> Lately, I've run across 3 AM stations playing such music. The first

Ann Arbor, Mich. has a really good adult-oriented alternative station, WAMX, AM 1290. From what I can discern, the station isn't doing well in terms of advertising revenue, but because they're the sister station of a very successful mainstream rock station (WIQB, 102.9 FM), even if they have mediocre ratings, the combo has to be doing better than when they were simulcasting the FM station on AM.

I really enjoy the station a lot. Their jocks are credible and have a good amount of knowledge about the music. I would best describe their format as "classic progressive," meaning that it's probably what the early progressive stations such as WBCN (Boston) and WABX (Detroit) would have evolved to, had they not given up their progressive formats.

A sample of WAMX's music:

Crash Test Dummies
Genesis
Kate Bush
The The
Traffic
Joan Armatrading
Bruce Cockburn
E
Tracy Chapman
Talking Heads
k.d. lang
Howard Jones
Linda Ronstadt

I think the station has a chance to become more successful commercially with the right kind of off-air promotions. Just as account executives have to convince potential advertisers that radio is an important part of the advertising mix--that the other forms of advertising alone are not enough--those in charge of promotions need to use other media to promote their stations.

For a city of 100,000+, Ann Arbor has diverse demographics, including a large student population--all of which means that there's no reason WAMX can't be highly successful. Personally, I hope the station will stick it out for the long term.

Funny you should mention WDJX-AM as I am here in Louavull :) and am a regular listener to that station... :) (BTW: they do play some local bands on that station) THe modern rock format is from 4pm-6am local time; the rest of the time, it simulcasts WDJX-FM 99.7 (an AC/dance station; wouldn't really call 'em top 40).

I'm rather suprised you heard it as far away as you did, as WDJX-AM is not a hyperstrong station...(It's only about 10 KW...) If you want the address for a QSL I'll be glad to send it to you.

Hmm...nrc.gov...are you in/around DC? Here in New York you can buy Broadcasting on the racks, but certainly not at supermarkets. You need to find a magazine specialty store, probably inside the beltway, preferably located near the networks' part of town.

BTW, I bought the Imus issue. The article was only about a page long, and didn't really say much at all. Unless you just want it for collectors/memorabilia value, I'd just pop down to the public library and read it.

Oh, and the picture on the cover was horrible, too...out-of-focus and amateuristic.

An update on the Ecuador radio story: According to Quito's "El Commercio" newspaper, on Friday, June 25 Radio Latacunga and Escuelas Radiofonicas de Ecuador were allowed back on the air. Escuelas Radiofonicas de Ecuador was warned not to broadcast inflammatory material. Sister Alma Montoya was released from custody. Also reported silenced earlier in the week was Radio Ingapirca, a Lutheran-operated station north of Cuenca. (R. Ingapirca was build with the help of HCJB engineers). No word on whether it is back on. There are unconfirmed reports that a fourth station was also forced off the air, and that one station in Quito was threatened with closure. --Ken MacHarg

Well, Old larry may have been a bit more subtle than Limbaugh, et
al; but his own opinions were pretty clear. He chose his guests to fit
his own preconceived ideas of good and bad and their treatment on the air
made it pretty clear where Larry stood. He was clever, but never lacked
an ego or the beleif that he had all the right opinions. As far as
callers go ,he'd let the loonies make fools of themselves, but if anyone
with a reasoned opinion in conflict with his own started to make points
he'd cut them off and make a nasty remark after they were hung up on.
Ever hear him deal with somone with dissenting views on Mid-East politics?

>soundproofing, and satellite dishes for network programming are in.

Let me second the idea in the previous thread of finding a
dark/struggling AM and taking it over for low $$$. (Maybe that's what
you're doing already -- tell us more.)

When KRCL got started back in about 1982 here in Salt Lake City, they got
a lot of support from commercial broadcasters and a lot of free gear --
it was used, castoff stuff, but it all pretty much worked. I helped to
train some of their people, and now they're a going concern. I suspect
they've even bought some new gear over the years. You probably have a
broadcasters association in the city you're working in -- that's the
group that can help.

To be blunt, having a non-profit community radio station around takes a
lot of pressure off local commercial broadcasters to do what they ought
to be doing anyway -- public service instead of another sumo wrestling
bar promotion. They'll be glad to help.

Since Jeff White does not have access to Usenet, I have taken many
of the articles and comments that have been made about WRMI in
'rec.radio.shortwave' and have e-mailed them to him.

Here is his response I received the other day.

gst

****************************** begin **********************************

From: Jeff White <71163.1735@CompuServe.COM>
To: George Thurman <gst@gagme.wwa.com>
Subject: WRMI

Hi George. Many thanks for passing on the comments about WRMI
reception from the bulletin board. They are indeed very interesting. One
thing I must remind North American listeners is that the antenna is beamed
160 degrees from Miami -- straight to Barranquilla, Colombia and Buenos
Aires, Argentina. So far (and I admit, it's still early) all of the
reports we've had from our primary target of Latin America have been
overall SINPO ratings of 4 and 5. So we believe the transmitter and
antenna are doing what they're designed to do. Whatever audience we have
in North America is sort-of "icing on the cake." Having said that, we've
had lots of overall ratings of 4 and 5 from North America, including
Canada. But reception off the back of the antenna may be quite variable.
As for jamming, we don't believe there has been any intentional
interference to WRMI yet, although it certainly could happen anytime. We
are aware of an occasional heterodyne, and splatter from the jammers on
9942 and 9965 kHz. But so far, it doesn't seem to be a major problem,
especially in Latin America.
I would certainly continue to welcome reports from listeners in North
America. Even though it isn't our primary target, we do consider North
America to be a significant secondary target. --Jeff

2340. Mysteries of Subaudible Tones

Newsgroup: rec.radio.broadcasting
Date: 1994-06-27 06:31:53 UTC
From: The Mighty Wimp <AET7350@ritvax.isc.rit.edu>
Message-ID: <2ulrop$k27@vixen.cso.uiuc.edu>
Source record: 39396

Here's another one...An AM station in my area, WAUD (1230 kHz) often inserts subaudible tones in between songs. The frequency of these tones is on the order of 20 Hz (or possibly lower), and they last about 1 second. Observation of the station's signal shows that the tones are sinusoidal and at a modulation level of 30-40%. The agc circuits in most receivers try to follow the tones, causing the volume to seem to fluctuate.
My questions are:
1) What is the purpose of such tones? I guess they could be used for remote control of the transmitter, but it's just too much of a coincidence that they occur only during transitions between program material. By the way, this station is not satellite fed.
2) How is the transmitter able to reproduce such low frequency tones? I'd imagine that it's not plate modulated, since that would mean that the modulation transformer must be rather massive.
3) On a somewhat unrelated matter, this station puts out a lot of splatter on nearby channels. Aren't the NRSC regulations limiting such spurious emissions in effect yet?

Message-ID: <2ulroq$k28@vixen.cso.uiuc.edu>
Source record: 39395

(Copyright, Pittsburgh Post-Gazette. Reprinted here
by permission. Republication prohibited in any medium.)

The KQV Newshounds, WAMO 106 Jammers, and WDVE
Diamond Dogs haven't quite cracked the minors yet,
but they'll go head to head in the ``Battle of
the Broadcasters'' Softball Classic, scheduled for
Sunday at Three Rivers Stadium.
The roster includes radio stations KQV-AM,
WAMO-FM, WBVP-AM, WBZZ-FM/WQKB-FM,
WDSY-FM/WXRB-FM/WEEP-AM, WDVE-FM and
WLTJ-FM/WRRK-FM, along with local TV stations KDKA,
WPTT, WPXI and WTAE, plus KBL.
The event, now in its second year, benefits the
Myasthenia Gravis Association of Western Pennsylvania.
Here's where the real competition comes in: the
station with the most fans in attendance gets a trophy.
The games will be from 9:30 a.m. to 5 p.m., rain
or shine. For ticket information, call 566-1545.

WTAE is adding a new local talk show - "Talk Back
with Jonas Chaney."
Chaney will focus on local issues and problems,
with a concentration on minority issues.The weekly
show airs Sundays from 5 to 7 a.m., starting this weekend.
Chaney is a familiar presence to local audiences.
He's a news anchor for Sheridan Broadcasting and
a former WPXI sportscaster.

Woodstock Two is right around the corner, and
WRRK will carry broadcasts from the upcoming
25th anniversary of the Woodstock festival
in upstate New York.
Coverage will include sound checks, backstage
reports and festival highlights, along with
live broadcasts from the concert itself.
After the event, the station will run recorded
performances from the festival.

A couple of radio stations will explore some
serious social issues with in-depth analysis
in the coming week.
WTAE-AM will look at the education system
in ``Pittsburgh's Blackboard Jungle.''
Dimitri Vassilaros will host the six-hour

program, which airs from noon to 6 p.m. on Sunday.
Individual segments will focus on topics
including outcome based education (OBE),
school taxpayers and school boards, and
teachers' unions
WDUQ-FM will air a four-part series on substance
abuse. The series starts Monday, airing from
7 to 8 p.m. during ``Jazz with Tony Mowod.''
Segments will look at what is being done about
the problem, and the legal and social issues
surrounding substance abuse. Thursday's final
segment is a live call-in show.
WDUQ will also run a one-hour documentary called
``Stonewall: Myth, Magic and Mobilization,''
which marks the 25th anniversary of the Stonewall
Rebellion in 1969, and traces the history of
the gay rights movement in America. It airs Monday at 3 p.m.

Paula Fuller, better known as ``Sgt. Paula Fuller,''
morning news person on WRRK, will be
doing the play-by-play announcing for the
Pittsburgh Phantoms games during the 1994 season.

The Amherst Saxophone Quartet will make a stop at
WQED-FM's studios tomorrow at 4 p.m. for an
interview and live performance on Ted Sohier's
``Afternoon Classics.'' The quartet's guest
appearance is in connection with the ongoing Summerfest
outdoor chamber concert series.
Highlights of the Amherst Summerfest performance will
air on WQED's ``Performance in Pittsburgh'' July 3
at 5 p.m. and July 7 at 10 p.m.

WWKS-FM's (The Force) Beach Blast, which was postponed
from an earlier date, has been rescheduled for this
Saturday at the I.C. Light Amphitheatre at
Station Square. The event runs from 3 p.m. to around
midnight, and will feature live music with Norris Reed
and the Cool Rollers (3:30 p.m.), Medicine Train (5 p.m.),
Raquel (7 p.m.) and Inside Out (8:45 p.m.), plus the
finals for the Force's ``Best Body in the 'Burgh''
competition. Admission is free.

2342. Re: WAJC, Indianapolis

>In article <2od5kt$ml0@vixen.cso.uiuc.edu>, richard@iglou.iglou.com
>(Richard Roderick) writes

>Has WAJC been sold or changed frequencies. I would appreciate any
>information on this situation.

Here's some more detailed information to add to Mr. Renken's recent reply to this inquiry:

WAJC (104.5 FM) was one of the very few non-commercial stations operating in the commercial FM band. Owned by Butler University, it broadcast (at least when I was at BU from 1971-1975) with 37,000 watts ERP (it was monophonic back then, but I think it subsequently added a stereo carrier) and broadcast from a transmission tower on the Butler campus adjacent to Hinkle Fieldhouse. The studios at that time were in a two-story cinderblock building under the tower (actually, there was a single control room, with an adjacent studio for news and public affairs broadcasts. The wire machine, Coke machine and transmitter were located in the basement.

After I left, commercial station WIBC-AM donated its studio space on Meridian Street for WAJC's use... I'm not sure if the transmission site or power changed when the move was made.

Last year, Butler's board of trustees approved the University's recommendation to sell WAJC to Radio Indianapolis, Inc, a subsidiary of Susquahanna Radio Corp of York, Pa. That company also owns Indianapolis station WFMS (95.5FM). According to a letter addressed to Radio-Television Alumni from Butler president Geoffrey Bannister, the funds of the sale (payable over a five-year period) will be used to benefit students, academic programs, and the wider community of arts and cultural organizations affiliated with the University.

The letter from president Bannister said that the sale was made in part because "the future lies in television and in digital and multi-track production technologies." Bannister pointed out that Butler had purchased full-power UHF television station WBTU, run by students, which will be seen on a number of local cable TV systems. Funds from the WAJC sale would be used to improve facilities at WBTU, including a remote broadcast van.

I haven't visited Indianapolis in more than a decade, so I can't tell you
about programming at the new station.... but for a WAJC
alum, it's kinda sad to think about it.

Anthony Hodgetts 242-9775 (hodgetta@cuug.ab.ca) wrote:

: Hello all, Charles Addler I think that's right, used to be here in
: Calgary for a while a few years or so back, then he went off to Toronto
: Ontario and well from what I heard he was then doing a afternoon slot on
: a Fla. radio talk network. Any of you know if 1. He is still in the
: business?

Adler left Candada for America and a "national" talk show via the Sun radio network. I put national in quotes because Sun is a small network that carries programs on small AM stations across the country.

Here in Florida, he was carried on only two stations, WPSL in Port St. Lucie and WBZT in West Palm Beach. A friend who writes a radio/tv newspaper column told me that WPSL reported that Adler was in Port St. Lucie one day and called the station from a 7-11. He was in town and had nothing better to do than stop by the station.

He appearently left Sun to work for a station in Boston. Sorry, but I don't have more details. If you're really interested, e-mail me at mikedow@gate.net. I'll make a few phone calls for you.

In my opinion, he was the ++worst++ talk show host I've ever heard. Rush Limbaugh without the talent. I envisioned a slogon: "All the Hate, none of the ability. I'm don't agree with Rush, but as a former tralk show host I take my hat off to him. He's the very best at what he does. Adler did a terrible job. On Sun, he sounded small minded and uninformed. He used the same self serving hype as Rush ("...talent on loan from god), but couldn't back it up with substance. Listening to his program was painful.

What was he like in Canada? He described himself as "the number one conservative talk show host in Canada." He added "Weh I left, my employers and many listeners wept. For the voice of truth and reason and left for the United States."

I wonder how you respond to that quote.

I live in Philadelphia and recently travelled to Pittsburgh, and in my travels throughout the Pittsburgh area, I found out about a station on the AM with the call-letters WZGO...funny thing is - these used to be the calls of one of our old top 40 stations here in Philly (106.1 WZGO - "Z106")! I thought it was an interesting thing that most people wouldn't have noticed. Now, I think -- I wonder where some other old call-letters have gone? Such as:

WIFI (formerly (I think) a top 40 station here in the '70s at 92.5 FM)
WKSZ (formerly "Kiss 100" (100.3 FM) here)
WEAZ (formerly "Eazy 101" here)
WSNI (formerly "Sunny 104.5" here)
WWSH ("Wish 106" back in the late '70s-early '80s)
WTRK ("Electric 106" for about 6 months in 1984)
WEGX ("Eagle 106" up until 15 months ago)

Has anybody come across these where they live or have travelled?

In a previous article, tbohr1@ed8751.pto.ford.com (Tim BohrR)) says:

>I was just wondering if anyone knew any major changes that WXYT-AM 1270 in
>Detroit might undergo due to ownership changes.
>They've been family owned for a long time, and recently the station
>was sold in a package deal between the Fritz family and Trinity
>broadcasting.

They were actually sold to Infinity Broadcasting, the largest group
owner in the country. I wouldn't look for MAJOR changes, since they
wouldn't disrupt something that's working well, but whenever ownership
changes, there are usually other changes that take place.

My best advice is: Stay tuned!

If they stay true to form, Trinity will replace the current programming with paid religious programs. I worked at a commercial shortwave station in Utah just before they bought it, and they immediately changed the format (not that we had any listeners anyway -- anybody remember KUSW?) to put on this low-overhead, high-profit format. Can't say I blame 'em.

I believe that's where she is as I write this.

> Boy, that sure didn't last. BTW, has a permanent replacement for
> Tom Leykis at WRKO ever been found, or is that columnist from New
> Hampshire still doing it on a temporary basis?
>

* Mark Jurkowitz,(Boston Phoenix columnist), was very unimpressive
in a 10am-2pm slot vacated by Leykis in early March. WRKO AM 680 programmers
played a little deja vu with its listeners 2 weeks ago -- they brought in
WOR's(NYC) George Burns for a week to do his old show. Burns did a local
10am-2pm slot and then hosted syndicated 3-6pm show for his WOR network.
That must've been pretty exhauting....

Last week(and so far this week,it's only Monday) WRKO went with
Jeanine Graff, an ultra right-wing weekend/fill-in talkshow hostess who
has a full-time job on a religious outlet WEZE 1260AM.

Victoria Jones simply didn't work out with her unfriendly style.
In a way, I also felt bad for her because she came in as a no-name
trying to fill a huge void created by Burns' departure...Considering
how much trouble(mostly for publicity) WRKO had to go through to get her
out of Detroit, she certainly wasn't worth the hassle....

* In a big surprise, Infinity announced last week that it signed its
long-time WBCN-104.1 morning host, Charles Laquidara, to a 6-year contract.
That, however, doesn't mean that Charles will be doing mornings for the
next 6 years on the Rock of Boston. It's very possible that Charles
will turn up on a sister CR outlet WZLX-100.7FM in a non-too-distant
future...

Rumors were circulating that Laquidara wasn't going to get a big deal
from Infinity after his current deal expired in September and that
he might even seek other offers from different Boston stations. But,
Infinity rewarded Laquidara for his name(most recognized New England
radio personality according to some dopey survey) and longevity on
the Boston air...

* Also on WBCN, after 8-month absence which was mostly spent in Colorado
WBCN rascal personality Patric Murray is back hosting weekend shows and

doing fill-in work...It's still unknown whether he'll re-join Laquidara as a sidekick on a Big Mattress...

* ARS' Hot AC WBMX-98.5FM, which will have a top spot in the AC battle when Spring Arbitrons are released in the next 2 weeks, inked its long-time morning man Joe Martelle to a 2-year deal...

* 'BMX's main crosstown rival Greater Media's AC WMJX-106.7FM is having a little trouble deciding on its AM-drive personality after Tom Bergeron quit in late April to take the job with FOX's new fX cable channel. After auditioning a half-dozen canditates in the last 2 months, last week they even air-auditioned the person they fired when they had to make room for Bergeron -- John Kosian...

* Merilee Kelly who was an assitant program director at Progressive WBOS-92.9FM for four years has left the station to become a program director at an LA station which is about change formats...Jim Herron, 'BOS's program will run the ship by himself without an assistant... Merilee was also doing a 7p-12a show on WBOS. Her permanent replacement hasn't been named yet....

* Pyramid acquired Churban WJMN-94.5FM from Ardman on June 1st. Initially, there was some house-cleaning/defections in the sales, programming depts. Last week it was on-air staff's turn. Casualties(no big shockers there) :

Stand-up comic Chris Zito - he was an unfunny sidekick on J.R Edwards' morning show. (J.R.'s hours are now 5:30-10 -- expanded from 5:30-9).

Midday(11-3) personality Karen 'The Madame' Blake -- Karen worked at practically every station in town.(that statistic kind helped her with a successful DJ business she's running :-) She joined 94.5 a few years back when that station(then WZOU) raided rival Pyramid's powerhouse CHR KISS-108FM for on-air and off-air talent. KISS even stopped her from using 'The Madame' nickname by claiming that it was their property... Now that 94.5 and 107.9 have the same boss, Richie Balsbaugh, who happens to have a long memory, Blake saw the writing on the wall...

To replace Blake, Pyramid brought 'Lady D' Diana Steele who was 'fired' from her 10pm-2am slot at KISS-108 about 2 months ago... Steele is on from 10-3...I think she's doing it on a temporary basis for the summer(this probably will be one of the shortest gigs in her radio career....I'll elaborate below)

PM Drive(3-7pm) Dallas Kincaid was also cut...Dallas came back to Boston from North Carolina market about a year ago...In the early-to -mid-80's he was a popular night-time personality on 'Hit 103' WHTT-103.3FM(now WODS-FM) which was battling KISS 108FM at the time...Hit 103 burnt out and Dallas left...Weekender/fill-in Bill O'Brien is currently doing Kincaid's show until permanent replacement is found..

At night, Marc Clark still has his 7-12a show...

* Speaking of Pyramid : I think I finally figured out what's gonna happen in the next 3 months(it's only my theory) :

It's obvious they're not doing anything major with 94.5. I don't think that's the priority right now. They fired whoever they had to fire, they filled some holes, added a KISS-like bumper sticker summer promotion (they spot 94.5 sticker on your car, you win 94 bucks) and that's enough for now...

It seems that they're currently fiddling more with their powerhouse WXKS-107.9FM. That's done for a reason,IMHO. It's nothing to do KISS but what will eventually take place with Jam'n 94.5.

If you tune in to KISS 108 you'll hear more Top 40 pop/rock acts like Counting Crows, Spin Doctors, Stone Temple Pilotsis on their playlist than ever before which is no doubt must alienate their hardcore listeners who prefer more dance-driven Top 40 Churban tunes...I think they're trying to force that crowd to sample 94.5...Meanwhile, they'll try to attract some of 18-34 Top40 crowd which listens to 'FNX and college radio for AP dance music to tune in to KISS 108...

Around September when 250,000 college kids are back in town, they'll finally pull the plug on Churban Jam'n 94.5 and replace it with the Top 40 AP Edge 94.5(or something in that neighborhood)...The dance crowd will run back the dial to KISS-108 for more Salt'n'Peppa, Janet Jackson while hipper college crowd tunes into 94.5 for Soundgarden, Pearl Jam, Counting Crows, Spin Doctors,etc...At that point, KISS 108 will again become heavy on Top40 dance tunes and more disco classics...

I just don't see Pyramid having *2* similiar formats(Billboard lists both Jamn' 94.5 and KISS108 as CHR outlets while daytimer WILD 1090 AM is Boston's only true Churban station) for a long stretch...I think 3 months is long enough of a period to reposition the audience...

* Imus was in town doing his show from WEEI 590AM studios for a couple of days last week...With an exception of his gorgeous 18-year old bride, he was hardly noticed....

* Speaking of WEEI, the only news person who was left over from pre-sports radio days when that station had an all-news format was finally cut 3 weeks ago...Bob Ames who held 6am-10am news position was let go in favor of cheaper customized Metro Traffic news updates anchored by Jeff Brown...Ames has resurfaced at WBZ-1030AM on weekends...Since WEEI's change from all-news to all-sports almost 3 years ago(9/91), many members of its newstaff have joined WBZ NewsRadio....

-Mark

2351. RadioWatch-Buffalo/Toronto(6/21)

Newsgroup: rec.radio.broadcasting
Date: 1994-06-28 07:41:01 UTC

Tons of stuff to get to:

*First,Sean Healy at the Univ.of Guelph(Ont.)sent me the Toronto BBMs(Bureau of Broadcast Measurement)ratings;I can assume it's the spring book. These are only 12+-alas.

Stn./freq. Format/positioner Share
---
1 CFRB(1010) News/talk;Argos(CFL)(The Source) 12.5
2 CHFI(98.1) Soft adult contemporary(CHFI FM 98) 12.1
3 CHUM(104.5) Hot adult contemporary(104.5chumfm) 7.6
4 CISS(92.5) New country(92.5 CISS FM) 5.6
5 CHUM(1050) Oldies(1050chum) 5.5
6 CBL(740) CBC;news/talk/various 5.3
7 CILQ(107.1) Album rock(Q107) 5.1
8 CKFM(99.9) Adult contemp./mix(Mix 99.9) 4.9
9 CJCL(1430) Sports;Jays/Leafs(The Fan 1430) 4.5
10 CHOG(640) Contemporary hits/talk(AM 640) 4.4

Also listed:
-CFNY(102.1) Modern rock(The Leading Edge) 3.0
-CFTR(680) News(680 News) 1.9
-CKYC(590) Country(Country 59) 1.9

Among the losers(just relaying what he told me):
-Mix 99.9(fell to 8th from 4th last Nov.)
-Q107(which had been at 6.7 last summer,but dropping since)
-Z 97.3(CJEZ-FM)(dropped almost 2 share points since going to a classic hits format)

*Back stateside:Colleen Brannigan,formerly at WBUF-FM(when it was known for a while as Mix 92.9 as part of its morning team)has returned to western N.Y. She joined Rochester's WVOR(Variety 100.5) as half of that AM drive team(the other half being Jennifer Michaels). Just wondering:With the number of ex-Buffalo radio personalities (Chuck Lakefield at WKLX,newsman Dave McKinley at WHAM,Trevor Joe Lennon at WMAX and Bob Smith at WXXI)in the Flower City,shouldn't we call Rochester "Buffalo East"?

*CJXY-FM(Classic Rock Y95,Hamilton)has wrapped up their 2nd annual Future Classics contest. There were only 4 finalists this year,compared to 5 last year. They were:the Brian James Duffy Band,Threshold,Roadside Attraction(finalist in '93)and-the winners-the Redeemers,who get $25,000 in prizes($10,000 in cash,a recording session,new music equipment and a music video among them). The competition aired-as a special-on CHCH-TV (ch.11-indep.)last Saturday. A CD is available of the finalists(wire me

offnet,and I can give you the details).

*How stupid is the talk you hear these days? Two examples:
-(from Business First's Fifth Coast column):While chatting with WKBW-TV weather anchor Linda Pellegrino last Wed.,WGR morning driver Tom Bauerle said,"If you live in the 'burbs and haven't been downtown in a while,don't leave any(loose change)in your car." He went on to inform listeners that "crackheads" have been known to smash in car windshields to "take 75 cents",adding that in the Allentown section(where 'GR's studios are located)that "if it ain't nailed down,it'll be stolen." Its rejoinder:"Apparently the thieves overlooked Bauerle's penchant for hyperbole." My rejoinder(from Beavis & Butthead),"What are you,a dumbass?"
-In re O.J.Simpson:3 stations were talking about what had happened on Friday. WBEN's Dave May and CFRB's Andy Barrie,during the time I listened(in Barrie's case,it was only 1 30-minute segment),they were calm and rational. Now,as for WGR's Rich Michaels,he was acting as if O.J. had already been convicted,saying-for want of a better phrase-"fry him." Two things:If Rich were judging this case,both sides would want him to excuse himself from the case due to his predjudices. 2.The best response comes from syndicated talker Alan Colmes:"I see-the jury's in."

*About the calls and what they stood for:WEBR stood for We Earn Buffalo's Respect(found that out while reading on the changes last year).
(>:>-devilish humor mode on)
How about some of these calls:
-WGR could stand for We're Gross(or Grandstanding)Radio(for the way it is these days)
-Chicago's WLS(if you're a Beavis & Butthead fan)could stand for We,Like,Suck.
(devilish mode off)

*Try some of these E-slips for size(all this weekend)
-95.5-CJOJ(Belleville,Ont.)!-hot A/C
-92.3-WZJM(Cleveland)-CHR
-94.9-WQMX(Medina/Akron)-country
-99.1-WFRO(Fremont,Ohio)-hot A/C
-95.5-????(played classical)

To Bob Smith:
-Re Rich Michaels:I'm trying to find out how much-if any-impact he's having in the ratings. I wired Tom Schuh at WHTT-FM to see if he could help-no response to date. (I'd like to see the same impact-or lack of same-in the books that NPR stations get.)

*About 3-letter station calls:For a while,when WGRF(97 Rock)returned to its classic rock format,it was known as WGR-FM,due to another station having WGRQ(currently,it's licensed to a station in Colonial Beach,Va.).

: our old top 40 stations here in Philly (106.1 WZGO - "Z106")! I thought it
: was an interesting thing that most people wouldn't have noticed. Now, I
: think -- I wonder where some other old call-letters have gone? Such as:

: WIFI (formerly (I think) a top 40 station here in the '70s at 92.5 FM)
: WKSZ (formerly "Kiss 100" (100.3 FM) here)
: WEAZ (formerly "Eazy 101" here)
: WSNI (formerly "Sunny 104.5" here)
: WWSH ("Wish 106" back in the late '70s-early '80s)
: WTRK ("Electric 106" for about 6 months in 1984)
: WEGX ("Eagle 106" up until 15 months ago)

: Has anybody come across these where they live or have travelled?

I can tell you that WIFI travelled to Kane, Pa. around 1987-1988 but
that station has since changed its call letters to something

different.

First let me say that I enjoy about 75 percent of the stuff in Airwaves. Even the postings by non-professional broadcasters. I do however look at the table of contents at the head of each issue and if there is nothing that interests me I delete the issue unread. What is an annouance to me is when the articles that I want to read are at the end of the issue and I have to page through the entire thing to get to them. One possible alternative would be to place the items of intrest to professional at the first of the issue and the ones that are less interesting at the end. That way people in the biz can read what they want and then dump the reast of the issue.

I work for the company that syndicates King, Leykis, Buchannon, Bohannon and just about everything else but Rush, so some of the postings from non-proffesionals are of interest to me and I would hate to loose them. I also will occasionally answer one of their questions.

Just a suggestion that may save some time and piss off fewer people.

2352. Radio Watchers - Cleveland

Newsgroup: rec.radio.broadcasting
Date: 1994-06-28 07:41:02 UTC
From: ai629@cleveland.Freenet.Edu
Message-ID: <2uok6e$fdh@vixen.cso.uiuc.edu>
Source record: 39307

Cleveland Radio Watchers for the Week of June 27, 1994
by Frank L. Macek

- THE CASE OF THE CUT WIRES -

No word yet on rather the management of WMMS-FM/100.7 had anything to do with the recent Howard Stern wiring cutting incident during his recent visit to Cleveland.

Police arrested Bill Alford, a 30 year old part-time engineer for WMMS, who allegedly severed the cables leading to the satellite used by Stern the morning of the broadcast, heard locally over and sponsored that day by classic rocker WNCX-FM/98.5 from Tiffany's Cabaret.

Stern was in town that day to celebrate his morning show rating's victory over John Lanigan at WMJI-FM/105.7

WMMS' management denied any knowledge of the act which could jeopardize their license should the FCC determine otherwise.

- THE BRIAN AND JOE RADIO SHOW -

Any day now, the Brian and Joe Radio Show is expected to show up as the brand new WMMS-FM/107.9 Morning Zoo team.

July 12 will mark the end of their current contract which wasn't renewed with WENZ-FM/107.9. However, the pair has a 90 day non-compete clause which may make this rather interesting since WMMS lawyers are supposedly trying to find the loopholes.

- WDOK NAMES NEW MIDDAY PERSONALITY -

Soft Favorites, WDOK-FM/102.1 FM, has replaced long-time midday personality Ted Alexander with Rob Schuler, the booth announcer for WVIZ-TV/25 effective June 20th.

Ted, who is Chief Engineer for the station, will retain that position.

Ailing midday ratings was the cause.

Rumor has it that WDOK will be repositioning itself soon taking a much harder, more mainstream AC approach.

- G. GORDON LIDDY HAS RETURNED -

WERE-AM/1300 has picked up G. Gordon after WHK-AM/1420 dropped him two months ago when it switched to an all sports talk format.

The show can now be heard weekdays from 11 am to 3 pm.

WERE has also picked up three other syndicated gabbers including The Don and Mike Show (3-6 pm), L.A. liberal Tom Leykis (6-9 pm), and Stan Major (1-5 am).

azer@garnet.msen.com (Charles R. Azer) writes:

>Ann Arbor, Mich. has a really good adult-oriented alternative station,
>WAMX, AM 1290.

Is it just me, or has this set of calls really bounced around for the last few years? WAMX used to be a great AOR FM station in Huntington, WV...all the greater for the fact that market could support an AOR at all. (This was a long time ago, since they called themselves "94 WAMX" when the station is at 93.7.) Then in the early 80s they adopted a format-of-the-week, most of them bad: all oldies, MOR, oldies MOR, lite rock, on and on. About a year into the lurch they dropped WAMX for WRVC (and their sister station dropped a 60-year-old set of calls, WGNT, for WTKZ). Two great stations annihilated, a big part of the reason I moved to New York. :)

Just rambling,

Aaron

In #664, Bob Smith in Rochester asks:

> One thing I've often wondered...what are the rules (if any) for
> on-air station ID's on Canadian broadcast stations?

Bob.. As someone who worked in (Western) Canadian radio for more than
15 years, I was never aware of any "legal I-D" requirements as per
the FCC-mandated top of the hour call letters-location format that's
in effect in the U.S.
Only one station I worked at ever did anything like it.. that was
CKCK (620 am) in Regina, Saskatchewan, where we ran an "ownership i-d"
at 11:59:30, 17:59:30, and 23:59:30 every day.
I once asked the Program Director about this, because it seemed
somewhat of an anomaly to me after more than 10 years in the industry
where I'd never run into it before. He said that the I-D's were now
a force of habit.. borne out of years of doing this. Apparently, there
may have been was a legal requirement at one point, but it was dropped in
the '50's or '60's sometime.

L Maybe someone in Canada has a better answer.. I don't know..

2356. Question About Talk Show Audience Breakdown?

Newsgroup: rec.radio.broadcasting
Date: 1994-06-28 07:41:10 UTC
From: Robert J Halprin <0005582789@mcimail.com>
Message-ID: <2uok6m$fdq@vixen.cso.uiuc.edu>
Source record: 39311

I've been following the thread on the conservative talk radio
hosts with some interest, and have been tempted to put in
my two cents worth as a outsider/observer of this medium.
In the meantime, however, was wondering what are the
key audience demographics that programmers seek or what
produce adequate (or better) ratings? Age, income, gender,
profession, education, geographical location, other?
And what are specifics in these categories that the
industry deems desirable (i.e., males 25-54 or?).
Thanks.

2357. Ch. 6 Audio (Was RE: DX on 6/21)

Newsgroup: rec.radio.broadcasting

From: JOHN SCHMIDT <schmidt@auvax1.adelphi.edu>
Message-ID: <2uok6m$fdp@vixen.cso.uiuc.edu>
Source record: 39312

Channel 6 audio is at 87.75 MHz. The aural transmitter is .25 MHz below the top of the 6 Mhz TV channel. See FCC 73.699 Figure 5, also 73.603

Channel 6 is 82-88 MHz, so the aural transmitter carrier is at 87.75

Most receivers have a wide enough IF that, in the absence of an interfering signal, you could easily receive the signal mistuned by 150 KHz. Here, the Hatian pirates broadcast on 87.9, so you have to tune to 87.7 (the lowest my car radio (honda factory model) goes to) to get channel 6.

I agree but only to a point. Conservatives, generally, are tired of
hearing themselves get skewered every time they turn on network TV.
Yet they hold a lot of consumer dollars that (IMHO) are largely untapped
in that medium. When they hear someone like Rush, WHETHER OR NOT THEY
WORSHIP HIM, they will gravitate to him just because he's not nearly
as offensive to them as the rest of the broadcast spectrum.

Sorry Charles, but John is correct. Ch. 6 audio is 87.75 MHz, with possible
up or downshift of 10 KHz to avoid interference, making it 87.74 or 87.76 MHz.
Your car radio picks it up on 87.9 because either 1) the AFC is tracking
the signal, or 2) the IF bandwidth is wide enough to allow at carrier
125 KHz off into the IF strip. This is probable, since most FM receivers
have a 250 KHz IF bandwidth or so.

According to the Miami TV station which we get on Cable here in Ecuador, Harry Carey passed out while on his way to broadcast a Cubs game in Miami last week. He was taken to the hospital and treated for cuts and bruises suffered when he fell. He was awake and alert, and was to be held for a day or two for observation. I haven't heard any more over the weekend. --Ken MacHarg.

I hope Emmis goes in to WIBC AM 1070 and changes that terrible format that they have now. That was the worst mistake for WIBC and the city of Indianapolis. I can't believe that even happened. Their ratings have gone down the drain because of this.

I also can't believe WNDE has gone all talk. They used to be a very popular music station when I was there and did quite well in the ratings. What are these stations thinking of by changing formats. Whatever happened to "if it ain't broke, don't fix it?"

Now in Virginia, but always a hoosier!

2362. AM reception and laser printers

Newsgroup: rec.radio.broadcasting
Date: 1994-06-28 07:41:24 UTC
From: rspencer@netcom.com
Message-ID: <2uok74$fe0@vixen.cso.uiuc.edu>
Source record: 39317

Since I moved to a new location several months ago, I have noticed that radio reception is distinctly worse in the little pocket I live in than is typical for the area in general. I can barely tune in KMPC 710 at night, for example, for the signal is almost completely overcome by static. When I turn on my laser printer, however, the static disappears almost completely, and the station comes in normally. Does anyone have an explanation for this?

: N> Isn't it odd that there is no "San Diego north" County in CA.
: N>
: prm@cbnewsl.att.com writes:
: N> It's one of these markets Arbitron made up, and M Street follows
: N> suit. Oneof those markets within another market. The towns M Street
: N> lists are Oceanside/Escondido/Carlsbad, which are on the coast in the
: N> same county as San Diego (San Diego county).
: I doubt that Arbitron "made up" the name North County San Diego. Two
: examples to the contrary:
: a. Pacific Bell has a separate phone book for the region, named (surprise)
: "San Diego North County"
: b. There is a bus operator in the area called "North County Transit
: District", totally separate from the "San Diego Transit" operating in the
: city of San Diego and environs.
: I'm sure there are other examples. . . .

Another probable reason it's a separate market is that LA/Orange
County stations are easier to pick up than down in San Diego, sp the
local stations compete with both San Diego and LA/OC stations. And many San
Diego AM stations are almost impossible to hear at night. For example,
KCBQ 1170 kHz, is wiped out by KLOK in San Jose, and KSDO 1130 is
buried in noise. KSON 1240 is also difficult to pick up, and KPOP 1360
is quite often buried by KNNS in Glendale, AZ. On the FM side, some
SD stations are quite weak in North County. There's a stretch of I15 in
northern San Diego City (between Rancho Bernardo Road and Lake Hodges)
that's a radio wasteland. KBNN 100.1 from Julian comes in great, but
many other stations (SD and LA/OC) are very weak.

Finally, growing up in San Diego, "North County" seemed like a different
planet. I think the North County-ans like to differentiate themselves
from South County types.....

Those tones are used by the station's automation system to trip over
the next event (EOM cue). Usually the stations filter them out;
occasionally the $5 circuit to do that is not in the budget ...

Source record: 39321

To the person who asked about tones between each piece of music on a local station, back when we ran the old FM-100 format at WXVW in Jeffersonville/Louisville, we could at times hear the automation activation tones between each piece of music. They served to activate the next function, which in our case at that time was another tape deck. I have some tapes of that music and can still hear the tones on my stereo if I listen closely. I suspect the station in question is playing its own format (as opposed to satellite) and you are hearing the tones which switch the automation from one function to the next.
Here at HCJB we add a tone to the end of the English Language newscast which YOU hear on shortwave at 8:30 P.M. EDT because that same newscast goes out on our Spanish Language FM station at 8:50 P.M. The tone is used to activate the automation system here and avoid a long pause until the timing system senses silence and automatically kicks in. Some times you can hear that tone on the FM station. I doubt you would hear it on shortwave because we time it to occur after the automation has already taken that tape off of the air. The automation on our shortwave is very time conscious--for example after the scheduled 9 minute of news it takes you out whether you are ready or not! --Ken MacHarg

Sounds like the automation system they're using is not stripping the tones
before they go over the air. These 20 Hz tones are stuck onto the ends of
songs to tell the brain to start the next event, such as a song, spot, ID,
or time machine. Where tighter control is wanted (such as in rock
formats) the tones are put in just a little ahead of the end of the song.
In slower (such as beautiful music) formats they're put in right at the
end. Sounds like they have an old IGM or Schafer system out there.

: 2) How is the transmitter able to reproduce such low frequency tones?

Transmitters can pass 20Hz easily. You're just not used to "hearing" them.

2369. RE: Subaudible Tones

Newsgroup: rec.radio.broadcasting
Date: 1994-06-28 07:41:33 UTC
From: Don Mansfield <dmansfie@cap.gwu.edu>
Message-ID: <2uok7d$fed@vixen.cso.uiuc.edu>
Source record: 39324

Those tones you are hearing are 25 Hz cue tones recorded on the tapes containing the stations music. They are there to signal the automation system that the event (in this and most cases a musical selection) and to start whatever is programmed next. At the end of the tone the tape machine stops and is cued and ready to play the next selection. Since they don't have separate cue tracks, open reel machines have these cueing tones on the program tracks...but they are supposed to be subaudible and then filtered out before they hit the transmitter. You are more than likely not hearing the tones but intermod products when the tone mixes with other audio (like tape hiss).

Some stations do use subaudible tones to control the transmitter but this is rare. More (but not allot more) use subaudible tones to control electrical loads for the power company.

Subaudible tones are used by some satellite services for controling switching of the stations automation but the better services (IMHO) use a separate cue channel to do this. That way they can do more clever things for the affiliates (control which liners play where over the music, trigger a time announces, etc) and it does not degrade the program quality.

Hope this answers your question.

In article <2ulrpa$k2i@vixen.cso.uiuc.edu>, dannyb@xmission.com (Dan Bammes) writes:

(what will happen to WXYT)

That's not Trinity, but Infinity Broadcasting...the folks who are about as far from Jesus radio as you can get, since they syndicate Howard Stern. But I doubt they'll put Stern on in morning drive, because their current morning show with Denny McLain is a consistent winner with top-5 rankings in all the desirable demographics and in 12+. (I'm familiar with the Detroit market from some personal contacts and from having spent a LOT of time in Motown on business in recent years.) There have been repeated reports from reliable sources, however, that Rush Limbaugh's days there are numbered for two reasons; 1) failure to generate revenue commensurate with expectations, and 2) the syndicator's demands for a MONSTER carriage fee relative to the show's ratings and revenue. 'XYT management is said to feel that they can probably do better on the bottom line with a strong local host or another syndicated show. Given that WJR's now beating Limbaugh 12+, it's not likely they will pick him up (especially after the negative reaction other recent Rush converts like KMOX are facing). So, will Rush swallow his pride and his money demands and stay on 'XYT, or will he be gone from Detroit this summer---maybe to be replaced by Stern in that early afternoon daypart? Or , if WWWW/1130 hasn't got him already,maybe Don Imus, another member of the Infinity stable who's likely to be just as appealing to Detroiters in that daypart and much less troublesome to the FCC? If I were in WXYT OM Michael Packer's shoes, I'd try to develop a new local star knowing that no one else with a decent signal is likely to pick up Limbaugh and throw him against me. That would give 'XYT the best chance for a long term payoff in both ratings and local agency spot billing. (This is doubly true given the poor performance of most of the syndicated product out there in recent Arbitrons.) But Packer may not make the final call on that. Stay tuned....

> So much for retiring to Florida...

It's still very possible that Charles could be collecting a paycheck by
sitting around in a retirement home in Florida and be off the air in Boston...:-)
About 6-7 years ago a Boston radio legend Jess Cain got a fat chunk of
change(around 6-figure a year deal) from NewEngland Television Corp. just to get
off WHDH 850 AM airwaves and not be heard on any other Boston market station....
They gave Cain a title of 'special advisor'. Chuck could end up in the same
capacity with WBCN down the road....
In Laquidara's case, his name is an asset to any station. If he'd go work
for another AOR outlet,say WCGY, a good number of his WBCN listeners would
follow as well...

* Other News : Country music station war is getting nastier. Greater Media's
WBCS-96.9FM fired its PD Jim Murphy on Monday(6/27). Murphy came to
'BCS from ABC Satellite Network in Dallas last May. During his tenure
'BCS('Boston Country Station) trailed Fairbanks' WCLB 105.7FM(Hot New Country)
in every ratings period by a 2-1 margin. 'BCS's GM Peter Smyth raided
'CLB for a new PD. Boston radio vet Harry Nelson(most memorable for his
work at WCOZ and WROR) who was doing overnights on 'CLB is now 'BCS new
person in charge. 'BCS is expected to adopt 'CLB's 'hot country' style
and directly challenge WCLB in a head to head battle. Up until now
WBCS' was mostly 'classic country+western'....

* I forgot to mention in my last post that Pyramid in last week's
housecleaning at newly acquired Churban WJMN 94.5FM had also let go
asst. MD Erik Anderson who held 9am-11am show....

* WEEI SportsRadio 590 has adjusted its station clock as of yesterday(6/27).
It is now airing Metro Traffic Network customized local news updates(including
traffic and weather) at 4-5 minutes before the top of the hour. Top and bottom
of the hour is now filled by sportsnews updates by 'EEI anchors(Dale
Arnold, Craig Mustard and Ted Sarandis). Sarandis' evening shift has become cut
by an hour(7-10 now)

Here's new weekday schedule :

5:30am-10am Imus(local sports updates by Dale Arnold)
10am-1pm Dale Arnold
1pm-3pm Craig Mustard

3pm-7pm Eddie Andelman(sports updates by Craig Mustard)
7pm-10pm Ted Sardandis
10pm-1am syndicated 'SportsLine with Ron Barr' out of S.F.
1am-5:30 various Las Vegas-based syndicated sports talk shows

Message-ID: <2uqsh2$3m3@vixen.cso.uiuc.edu>
Source record: 39329

WTLB (1310 Utica 5KW/500w OLD) and WRCK (107.3 Utica 50KW CHR) are being bought by the Radio Corporation (they own WKLL 94.9 Frankfort 50KW AOR, WKRL-AM 1200 N. Syracuse 1KW AOR, WKRL-FM 100.9 N. Syracuse 3KW [CP 6KW] AOR and have a purchase pending with WTKW 99.5 Bridgeport 2.8KW [CP 5.7KW] Classic Rock). WRCK went immediately to Classic Rock. [Must have just missed it-was still CHR 6/12]. I suspect it may be simulcasting WTKW. No indication if there will be a format change for WTLB, or for WRCK once the sale goes through.
*** What is really on the air? ***

WYUT (92.7 Herkimer 3KW) is back on the air. I heard test patterns when I was in town 6/12. They have a Westwood 1 Oldies format w/Imus talk. They have an Construction Permit to raise the antenna about 600 feet. Must be moving the antenna site. WYUT-AM (1420 Herkimer 1KWD) is scheduled to return to the air in July [format TBA].
*** How is the signal? ***

WUUU (93.5 Remsen 3KW [CP 6KW] JSN Easy Listening/Light Jazz) is getting quite a following from people I have talked to. The one negative, and it is a BIG one, is that the signal is pretty bad, esp. in North Utica. They are supposed to bump their power, that would go a long way to help the ratings.

Here we go again with another religious translator station. The Foursquare Gospel Church has been granted 50 watts on 99.7 for station W259AC-99.7. They will be rebroadcasting WJIV (101.9 Cherry Valley 8.9KW). I mentioned a few months ago that Faith Broadcasting, owner of KILA (90.5 Las Vegas 100KW), was granted 6 watts on 88.5 in East Utica. Anyone hear if it is on the air yet? It wasn't 6/12.

WEIV (Construction Permit for 100.7 Utica 1.2KW) has changed call letters to WVVC. No news as to when it will be on the air.

>It's a question of where the power is going. Is it going into the main
>signal or into a subchannel? Also, and it is *big* problem, is multipath.

Just a quick correction here. SCAs and other subcarriers do not divert
power away from the main program, they divert _bandwidth_ - or modulation
capability. Turning off the subcarrier will not make the station reach any-
where it was not going in the first place, and will not increase loudness
either - unless the injection level of the main program is increased by
the amount formerly taken up by the subcarrier.

Incidently, the best subcarrier to remove in order to improve performance
in a multipath-prone area such as SF is the _stereo_ subcarrier. 90% or
more of KQED's programming is mono, yet they never turn off the stereo
subcarrier/pilot - which would allow them to increase their main channel
modulation & would drastically reduce multipath. I think that KALW does
do this. I know that KUSP down here in Santa Cruz turns off the stereo
during their NPR programming.

Just a couple of reports of id use from Ottawa.

CFRA - the news-talk station - must give its id and frequency every five minutes; it certainly gives a whole station plug for its format that often. But I don't think it gives an 'official' announcement at the hour or half hour.

CIWW - Oldies 1310 - never uses CIWW EXCEPT at the top of the hour and I think it uses it every hour just before the news. I never understood why the calls for this station were changed from CKOY which it had carried for a long time. Its FM partner is CKBY - a country station - and it is owned by Key Broadcasting which operates/did operate CKEY in Toronto (I recall some changes to this, but I don't remember just what.)

CHEZ (an English station with a French pronunciation: shay) does not, in the time I have listened to it, ever call itself C-H-E-Z.

This suggests to me that there is no rule, but that doesn't explain CIWW, does it?

>> One thing I've often wondered...what are the rules (if any) for
>> on-air station ID's on Canadian broadcast stations?

> I was never aware of any "legal I-D" requirements as per
> the FCC-mandated top of the hour call letters-location format that's
> in effect in the U.S.
>
>Maybe someone in Canada has a better answer.. I don't know..

In Canada, radio broadcasting stations are required, by a regulation enacted under the Radiocommunication Act (General Radio Regulations, Part II), to "identify the broadcasting station at least once every hour on the hour or within 10 minutes thereof .... by a voice announcement in English or French that:

(a) articulates each letter and states any accompanying number designator of the call sign of the station; and

(b) names the principal city or community that is served by the station."

Some variations and exceptions are provided for networks and re-broadcasters.

This rule, or an equivalent, has always existed in Canada. However some stations are not very good about observing it. Last year, many of these received violation notices from Industry Canada's radio inspectors. The national broadcasters' association (CAB) is still discussing with Industry Canada whether some other forms of on-air ID might be acceptable.

Hope this information is useful.

>L Maybe someone in Canada has a better answer.. I don't know..

I worked in commercial radio for 5 years. At CFNB in Fredericton we had a carted full ID which ran with the news jingle. It said "550 Radio, this is CFNB, where New Brunswick hears the news....."jingle""

I was always under the assumption that it was required, altho other stations in our market were less showy about it, yet they too did at least mention the call letters and the city.

In article <2uok6d$fdd@vixen.cso.uiuc.edu>, ag365@freenet.buffalo.edu (Carl K. Gorney) writes:

(on Toronto ratings, Buffalo/Rochester developments)

A couple of other interesting sidelights in the figures Carl has just posted for Toronto. First, CFRB seems to be in danger of losing its lead despite holding relatively steady in overall 12+ AQH. That could be attributed to its failure (up to now) to attract and hold
baby-boomer audiences, who are most likely gravitating to CHFI's gold-intensive music mix. If I were in Gary Slaight's shoes I'd stop playing with the jukebox in my office (I've been there, he has one) and start looking at freshening up the host lineup especially after 12 noon. Letting strong and opinionated personalities like Wayne McLean get away was a mistake and losing Ed Needham (as much of a pain in the ass as he might have been to work with) was an even bigger one. These guys were feisty enough to make waves. Younger listeners like that, as long as the host knows what he's talking about and doesn't make a complete ass of himself when he opens the mike like Rich Michaels or the now-silenced and little-lamented Jack Kinnicutt..
And very quietly, 1050/CHUM seems to be getting back into the thick of the competition with its personality gold format...it's up from
9th or thereabouts and a 2.5 share, to almost a 6 and a spot in the top 5 overall. I remember rumors last year that CHUM was about to go talk, and decided to find out first hand if they were true. Jim Waters
(who heads CHUM's radio division) wrote me back saying he had no such plans in the works, and that he expected fine-tuning the oldies format would put them back in the top 5. Looks like this book proves he was absolutely right...though he can't be happy to see that some of AM's success may have come at the sister FM's expense...

Back here in Rochester, WHAM still has no idea what it's going to
do with its midday talk show, which runs opposite me. I've spoken with several inside sources (who shall remain nameless).They have al-ready tried several substitutes in on-air auditions. They've all been put aside, either as not sounding professional and polished enough (in
the case of a former City Councilman and currently disbarred lawyer), too expensive (in the case of a Toronto-based host who I think I've heard on CFRB's overnights) or not conservative enough (in the case

of a columnist for the morning paper who's known as "Law-and-order Lonsberry"). They appear to want someone just like the guy they lost, Jack Kinnicutt, who angered listeners, community groups AND key advertisers and ended up with almost no cash billings at all on his show. But they want one who will work cheaper. Kinnicutt's departure was precipitated by a demand for more money, even in the face of declining ratings. He threatened to quit on the spot if he didn't
get it...he didn't...and he quit. WHAM wants to have a new host in place in about three weeks. But if they're going to accomplish that, they will either have to drop their iron-clad insistence on an ultra-conservative (which they would be wise to do to increase business) or hope for a miracle in the form of a top fascist talent willing to work
cheap. My guess is they will probably not find their dream host (and Rochester listeners' nightmare) until late summer or maybe early fall, and maybe not even then. Fine with me...the longer they drag on

with it, the more they slide. They couldn't do more to help me if they
tried.
Bob Smith, midday host WXXI/1370 Rochester NY

2380. Re: Ottawa Radio <was BOSTON RADIO WATCHER???????????>>

>WCAP, Lowell MA. It's since been killed off there, but I still
>hear it every once in a while on other stations.

CFRA, Ottawa's News-talk station (Talk that makes news, news that
makes talk), uses the Bulletins at once tag, paired with "breaking
news any time".

CFRA has received some local bad press for one of its shows: Experts
on Call. Seems the experts paid to be on the program so they could
publicise their expertise, giving us a two-hour infomercial without the
station bothering to tell the listeners. I can't imagine that the
lame-brains at CFRA thought this up by themselves, so I assume it
happens elsewhere?

For what it is worth, the new talk format stopped CFRA's decline in
the ratings, though frankly the way the Ottawa Citizen (sorry to James Hale
who covers radio for the Citizen and reads this newsgroup) reported
the spring book makes it difficult to know just what went on. The
major display box had total listeners, which made CFRA look rather
good. In the body of the story were other figures where CFRA didn't
do so well, but there wasn't enough info to really tell. Perhaps
James could post all the numbers here. Ottawa is interesting because
it has a significant French population and though the market is large
is split between English and French. Only Montreal has a bigger
split than Ottawa, I think.

Anthony Hodgetts 242-9775 (hodgetta@cuug.ab.ca) wrote:

: Just a quick question to all of you talk show hosts, but more to
: the operators of the boards and phones. I notice that the same callers at
: least a few times a week phone in to our local talk shows.

Yes, and a good talk host can work around these people. Sometimes, though, the audience loves to hear them. This was the premise behind the original play, "Talk Radio" (before it was corrupted into that awful movie script)...that the listeners are like a family out there.

Anyhow, this is a problem run into in smaller markets, though even the big city can have the problem. For me the easiest way was to vary the topics enough so that they wouldn't appeal to the "rut callers" all the time. Whenever a rut caller phoned I made sure they stayed on topic, or if it was open-phone, made sure that they contributed something I'd never heard before. My desire to make the show flow gradually got rid of the worst offenders (the ones who phone only to tape themselves and otherwise don't care).

For instance, we had (believe it or not) a Commodore-64 as our call screening computer. The program was written by someone at KIRO and s/he had forgotten to stick a poke in there to disable the stop key. Consequently, the thing would get stopped accidentally from time to time. One day in frustration I asked the audience if anyone knew the two pokes needed to disable the stop key. Sure enough, within 5 minutes somebody had them. It was a guy who'd never called a radio station before (evidenced by his nervousness), and of all things we ended up talking about horses. This got us off on roosters and disturbing the peace. It went on from there.

Another time I asked why it was that nobody's ever made a copy of the 1966 Mustang, one of the primo collector cars. Again, I got a flood of calls from people who'd never called before. From that we branched into the general discussion of why things aren't made as well as they used to be, and from there the whole philosophy of a "disposable society". These were topics where a wide range of people could phone, unlike the steady diet of most talk hosts: Washington and crime.

In many regions a local talk show cannot be done at night because the audience simply isn't big enough to keep from getting an onslaught of rut callers.

My name is Adam Curry, I run mtv.com and metaverse.com on the net. I also host a radio show called "Adam Curry's Top 30 HitList". It is syndicated nationwide by Entertainment Radio Networks out of Malibu California.

Actually I should say I used to host this. I quit the show last week. Reason: ERN haven't paid me in over 9 months, haven't given me a proper accounting (I am a profit participant).

3 years ago Scott Shannon (now WPLJ) warned me about this conduct from ERN, I didn't believe him then, I sure do now, and I'm really sorry I didn't take his advice. I put a lot of hard work into that show.

Anyway, I just wanted to post this here for those of you who allready do or may do buisiness with Entertainment Radio Networks. DOn't make the same mistake I did.

THanks,

Adam Curry

King's night time radio show was way off its peak before the transition to daytime.

At his peak Larry was on in prime time in Portland. When he had the right guest there was a special chemistry that made his program worthwhile. As time passed the magic became scarce and more and more he insulted and cut off callers he disagreed with.

At present Rush is on KXL live in the morning. Mike Reagan and Rush replays are also available when no ball game is on. I have not been able to hear G Gordon Liddy, a delightful mixture of SOF and MAD magazines.

Art Bell fills us in on the UFO scene live at 11 PM.

Liberal talk hosts are on in the morning and the afternoon on KXL. I think Buchannan is on mornings on a daytimer which carries liberals in the afternoon/evening.

Conservatives do not have a monopoly on PDX talk shows.

Listening to KBBT with my Sony AM stereo radio a few nights ago, heard the DJ say "We're in AM stereo, ... as if anyone around here even has one." Decided to call their business line (no request line) and mention that they have at least *one* AM stereo listener. Receptionist didn't know that the station was in stereo. Said "Huh, *AM* stereo?". At the end, she said that she'd "pass it on" to some mamagement type there.

Other "solgans" I've heard the jock say: "Alternative music 970 on your crappy AM radio".

This station must be doing at least okay, as they have live jocks on in the later evening now, before they must have just played tapes as I never heard any DJs then before. So, they must have some money to pay them.. Or maybe college students interning? They ain't exactly Dan Ingram of WABC in the old days.

<0005582789@mcimail.com> writes:

(on demographics of talk show audiences)

Talk stations WANT to try to skew heavily 25-54 male. The
irony of it is, the more conservative you are in your overall
schedule
the older and more downscale you get. Rush up to now has been
an exception to this trend because he was an entertainer first and
pundit second...but now that he's preachier he's losing a lot of his
young male listeners (and younger women as well) who got a kick
out of his entertainment shtick even if they disagreed with him. The
more seriously political he gets, the more he loses. And the rest of
the station suffers as well.
The more moderate (or balanced) and less ponderous stations
are actually now doing better in those key demos. Look at LA,
where KABC reclaimed the format lead and KMPC made big inroads.
Or Boston, where news-heavy WBZ is surging while WHDH, the
Rush station, is sliding. And in our town, although we at WXXI/1370
may not have the format lead (WHAM, the Rush station with a
VERY right-wing overall slant comes in with an 11, we draw
a 6 share) their demos are skewed old, and our average listener is
only in his/her early 40s, prime boomer territory. And they dropped

over a million in gross billing last year....

(on chronic callers)

We get a few regulars as well...your best defense against
chronic boring callers is just to book guests and raise topics that
will draw a lot of different people to the phones (the OJ Simpson
case was a no brainer, but there are lots of others) so the
"regulars" don't even have a chance to dominate. Also, letting
go of a run-on caller gracefully but firmly after he's made his
point (and before he beats it to death) is essential. Screening is
something I don't like to do on principle, and you don't HAVE
to do it if your topic selection and presentation are interesting
enough. When you have that under control, you have so many
callers that the regulars don't dominate the proceedings, and a
FEW recognizable SEMI-regulars even liven things up every once
in a while....

Greetings from North San Diego County:

As published in the "Orange County Register," on Tuesday, June 27,
"American Top 40" 24-year run is signing off at the end of the month.

The show, started in July 1970 put Casey Kasem in the national spotlight,
and later through Armed Forces Radio, in the international broadcast
areana.

The show, now hosted by DJ and sometime actor Shadoe Stevens will produce
an international version for foreign markets.

Many stations will pickup a similar Top 40 list, hosted by KIIS-FM (102.7
Los Angeles) Rick Dees. That show is syndicated by ABC Radio, the same
organization that is "repositioning" AT40. Dees is reported to have signed
a multi-million-dollar deal with ABC.

Robert Hall, senior VP for ABC said last Wednesday, "American Top 40" had
reached the end of its competitive life cycle in the U.S."

Thanks!

: Yet they hold a lot of consumer dollars that (IMHO) are largely untapped
: in that medium.

If this is the case, why can't Rush Limbaugh attract any decent national accounts? What I've heard are mostly "Learn to READ!", "A-B-C-D-E-F-G", and of course, the mock-Spanish lessons, "S-O-C-K-S." You'd think that if the right wing in this country were so moneyed and so educated Rush's ads would promote Mercedes, Jaguar, and even Lincoln town cars, banks, home entertainment centers, and the like. You'd think the tourism bureaus would be beating down the door to lure people to Mazatlan, Maui (especially with Hawaii's recession), and Europe.

So, who ARE the listeners? Judging by the advertisers I'd say semi-skilled and unskilled laborers who probably worked in rust belt car assembly and steel plants, basically the white-trash Archie Bunkers of the world. I don't think *any* of Rush's advertisers are selling high ticket items. About the most mainstream advertiser he has is Snapple, and also something anyone can afford.

Well, WLS just split their AM and FM...the AM is still all fascists
all the time, but the FM is "lifestyle talk"...liberals and lighter
topics. I've called Turi Ryder's show sometimes as many as 3 times
a night, using different voices and names... I always get right through
and *never* have to wait more than one call to get on (hurting for
callers?) and I'm *always* entertaining.

One call I made was as a gay guy (my wife was rolling on the floor)
explaining what happens in the "peep shows". I was on for 20 minutes...
and I said some *really* sick things. She was enthralled by my call.
The station's office got lots of complaints the next day from
familyvaluenazis. Later, I called the next show...discussed the O.J.
thing,
had Johnny Vann (sp?) eating from my hand...then told him I scammed
Turi 3 times and even did the voices for him. He was really pissed
and hung up and told me to get my own talk show.

I've gotten on both Turi's and his shows several times again this week.
My wife thinks it's hysterical. Anything to make my wife laugh.... :) :)

>you screen callers so listeners like me don't go "OH, no, not Harry
>again?"

We have developed a little system that seems to work. The producer/screener "rates" the caller on a scale of 1 to 10...ten being the "ideal" caller...1 the one to leave on hold forever. The "regulars" are always rated down in the 3 to 4 category (you can tell who they are after a couple of weeks on the air).

I've personally let the regulars sit for an entire hour on hold when there were only a few calls on the switchboard...just to prevent them from dominating the program! (in hopes they'll hang up...which they usually do after a while).

If you don't find some way to screen them, they start thinking they own the program. Of course, I was taught "Talk Show 101" by Roy Fox when he was at WHO years ago...and I try to treat callers like you treat music on a music station...you've got to have the right "flow" of callers, topics, etc to be successful.

As predicted in this space a year ago, Greater Media's country WBCS-FM 96.9 Boston (the onetime EZ WJIB-FM) has been losing the country battles, such as they are, to Fairbanks' WCLB-FM 105.7 Framingham-Boston (the onetime WVBF). Now WBCS has made one of the first bits of action in an 18-month rivalry that's been so subdued it's making drying paint look exciting.

WBCS has hired former WCLB evening jock Harry Nelson as PD, replacing Jim Murphy. Speculation is that WBCS will try to move from its generic country sound closer to 'CLB's "hot country" format. 'CLB can afford to skew young because sister WKOX-AM is programmed with satellite classic country.

To give you an idea of the minimal market share these stations are haggling over: WCLB's best book was a 2.7 share 12+. WBCS has been hovering in the 1.something range for the last year. If they're not careful, they'll slip below co-owned WMEX-AM 1150, which programs leased-time ethnic :-)

I think the only reason WBCS is still in the format is because they're holding a grudge against WCLB for beating them on the air by 2 months in '93. WBCS was so busy consulting itself to death that it got scooped by the more aggressive Fairbanks guys.

And that's the snooze from Boston...bulletins at once...

Going on in the #40 market:

*WJJL-AM(1440,Niagara Falls;oldies-50s/60s concentration)now simulcasts WKBW-TV's 11 at Eleven newscast at(when else)11pm. This ends an affiliation of quite a few years when the cast was on 107.7 FM (WEZQ-FM,which was easy listening;currently it's satellite new country WNUC-FM). Nice,except at night 'JJL drops to 55 W. Consider that WBNY-FM, where I was a jack of all trades(well,almost all)from 1988-92,is at 100 W and last November went to stereo,which boosted its range by a mile or two (it can now be heard in the southern areas of Niagara Falls before it dies out).

*Some notes from the M Street Journal(courtesy of Mark Roberts):
-WRQI(95.1/95.5,S.Bristol,classic rock/Stern;Rock It 95)has had minor corrections to its license(no specifics)
-A group has applied for 105.5 FM in Brockport with the calls WASB-FM;looks like a sister station for 1590 AM(same calls)which runs a religious format.

*I received a note from someone on the ubvms system in regards to comments I made on WGR and minority hirings. He generally agreed that 'GR may not have done its best,but said that 'BEN "doesn't have anything to be proud of for having Winston Brown as an overnight news anchor", noting that he "sucks" on the air. On that point,I'll agree-somewhat;he only came aboard a few months ago. He also mentioned Claudine Ewing not being ready enough for PM drive(Buffalo's Evening News(from 4-7pm); correct again,but she was a fill-in last week,as was George Richert (he handles AM drive on the Good Morning Show with Mark Lightner). Also, he adds that sources at 'BEN are none too happy with Brown,because of non-cooperation with other station staffers(i.e.not recording the overnight weather forecast for the morning show).
Insofar as changes go:
-They will probably carry Gil Gross on a tape-delay basis after Jim Bohannon.
-Gary McNamara's show will run from 9am-noon,moving Dr.Dean Edell's show to weekends.
-Infomercials will air on Saturdays instead of Ask the Vet. Why? Apparently,one of the infamous 7 Words You Can Never Say on Television (or Radio)popped up last Saturday. A caller was speaking of how his neighbor's Dalmatian relieved himself in huge piles on his lawn(you can assume what word was used). He noted that,"with Bill Lacy on remote,they can't use their delay".(Some background on Ewing:I worked with her for about 6 months at 'BNY;she and another student handled the newscasts-when they were 15 minutes long overall,while I reported on sports. Back then, she was good-might have lost something in the jump,but is getting better.)

*The Am-Pol Eagle weighed in with an editorial in its June 23rd issue about the remarks noted in my report on Friday. It's now asking for letters of protest to be sent to GM Jim Meltzer and to Mindy Rich(who heads up Rich Communications),and to the FCC-in the latter's case,that a protest be placed in the public file for re-licensing. They vow that if an apology is not forthcoming,"we will do whatever is necessary to have the FCC revoke the licenses of both stations."(from the editorial). I'm sorry-even though I'm of Polish ancestry,I cannot support this. What 'GR needs most is a brain transplant. :>

*Regarding Canadian IDs:There are some stations in the Toronto area which ID:CKGE-FM(94.9,Oshawa,hot A/C;The Edge 94.9fm),CJEZ-FM,CHIN-FM and CHUM-FM in Toronto,and CHTZ-FM in St.Catharines(albeit in a roundabout way,noting that they own CKTB-said as "CKTB 610 St.Catharines",which would be legal stateside).

*About WXYT:They couldn't bring in Howard Stern even if they wanted to-apparently,an agreement said that its other 2 owned stations in Detroit would not air Stern's show as part of the agreement purchase(Chuck Yeti noted this earlier).

*Re Crawford:Bob Smith,as much as I respect him,is in error when he states that Crawford is based in Buffalo. It isn't. It's based in Blue Bell,Penn. and owns 11 stations(6 AM,5 FM)-3 in New York(WDCX here, WDCZ in Webster-outside of Rochester,and WDCW in Syracuse-all interconnected and known as the New York Network. There seems to be a mix of 40% local, 60% network/other in its programming,and tilting to the conservative side.).

N> with dissenting views on Mid-East politics?

I don't remember him discussing Mid-East politics all that much (the show generally put me to sleep by then). I do remember flame wars over abortion and taxation . .

I remember listening to him around 1979 or so, and most of the program seemed innocuous then. Maybe it became more stridently political as time passed.

: Rush replays are also available when no ball game is on. I have
: not been able to hear G Gordon Liddy, a delightful mixture of
: SOF and MAD magazines.

Isn't Liddy on KEX, KKEY, or K-whatever in Beaverton -- the station that always identifies itself with the "west side". Gosh, can't remember its name, but they were doing some talk, too. I thought for sure Liddy was around there somewhere. The one I miss is the CBS guy whose program was run on KEX after Tom Snyder was cancelled. Forget his name. Damn. He filled in for Paul Harvey many times, too. Anyhow, Liddy is a good listen.

: Liberal talk hosts are on in the morning and the afternoon on
: KXL. I think Buchannan is on mornings on a daytimer which
: carries liberals in the afternoon/evening.
: Conservatives do not have a monopoly on PDX talk shows.

Having worked in that market I can say that Portland has one of the most interesting mixes of talk shows on the West Coast, including my friend and mentor, Jerry Dimmitt, who's been everywhere in that town. I can only wish SF had as much variety. Here the voices are just too strident, even the ones I agree with. Somehow programmers have gotten it in their heads that you have to yell at the people to get their attention.

N> low-overhead, high-profit format. Can't say I blame 'em.

Can't blame who: Trinity or KUSW?

(For the uninitiated: KUSW was a shortwave station operating out of Salt Lake City, UT, in the late 80's. They primarily played American AOR/AC music--quite different from most American shortwave stations perhaps, but not really anything you just couldn't get anywhere else. They also had some Mormon religious programs on Sunday)

KUSW was sold to Trinity Broadcasting around 1991. Trinity currently rebroadcasts 24 hour audio from its TV satellite network; the transmitter is more or less fixed on 7510 kHz.

WBEN Buffalo (930 AM) ends their newscasts that way..."next news at <xxx>, bulletins at once". Way back in its glory days, WKBW Buffalo had "pulse-beat news" at :15 and :45, complete with a great intro jingle. They ended with a music-based stinger, "Repeating the K-Big Story of the Moment", with a one line summary of the top story. Also in the 60s, WYSL Buffalo used to have 20/20 News, when they were a Gordon McLendon station.

Source record: 39207

The comment about a receptionist at a station not knowing her station was in stereo reminds me of the call I made to an FM station (Peach) while visiting our daughter in Atlanta last January. I called to thank them for their Saturday and Sunday night "50's" show (which is a great show by the way). The young lady who answered the phone told me it wasn't on their station and said it was probably on W---. I knew she was wrong, so found the studio line, called it and thanked them. They thanked me, and acknowledged it was their station which carries the show. But, I'm not surprised. You would be surprised (then perhaps you wouldn't be surprised) how many people work for HCJB here in Ecuador and don't own a shortwave radio, and/or never listen to our AM or FM stations either. --Ken MacHarg

William A. Goldsmith (wgsmith@netcom.com) wrote:

: capability. Turning off the subcarrier will not make the station reach any-
: where it was not going in the first place, and will not increase loudness

Well, it did increase coverage, not only by a personal observation of a
staff member, but by some phone calls from the area.

: Incidently, the best subcarrier to remove in order to improve performance
: in a multipath-prone area such as SF is the _stereo_ subcarrier. 90% or
: more of KQED's programming is mono, yet they never turn off the stereo
: subcarrier/pilot - which would allow them to increase their main channel
: modulation & would drastically reduce multipath. I think that KALW does
: do this.

Indeed they do. Now it's automatic. KALW is in mono all the time except
for nightttime music programs from about 9 to midnight. That and the
weekend folk, jazz, and trad jazz shows are the only times the sterso
subcarrier is turned on. For that matter, how many listeners really know
what stereo is? Most of them probably think "stereo" means 2 speakers
and good fidelity. And some stations' separation is so bad they may as
well be in mono anyhow....not that I'm naming call letters.

2408. KPIX union-busting, too?

Newsgroup: rec.radio.broadcasting
Date: 1994-06-30 01:58:49 UTC
From: dk@crl.com
Message-ID: <2ut8sp$paj@vixen.cso.uiuc.edu>
Source record: 39213
Cross-posted to: ba.broadcast,rec.radio.broadcasting

When Group W Westinghouse begins their new news format on KPIX AM-FM (formerly classical KKHI AM-FM) in a few days it will run with a minimum of staff and as a non-union operation unlike their KPIX-TV channel 5 which has full union representation.

Apparently there will be only 1 or 2 "anchors" and the rest of the announcing duties will be done by off-site announcers from one of the other non-union Group W stations (possibly KFBK in Sacramento or KFWB in Los Angeles). The system will be automated, which explains why nobody seems to be getting jobs there. It appears that whatever production duties are done will be done by interns wanting to put some broadcast experience on their resumes. (I wonder if there will be any jobs for those interns to do in the business if stations are using interns instead of hiring people.)

KPIX has not taken to air yet because the Ethernet-type com links among their computers have had problems, possibly due to someone ordering the wrong wire, faulty installation, or faulty cards.

San Francisco, coincidentally, is commemorating the General Strike 60 years ago which resulted in the National Guard shooting and killing longshoremen who were picketing for unfair working conditions. San Francisco had had high wages compared with the rest of the country in the past because of its heavy unionization.

Today, companies are union-busting all over. At one point stations were represented by any number of unions including NABET (mainly engineers), AFTRA (mainly talent), and/or IBEW (mainly engineers and production people). Today, these unions are all but broken and with them the salaries have dropped to McDonald's-type wages, with few if any perqs (such as medical or dental plans). Air talent and engineering help today often work on a will-call basis, subject to the whims of management.

Michael, back in 1988 I wrote a letter to Reb Porter. He sent me back a nice long letter, reminiscing about those WIFE glory days and "where they are now." In 1988, Reb was the Commercial Production Manager for WIBC, and he ran a private disc jockey booking business. Jay Reynolds was Sales Manager at WTPI-FM. Ron Hofer was a self-employed claims investigator (as he was when he worked at WIFE--radio has always been a part-time thing for him). It was Ron who started the WIFE GOOD GUYS NO-STAR BASKETBALL TEAM. Joe Light was last heard of in Council Bluffs, Iowa/Omaha, Nebraska. The first Roger W. Morgan left WIFE for St. Louis, then went into teaching radio. The second RWM (not nearly so good as the first) went to Oregon and then San Francisco.
As for Dick Summers, I too followed him to WBZ (and listened to WBZ more than any other station in the mid 60's, even though I lived in Speedway). He was working at a station on Long Island in the early 80's (yep, I wrote him and got a nice letter back). He published at least three Rod McKuen-like books of soft poetry and lots of black and white photos, called the Lovin' Touch series. I did not know until recently that he had worked in Cincinnati before he came to WIBC in Indpls in the late 50's. Last I heard he was doing an afternoon drive shift somewhere in New England. Ah, for those days again! ---Dan

2411. Radio Watchers -- Kansas City (6/29)

Newsgroup: rec.radio.broadcasting
Date: 1994-07-02 05:46:53 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2v2v0d$4vd@vixen.cso.uiuc.edu>
Source record: 39217

Album-rocker KYYS(FM) celebrated its 20th birthday today (June 29) with a reduced-price concert at Sandstone Ampitheater in Kansas City, Kansas and a day-long remote from the Wyandotte County venue.

Actually it's KY-102's 20th birthday as an album-rock station, celebrating the day when WDAF-FM pulled the plug on its automated oldies format.

During its heyday in the early 1980s, KYYS(FM) and its AM partner, WDAF, traded the #1 and #2 positions in the Kansas City Arbitrons. KY-102's morning team of Dick (Wilson) and Jay (Cooper) ruled local radio. Thousands of eager twentysomethings "enlisted" in KY-102 PD Max Floyd's "Rock and Roll Army" by participating in numerous station events.

Max Floyd is still at the station as one of the morning personalities, but no longer is the program director. The PD slot on KY-102 is now an annual revolving door, perhaps reflecting the station's soft performance in recent years.

While the station easily outlasted its 1970s competition from progressive KWKI, its late 80s Rock 40 competitor KXXR(FM) proved much tougher to deal with. KXXR's two-year reign ended with an abrupt switch to CHR in June 1990, and KY-102 enjoyed a brief spurt of audience growth until KCFX changed frequencies and moved its transmitting site from suburban Cass County into Kansas City in 1991, improving its metro-area signal greatly. .

These days, KY-102 is caught between a Rock (KQRC) and a Fox (KCFX). KY-102's audience is shared with hard-rock KQRC in the younger demos and classic-rock KCFX in the lucrative 25-54 demo. KCFX's status as the Kansas City Chiefs flagship station has fueled its audience gains in recent surveys.

Other than the additions of slogans such as "We suck less" and "Would you listen to a station that calls itself KY?" KYYS has not responded to tougher competition, for the most part. Only recently has it begun to change its playlist. An occasional modern-rock crossover now sneaks into the station's programming day.

*****

Here's the Kansas City Star's take on President Clinton's outburst on KMOX in St. Louis last week, in its lead editorial yesterday (June 28):

The president also lambasted Limbaugh, the right-wing rabble-rouser who has specialized in harassing the Clintons. Acutely aware that his comments were being made before Limbaugh would go on the air himself, Clinton lamented: 'After I get off the radio today with you, Rush Limbaugh will have three hours to say whatever he wants. And there's no "truth detector." You won't get on afterwards

and say what was true and what wasn't.'
Later Limbaugh responded with self-righteous sanctimony:
'There's no need for a truth detector. I am the truth
detector.'
What balderdash!
Limbaugh may be entertaining -- and a little amusement
has its place -- but much of what he scatters across the
air waves [sic] is anything but the truth.
++++
Oh well. Limbaugh reminds me of nothing more than a pathetic
imitation of Jackie Gleason apeing the combined shticks of Father
Coughlin and Roy Cohn.
How many months will it be before he's hawking stuff on QVC?

Happenings in the #40 market:

*First,a correction of note:I mentioned in my last report that WJJL in Niagara Falls had the simulcast rights to WKBW-TV's 11 at Eleven newscast. Not so,it seems. WNUC is still advertising them around the mid-point of the newscast. (At least *I* correct my errors-unlike Rush L.-just ask Fairness & Accuracy in Reporting(a group I belong to, in addition to subscribing to EXTRA!-its magazine)if you don't believe me.)

*While scanning the Radio BB on Prodigy,I saw the full list of stations that carry Tom Leykis' show. John Wharton,Jr.(the poster)said that a station in Buffalo has a verbal commitment to air Leykis. NO deal yet(memo to John:when it comes down,e-mail me with the news).

*The latest issue of Billboard has a ballot for its annual radio awards(which,technically,aren't sponsored by them). The list:

-Best Adult(medium):WMJQ-Buffalo(Q102)
-Best Rock(medium):WCMF-Rochester
-Prog./Oper.Dir.-Rock(med.):Stan Main(WCMF)
-Prog./Oper.Dir-Adult(small):Paul Bendat(WKLI-Albany)
-Music Director-Rock(med.):Dave Kane(WCMF)
-Music Director-Top 40(med.):Sue O'Neil(WKSE-Kiss 98.5)
-Music Director-Rock(small):Dave Frisina(WAQX-Syracuse)
-Local air personality:
-Dave Kane(WCMF)-middays w/The Dave Kane Thang
-Brother Wease(WCMF)
-Dave Coombs & Steve "The Fat Man" Cortlett(WAQX)
-Bob Mason & Bill Sheehan(WPYX-Albany)-small
(two are in Stern markets that he hasn't beaten-PYX 106 & 'CMF)

Congrats to all!

*About the Canadian IDs I noted last time:I heard all of them and have them on tape to back it up(my series of 5 sweeper tapes and a 6th in progress-wire me if interested).

*As far as the "Bulletins at once..."thing goes:CFRB in Toronto does it thusly:"Bulletins when they break(or happen..don't know which)" and,just within the last week,so did WGR-worded as follows:"Remember-when news breaks out,we break in." Especially if it happens to be another O.J. Simpson update,right? :>

*About the C-SPAN week of talk shows:I'll jump into the C-SPAN gopher and see what I can find.

Cleveland Radio Watchers - Update June 30, 1994
by Frank L. Macek

- THE CASE OF THE CUT WIRES -

A Cleveland grand jury this morning indicted Bill Alford, the 30 year part-time engineer at WMMS-FM/100.7, who alledgedly interfered with Howard Stern's visit to Cleveland recently.

Stern's nationally broadcast show had come to town to celebrate his long awaited rating's victory over morning man John Lanigan on WMJI-FM/105.7.

Alford reportedly cut the wires leading to the satellite uplink during his live broadcast, heard locally over WNCX-FM/98.5

WMMS management still denies any knowledge or involvement.

Yes, indeed, the FCC granted the application to Mr. Wolfe who owns WASB-AM, 1590 KHz, 1KW, DA-2. And he will probably simulcast his religous tripe over on 105.5FM as well. Oh, well. I guess the other applicants could not compete. It is a loss to the area, and another failure of th 80-90 drop ins for local stations. I wrote a letter to the editor when the frequency first came up and saw all of the applicants. This included the Kimble brothers, (in)famous for some of the radio escapades in the Rochester/Finger Lakes area, a minority interest, someone wanting to put up an SMN style station, and WASB. The minority interest was going to program spanish, which would have been a refreshing and in many cases to the Rochester and outlying areas, a needed and refreshing difference. By the way, anyone know of the applicants for 94.1 in Brighton, NY? I would love to see WITR at 89.7 apply for it, and help us out! :)

Re: Automatic Allocation of HF radio channels

As part of my final year Electrical Engineering thesis project at Monash University in Melbourne, Austrlia, I have undertaken to research into 'Self Tracking Automatic HF Optimisation of Voice and Data'. The project work is on behalf of Melbourne based company, BHP Petroleum that make great use of telecommunication equipment in remote locations both locally and overseas.

The latest equipment I came across that handles automatic allocation of HF channels is the Automatic Link Establishment (ALE) 1045 controller.

I managed to get a copy of a brochure on ALE 1045 detailing its possible arrangement in conjunction with a PC, high speed data modem and an HF radio.

Having also read through the US Federal Standards 1045 on ALE titled 'Telecommunications: Radio Automatic Link Establishment', I would greatly appreciate further information on ALE or relevant equipment and about the possibility of transmitting voice as well as data using this system.

Could someone please clarify the following points:

AA) Is it viable to digitize and compress voice before transmitting it as data blocks but switching off the 'retransmission' mode to prevent echoes? What type of Codec might be suitable for voice digitisation?

BB) Can an ALE system be used to allocate the optimum HF channel at regular intervals and switch over to normal analog voice communication?

Any references to literature or technical articles would also be much appreciated.

Thanking in advance,

Shiraz Iskenderian,
Monash University.

Message-ID: <2v2v1b$50e@vixen.cso.uiuc.edu>
Source record: 39230

Off the Radio BB on Prodigy(paraphrasing,don't have it with me):
Detroit's WDFN(1130 AM)will debut on July 11. Among the talkers
set are:
-Van Earl Wright(ex-CNN,now with WDIV-TV-Detroit's NBC affil.)from
noon-2:30pm. I HATED him at CNN for a lot of reasons,not the least of
which was the way he'd do a home run call(i.e."DEEP-overthewallin(wherever
it went out)")
-There are two others-a team show from 2:30-6pm and an ex-jock from
6-9pm(don't know who they are).
I can't see them getting any of the Big 4 teams(Tigers,Red Wings,
Lions or Pistons(then again,who'd WANT the Pistons?)-all 4 teams have
long term deals. I can,however,see them getting the rights to the IHL's
Vipers(no,the stars from the dead NBC series will NOT be there opening
night :))as well as some area college play.
Memo to Chuck Yeti:An update,please?

2424. HOUSTON AREA INFORMATION WANTED

Newsgroup: rec.radio.broadcasting
Date: 1994-07-02 05:47:24 UTC
From: gst@gagme.wwa.com
Message-ID: <2v2v1c$50g@vixen.cso.uiuc.edu>
Source record: 39229

I have a question about TELEVISION in the Houston area.
I know that this is a radio discussion group, however since a discussion group does not exist for TV (hint hint B.P.) I will place my question here.

I received a copy of the Houston Post the other day. Going thru the TV Listings I noticed that there is a new station in the Houston area. Can anyone tell me anything about channel-30. I think they call it KCRA-TV. Is it low-power and just using full power type call in its programming? Any info would be appreciated.

Thanks

gst

>I remember listening to him around 1979 or so, and most of the program
>seemed innocuous then. Maybe it became more stridently political as time
>passed.

I wouldn't exactly call Ol' larry "stridently political". He was
very careful to make some gesture of appearing subtle, but he would act
as if the caller HAD to be a crank if he was on the opposite side of one
of Larry's preconceived opinions. Support for Israel in teh Middle East
was certainly one of those and I'd not be surprised to know that abortion
(something I support, for all that's worth) was another.
You know, as I really think about it (and I've dome no intensive
listening) the times I heard Rush disagree with a caller, he was more
polite about it than I recall Larry. This is NO scientific sampling I
hasten to add. It really isn't all that important, I guess. it is Rush's
or larry's programs and either is free to be as fair, antagonistic, rude
or understanding as he wishes. The ratings and revenue will be the final
arbiter.

>(such as medical or dental plans).

Not to start a full-blown flame war, but I'm somewhat curious as to why
the general free market laws of supply and demand won't bring wages in
the broadcast industry in line with whatever's appropriate? How does
the broadcast industry differ from, say high-tech, where very few
engineers are union?

>
>Can't blame who: Trinity or KUSW?

Can't blame either one. Ralph Carlson never made a dime on KUSW; in fact he lost some major bucks on the whole project. As far as I know, Trinity's making money and keeping the place in operation. Ralph was hoping to emulate the success of WRNO in New Orleans, but it just never quite worked. Fun as hell to do, though.

>KUSW was sold to Trinity Broadcasting around 1991. Trinity currently
>rebroadcasts 24 hour audio from its TV satellite network; the transmitter
>is more or less fixed on 7510 kHz.

One of our consultants on the rock station where we all had our day jobs called it "Two-and-a-half million watts of Who Gives a Sh*t?" That's exactly what it turned out to be, in spite of our naive efforts to make it work.

KUSW's only claim to glory is that it was used to blast Manuel Noriega out of the Vatican embassy in Panama. The U.S. Army just set up their loudspeakers, tuned the radio to 15.580 and cranked it.

In a previous article, SOBCZAK@MAINE.MAINE.EDU (Robert A. Sobczak) says:

>
>It was announced on Monday that Radio Free DC will be broadcast on C-Span
>on 5 July from 1000-1400 EDT. Roll those tape decks!
>
>Rob
>
>ps. Has anyone heard if other programs will be on C-Span during the
> Independence Day week break?

As a matter of fact,yes. But first to Liddy...

Here's what the G-Man will have(off the c-span.org gopher):

-10am:Regis Philbin(phone interview-about 10 min.
-11am:Review & comment on the news
-12noon:Oliver North and possibly other Virginia U.S.Senate candidates
-1pm:John Walsh(host,"America's Most Wanted"(Fox)
(provided from one who isn't in agreement with the G-Man,but still respects
him...)

Also,on Thurs.(7/7)they will simulcast Diane Rehm and Derek McGinty's
shows from WAMU in Washington,D.C.-in addition,NPR's "Talk of the Nation"
(with Ray Suarez)will be seen;his guest in the 3pm hour will be FDA
Director David Kessler.

Sorry,but this sounds-so far-to be locked inside the Beltway. The last
time they did this,at least they went all over the place(I dug the KABC
stint with Michael Jackson,and do I ever WISH he'd come here-he'd kick
Rich Michaels' tail in 10 seconds flat.).

> Unless the audio chain is out of whack, it really should not make much
> difference.

When Dave used to have a scope in the control room at KALW it was pretty clear that "mono" programs differed quite a bit, be it from bad recording tape contributing to phase distortions or maybe bad mixing somewhere. It didn't seem to be the practice at KALW to mix to mono for mono broadcasts, but rather to leave things in stereo and just turn off the generator. When they'd forget to turn it off I could tell the difference if I was driving, especially on the Bay Bridge or going down the peninsula. The most noticeable point was on the way to the dumps near Candlestick. I agree that in theory the stereo subcarrier should look invisible in a mono program.

I recall some station (I want to say KKHI) which turned off the carrier for newscasts and I seem to remember somebody writing in to a newspaper complaining that the station "went off the air" for a few minutes each hour.

> Some receivers go apeshit when
> the pilot goes away, and some will mute the audio entirely when in "stereo
> only" mode.

Are there "stereo-only" mode receivers out there anymore? I haven't seen any in years. Anyhow, thanks for the discussion. Still, though, it may not be proper electronics, but there is an audible difference, and not just a loudness factor either. There's a definitely noticeable lack of multipath distortion, and overall I think Dave does pretty well in keeping KALW's audio chain tuned up. He could leave it on and Y it to mono though. That's a good point.

As the resident KFBK staffer in here, I'll have to deny any participation from us as far as "off-site staffing" KPIX's new all-news radio operation. If we're doing or going to be doing it, no one's told me, at any rate...and besides, we're not a Group W station anymore. Chancellor Communications bought us and sister KGBY/Y92 earlier this year.

I do know that we often do Sacramento-based reports for KFWB, and they do LA reports for us, even though we're not owned by the same company anymore. I wouldn't be surprised if the same arrangement popped up with KPIX when they sign on, but that's about it. I don't know of any arrangements right now (I am the low man on the KFBK totem pole, tho ;).

2434. NPR Harry Shearer vignettes based on OJ Phone?

Newsgroup: rec.radio.broadcasting
Date: 1994-07-02 05:47:43 UTC
From: pwh@bradley.bradley.edu
Message-ID: <2v2v1v$511@vixen.cso.uiuc.edu>
Source record: 39237
Cross-posted to: rec.radio.broadcasting,rec.radio.noncomm,alt.radio.networks-npr

On my way home from work today, I tuned in All Things Considered on the local National Public Radio station, to hear reader letters regarding some vignettes written by Harry Shearer that were based on the phone conversations with OJ Simpson during his famous surreal ride in the white bronco before his arrest a couple weeks ago.

Unfortunately, I obviously missed the original broadcast. I'm a fan of Mr. Shearer's work generally, and by the descriptions read I think I'd be interested. Does anyone know when this aired so that I could contact NPR about obtaining a transcript?

Please email me, as I do not regularly get deep enough into USENET to read this group. If you have any suggestions of a more appropriate place to ask, I'd welcome that as well.

Thank you, Bill! I was going to stay out of this (even though I kind of started one of these threads), not wishing to appear as an expert on everything. I will confirm the following statement:

>Incidently, the best subcarrier to remove in order to improve performance
>in a multipath-prone area such as SF is the _stereo_ subcarrier.

This also is done by a few rural stations in Missouri. KRES in Moberly always turns off its stereo generator during Cardinals baseball and local sports events. Another Shepherd Group station, KAAN-FM in Bethany appears to broadcast in mono full-time as a simulcast of KAAN(AM).

With the Cardinals broadcast, KRES is making a bid for Columbia ad dollars (but generally does not succeed since self-styled sophisticated college-town Columbians [I once was one] view KRES as a hick station).

Btw, KRES also has a fulltime data subcarrier. As Bill Pfeiffer has noted, KRES is almost impossible *not* to receive in most of the state of Missouri (or so it seems).

Blaming impaired coverage despite high power on subcarrier usage ignores some other factors that can affect the station's effective reach:

*** How much gain is in the antenna. High-gain antennae have narrower beam widths and are more prone to multipath as a result.

*** The effect of tower facings on a station's coverage pattern. It has become apparent in the past few years that the presumption of omnidirectionality for most FMs failed to take tower facings into account. Some directionality is in fact induced. Shrewd broadcasters are planning their facilities to ensure that the transmitting antenna is mounted such that the desired city of coverage is in what amounts to a directional lobe.

*** Intervening terrain. This should be obvious from the nature of VHF signals.

*** Possible interference from other local stations. Cross-modulation products may induce background interference that becomes audible in certain difficult locations for reception. (Kansas City reception of KZTO in the Lawrence (Kansas) market was hit severely by this factor; even though it was 10 miles closer than KLZR, KLZR still puts a relatively clear if noisy signal into much of the area; KZTO never could be heard on the Missouri side where all the local txs are.)

And ad infinitum. A lot of things can happen between transmitter and receiver.

Now for proof by anecdotal contradiction, using the Topeka Theorem (the Kansas Corollary?):

The strongest Topeka signal at my present location is KMAJ (107.7). It was the strongest Topeka signal at my other KC location, too. By the postulates of a couple of previous AIRWAVES posters, this shouldn't be. KMAJ is the only Topeka FM with SCS subcarriers of any kind (two audio) -- yet it is stronger than co-located KDVV and KTPK although all stations are 100,000-watters.

It's probably the antenna. KMAJ lost its previous site during an ice storm seven years ago (approximately). The tower crashed to the ground and most of the antenna (nine elements if memory serves me right) was unusable. The station came back on the air with one element and about 8 kW a few days later. The owner asked his CE why the signal seemed to be *better* in Topeka than before. The concepts of gain and beam width were explained to him. Whereupon the owner asked if he could run one element with 100,000 watts!

I'm sure "Magic 108" is not doing that nowadays -- but I'm sure they're not running nine bays any more, either.

>
>Indeed they do. Now it's automatic.

Unless the audio chain is out of whack, it really should not make much difference. The pilot itself only consumes a maximum of 1 db of modulation and the stereo subscarrier itself should consume 0% modulation, assuming the mono material has equal amplitude in each channel and is totally in phase.

The stereo component of an FM station consists of a double sideband suppressed carrier signal in the 23 KHz to 53 KHz area of the station's spectrum. If there is no stereo information to be broadcast, as would be the case with equal left and right channels that have zero degree phase difference, there is no information in the stereo subcarrier, since the subcarrier itself (38 KHz) is suppressed. Most modern stereo generators, such as those found in Orban units, are capable of at least 50 db suppression of the L-R subcarrier under such conditions (FCC requires 40 db).

It is this characteristic of FM stereo that causes "mono buildup". Particularly on classical stations, it used to be a headache that the mono announcer's voice would end up being as much as six decibels louder than the stereo music. While the music would have half the modulation taken up with L-R transmission, the announcer's voice would generate no L-R which, when also modulated at 100% total, would seem much louder in the absence of the subcarrier material.

I was one of those who, back in the late sixties, participated in getting this provision in the FCC rules removed. The FCC rules used to be very strict about turning the pilot off when not broadcasting in stereo, even to the point of doing it during newscasts, etc. Some receivers go apeshit when the pilot goes away, and some will mute the audio entirely when in "stereo only" mode. Some make a big "thump". And for the reasons explained above, it is completely unnecessary.

It has been my experience - as both a union member and in management
positions - that the unions "busted" themselves by trying to do the same
things they do elsewhere in industry: locking the organizational struc-
ture and staffing requirements into patterns developed in the 1950s (or
before), and protecting the jobs of incompetent employees because of
"seniority", "brotherhood", etc.

Source record: 39245

In article <2ut8ru$p97@vixen.cso.uiuc.edu>, ag365@freenet.buffalo.edu (Carl K. Gorney) writes:

(On Western NY/S. Ontario radio)

First of all, sorry about the confusion concerning Crawford's HQ; it comes from the fact that back when I was working in the Buffalo market back in 1977-81, they called WDCX their flagship. Assuming that made it the HQ station was a bit of a leap. The 105.5 CP for Brockport is a little interesting...seems to me unless it's going to be low power (3000 W or even less), isn't that cutting it a little close to WJZR/105.9 in Rochester, with studio and transmitter on East Main St. just 14 miles away as the crow flies? I wonder if WASB-FM will be somewhat directional?

Now to the rest of the Rochester scene...while we were doing an outdoor remote on State St. downtown to celebrate our 10th anniversary, our format competitor WHAM remains unable to de-cide what to do about its midday show. Jack Kinnicutt did indeed leave, not because of public or advertiser reaction to his more in-sensitive and inflammatory remarks (which has been negative and very costly to WHAM's bottom line) but because of a salary dis-pute...just as their station's operations manager Jeff Howlett had said. Now, sources within the station say they are looking for someone equally right-wing and controversial (i.e. almost in Rich Michaels territory) but willing to work cheap. Sources say a $25,000 annual salary is about the top of what they are willing to pay, and that one candidate has already turned them down for that reason alone. They have no one else in the pipeline, and are relying on guest hosts including the Mayor, a number of former politicians, and various and sundry fill-ins from within the staff. They hope to fill the slot by mid-July but if they're to meet that schedule they will have to identify, recruit and hire someone quickly, whom they don't even have in their resume file right now. Doesn't look too promising at this point...

Meanwhile the only other significant programming change is the presence of Yankee baseball play by play on WHTK "Hot Talk 1280." This may be the opening wedge of a shift to a sports-based format. Their current "Hot Talk" based on largely conservative syn-dicated talkers has done absolutely nothing in the first two books... only Imus in the morning, the wittiest and most moderate of the bunch, is drawing numbers that are at all competitive. Liddy, Don & Mike and Gene Burns have fared very poorly against the two established talkers (WHAM and WXXI-AM). So sports, either

syndicated or a mix of local and syndicated stuff, is reportedly
going
to be their next step if "hot talk" continues to languish after 10 AM

each day. (Imus would stay under that format---he does well at other
syndication-driven sports stations like WEEI in Boston.) This will
be interesting since WCMF-AM's carriage of Rochester Red Wing
baseball and Buffalo Sabres NHL games has been interpreted as
THEIR first step toward separating most of their schedule from FM
and going in a sports direction. (Reports are that they are looking
toward eventually breaking the simulcast after the talk and humor-
driven Brother Wease show ends at 11 AM, emphasizing sports if
that option stays open.) Stay tuned...could be more changes coming
if the market research looks promising.
Also, if Hot Talk 1280 fails or turns in a sports-centered
direction,
that will leave a definite opening in a market big enough to support
3 fulltime talkers IF signals are adequate for full market coverage
and the personality lineups are strong. (WHTK has problems with
both their lineup and their HIGHLY restrictive nighttime pattern,
which
kills them in morning drive during the fall and winter.) Do not be
sur-
prised if one of the two lowest-rated full-power FMs in Rochester
then seriously considers trying talk on FM, with a local-syndicated
mix. A couple of owners are watching to see if WLS-FM in Chicago
succeeds with its own brand of younger-skewing talk separate from
its AM sister. If it does within the next 6 months (and based on
their
lineup, I predict it will) you may see it imitated by an FM in
Rochester.
Won't say which one just yet, because there are now a couple that
are at least mulling it over. Time and the Arbitrons will tell.
Bob Smith, middays WXXI/1370 Rochester NY

2442. Radio Watchers -- Kansas City (7/2/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-07-03 07:03:03 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2v5nr7$8sp@vixen.cso.uiuc.edu>
Source record: 39247

Kansas City radio stations did their usual lackluster job in covering a line of severe storms that slammed through the city Friday night (July 1) with heavy rains and 80 mile-an-hour winds.

WDAF's failure to cover the storms extensively was especially puzzling. The station, which has made its reputation covering spot news, did not cut away from its regularly scheduled talk show on Royals baseball until its scheduled end just before midnight, at the midpoint of severe weather in the Kansas City metropolitan area.

WDAF did send reporter Steve Coutt out in a "war wagon" to drive the city's streets and highways; however, Coutt's reports were not broadcast until the Royals talk show from the Hooters restaurant in Overland Park (Kansas) was finished. Instead, listeners were treated to sports director Brian Kelly's deep insights about the Kansas City baseball team, as well as feedback from a monitor speaker that was turned up too loud.

During severe storms one week ago that resulted in a tornado at Excelsior Springs (Missouri), WDAF was similarly out to lunch (or, should we say, out to dinner), not covering the weather until the remote from Hooters was over.

News/talk station KMBZ broke into its network talk show about every five minutes to broadcast bulletins from station meteorologist Sara Croke. KMBZ did not send any reporters out on the street. KMBZ's duopoly partner, talk station KCMO, broadcast weather service bulletins read by a board operator.

*****

The storms also ripped through northeast Kansas, knocking Topeka FM stations KDVV, KTPK, and KMAJ off the air. They were still off the air at 9 am Saturday. Also off the air most of the night was University of Kansas radio station KANU(FM) in Lawrence.

The most severe damage occurred in the city of Lawrence and at the Clinton Lake state park west of Lawrence. Lawrence radio stations KLWN and KLZR were off the air briefly when the storms first hit around 11 pm. When they returned to the air, reporter Barb Quinn fielded numerous telephone calls from listeners describing the storm's aftermath in Lawrence. Station owner Hank Booth and FM afternoon drive personality Tim Barrett were in the field with their car phones, reporting the damage that had occurred at Clinton Lake and in Lawrence and Douglas County.

KLWN and KLZR discontinued simulcasting at midnight and KLZR returned to its regular modern-rock programming; KLWN continued extensive programming on the storm's aftermath Saturday morning, when many Lawrence residents were still without electric service and several major streets were still blocked by fallen power lines and trees.

The only high-powered Topeka FM station on the air during the

storms, WIBW-FM, bailed in and out of its satellite-fed country programming with bulletins from WIBW-TV staff meteorologists. WIBW(AM) did not have any local news Saturday morning and did not break into satellite-fed talk shows to provide any updates on the effects of the storm.

It appears that, of all the stations mentioned, only KLWN and KLZR took seriously their obligation to keep listeners informed during dangerous weather conditions. Again, committed local ownership does seem to make a difference.

*****

Other items of note (both condensed from the Kansas City Star):

++ KPRS planned to celebrate the 25th anniversary of air personality Chris King with a Temptations/Four Tops concert at Starlight Theater. The June 16 concert was cancelled but that hasn't fazed King, whose anniversary at the station is Sept. 4. He keeps on playing classic "soul" hits during his daily noon-hour Chartbusters show on the locally owned urban contemporary station.

++ Despite threats of a lawsuit, Wichita (Kansas) radio station KRZZ did not yield to record company demands to stop playing songs from the Rolling Stones' new album. Now Virgin Records has decided to release the record early. The group's 37th album was fed to radio stations Thursday (June 30) via satellite. KRZZ program director Michael Lee is claiming his station is the first in the world to play cuts from the album, which it obtained on tape.

Station owner Hank Booth and FM afternoon drive personality Tim Barrett were in the field with their car phones, reporting the damage that had occurred at Clinton Lake and in Lawrence and Douglas County.

KLWN and KLZR discontinued simulcasting at midnight and KLZR returned to its regular modern-rock programming; KLWN continued extensive programming on the storm's aftermath Saturday morning, when many Lawrence residents were still without electric service and several major streets were still blocked by fallen power lines and trees.

The only high-powered Topeka FM station on the air during the

storms, WIBW-FM, bailed in and out of its satellite-fed country programming with bulletins from WIBW-TV staff meteorologists. WIBW(AM) did not have any local news Saturday morning and did not break into satellite-fed talk shows to provide any updates on the effects of the storm.

It appears that, of all the stations mentioned, only KLWN and KLZR took seriously their obligation to keep listeners informed during dangerous weather conditions. Again, committed local ownership does seem to make a difference.

*****

Other items of note (both condensed from the Kansas City Star):

++ KPRS planned to celebrate the 25th anniversary of air personality Chris King with a Temptations/Four Tops concert at Starlight Theater. The June 16 concert was cancelled but that hasn't fazed King, whose anniversary at the station is Sept. 4. He keeps on playing classic "soul" hits during his daily noon-hour Chartbusters show on the locally owned urban contemporary station.

++ Despite threats of a lawsuit, Wichita (Kansas) radio station KRZZ did not yield to record company demands to stop playing songs from the Rolling Stones' new album. Now Virgin Records has decided to release the record early. The group's 37th album was fed to radio stations Thursday (June 30) via satellite. KRZZ program director Michael Lee is claiming his station is the first in the world to play cuts from the album, which it obtained on tape.

2444. AAA in LA <Confused Yet>

Newsgroup: rec.radio.broadcasting
Date: 1994-07-03 07:03:05 UTC
From: ggoldwyn@ix.netcom.com
Message-ID: <2v5nr9$8sr@vixen.cso.uiuc.edu>
Source record: 39250

Hi. This is my first posting to this newsgroup. I'm usually hanging out
in alt.my.computer's.busted, but I'll try to get here daily. I'm going to
paste a little 2-part post (now combined) that I sent to the LA Radio group
that I frequent. Any part of it that you don't understand, must be PGP'ed,
so ignore it. Here comes the paste:

Subject: And the hits just keep on coming...
To: la-radio@helen.surfcty.com
Sender: ggoldwyn@ix.netcom.com

KROQ was Top-40 and simulcast back in the '70.
I can still hear those jingles running through my mind...

"K-Rock one-o-six point seven...K-Rock FM Stereo...
K-Rock AM fifteen-hundred...K-Rock on your Radio."

In response to Top-40 on AM in this day and age...my question is,
Why? I don't think any music belongs on AM radio. Not even
AM-Stereo. Not with FM-Receivers available for less than 20 dollars,
and that sweet super-hetrodyne wine...red, or white.

Speaking of FM...KUTE 102 is finally making the switch to The Edge...
Whoops, sorry...old notes...
K-Lite is switching to FM 101.9 today (7/1/94) at 5:00 PM. My question is,
Why? Hasn't Cowboy Gene and Golden West learned yet? LA can't deal
with anything intellectual. Look at the book.

My format book is getting really FULL!

-Part 2-

From: ggoldwyn@ix.netcom.com (G. J. Goldwyn)
Subject: It's 5 PM Pacific Daylight Time...
To: la-radio@helen.surfcty.com

I soaked my antenna all day in salt water so that I could fully enjoy the new
sounds of FM 101.8...whoops, I'm off a decihertz...

Okay, so I'm the kind of dude who really digs Peter Himmelman and Tori Amos,
so should I apply the loctite to the pot now? It was really a kick hearing
the president make that little "True to be true to be new to change" announcement.
Golden West Broadcasters...those guys are SO WACKY! Are Mark and Brian gonna get
the morning gig as Nicole's Producers? Should I apply for a job as the R&R
gonzo reporter?

Oh and, HEY! What are the new call letters? I liked KLIT. It sounded so...sexy?

>pretty new to the business.) Thanks!

It used to be. I subscribed to "Crudblasting" on and off over the years, and it was pretty comprehensive, although the frequent factual errors and typos were enough to make a reader scream. A couple of years back it was sold to Cahners Publishing, and, while the graphics have been spiffed up, I find it to be significantly more shallow in its content and coverage. Maybe it's just spread too thin, what with all the new media it tries to cover. However, I've seen Cahners screw up other magazine properties it has acquired (a *great* example is Datamation), and I just don't subscribe anymore.

If you want subscription info, they used to be located in D.C., at 1735 DeSales St, NW. They also have/had a 1-800 number, which 800-Information should have. They also used to have a 6 month trial subscription.

Casey's show, produced/distributed by WestwoodOne, continues unaffected. He left the ABC fold a few years ago and was replaced on AT40 (ABC retained rights to show's name and to 'exclusive' use of Billboard Hot 100 chart) by Shadoe Stevens. The show, with Shadoe, remain in production for bow, but only for international distribution. Rick Dees deal does not merely name him as replacement host -- it's a whole new show. Current contracts with AT40 affiliates become void; ABC will affliate stations to carry the new show from scratch. I think it's supposed to begin in August. Also, Shadoe's show will be produced by his own production company, unlike the 'old' AT40 which, both with Caset and Shadoe, was produced by ABC/Watermark at studios at studios in Los Angeles (where American Country Countdown is produced, and from where Doug 'The Greaseman' originates his syndicated show - leasing studio space/satellite time - the studio formerly used by Tom Snyder's Radio Show).

: by ABC. Is this the successor to America Top 40?

: --mikedow@gate.net
: Mike Dowling in
: West Palm Beach, Florida

Mike: As far as Casey goes, he left ABC/American Top 40 in 1988
(I think) to do his own Casey's Top 40 for Westwood One. Shadoe Stevens
took over AT 40. Stevens is the big loser, unfortunately. ABC
cancelled AT40, fired Stevens and brought in the Rick Dees Weekly top 40
and is putting forth A LOT of effort to promote it. As far as I know,
Casey is still counting em down.... In fact, the last I heard was Casey
had a new AC style top 30 countdown. I don't know if that's still going
on. There are no countdown shows here in DC...

But where does Dick Clark's Countdown
America fit into all of this? hmmmmmmm.....

Have fun...

>before)

I'll never forget the time I went to SF with another broadcast friend of mine who needed to take a tape to KKHI. Playing the 10 minute air sample at the KKHI studios was such a project!

It turns out that the staff announcer we saw could load the reel-to-reel tape on the machine and even thread it, but we had to chase down a staff engineer to actually push the various play, stop, ff, and rewind buttons. So while we're all standing there, the announcer had to call out instructions to the engineer: "stop there....no, forward a little further...OK, that's it...now go forward some more....". Obviously impressed by all this display, I was told that if I were an engineer there as I was(am) in San Jose, there are all sorts of rigid little rules I would have to follow as to what I could and couldn't do. My immediate response at the time went something like, "Well hell, that's no fun!", since I enjoy doing everything.

I'm not ignorant of the history and, indeed, necessity of unions, but I thought the little process I witnessed was terribly wasteful - and no fun.

>really was disappointed to se them sold, but I guess Mr. Carlson (just
>like WKRP?... Ralph Carlson.) just didn't have the audience that most
>radio advertisers wanted...

Actually, the character's name in WKRP was Art Carlson. In real life,
Art was Ralph's brother here in Salt Lake. Art ran the meat packing
plant and Ralph ran the radio stations. Their first was KRSP, named
after the most endearing characteristic of their other product, A&R Bacon.
(You think I'm kidding, don't you? Look in the Salt Lake phone book.)

>KUSW tried to make a go of it on their own with their own Video Tape Club
>and Record Club and other "Mail Order" type products... I guess they just
>didn't do it soon enough?

Ralph shot his whole investment wad on KUSW's physical plant. When he
was done building it, he really had nothing left over for staff or
marketing. The staff was mostly shared with KRSP, and he ran out of
money as the marketing issues became desperate.

I think he actually made money when he sold it, though. Trinity made him
a good deal.

Yeah, and this was so unfortunate. I used to listen to KUSW a lot because it was providing a music mix I just couldn't get in the SF Bay Area (believe it or not) at the time. I think a station of that size would have required a *lot* of concentration in the sales area, somebody like a Jason Jennings who specialized in selling non-rated stations by sheer determination. I'd bet that KUSW had a decent-sized audience in other countries, but a big problem in finding advertisers wanting to reach them.

installed with extra care for long life all connections soldered and
closed with heat shrink tubing for NO MOVEMENT.
****
******
Matt , it is a converted house trailer made to pulled with a staion
wagon, van or pick-up truck. it is ready to move and would be more
than adequate as a complete radio station, (a shed would be needed
for the actual x-mitter) there is every thing you would need to run a
24 hr station, including room for an office in the rear. This
arrangement would be good for someone who is building a station, but
wants to get on the air right away. ALSO, this would make a KILLER
remote vehicle. with its rounded silver exterior, it is the best
attention getter and makes people stop and look. there is more than
enough room on the outside for call letters and windows so that
people can look in at the dj. the trailer is now in key west fl.
where i use it every day for a morning show. i would consider
delivery. I have placed an add in r&r at $110,000 . there is alot
more to say about it, so if you are interested please call me at
(800)793-7633 or e-mail me your phone #
- paul joffe **** READY TO SELL FOR HALF WITHOUT THE COMPUTER
EQUIPTMENT.**

Maybe Barry will retire. I met Barry Gray briefly back around 1965,
when he was the 11pm-1am talker on WMCA, which was otherwise a Top 40
(The WMCA Good Guys). Back then Barry was in his mid 30's or maybe
40-ish. That would put him minimally into his late 60's.

>everyone's life (especially mine) a living hell.

Amen to that! Personally I'd like to see the FCC outlaw 67 kHz SCA and replace it with SAP -- the same technical specs as are normally used, but operated as a broadcast service for the public. I really have a hard time with the idea of diverting broadcast spectrum to non-broadcast uses.

2458. Radio Watchers -- Central Missouri (7/3/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-07-04 06:59:53 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2v8c19$t80@vixen.cso.uiuc.edu>
Source record: 39265

My holiday weekend trip to mid-Missouri didn't yield more than a
few tidbits, but there was some good listening, thanks to a strong duct
from the St. Louis area.
The following are highly opinionated observations based on one
weekend of listening:
++ KNJZ, the new "jazz" station at 100.3, is, in reality,
beautiful music for the same crowd who bought butcher-block tables and
diagonal wood paneling in the 80s. Imagine Pat Metheny done by Muzak,
and you've got the idea.
++ Suburban KFAV (V-100) in Warrenton still calls itself "V-100,"
and its formatics definitely are CHR-based, but I don't know from about
half the tunes it plays.
++ WKBQ (Q-104) has apparently survived its move to a weaker (50
kW-equivalent at 104.1) station from the stronger 106.5 (100
kW-equivalent) frequency now held down by WKKX. The station has plenty
of spots. Its playlist seems fresh and up-to-date, with plenty of
modern rock crossovers, and much less of the bubblegum that infests KC
CHR radio (stale bubblegum at 93.3; urban bubblegum at 107.3).
++ The former KWK(AM) at 1380 is now simulcasting WKBQ, with the
joint ID "WKBQ-FM Jerseyville; WKBQ St. Louis." How many other
instances are there of a station that's gone from a three-letter K call
to a four-letter K call (KASP) to a four-letter *W* call?
++ KSHE(FM) at 94.7 has apparently confined all of its
heritage-based programming into the Sunday morning "KSHE Classics" show
hosted by John Ulett. KSHE was renowned in the Midwest for playing
albums and artists no one else in the region would play during the 70s
and early 80s. In recent years, it has turned into a mainstream AOR
station. One other outpost of KSHE's earlier programming policy, Gary
Bennett's "Feats at Five," featuring tunes from Little Feat Saturdays
at 5 pm, has been moved to approximately 9:30 am during the KSHE
Classics program.
++ The new KJSL at 630 (formerly KXOK) is riding the satellite for
the most part. There have been no spots, but lots of PSA and
institutional announcements for Crawford Broadcasting. The programming
is a repeat of the standard right-wing so-called "Christian" garbage.
Anti-gay talk shows seemed especially well represented. While the
station calls itself "The Salt and the Light of St. Louis," what it
really seems to be doing is rubbing salt in as many of society's wounds
as it can find.
*****
The following is a quote from a letter published in the Columbia
(Mo.) Daily Tribune on June 28:
"KFMZ radio [98.3] is running the following advertisement: 'KFMZ
rocks Columbia like a big dog in heat.' Besides being nonsensical, it

is another reminder of the continuing moral decay in our country and community. What does the sexual excitement of a dog have to do with music? Although I do not listen to this station, there are many young, impressionable people in this community who do."
One wants to ask the letter writer, "If you don't listen to this station, how did you hear the slogan?"
One wants to ask KFMZ, "What DOES the estrus of a dog have to do with music?" even though we are talking about an album rock station.
And why were cat lovers left out of the equation?
One wants to ask the Tribune, "Who laughed the hardest, and how many of you had to be taken to Boone Hospital Center for treatment of the resulting injuries?"
Can moral decay be prevented with Crest?
*****
TOPEKA NOTE: Stations KMAJ, KTPK, and KDVV returned to the air at about 11 am Saturday (July 2) after being knocked off the air nearly 12 hours before because of storms that blasted through northeast Kansas.

This weekend, Group W pulled the plug on the classical format on their stations, formerly KKHI AM & FM.

Now fully using the calls KPIX AM & FM (1550 & 95.7), and the slogan "95.7 FM, The Express", the station features an interesting mix of modern instrumental jazz ("Adult Alternative") and some vocal Adult Contempoary songs. They have local news/traffic/weather every hour on the hour, supplied by Shadow News/Traffic (I believe). It's funny to hear someone doing local news on KPIX from about :00 to :02, then jump over to KSFO Talkradio 560 (who also use shadow for their local news) and hear the same person doing the news from :03 to :06!

In other Bay Area News...

98.5 KOME San Jose, which modified their format a few months ago from AOR to a more Alternative Rock sound finally has at least _one_ live DJ - "Shark" was on the air last night (Saturday night).

>K-Lite is switching to FM 101.9 today (7/1/94) at 5:00 PM. My question is,

Yup, FM101.9 is officially 'album alternative.'

The last "K-LITE" song was Willie Nelson's "The Party's Over."
GM Bill Ward read a brief statement of change.

Artists played in the first hour or so included The Story, Dire Straits,
Los Lobos, Van Morrison, The Subdudes, and Lyle Lovett. I actually think
that the first couple of songs were played in the wrong order...
First song was Sheryl Crow's "All I Want To Do," then the Dead's "West
L.A. Fadeaway," with the L.A. references. Then, songs by the Story and DS, then Elvis
COstello's "Radio Radio" and Michelle Shocked's "I've Come A Long Way"
with its L.A. reference.

I may have a fuller monitor available; e-mail me for details...

Does anybody know if EZ Communications bought WUSL (Power 99) in Philadelphia, along with a station in Miami? I believe that if no other company could come up with $52 million by Monday, June 20th, Tak Communications would pass the stations on to EZ for $50 million.

Anybody have any info on this deal?

2464. KPIX surprises all

Newsgroup: rec.radio.broadcasting

Classical is gone. So, "95.7 The Express"? "Light jazz"? Looks like they're trying to go up against KKSF (new age/"light jazz") but with news on the hour. Far cry from the all-news format predicted.

As to news, the Gypsy story broadcast at 10:00am is right out of the Sunday Examiner. How would stations cope if the Chron and Ex went out of business tomorrow? It seems to be the news/music format of the 1960s but without any personality. Is Big Rick Stuart (KITS, Live 105) the only DJ with personality today?

The reach of music appears to be 1950s to 1992 or so, a combination of big bands and whiny contemporary mellow music, with a little KKSF-type thrown in. Sorry, but "jazz" has a basic melody line onto which the musicians improvise and jam. A classic example of jazz is the "Flintstones" theme as done by the Joe Pass Quartet. You can hear the melody line clearly, but they play it in a different tempo then wander off on tangents, coming back to the theme. Whiny sax riffs with no discernable theme is not jazz. It's some kind of irritating musical masturbation.

Will the format make it? I don't know. My first inclination is to say that it won't because it takes too many different styles and eras. Bill Drake once said that the music a person likes at age 16 is the music they'll like all their lives. While he meant the actual songs, I'd venture to say that the style is what matters. As for me, a 1960s child, I can tolerate about 1 out of 5 songs, opting for the big band stuff.

They're also totally ignoring the AM station. Heck, they could, if nothing else, track continuous symphonies on it or something.

I called KUIK, the "West side" station, and the announcer thought KVAN
(Vancouver WA) had Liddy. KVAN isn't answering their news phone today
(Sunday). I got a listing of stations carrying Liddy in April and none of
the stations listed are audible here.

KVAN runs CNN Headline and Seattle ball games. When that gets
old they run Mike Reagan. It seems the only talk show that
doesn't get OJ'd these days is Art Bell, who is now on KEX when
the critters aren't munching on his telephone lines.

In article <2v5nrh$8tj@vixen.cso.uiuc.edu>, Robert J Halprin
<0005582789@mcimail.com> writes:

(what demos do talk stations want?

You want to get 25-54 women as well, but most talk stations
run to right-wing, anti-choice and often anti-feminist rant (eg. Mr.
Limbaugh). That has a strong tendency to turn both women and
the more educated and upscale male audience off...so you find
advertisers like banks, car dealers and big ticket retailers very
much underrepresented on most talkers. The ones with more
balanced or diverse personality lineups, like KGO, WJR, WBZ
or KABC, are notable exceptions to this. (Each, by the way,
happens to be format dominant in its respective market.) Talk
radio's apparent conservative bias is costing it big-time in
listeners
and money...and it seems station managers are just beginning
to wake up to that fact. Hopefully it's not too late to save the for-
mat...

Message-ID: <2v8c1r$a@vixen.cso.uiuc.edu>
Source record: 39273

Some changes in and around Texas...

* KTUX-98.9 Carthage (Shreveport LA/Bossier City LA) flips from rock CHR "Tux 99" to album rock as "99X, the Rebel Rocker." KTUX stunted by playing Billy Idol/"Rebel Yell" over and over. Tux 99 flipped from CHR to rock CHR at the end of 1992 and has progressively moved towards AOR.

Louisiana top 40s are becoming harder and harder to find. Shreveport joins Monroe/West Monroe in being CHR-less. Four other LA markets have only one: Alexandria (KQID-93.1 "93QID"), Lafayette (KSMB-94.5), Baton Rouge (WFMF-102.5), and New Orleans (WEZB-97.1 "B97"). Louisiana's other radio market, Lake Charles, still has KBIU-103.7 "Bayou 104," but they have added a huge amount of classic rock and moved to a rock CHR sound (which is OK with me since of the top 40 subformats, I like rock 40 the best) playing "all hits and more rock."

* New duopolies: jazz/gospel KOAI-107.5 "Oasis"/KHVN-970 "Heaven 97" Ft Worth pick up urban/Spanish KJMZ-100.3 "100.3 Jamz"/KMRT-1480 "La Super 1480" Dallas; Spanish Tejano/Spanish KKLB-92.5 "Club 92.5"/KELG-1440 Elgin (Austin) will buy the bankrupt Spanish Tejano KTXZ-1560 "Tejano 1560" West Lake Hills (Austin); country KONE-101.1 "K1" Lubbock and AC KMMX-104.7 "Mix 104.7" Lamesa (Lubbock) will unite; gospel/urban AC KALO-1250/KHYS-98.5 "Y98.5" Pt Arthur (Houston) will acquire urban KBXX-97.9 "97-9 the Box" Houston.

If you're keeping track, that's Dallas fourth (KSNN/KYNG; KICI-AM-FM/KESS/KLTY; KRRW/KTXQ), Austin's fourth (KLBJ-AM-FM/KHHT; KHFI/KPEZ; KJCE/KFGI/KKMJ), Lubbock's second (KKAM/KFMX/KRLB), and Houston's second (KILT-AM-FM/KIKK-AM-FM) duopoly.

* Name changes: country KVST-103.7 Huntsville (Conroe) to "K-Star 103.7"; AOR KLOL-101.1 Houston to "Rock 101 KLOL" as they become more current-based and harder (to counteract Z-Rock KKZR-106.9 no doubt); AC-oldies KKMY-104.5 Orange (Beaumont) to "Hot Classics 104" (how does one call Michael Bolton songs as "hot classics?")

* KAYC-1450 Beaumont and KQHN-1510 Nederland (Beaumont) are now simulcasting talk and sports as the "Triangle Sports Network." KAYC was country // KAYD-97.5 Beaumont, and KQHN-1510 was CNN news and talk.

* KORI-104.7 Mansfield LA (just across the Texas border) is now on as "Star Country 104." KBUS-101.9 Paris has moved from AC to CHR with quite a bit of classic rock. From a trip to Houston, it looks like KRBE-104.1 has dropped its nightly modern rock show. Tejano KTNO-1540 Fort Worth back to Spanish religious "Radio Vida," while KZTQ-106.1 Laredo becomes Spanish Tejano "Tejano 106."

Just a note about these countdown shows... It used to be when a song was a hit, it was a HIT! But now the audience is so segmented that I don't think ANY of the countdown shows really go through the Billboard Hot 100 list any more. Casey's AC countdown is just that--one after another god-awful Michael Bolton, Whitney Houston, etc.

I think rap is the "chart buster" problem. If one looks at the Top 10 list in the paper each week, we see an interesting combo of rap, AC, "modern rock," and just good ol' "pop." Is there any radio station in the country that airs all that stuff in a single format any more? Certainly not here in S. Calif.

So I asked myself, is this really a new concept--a bunch of different kind of music on the same chart? Of course not. Think of the mid-60s, for example, when the charts included "folk music" by the Seekers, full-out funk by Aretha, raw-edged "acid rock" by the Doors, and love ballads by whomever. It was all there at the same time. The mid-50s were even more interesting--when Dinah Shore and Elvis Presley records sat side by side on the Top 10 lists!

Well, anyway, I'm disappointed that Top 40 stations aren't Top 40 stations any more and that a hit isn't a HIT across the board anymore. Guess I'm too set in my 46-year old ways!

Cheers--Jim, K6ZH, San Diego

AM travels further than FM. Also, the last I heard KIIS was still simulcasting their CHR format on AM. They do that in other cities as well. I heard once of a Top 40 station in Havre, Montana on AM. I think the idea of simulcasting on AM and FM for rock is a good idea. I would like to hear some of the CHR stations farilt close to Sacramento simulcast their transmission on AM as well as FM. When KWOD in Sacramento was a CHR/Top 40 station, they were, according to one radio station guide I saw once, going to take over a "dark" AM station in Sacramento and simulcast their Top 40 format on AM. There are CHR stations that are very hard to get in Sacramento because of "harmonics" put out by local stations. KGBY (Y92) puts out a harmonic at 94.7FM which blocks out KEWB in Anderson, KWIN iis blocked out by a harmony from KSEG(The Eagle) on 97.7, and one country station from Reno at 104.5 often time blocks out KHTN 104.7FM (Hot 105), I think that if KEWB, KWIN, or KHTN started simulcasting their broadcast on an AM frequency they could reach more audience as their is no CHR station in Sacramento. There are many areas without a CHR station, and if you simulcasted on a strong AM station, you could cover those areas, and get more audience. So I disagree with your notion of keeping music of AM, sometimes putting music on AM can be good for business because in the case of Top40/CHR, you just might be able to broadcast into an area which does not have a CHR station. The AM that KWOD was going to take over is a dark AM on 1030 that has been dark since 1987, for some reason, I guess it never panned out. KWOD was having problems with ratings in 1991 when they were preparing to take over 1030. If they had done so, their ratings in the Bay Area would have gone throgh the roof. There was no CHR/Top40 station in the Bay Area at that time, and many CHR fans in the Bay Area would have tuned in 1030 AM to listen to what they would not have been able to get elsewhere, Top 40 radio. Until KYLD recently started leaning towards a CHR/Top 40 format, there was *nothing* that even came *close* to resembling a CHR/Top 40 station. KWOD would have still had lousy ratings in Sacramento, but I think they would have had enough listeners from the Bay Area tuning in that they would have kept their Top 40 format instead of switching to "modern" rock in June, 1991, or at least keep it on the AM. I would like to see KYLD get on am AM station somewhere, their FM signal is quite weak, and they really need an AM to get out further. Too bad the current owners of KYLD did not think of this and buy one of the stronger AM stations when they bought KYLD. KSFO, KFRC, or KKHI-AM would made a perfect "companion' to KYLD for an AM simulcast.

Others have posted to your message, but I will add my 2c.

It's a shame that the American Top 40 Disintegrated so, but perhaps
the countdown show format doesn't have the appeal it did when "Rate
A Record" was still fresh in people's minds.

People don't need countdown shows because they know their favorite
groups and artists are already number one in their hearts, if not
number one on the charts.

(on KPIX format)

Messages we've seen on the Compuserve Broadcast Forum
seem to indicate that this may well be a stopgap format on the way
to genuine news/talk. Apparently they have several problems with the
physical facility and with the unions. The studios are reportedly far
from complete; there are modifications to the transmitter plant that
are behind schedule...and their plans to double up on TV talent
apparently have not set well with AFTRA or NABET, and some work
rules are still being hammered out.
Also, word I've gotten from sources in the Bay Area indicates
they are having problems figuring out how to live within the budget
corporate HQ gave them, and at the same time hire the kind of talent
that will give them a competitive sound. So this may well be a tem-
porary thing until they figure out how to do competitive N/T on a
com-
parative shoestring...if it lasts beyond a couple of months, you can
pretty much figure out they failed, and the station may change hands
again.

David Kay Wrote about KKFI becoming KPIX...

} Classical is gone. So, "95.7 The Express"? "Light jazz"?

} Sorry, but [...] Whiny sax riffs with no discernable theme is not jazz.

Agreed wholeheartedly.

} It's some kind of irritating musical masturbation.

I dont know what this station sounds like, but in Chicago the NAC
(Smooth Jazz) is kicking butt. It is, the LOP (Least Offensive
Product) of the band. It is more urban and vocal by day, heard in a
LOT of offices and restaraunts, and gets more 'jazzy' and less vocal
in the evenings. It is a very tight product. It is easy for a large
group of people to listen to and takes the "waiting room/office"
Involuntary listening market completely since demise of Chicago's old FM 100
Beautiful Music station. It is all very crisp and digital sounding,
and very smooth indeed.

} Will the format make it?

The format is doing very well in Chicago, to the surprize of many. The
skew a bit urban, but always jazzy feeling, if not real JAZZ.

I think they are the Great Chicago Compromise and it works.

Will it work there? Depends on the competiton and the listenership.

Bill

>difference. The pilot itself only consumes a maximum of 1 db of modulation
>and the stereo subscarrier itself should consume 0% modulation, assuming
>the mono material has equal amplitude in each channel and is totally in
>phase.

The difference it DOES make is in S/N in fringe areas -- a station broadcasting in stereo mode suffers the same <=>23 dB S/N penalty whether there's any separation or not. It's not bad for a home listener who can switch down to mono mode, but it's hellish with car or portable radios which don't have a mono switch position.

2482. Special DX conditions on Thursday

Newsgroup: rec.radio.broadcasting
Date: 1994-07-05 04:33:16 UTC
From: ug930066@mach01.scs.carleton.ca
Message-ID: <2vanqc$dmu@vixen.cso.uiuc.edu>
Source record: 39288

We had some very rare FM broadcast band conditions on Thursday morning (06/30). In this case, Florida "was open".

I first noticed the special DX conditions when I tuned-in to 97.5 to listen to WCIZ-FM in Watertown NY, which I usually get full-strength here. Instead of Classic Rock, I heard Country Music, and it was so clear, I was afraid CIZ had changed their format overnight! They then played a few commercials and the locations of the businesses (Lakeland, etc) did not sound familiar as being in Upstate New York. After the commercials, they played their sweeper for "Central Florida Weather", and that's when I knew that I was hearing something special.

The conditions lasted for at least three or four hours (possibly more that I missed before I turned the radio on around 9:00am EDT).

Here are a few of the stations I received:

97.5 WPCV "97 Country" Winter Haven, Florida Country
104.5 "Rock 105" (Possibly Atlantic Beach?)
106.7 "XL-106.7" Orlando, Florida All-Hit
95.7 "Mix 96" (Possibly Clearwater?)
95.7 Something in Spanish (mixed with "Mix 96", no pun intended)

Unfortunately, I didn't have time to log more stations or to get any of this on tape.

One particularly interesting aspect is that semi-local stations were blocked out by these stations from Florida, including: WCIZ-FM 97.5 in Watertown NY (100km / 60 miles away); CFLG-FM 104.5 in Cornwall ON (100km / 60 miles); and WYYY-FM 106.7 (relay of Y94-FM Syracuse NY).

If anyone else heard anything interesting during this period, please post; I would love to hear about it!

TTYL...

2484. Albuquerque, NM market -- update on programming

Newsgroup: rec.radio.broadcasting
Date: 1994-07-07 06:09:39 UTC
From: roberts@triton.unm.edu
Message-ID: <2vg673$nbs@vixen.cso.uiuc.edu>
Source record: 39290

Two big changes in the Albuquerque market in the last few days.

1) KRZY-AM, 1450 has changed formats. They used to simulcast a country music FM station, KRST-FM.

But, on Friday July 2, they changed formats to all sports radio.

Their lineup includes (as best as I can figure out):

6am IMUS IN THE MORNING (Host: Don Imus)
10am SPORTS BUFFET (Host: Joe Chevalier)
12p LUNCHTIME PIG-OUT (Host: Matthew Ratledge -- live from a local sports bar in Albuquerque)
1p SPORTS FANFARE (Host: Larry Cotler)
4p BUDWEISER SPORTSTALK (Host: Scott Fader)
6p SPORTS RAP (Host: Zig Fracassi)
8p SPORTS BYLINE USA (Host: Ron Barr)
11p SPORTS OVERNIGHT UPDATE
12m ALL-NIGHT SPORTS GRILL (Host: Kevin Olson)
4a MORNING SPORTS-LINE (Host: Bobby Kemp)

KRZY is also the home (in Albuquerque) of the COLORADO ROCKIES. ROCKIES games will pre-empt the shows listed above.

2) the other big news I discovered today. I was AM channel surfing here and I found a familiar show.

TOM LEYKIS

He is now on Talkradio 920 (KQEO-AM) from 4 to 8 pm Mountain time.

-=-=-=

the last few days have brought great changes. I now have easy access to both Don Imus and Tom Leykis now.

Waiting for Stern (yea, right! in Albuquerque! The barren vast wasteland on the FM side...) (big time sarcasm here)

After having modern-rock station WENZ not renew their contracts,
the morning team of Brian Fowler and Joe Cronauer have been picked up
by WMMS (I am listing this as a rumor because I haven't personally
verified it yet... but it *does* sound interesting!)

Lots of changes have occurred programming-wise in the past few months,
but I have been off Usenet ever since my excursion to Chicago in May.
I will try to get some more information to you soon....

Subject: AMARC 6 - Radio du Monde
Date: Wed, 6 Jul 1994 14:01 EST

R a d i o d u M o n d e

An important message for everyone plannning to attend the 6th
World Conference of Community Radio broadcasters (AMARC 6) in
Dakar, Senegal from January 23-29, 1994:

A special radio station will be set up during the AMARC
conference. Radio du Monde, which will be located at the
conference site, will broadcast to the entire city of Dakar
(population 1.5 million) from 6:00 AM to midnight every day.
You are invited to be part of the station!

How?
- By bringing music
- By bringing cassettes of your best radio programs
- By preparing programs for live broadcast on Radio du Monde

What kind of programs?

Radio du Monde will be an experimental station with
programming that reflects the diversity of community radio around
the world. Programming can include radio art, live and recorded
radio theatre, music from Africa and the world, coverage of the
conference and discussion with participants, live music, local
and international news, spotlight on Senegalese culture and
society.... Have another idea? Let us know!

While Senegal's two official languages are French and Wolof,
programs are welcome in any language. Normally, longer programs
in a language other than French or Wolof, should have at least
60% music.

If you are interested in doing a program, send your proposal
to AMARC's Montreal office at the address below.

We look forward to hearing from you!

>As far as I know, Casey is still counting em down.... In fact, the
>last I heard was Casey had a new AC style top 30 countdown. I don't
>know if that's still going on. There are no countdown shows here in
>DC...

Casey's adult contemporary countdown airs here in LA on KBIG 104.3 FM
on Saturday mornings starting at 7am, I believe.

We get the Rick Dees weekly top 40 on Saturday and Sunday mornings
(6am and 9am, respectively), on KIIS 102.7 FM, which is also Dees'
home station (weekday mornings 5 - 9:30 am or thereabouts). I used to
enjoy Dees' show, but for the last couple of years they have omitted
some of the chart selections in order to play listener requests. More
often than not, the omitted chart selections are rap or hip-hop.

Perhaps I am misunderstanding some of the postings, but if ABC is
going to basically carry Dees' show as is, I hope they drop this
listener request stuff and play everything from the chart.

Message-ID: <2vg67i$nck@vixen.cso.uiuc.edu>
Source record: 39297
Cross-posted to: rec.music.makers,rec.radio.broadcasting,rec.music.makers.synth,rec.audio,rec.audio.pro,rec.audio.tech

I'm looking for a mixer to be used in a permanent radio production environment with occasional (again permanently wired for) PA use. Here are the models I've narrowed it down to (arranged in order of price):

Mackie CR-1604
Samson MPL-2242
Soundcraft Spirit Folio 4
Ramsa WR-S4416

The Ramsa does everything except it may come in at way over budget as well as desktop space. The Mackie is deficient in several areas but is cheapest.

Our requirements are: 16 or more input faders (line / mic switchable), 4 aux sends, mid-swept EQ, 4 bus, as close to $1000 but under $2000 in price.

Our user profile: mainly NOVICES who have NEVER seen a production suite before. A small number of experienced production / PA people will also being using this...

So, is there any other models I should be looking at / what do you think of the above list???

2493. New rock in New York

Newsgroup: rec.radio.broadcasting

From: WCHSNews@aol.com
Message-ID: <2vg67j$ncl@vixen.cso.uiuc.edu>
Source record: 39299

WDRE/Garden City (92.7) plays new/progressive/modern rock. They're on the Island, and have three repeaters, but the signal goes into the city pretty well in most areas.

WXPS/Briarcliff Manor (107.1) recently changed their format to modern rock. They are in Westchester, so you shouldn't have too much trouble picking them up.

If you're travelling a little south of the city...

WHTG/Eatontown (106.3) has been doing modern rock longer than it's been around. They're one of the few stations that cares about the music. 'DRE has become too commercial, and 'XPS are really just getting their feet wet. 'HTG isn't slick. The jocks don't have rock monster voices. But they consistantly play mainstream and bleeding edge progressive rock.

I'd be interested in any reports of stations carrying long-form ('continous') coverage of the O.J. Simpson pre-trial hearing. What are the different networks offering? What kind of clearance are they getting?

As of last Friday, ABC was providing two separate versions of anchored wall-to-wall coverage (one for Information Network stations, the other for all other affiliates, a clean feed (no commentary), plus twice-hourly updates for those that want coverage, but not in non-stop form.

Have any of the other nets offered such options? How is Westwood One handling it -- combined NBC Radio/Mutual/Source coverage? How is it affecting APRadio's new all-news service -- they still have only two program channels, right?

What have YOU been hearing in your market?

Jim: You are not the only one who thinks the charts should be less segmented. The station I built as a college student (WESS-FM, East Stroudsburg, PA) plays across the spectrum, although they do it in blocks. Not too many places you can get rap, hard rock, grundge, contemporary christian rock, folk, and classical on one station. But that's why the broadcasters call it alternative radio. Ain't no pattern to it!

2499. More on Top 40

Newsgroup: rec.radio.broadcasting
Date: 1994-07-07 06:10:04 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2vg67s$nd6@vixen.cso.uiuc.edu>
Source record: 39154

In ARJ #679, price@nosc.mil (James N. Price) wrote about Top 40:
>So I asked myself, is this really a new concept--a bunch of
>different kind of music on the same chart? Of course not. Think
>of the mid-60s, for example, when the charts included "folk music"
>by the Seekers, full-out funk by Aretha, raw-edged "acid rock" by
>the Doors, and love ballads by whomever. It was all there at the
>same time. The mid-50s were even more interesting--when Dinah
>Shore and Elvis Presley records sat side by side on the Top 10
>lists!

In those days, the charts were based on what I consider to be a
fairly "hard" statistic -- weekly sales.

Now, the charts are based on "soft" statistics -- specifically,
those derived from callouts, focus groups and other forms of somewhat
suspect research.

Radio stations back in those days also didn't have the heavy burden
of debt service caused by inflated license values.
>
>Well, anyway, I'm disappointed that Top 40 stations aren't Top 40
>stations any more and that a hit isn't a HIT across the board
>anymore. Guess I'm too set in my 46-year old ways!

Well, AAA is really just a reworked version of 1970s progressive rock
radio, updated with newer artists. Perhaps someone will have the
imagination to do the same with Top 40, although I wouldn't hold
my breath too long.

Judging by Kansas City at least, most CHR
stations are really either hot AC with bogus liners (KMXV)
or watered-down urban contemporary stations (KISF).

Last week I found a tape of St. Louis radio that I made in January 1974.
Most of it was of the legendary album rock station KSHE.
It was astonishing to recall how little of the
music on KSHE was in fact "hard rock." Included was Michael Murphey's
"Wildfire," something you would NOT hear on KSHE today (much less
Kansas City's KYYS).

On that tape, there was also an aircheck of KSLQ, then the FM Top 40
monster in St. Louis, playing Deep Purple's "Smoke on
the Water." Do you think you would hear something like that today
on most of your CHRs?

Not that I care much for Deep Purple but sometimes, I think for radio
to progress, all it has to do is turn the clock back and do some of

the things it used to do.

Great quote from retired University of Missouri professor Vern Stone
in this month's St. Louis Journalism Review. He was talking about
TV news, but this statement applies equally to radio:

Well, the consultants use bad research. They use 'hocus-focus-groups.'
They use junky cheapo surveys that are not always reliable.
A lot of their research doesn't mean a lot.

Message-ID: <2vg682$ndc@vixen.cso.uiuc.edu>
Source record: 39155

```
Well, since I originally brought it up...it is still my opinion that it doesn't
belong there. Here, let me step further out on the plank...Top 40 Radio doesn't
belong on FM either. Top 40 as a format is dead, at least for now. No brave
broadcaster is willing to admit it, but Top 40 (as most of you think of it)
doesn't exist. There is Rap, Soul, Pop, Country and Alternative (whatever the
hell that is.) Sure, I'm skipping New Age, Classical, Nostalgia, Classic Rock,
Tea Music, Chants and All Garth...but I have to. The bandwidth is narrow and
my sig is 4 lines, give or take a couple. Look, most radio stations suck and
as soon as I get my act together, I'm going to bust lose with some fresh new
flavors and a couple of mega-mixes. Broadcasting is a business and to most
programmers, GM's and Owners, the customer is nothing more than research data
gathered by consultants. I grew up listening to 93 KHJ. I am totally ashamed
of what the medium has become. How many times are you going to switch the format?
How many times are you going to change the call letters? Why doesn't AAA play
Bulgarian Chant Music? How many hot clocks does it take to start a fire?

2501. WFAN Sports Talk Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-07-07 06:10:11 UTC
From: bellcore!jts1@uunet.uu.net
Message-ID: <2vg683$ndd@vixen.cso.uiuc.edu>
Source record: 39156

I was wondering if there are any frequent listeners to 660 AM WFAN in NYC
on this newsgroup.

If so, I would be interested in knowing which shows and DJs (besides Imus-in-the-morning)
that people like and dislike on the FAN.

Also, I would like to discuss the sportscasters of the Rangers, Knicks,
Mets, and Jets if anyone is interested.

Personally, I like Howie Rose, Bill Daughtry, Steve Somers, and Ian Eagle.
They are the most knowledgeable, least obnoxious guys on the station, IMHO.

Steve Somers is great if you are a Ranger fan. His show basically has a cult
following among Ranger fans.

Howie Rose does the Mets pre-game show and Rangers play-by-play. He is a
pretty reasonable guy (although I thought his criticism of Doc Gooden's suspension
was a little harsh when all the facts were not yet on the table). On the positive
side, he made several of the greatest hockey radio calls in the history of the
sport during this year's Stanley Cup playoffs. :-)

Ian Eagle is mainly a basketball guy who hosts a show with Bernard King called
"Friday Night Hoops" during basketball season. Although I am not a huge
basketball fan, these guys know their stuff.

Well, that is all for now. I would like to discuss the FAN more if people are
interested.

There is a new FM station in the Watertown NY.

The station broadcasts on 106.7 MHz from Copenhagen NY and plays
hard rock. For a couple of weeks, we have been hearing a relay of
95-X (WAQX Manlius-Syracuse) on this frequency, but it is now part
of the Z-Rock network, apparently owned by ABC and based in Dallas,
Texas.

Does anyone have any more information about this Z-Rock network?
(Like how big, affiliations, etc?)

Different title,same stuff. Prepare yourself...

*Re my 7/1 report on Tom Leykis' stations-you can now add another
to that list. WWKB began airing the show yesterday,6-10pm. I caught
some of it,and he's halfway decent-in the time I listened,he didn't
mention KFI once. Topics included a talk with a woman who wrote an
article for a women's magazine on women having affairs,whether the
Internet is too male(regarding that week's cover story in Newsweek),
and an interview with Danny Elfman(who,in addition to composing a
number of soundtracks,is back with Oingo Boingo-now just Boingo).
Whether this is a tryout or not,I don't know.

*One hire that I haven't mentioned is that of Diana Cruise,now
at WKSE(Kiss 98.5). She's in the 10pm-2am shift,but had been in the
6-10pm spot.

*G.Gordon Liddy didn't air live on WWKB(The Big 1520)today-probably
due to the C-SPAN simulcast. In its place,it aired Nancy Donnellan
(aka The Fabulous Sports Babe)via ESPN Radio(I think). The G-Man will
air on tape delay here-how about anywhere else?

*Kevin Hosey(of Nightlife,also an ex-WBNYer)has a piece regarding
WUFX-FM(103.3 the Fox)in this month's column. I don't have it with me,but
I will post it later.

*Staying with WBNY for a bit:their annual Battle of the Bands will
be held on Sunday,Aug.22 on board the USS Little Rock at the Buffalo
Naval Park,with the proceeds to benefit the park. It usually attracts
a good crop of contestants. Contestants to come...

If anybody happened to tape NPR's "All things Considered" on Monday, in particular, the half-hour that had the Reduced Shakespeare Company's salute to July 4, please let me know by email. (I didn't hear it until the late-night rebroadcast). Thanks in advance.

Message-ID: <2vit1l$1v7@vixen.cso.uiuc.edu>
Source record: 39161

Not much happening on the radio in the Nation's Capitol in the past few weeks. But, there are a few exceptions.....

Davey Jones has left WBIG FM 100.3 (Oldies format) in a dispute with management. Jones joins cross-town rival WXTR, X-tra Oldies 104 FM. Jones will start at X-tra Oldies 104 by working the Saturday night shift. He'll also be available for vacation fill-in and may eventually slide in to a full time position.

This week C-SPAN will air "Talk Radio Week" and will feature live simulcasts of Washington area radio talkers. Among those you can see and hear on C-SPAN are: G. Gordon Liddy of WJFK; Mike Cuthbert and Carol Preston from WWRC; Tony Kornheiser of WTEM and the Washington Post; Diane Rehm and Derek McGinty of WAMU; Ray Suarez from NPR; Howard Kurtz from WRQX's "Liveline"; and from WOL radio, Kathy Hughes and Armstrong Williams. Look for and listen to your local favorite!

As reported here in AIRWAVES a while back by "syael@aol.com", Johnny Holiday's debut on WXTR FM 104.1 (Oldies format) was a disaster. There was absolutely no chemistry between Holiday and co-host Bobby Bennett. They basically spent 4 hours talking on top of each other, missing cues and mispronouncing the name of advertiser "Vie de France". It seems they didn't play much music either. Listeners called to complain and Holiday thought twice about the deal and decided it wouldn't work. There is a chance that Holiday might come back to WXTR to work as their sports announcer.

Infinity Broadcasting has officially purchased WPGC FM 95.5 (Urban format) and WPGC AM 1580 (All Business format) from Cook Inlet Radio Partners. The selling price from Cook Inlet, a record $60 million! WPGC's General Manager, Benjamin Hill, has been signed on with Infinity to continue running the two stations. Infinity also owns WJFK FM 106.7 in Washington and WJFK AM 1300 in Baltimore and simulcasts all programming to Baltimore. No format changes are expected at WPGC AM or FM. However, chances are that Infinity will arrange for WPGC FM's morning man, Donnie Simpson, to be syndicated. Infinity, as many of you know, has had numerous run-ins with the FCC over Howard Stern, was finally able to complete the deal for WPGC before O.J. Simpson went on his little journey through L.A. Simpson is on Infinity's Board of Directors and had this deal not been done when it was, the FCC probably would have attempted to delay the purchase yet another year.

I doubt very seriously that anyone who listens to the CHR format
would put up with an AM station. Or, for that matter, I doubt if
they know where the AM band is.

The only way this might work is the minor success that urban stations
have on the AM band...because it's "the only place to go" for that
format in many markets, including here in Sacramento. But how do you
define CHR? There are folks that would define it along the lines of
what KSFM 102.5 is doing. I'd guess since you don't mention them,
that you're into more of a Hot AC format, sort of like Y92 only more
up-tempo.

Am I right? :)

Well, there's WDRE at 92.7 Garden city, and 98.5 out in the Hamptons of Long
Island, and 103.9 (around there) north of Philly. Modern rock. There's
also a new station at 107.1 in Westchester County (north of NYC) "X107"
which used to be WRNW, where Howard once worked as a manager of sorts
years ago. "X107" is also Modern rock, but a bit harder rock than WDRE.

Speaking of WDRE, they have a small network of transmitters/stations, as
mentioned above. Though, the Philly outlet ID's as "WIBF Philidelphia,
which is WDRE". Sounds a bit strange hearing one station say that they
are another (callsign)..

that people like and dislike on the FAN.

I have very little respect for Chris Russo, as a sports person and as a
broadcaster. Lots of hot air on both counts.

When I lived alone, I used to listen to Captain Midnight, Steve Somers,
under the covers, schmoozing s-p-o-r-t-s.

I started listening to WFAN when they first went on the 1050 frequency,
back when they had Greg Gumbel, Jim Lampley, and Pete Franklin. What
a deadly lineup. (What's weird about this: Greg is taking over for Lamps
on NBC's NFL pre-game show this season, possibly so Jim can spend more
time w/the Breezer and their kids.) The two personalities now on WFAN
I have the most respect for as sports commentators are Howie Rose and
Suzyn Waldman. They have knowledgeable opinions that always make for good
listening. Ian Eagle has come into his own as a broadcaster and may yet
prove to become more famous than his dad, Jack Eagle (the old monk from
the old Xerox commercials).

Cross-posted to: rec.radio.broadcasting,rec.video.satellite,rec.music.bluenote

Well, it's official. America's first all-jazz radio station, KJAZ in Alameda (San Francisco) will drop format as of August 1st and will likely go fulltime Spanish with a contemporary music format. KJAZ at 92.7 (Class A station) was begun in 1959 by Pat Henry (who today produces a syndicated jazz show).

In a nasty attempt by a communications professor at SF State University to wrest control from Henry and get the station for his own uses in 1977, Henry eventually sold KJAZ at a discount to office park developer Ron Cowan rather than fight the professor. Cowan had ups and downs with KJAZ. At the end he said KJAZ was losing $2 million a year.

Being unable to lure the University of California at San Francisco medical research institution to his Harbor Bay Isle office complex, and thus being unable to attract other tenants in concert with UCSF as anchor tenant, Cowan had been having big financial problems with his development. This kept him from being able to continue to underwrite KJAZ and has forced him to sell. In a last ditch effort, Cowan tried to get listeners to donate money to pay the bankers and keep KJAZ on the air. That attempt only reached about 20% of its goal. As it stands, Cowan will probably ultimately lose about $6 million on it because of the operating losses over the years.

Fulltime jazz continues in the Bay Area with the College of San Mateo's KCSM-FM at 91.1. Also, mellow instrumentals (considered "light jazz" by some people) continues on KKSF and KBLX.

I've heard this as well, and expressed it in the ba.broadcast newsgroup (for the Bay Area). I'd also heard that their computer system is munged up, and that they *may* be up as early as the 6th...though I doubt it.

I'm sure that they're headed for news/talk at least on the AM...I wonder if they might not be planning the Express thing for the FM? It's been a few years since the Bay Area had a non-music format on FM, from what I recall hearing.

Here in Boston, no radio station is taking the full hearing wall-to-wall. ABC stopped offering two separate anchored products this week; now Bettina Gregory is anchoring coverage for all ABC networks. WEEI has been dipping into the unanchored coverage (from what net I know not) a bit this week. WBZ has been running ABC updates at the top and bottom of each hour. Our calls indicated listeners are less interested in hearing all that off-mike court noise than in hearing the rest of the news.

So far, ABC-TV, CBS-TV, NBC-TV, Court TV, ESPN2, and CNN have all stayed pretty much wall-to-wall with it. I guess it's been a better TV story than radio story.

I'm partial to the Mackie, and have one connected to my $40k workstation, but it's not for novices. Have you check out the Allen & Heath rackmount? Long-throw faders, decent flexibility, and it looks/routes like a studio console.

How come you're not considering radio-station style consoles? Most real-world production rooms use a totally different style of mixer from any you've mentioned.

The station I work for (KFBK-AM 1530/Sacramento, CA) has picked up the ABC Information long-form coverage a couple of times, during a local talk show. The coverage pre-empted the show for only about 10 or 15 minutes.

We did use a couple of our network sources for the initial "O.J. 40 MPH Flight Across Southern California", but haven't really gone wall-to-wall with it since. I know KGO in San Francisco did so for at least the first day of the preliminary hearing, tho.

I think this is a good place and time to discuss the phenomenon of "continuous coverage" of the O.J. Simpson pre-trial hearing, and whatever else follows. I mentioned in an earlier message that the station I work for has declined to carry most of the wall-to-wall stuff, and personally I think this is a good idea.

What they're doing, IMHO, is putting the *important* stuff on related to the case. For example, the ruling this morning regarding the suppression of evidence was aired by us live. These decisions are pretty easy for news directors around the country to make... any decent news station is equipped with a full AP wire, and a "hotline" from their network to alert them to live coverage or special reports. We have aired many of the 1-2 minute long special reports, and of course have followed all the details of the story during both our own newscasts and during the ABC network newscasts.

I guess what I'm saying is that it isn't imperative (again, IMHO) for an all-news radio station to exclusively air network-run wall-to-wall coverage of the O.J. trial(s), to cover the story well. As someone I heard on a San Francisco station noted, pre-trial hearings don't translate well to radio or TV, radio especially.

And I personally think that covering the O.J. story this way frees up a station's airwaves to also cover OTHER news that might be passed up by stations going wall-to-wall with every single second of the O.J. trial. Those wanting to find out about the O.J. case still get all the information...they just miss the coughs in the back of the courtroom.

This, especially, is my opinion only...I'm speaking only for myself here.

And of course, discussion of the "importance" of the O.J. story in general is another can-o-worms. ;)

}
} I've noticed that too. Among all the national talk show hosts, Rush and
} Bruce Williams seem most polite. (That's not counting all of the
} psychologists--you'd *expect* them not to hang up on callers).

No, Rush is smoother than that. He fades the caller's audio with a hand gesture to the board op, he makes his point, the caller may or may not be connected, but (s)he is no longer able to speak on the air. So he does not do the traditional 'click' but he does the same thing by fading their audio down.

You seldom hear a caller say goodbye, except for fawning women, real dittoheads (intelligent ones that make his show look better get a LOT of time as do oppoition views which Rush knows he can derail. If the opposition is high-level, they get the fade down, Rush makes his speech and off to commercials wth a ".... thanks for the call....Back... after these...<your listening to....>.

I think I would rather have the honesty of terminating the call at whatever time the host thinks it is appropriate and hear the caller say 'goodbye'.

Bill

(on politeness of talk hosts)

Rush may be polite (by comparison) to critical callers, but have you ever noticed how few he allows to get on the air? He makes no secret of his pre-screening to ration severely the number of non-dittoheads he allows to get on the air.
Give me a host who refuses to pre-screen for political orthodoxy, and manages to maintain not only a strong personal viewpoint but at least a modicum of respect and courtesy for all who call in, even if their views don't match his. That's the standard I've always tried to maintain on the air, and I'm sorry to say it makes me almost unique in my own market (a top-50 market with three fulltime talkers at that).

>Does anyone listen to 1560 WQEW in New York City???

Yes. I listen to WQEW regularly, and enjoy the station very much. I am particularly a fan of Rich Conaty's "Big Broadcast" and Jonathan Schwartz's Sunday Morning program (both of which I listened to regularly when they were on WFUV and WNEW respectively).

The one complaint I have about WQEW is the New York Nets basketball games. I have nothing against basketball, but I feel the WQEW is not the place for it.

A couple of months ago, Nat Hentoff dedicated his column to this very topic. It seems that longtime Voice contributor Jack Newfield was made persona non grata on WABC Radio, where he had hitherto been a frequent left-wing counterpoint. But something happened and station management said Jack wasn't behaving nicely so he had to go. Hentoff's column explored the absurdity of this decision by noting how their number-one local personality (help me out on this, someone) was incredibly nasty to callers, cutting them off, etc., and then comparing Rush Limbaugh *favorably* to almost all other talk-radio hosts Hentoff had ever heard. Limbaugh waits for you to finish and says goodbye to you -- and doesn't then go off on you in your absence. He lets you rant, and if he argues with you, do so civilly if not coherently.

This has been my experience as well in my listenings to Limbaugh and talk radio, for which admittedly I have a very weak stomach.

(stuff about mono buildup deleted)

There is a problem with letting the stereo pilot stay there
with no L-R program material. Your S/N ratio will go down.
Remember that the receiver will look for and try to demodulate
the material in the 23 to 53 KHz band of detector output using
the derived 38 KHz subcarrier from pilot. The output of the
stereo demodulator is matrixed with the L+R baseband signal to produce
the main outputs. Only if the pilot is absent will the matrixing
be prevented (in most receivers).

I'm sure you are well aware of the triangular frequency distribution
of FM detector noise (which is why stereo FM is much noisier than
mono). Since the L-R signal is encoded as DSB-SC, there is no
gain from C/N to recovered S/N in the L-R channel. So, the noise
that is in that bandwidth from the detector output will just get
split evenly and added as additive noise to both channels.

The audio processor may automatically adjust the allocation of allowable
deviation between L+R, L-R and SCA according to program material, but
most receivers don't know how to do diddly squat (hence the mono buildup
problem). Unless you can tell the receiver to ignore the L-R
channel when there is no information there, turning the pilot off
is the way to maximize S/N during mono transmissions.

Of course, there is a S/N gain achieved by concentrating the signal
as a mono signal -- the mono buildup will increase the desired audio
by 6 dB and leave the noise floor the same, so the S/N does go up
by 6 dB. But I think you will win even more by turning the L-R

channel off in the receiver.

Actually, here in Atlanta, we have talk show hosts (on alleged "news" stations) who cultivate their impoliteness and use it as a selling point. My theory is that talk show hosts who resort, for ratings, to insulting callers and others without ready access to the media, are in reality nothing but highly paid _cowards_.

The local talk show hosts control the caller's level (so the host can make sure the caller doesn't get his point across), and whether callers access to the media at all (with their screeners and "drop" button); the hosts sit inside fortress-like buildings with guards in front; and they have a Georgia statute that protects radio and television broadcasters from libel and slander suits to an even greater extent than newspapers, and probably to a greater extent than is required by the U.S. Constitution.

Perhaps it is for these reasons that the hosts (or should I say highly paid cowards) feel they can both get away with and profit from what they say on the air, even if it is something they wouldn't dare say in print, or in the presence of the people they are insulting, or even verbally off the air -- and thus without the statutory protection -- to their victims' friends or business associates.

The label "coward" might also apply to hosts who are highly opinionated and who do not allow others on the air to provide a _meaningful_ opportunity for rebuttal. But I think the theory applies even more convincingly to the local Atlanta insult-jocks.

Glad to see we could bring you out of the Internet closet! :]

Your point about talk shows being fun is exactly what we've been discussing, Jan...and the consensus here has been that Rush and many conservative talkers are becoming too serious...too full of themselves of late...and are forgetting that radio is an entertainment medium primarily, not a pulpit for sermons.

Limbaugh's entertainment menu is decreasing on radio...it seems most of that is being shuffled over to the television side. That runs the risk of the audience doing the same. Might be good for him, but lousy for the affils who've been shelling out mega-bucks for those mega-dittoes.

Say...I don't think KVAN is running any talk at all, other than
CNN headline news.
What I am wondering is, whait in tarnation happened to JERRY
DIMMETT? He was a staple of Portland radio for many years, and he may be
the impetus for the fabulous NBC tv show "Hello Larry," (this I am just
fantasizing, actually). Anyway, Jerry got dumped at KKEY, whose owners
never pay their talent anything but a commision that they have to get on
their own selling efforts, and he went to KVAN, who of course turned all
pseudo-news.
What goes on with Portland talk radio? The only local talk is
three hours of Bill Gallagher and KKEY's Al Emerick in the morning??

Infinity Broadcasting (of Howard Stern fame) has an AM at 1480 in the NYC area. Something like 5000 watts. Years ago it was WJIT, a Spanish station (if I remember rightly from high school Spanish class, they say "J" like we say "H", so it comes out like "HIT"), then 2(?) or so years ago, it went to "Z Rock", WZRC, heavy metal music. That lasted maybe a year, then it went Korean language broadcasting.

2532. Buffalo/Toronto Radio Watch(7/8)

Source record: 39188

News-oh,there's news:

*Following up on my 7/5 report:WWKB does,indeed,have Tom Leykis-
only when the Yankees either aren't playing or have a day or late-night
game. He may be on more than that;Alan Pergament's column in today's
News says that after the season ends,the Yanks will be off KB's schedule.
Also off:the Chicago Bulls and the New York Giants. No decision on whether
KB will continue carrying Niagara Univ.hoops(or the many college teams
they have deals with). Why were the Yanks dropped? GM Terry Rodda said,
"They are not local. I don't think the interest level is very high." Terry,
have you even bothered to do a survey of this area? The Yanks are the
baseball team that a good portion of the area's fans back(this from a
Blue Jays fan). The new schedule is as follows:

6am-? Howard Stern
?-2pm Nancy Donnellan(aka The Fabulous Sports Babe)-ESPN Radio
2-4pm Dr.Laura Schlessinger(from KFI-I believe)
4-6pm J.R. & Suzie Gach
6-10pm Tom Leykis-Westwood One

*Perg also reported on the changes at WBEN. Unfortunately for him
(but fortunate for me and all of you),*I* got to it first-memo to Ben
Bass:thanks.

*About Kevin Hosey's article that I referred to:
-"For some reason,I've been doing a lot more listening to 103.3
The Fox,especially the morning show with Ted Shred and Tom Ragan.
"It's funny at times,but sexist and kind of pathetic at others.
Bras Across Niagara?(FWIW,it involved stretching 3,000 bras across the
Niagara River near the S.Grand Island Bridges-CKG)Sorry,but I saw Bras
Across America on a repeat on...Comedy(Central)recently,and as usual,it's
always sexual content to please heterosexual men,proving once again that
some stations run on testosterone. What about Jocks Across The Knox,utilizing
the Albright-Knox Art Gallery?
"I suppose that this and the female strippers on the show make
sense when you consider that except for Jessie Galante(veteran of the area's
music scene),who hosts Buffalo Lix,the local show,it's hard,if not
impossible,to name a female air personality on staff at the Fox.(I can,
Kevin-even though it's fill-in. Stephanie Workman is on board-she was also
WBNY's PD for a year,and from what I know,she wasn't well-liked by the staff.)
"And regardless of what sex the air staffers are,why the sickening
homophobic,insulting and unfunny 'Fudge Pack',the take-off of the B-52's
'Love Shack'? I'd love to hear the station's management try to explain this
away without portraying its listenership as a bunch of 18-24 year old males
with their feet on the volume control of the radio,one hand on a Penthouse

magazine and the other hand in their shorts."

*The latest in the ongoing battle between the Am Pol Eagle and WGR:
The June 30th edition had an open letter from Joseph Macielag(pres.of the Polish-American Congress)to Rich Entertainment Group president Mindy Rich(don't have the time to type it in now,but I'll save it for later). It also has an update on Rich Michaels and his comments,noting that on his June 24th show,a caller brought up the incident and asked him to apologize for the remark;however,Michaels wouldn't do it.
Later,according to the paper,"he reportedly observed that the listener 'doesn't like being called a "polack"' and played a polka for him as a joking way to make amends."
The paper called WGR asking for a statement of policy concerning the use of "derogatory ethnic slurs" on its radio stations. WGR/WGRF GM Jim Meltzer returned the call,saying that it was not the policy of the station to sanction use of such terms and noted that Michaels had already been reprimaned for use of such terms. He seemed,according to the piece, to be reluctant to instruct Michaels to apologize,but did promise to look at other ways that Michaels or the stations could express regret and vow not to repeat it.

*One last thing:Janet Snyder is now the new AM driver at WKSE-FM (contemp.hits,Kiss 98.5),replacing Bruce Maiman(aka Dr.Maims). The change was made at about the same time Kiss altered its playlist a bit (but NOT,as Perg notes,to a more alternative format-it's MTV alternative). Nicholas Picholas,who hosts Club Kiss Fridays and Post-Modern Sunday,is her sidekick(whom Janet refers to affectionately as her "funny man,boy toy"). Janet,who is Paul Snyder's daughter(Buffalo vets will remember that he moved the NBA Braves to San Diego),has signed only a 1-yeat deal,saying that when the ratings increase,"I'm going to nail them to the wall for a huge raise." It was noted that Kiss was taking a chance;they're behind Rochester,who has 3(Joell at WGMC(90.1-jazz;Greece),Jennifer Vanderslice at WBER(90.5,alternative)and Colleen Brannigan and Jennifer Michaels at WVOR(Variety 100.5)).

2534. North San Diego County Post

Newsgroup: rec.radio.broadcasting
Date: 1994-07-09 07:51:46 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2vlkui$8c0@vixen.cso.uiuc.edu>
Source record: 39189

Greetings from north San Diego County:

XETRA-AM (690, 50kw, U, Tijuana, Baja California) quest as a flagship station for the Padres is still possible. KFMB-AM (760, 50kw, DA-II) and the Noble Broadcasting Co., outlet are still in the seventh inning stretch for broadcast rights. The professional baseball syndicate has put the next contract on hold because of an impending $ale are now leaning from the current holders (KFMB) to $$$. XETRA is rumored to have bid more than $2-million per year for broadcast rights. The contract has not been decided because of the potential move of the baseball team.

Par broadcasting's KGMG-AM outlet began simulcasting KKLQ-FM (106.5 7.4kw) the first of June. July 1st (or abouts) the calls on the AM side were changed to KKLQ-AM; which was KOGO-AM (600, 5kw, U) prior to their switch to "Hot Talk." To confuse the reader more, to ex-KKLQ-AM was, umm, simulu-casting KKLQ-FM.

KOGO's talk format has woke up the airwaves in San Diego. While KOGOs signal can be heard from Ensanada, BC, Mexico to Santa Barbara; and east to Yuma, the 1-800 phone callers are mostly from the LA basin area. KSDO (AM 1130 10kw DA-II day, 1kw DA-III night) dropped G. Gordon Liddy from its night-cast and added Westwood One "Tom Leykis Show" on a tape delayed basis. G. Gordon Liddy is now heard live on KOGO from 9 a.m. to 12-noon; after WFAN's Imus-in-the-morning. Afternoon talkshow host (and former KCMO, Kansas City, Mo.) Dave Dawson did a stint from the Del Mar fair. Dave, did you have to talk about anal sex one afternoon while children were gathered around you?

Fallbrook based FMer, KBAX (107.1 3kw) has joined three other southern California stations in the Asia One Network. This is reportedly the country's first Asian-language network. It is slated to feature programming in Japanese, Korean, Vietnamese, Tagalog, and Mandarin.

XETRA-FM (91.1 100kw, killer sig) former morning team of Mike Berger and Jeff Prescott have been officially let go by Noble Broadcasting. They tried the morning show on all sports, XETRA-690, but didn't click. They're not on the air, but still have a contract with XETRA AM/FM. A published report in the Escondido Times-Advocate says that the team might end up on KCLX-FM. That station currently has LA-based "Mark and Brian" in the early hours, but the syndicated program hasn't caught on.
[Las Vegas had Mark and Brian, but dropped them too.]

Yikes! For a San Diego/Tijuana radio log, please e-mail me!

Thanks!

2535. The BLAZE now ROCK 103.5

Newsgroup: rec.radio.broadcasting
Date: 1994-07-09 07:51:47 UTC
From: janik@spss.com
Message-ID: <2vlkuj$8c2@vixen.cso.uiuc.edu>
Source record: 39192

Well, the BLAZE (WWBZ 103.5), the lame attempt at "real rock" in Chicago
by Evergreen
Broadcasting is defunct. Which means the 2 or 3 times a week they played
Pantera or Slayer is now a memory, and Scott Loftus is again out of a gig.
The station has NO jocks (I don't know if this will change, they were
supposed to hire some high-profile shock jock for mornings...) everything
is canned, including the slams against the other stations in town.

Supposedly, they are aimed at males 25-34, somewhere between classic
rock WCKG (105.9) and modern rock Q-101, WKQX (101.1) "the new rock
alternative". What they sound like to me is a traditional AOR format
exactly like WLUP-FM98 (97.9) "the Loop" was like before they went to a
talk-heavy-with-AOR-music format (kind of a hip WGN, if you will).
WLUP and WWBZ are both owned by Evergreen.

So on the way in this morning, my wife & I heard:

La Grange -ZZTop
Are You Gonna Go My Way -Lenny Kravitz
The One I Love -REM
The Big Empty -Stone Temple Pilots
Dazed & Confused -Led Zeppelin

Later on I heard some Van Halen, "Miss You" by the Stones, ...

Over the weekend they played their whole playlist in alphabetical order.
Heard some Ozzie, some Springsteen, some Don Henley, some Floyd.

Yawwwwwwn. Glad I have the new C.D. by the Church sitting right here.

Sure hope someone starts up a REAL ROCK station here soon...

From: fox@nanook.enet.dec.com
Message-ID: <2vlkup$8c3@vixen.cso.uiuc.edu>
Source record: 39190

I tune in here every now and then looking for insights on the Boston radio scene and broadcasting in general. Great stuff! I'm glad it's available to me here at Digital.

Was wondering about how the two Boston Country convert stations are doing since they changed formats a while ago. I used to listen to WCLB (formerly WVBF) religiously for Loren and Wally in the morning and generally AC music during the day. I don't listen to them any more because I'm not really a country music fan. It was a sad day when they switched formats as I had been listening to them from just about the time Loren and Wally started! I even have a piece of their tower when it fell during a hurricane a number of years ago! That steel sure is heavy!! ;-)

I also used to listen to WBCS (formerly WCDJ) as the only full time Jazz station in town. Jesse Sanditch was a great DJ and widened my jazz horizons considerably. Anyone know where he is now?

Am curious how they're ratings are. Talk was that both weren't going to survive and that 'CLB had the deeper money pockets. How are they comparing rating-wise to my now no so new favorite station WBMX?

I was happy to hear that Jody Winchester left Loren and Wally to go to WBMX in the morning with Joe Martelle. Looks like she's getting what she was looking for... more air time! She's doing a great job!

David

The Phantom Of The Open Hearth; A Fistful of Fig Newtons; and
A Ferarri In The Bedroom. Shep also made at least four LP
recordings that I know of (one is him reading selected works
of Robert Service.)

Needless to say, I grew up listening to Jean Shepherd and
greatly miss him.

I would also be eternally grateful if someone would post
or email information where other Shepherd tapes might be
obtained.

Excelsior You Fat Heads! Flick Lives!

In Liberation,

Roy

Rudeness may be a good short-term marketing gimmick, but I think extreme rudeness will hurt in the long run.

I listen to Bruce Williams and Joy Brown all the time because, by and large, they seem like intelligent, pleasant people. I hide from Rush Limbaugh even when I agree with him because he's just too nasty.

: DIMMETT? He was a staple of Portland radio for many years, and he may be
: the impetus for the fabulous NBC tv show "Hello Larry,"

Jerry Dimmitt will probably be likely to talk with you and tell you what's going on. He's in the phone book. "You have entered the Dimmitt Zone..."

: fantasizing, actually). Anyway, Jerry got dumped at KKEY, whose owners
: never pay their talent anything but a commision that they have to get on
: their own selling efforts, and he went to KVAN....

KKEY didn't start that way. Some of us actually got paid in real money! Dimmitt was one of them. Later, Linda Wiegant got greedy and turned to the brokering arrangement, which resulted in driving away some of the talent the station once had (Rick Miller for one, Roger Stark for another). Dimmitt went back to KKEY, but only while looking for another gig to come up. When you call Dimmitt, let him tell you the story of the UFO and KFWB in Los Angeles. It's creepy.

: What goes on with Portland talk radio? The only local talk is
: three hours of Bill Gallagher and KKEY's Al Emerick in the morning??

The Portland metro is too small to support the talkradio it has. The one what surprised me is 1520, the former KSGO, whatever it's called now. Sportstalk in PDX? Yikes! I don't think they draw more than a .5 share. I can't see how they make any money. I think Bill Gallagher is a very good talkhost. I also liked Brad Eaton -- just nice, intelligent, and fair-minded. I think he's in Seattle.

>three hours of Bill Gallagher and KKEY's Al Emerick in the morning??

Portland talk radio is somewhere between dynamic and unstable at the
fringes. The G-Man is now on KVAN, and Buchannan is on KKEY, both
during Rush's show in the morning.

>have you ever noticed how few he allows to get on the air? He
>makes no secret of his pre-screening to ration severely the num-
>ber of non-dittoheads he allows to get on the air.

Correction: a "dittohead" is one who enjoys the show and wants
it to continue, not necessarily one who agrees with Rush.

One host who does not pre-screen is Art Bell. As a result, he
often must stop the flow of the program to tell the caller to
turn down the radio or bleep the caller's last name.
Nonetheless I am amazed he gets relatively few inept
conversationalists calling in. Perhaps it is such a supreme
pain to get in that only those with a burning desire to speak
will spend the time redialing, letting the phone ring, getting
cut off, and repeating ad infinitum usually necessary to get on.
I don't have time for that and just send a FAX or email.

Even without screening Art Bell gets relatively few liberal
callers. Indeed it seems most of the liberal calls come from
"Charlie", but that is my subjective impression which may be
affected by Charlie's style. I must admit the last liberals I
have good feelings for were Hubert Humphrey and Gene McCarthy.

So I am inclined to give Rush the benefit of the doubt when he
claims he does not screen out contrary callers just because they
are contrary. While Rush hardly ever cuts off a caller, he is
selective in choosing which callers will be held over commercial
breaks. In my impression, he is more likely to do this with a
caller who agrees with him but is not developing an interesting
conversation. When Rush gets an interesting contrary caller the
call can last half an hour.

} : This weekend, Group W pulled the plug on the classical format on their
} : stations, formerly KKHI AM & FM.
}
} And in doing so, destroyed a most valuable bay area asset! In choosing
} to ignore the 300,000+ listeners, Group W has certainly convinced me
} that I don't need their kind of entertainment in any form.

} ...this change of format benefits
} no one except perhaps the owners of Group W. There certainly is no need
} for additional news or weather or traffic reports......they exist already.
} What no longer exists is a live classical music station, an outlet for
} the arts, in the bay area. KDFC is just plain boring...and the owner seems
} content to remain so, leaving many of us without an alternative.
}
} Thank you so much for you thoughtfulness, Group W!

Not only did KKHI have loyal listeners in SF, but was well received
and appreciated north of the city along the coast well into Canada.
It's directional 10000 watts did a fine job up there. A friend of
mine in Oregon was very upset to hear of the change.

As for alternatives, I just installed a satellite TVRo system here in
my SW Missouri ranch and I must tell you that if your market is
lacking is such things as classical, Jazz, New-Age or other styles,
there is somehting up there for you. I get something like 7 classical
channels, severla Jazz channels and a lot of other neat stuff
including CBC TV/Radio, BBC/VOA (in studio quality sound), and
hundreds of local radio stations who uplink for some reason.

I really like it. All of this programming is in the clear.

I didnt even go into all the local TV newscasts you can see.... And
wild news and event feeds... It is well worth the cost.

For more info, post to rec.video.satellite ask for the TVRO FAQ.

Bill

>> My question is, will this trend ever slow down? Soon, I fear, there will be five stations broadcasting from 30 transmitters around here. It sure seems that way. I really don't know how much all of this is serving the local communities involved. <<

Its partly because there are so few dollars in the Northern Michigan market for any type of media that that type of consolidation is happening. If stations could not do this, many of those in that area would simply go dark...which is definately NOT in any community's best interest. That is only one of several reasons why the FCC has allowed this type of satellite programming to take place as well as the LMA's and duoplies. It's not the best thing...but there are few alternatives. By the way I used to program in that area back in "92 - at 106KHQ in Charlevoix before coming out to Denver.

Take care.

: You seldom hear a caller say goodbye, except for fawning women....

In doing talkradio I've done exactly the same thing, and for this reason. Saying goodbye just sounds bad. It gives the impression (and I think a talkhost will subliminally get to feel this way, too) that the show is being done for the caller rather than for the audience. In my opinion, the caller is an element in a successful talkshow. I believe that saying goodbye disrupts the flow, to wit:

Caller: "...and I think he's wrong about that."
Host "Thanks for calling. Let's go to Wilma from Cucamonga."
Wilma: "Thanks, Dave. I have to agree..."

Or look at the transition done this way:

Caller: "...and I think he's wrong about that."
Host "Is he wrong? Wilma from Cucamonga."
Wilma: "Thanks, Dave. I have to agree..."

Dunno about other people, but I far prefer the latter way of doing things. To me it just seems to flow better. While I don't like Rush at all, I think he handles program flow well. Too bad he's painting himself into a corner with his downright wrong statements and his bullying.

This article and others from Policy Review and additional publications can be viewed at no charge on The Electronic Newsstand, a service which collects articles, editorials, and table of contents from over 120 magazines and provides them to the Global Internet community.

Access to The Electronic Newsstand is available 24 hours a day, 7 days a week via Gopher, an information navigation and retrieval technology from the University of Minnesota. See full information at the end of this excerpt.

Gurus of Gab

In an increasingly bureaucratic, mobile, and even unfriendly America, talk radio functions as the last neighborhood in town. We communicate, kitchen-table style, with some of all types of Americans and they with us. We are the lightning rods for anger and sadness and views ranging from the enlightened to the moronic. We find our audiences often as youths and grow with them into adulthood; I think of 10-year-old Seth who called me in 1976 when I began on the air, and who periodically has checked in from college, law school, and now from his home with his kids in the background.

At one level, talk radio entertains. Its hosts, like its audiences, run the full gamut -- from insightful to inane. Some intend only to shock or amuse. At another level, talk radio informs. It can expose ideas for what they are, bring important facts to light, give a hearing to all sides of an issue. In a word, educate. Finally, talk radio activates. It can move people to get involved, locally or nationally, in the issues of the day. It can prompt a listener to invade the arena of ideas -- and the politics they generate -- and to become a player, a participant, a citizen.

No, talk radio hosts are not preachers, and our programs are not revival meetings. But with one in six Americans listening regularly to talk radio, we're both a resource and a soapbox for millions. The popularity of talk radio reminds us that Americans still prefer talking to fighting. And though our national conversations are not

always civil, talk radio helps ensure that at least we'll keep having them.

Policy Review has asked several of my colleagues to explain how they have helped educate and activate listeners, whether on issues in their own backyards, or coming out of Washington, D.C. These are their stories.

David Brudnoy
WBZ-AM, Boston, MA
RAOUL LOWERY CONTRERAS
San Diego, CA

At one of the many funerals I attend in my extended family of hundreds, a grandmotherly woman held my hand in both of hers, looked at me with tears in her eyes, and said in Spanish, "You say the things that have been in my heart for years. Thank you."

Recently a city government executive invited me to be the commencement speaker at the graduation of the Leadership Institute, a foundation funded course for Mexican-American business and professional people that teaches leadership.

Welcome to some of the fringe benefits of hosting a daily talk radio show aimed at Latinos.

Six years ago, when I decided to try my hand at writing and sold my first op-ed articles, I thought I had inched into the opinion-shaping world of mass media. To some extent, I had. But my recent move into radio -- with a six-day-a-week talk show on a station with a potential audience of 20 million people -- dwarfs the impact of newspaper columns.

Talk radio provides an incredible "bully pulpit" for talk show hosts. My favorite topic, one of special concern to so many Southern Californians, is economic development for Latinos. Unlike so many Latin-American leaders, I am very critical of welfare on my show and the effect it has on Mexican-American families.

So begins this issue's featured article from Policy Review.

2548. Terre Haute radio news

Newsgroup: rec.radio.broadcasting
Date: 1994-07-09 07:52:18 UTC
From: jwg@acd4.acd.com
Message-ID: <2vlkvi$8cq@vixen.cso.uiuc.edu>
Source record: 39103

This story is from the Terre Haute _Tribune Star_, 8 July 1994.

Radio boss guilty of sex crimes

Michael S. Rice, president of the corporation that owns Terre Haute radio stations WBOW-AM and WZZQ-FM, was convicted Tuesday of 12 crimes involving sex with teen-age boys at St. Charles County, Mo.

Rice was found guilty in St. Charles County Court by Visiting Judge Jack Edwards in a trial by stipulation of facts, according to the St. Charles County Prosecutor's office.

He was charged with eight counts of deviate sexual assault and four counts of sodomy, all felonies.

"Instead of the victims having to be present, the judge reviewed a written statement of facts," said Assistant St. Charles County Prosecutor Rebecca Shaffar. Edwards announced his verdict after taking between 1 1/2 to two hours to study the evidence, she said.

Rice will be sentenced after a hearing on Aug. 31. He could receive anywhere from probation to 112 years in prison, Shaffar said.

In Missouri, criminals serve about one-third to one-fourth the length of their sentences.

Rice is the president and treasurer of Contemporary Media at St. Charles, Mo. In the 1980s, he maintained a part-time residence in Terre Haute. He has been in Terre Haute once this year, an employee of WBOW said Wednesday.

The victims in the case were all boys ages 16 and under tho lived at St. Charles. Rice maintained his innocence in brief testimony before Edwards, Shaffar said.

Rice's attorney, Wayne Schoemeburg, was unavailable for comment. Rice, who is free on bail, could not be reached at his Maryland Heights, Mo., residence.

It was not immediately clear how the conviction will affect the ownership of the station. Janet Cox, listed as vice president of Contemporary Media, could not be reached for comment in Missouri on Wednesday.

WBOW station manager Ken Brown said the conviction will not affect the station "in any way, shape or form."

---
notes from Jim Grey:

Contemporary Media also owns WBFX(AM)/Terre Haute, KFMZ(FM)/Columbia, MO,
and at least one other station not in either of Terre Haute or Columbia.

Rice was arrested on these charges more than three years ago. The wheels
of justice have turned very slowly in this case.

Peace,
jim grey

2550. Radio Watchers -- Kansas City, etc. (7/9/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-07-10 06:47:30 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2vo5i2$89m@vixen.cso.uiuc.edu>
Source record: 39105

Thanks to Jim Grey for his post regarding Mike Rice,
the Missouri and Indiana station owner who has been convicted
of 12 felony counts relating to sexual assualts of teenage boys
in St. Charles County, Missouri.
St. Charles has not had a daily newspaper since 1978 (when the
Banner-News folded), and I could not find any coverage of the case in
the St. Louis Post-Dispatch. St. Charles is 250 miles away from
Kansas City, so the local media here would not have even known about
it. My Columbia sources were not available this week, either.
So, anyway, what should this mean? I don't know.
Aside from the Terre Haute properties, Rice's Contemporary Media
owns KFMZ(FM) Columbia, KBMX(FM) Eldon, and a construction permit for
KTDI(FM) Huntsville (Moberly), all in Missouri. A Contemporary Media
CP for a new AM at Camdenton at 1520 was cancelled last year.
In 1980, Rice filed for a new AM station at 1030 licensed
to Hallsville, Missouri, northeast of Columbia. That station was
assigned based on a minority preference to an applicant from Blue
Springs, Mo. That station later went bankrupt; it is now KBEQ
(in the Kansas City market).
Contemporary Media is the original owner of KFMZ and KBMX.
I cannot find the specific legal verbiage at this time (all
I have at home is a copy of Part 73 from 1989) but, as
I understand it, a convicted felon may not own or have a financial
interest in a broadcast station.
As I also understand it, control of the financial interest in
Contemporary Media was transferred to Rice's parents approximately
two years ago. This was stated by the licensee on documents relating
to the KTDI construction permit. This apparently was reported to the
FCC but did not require its approval because it involved members of the
same family.
Rice has made enemies over the years, by filing numerous petitions
either to keep stations out of the Columbia-Jefferson City market,
or to prevent them from upgrading. His attempts usually failed, but
not without costing him and his opponents some money, and, of course, causing
upgrades and new stations to be delayed from entering the Columbia-Jefferson
City market.
Rice also fought the move of KYKY(FM) St. Louis to the 1,000+-foot tower
it had built near Shrewsbury, Mo. KYKY is at 98.1; KFMZ is at 98.3.
That's all I know about that situation.
*****
"Missouri's Farm Voice" will be speaking Spanish for two hours on
Saturday nights, beginning today (July 9).
WHB(AM) has brokered time to Pete Cedillo of Kansas City for a show
called "Onda Musical." Cedillo told the Kansas City Star that his eventual

goal is to have a full-time commercial Spanish-language station to serve the area's Hispanic population, estimated at 60,000.
Cedillo has hosted Spanish-language shows in the Kansas City since 1968, enjoying a long run weekly on WDAF(AM) with "Comentarios y Musica" for 11 years, ending in 1985.
Regarding the Spanish-language music Cedillo plans to present, WHB owner Mike Carter told the Star, "I don't understand it, but I like it. It's just fun music to listen to."
Cedillo and his co-hosts, Andy Dominquez, Robert Parra, and Saul Hernandez, will not conduct the show entirely in Spanish. Cedillo told the Star, "There's a lot of youth who never listen to Spanish programs. So we put some English in there to get them to listen to us."
Carter is giving Cedillo a seven-week trial run on the 10,000-watt station at 710. WHB normally broadcasts farm news and country music.
In the Kansas City area, Spanish-language programming is available for two hours every evening on KKFI (90.1), Sunday nights on KCUR (89.3), and fulltime on the 67 kHz subcarrier of KKFI. I am not aware of any Spanish language programs in the Topeka area, although there is a longstanding Hispanic community in the Kansas capital city.
Spanish-language programs have also appeared on KCEZ (now KCMO-FM) and KCLO-FM (now KQRC) in the Kansas City area.
*****
Hiawatha, Kansas station KNZA(FM) at 103.9 has apparently completed its upgrade to class C3. The station can now be heard on car radios and better home receivers in the Kansas half of the Kansas City metropolitan area. KNZA is a farm-and-country music station. It should be clearly receivable in the St. Joseph market.
*****
George Davison has reported to me that KTTN(FM) Trenton, Mo. (the object of a lot of discussion back in February and March about radio stations that really DO serve their communities) has completed its frequency change to 92.3 and has upgraded to 6 kW. The KTTN interests recently put KGOZ(FM) Gallatin, Mo. at 101.7 on the air with an automated country format. The 25,000-watt Gallatin signal can be received in the outer portions of the Missouri half of the Kansas City metro area.
*****
The M Street Journal has finally reported the silent status of station KZTO(FM) Ottawa, Kansas. The station is now promising it will be back in the fall. The station is a class C1 at 95.7, with (at least on paper) a transmitter site southeast of Lawrence. When it comes back on, it should be receivable in the Kansas City area. Other sources have reported the station's owner recently bought a station near Birmingham, Alabama, and is planning to start a chain.
Before it went off the air in February, KZTO used the slogan "Total Radio" and programmed soft AC music and the Motor Racing Network to the Topeka market from studios in Lawrence.

Source record: 39109

I was driving home from Syracuse, after some nice storms this Saturday (7/9)
and I was trying to see if I could pull in the station (WEOS 89.7FM Geneva,NY)
any farther than normal. With WRVO at 89.9 in Oswego, There is a place on I 690
and on I90 that I use as a benchmark where we can be heard over the adjacent
channel splatter. Well, here I was picking up an 89.7FM in
Syracuse, and someone or thing was also clobbering WRVO at 89.9. So I waited
for the station break at the end of All Things Considered. It wasn't WRVO's
adjacent, as they were doing a local underwriter. and not WEOS,
but at 89.7 was KIWR Council Bluffs Iowa!!! at 559 PM, I heard the weather
forecast, female announcer and on air plug for The Best of our Knowledge and
a Car Talk Promo. It was full quieting. It faded after about 2 miles, and WEOS
came in loud and clear. THere were a lot of stations coming in on top of
existing stations in the area, but I could not dial flip while driving and
handling two kids who wanted dinner. Quite interesting.

2553. WWL's Moonglow With Martin

Newsgroup: rec.radio.broadcasting
Date: 1994-07-10 06:47:32 UTC
From: LESMITH@nervm.nerdc.ufl.edu
Message-ID: <2vo5i4$89s@vixen.cso.uiuc.edu>
Source record: 39108

When I was a kid growing up in Sanford, Florida, I used to tune in to WWL, New Orleans, about 11 p.m. Eastern Time and listen to 'Moonglow With Martin.' This was during the 1950s. Clear-channel stations still had quite a bit of protection at that time, so WWL would come booming in most nights. And what a show it boomed with! Dick Martin had a deep voice, with a low-key casual delivery. And he had access to what was apparently an outstanding collection of good sounding (for the time) jazz recordings, mostly large groups. I think he went off WWL in the late 1950s or early 1960s. After years of being in broadcasting myself, I still remember Dick Martin as one of the greatest record-show hosts ever. He must have had a large number of listeners across say 10 to 12 states. Yet, I've never read or heard anything about him since that time. Does anyone else remember hearing him, know what happened to him, or have any information on him at all? I'd appreciate hearing from you.

Incidentally, when Dick Martin finished his show, I would tune to a station in Charlotte, NC, to listen to two guys who did a show called, "SPEMOSA--The Society for the Playing of Entertaining Music in Order to Stay Awake." They were good, too.

```
: In doing talkradio I've done exactly the same thing, and for this
: reason. Saying goodbye just sounds bad. It gives the impression (and I
: think a talkhost will subliminally get to feel this way, too) that the
: show is being done for the caller rather than for the audience. In my
: opinion, the caller is an element in a successful talkshow. I believe
: that saying goodbye disrupts the flow, to wit:

"Goodbyes" are better for entertainment talk shows, where there's rarely
a pre-packaged "topic" being discussed. The listener is given a warm
fuzzy by the fact that the hosts appear to Really Care About Everyone In
Their Audience. Nobody wants to hang out with (or dial into) an
apparently rude person who doesn't really care.

>stations) who cultivate their impoliteness and use it as a selling point.
>My theory is that talk show hosts who resort, for ratings, to insulting
>callers and others without ready access to the media, are in reality
>nothing but highly paid _cowards_.

So what am I supposed to do when a caller:

- Gets on the show under a pretext?
- Refuses to limit comments to the topic under discusson?
- Attacks a guest personally?
- Rambles on incoherently?
- Monopolizes the discussion?
- Displays a hundred varieties of foolishness?

I once suggested on the air that I'd like to limit my callers to only those who could form a complete sentence. I spent the rest of the show getting chewed out by my listeners for being rude. Many of them were very articulate -- where was all this eloquence before I hung up on guy who said I was nothing but a Communist who wanted to take over the world (and I left him on about two minutes too long).

Just so we can see who's lacking in courage, I'd like to invite you to come to Salt Lake City and host two hours of my show. We'll put you in the driver's seat -- you deal with callers, topics, guests -- and let's see you backtime into the news at the top of the hour.

Hello,
in the last Airwaves you mentioned needing a specific value variable
capacitor. Bear in mind that when making antennas for reception the
values are not nearly as critical as when making them for transmit.
Very often, close is good enough. I would try to find any variable caps,
wether too large or too small, and try them in the circiut, if they are
not satisfactory then you can 'make' the correct cap. by putting a
variable capacitor in series or parallel with a fixed capacitor.
Radio shack makes trimmer capacitors in the pf range, you could try
them and if they don't work then add another capacitor to adjust your
total capacitance

```
---||---||--- capacitors in series decrease capacitance
```

```
.-||-.
| | capacitors in parallel increase capacitance
|-||-|
| |
```

I think the formulas are

Parallel cap. = C1 + C2 + ... + Cn
Series cap. = 1/(1/C1 + 1/C2 + ... + 1/Cn)
But I am not swearing to anything....

The formulas are relatively straightforward, but my brain is not
working at this hour and I don't have reference data handy...
I would just try the nearest size variable cap. and then use fixed
caps to 'adjust' it, seeing what works. A radio with an S meter
is really handy here :)

Good luck!

: success. Does anyone know where I could get one by mail order? I don't
: have an old radio to salvage one from.

I doubt it, since the technology has changed, and there just aren't enough
tennawinders out there to justify the parts houses stocking this cap.
Best to scrounge for an old tube radio in a thrift store and cannibalize
the varicap that way. Heck, you can probably call your neighbors and get
a non-working radio for free from one of them. The 365 mf is the larger
of the two varicaps in ganged caps.

>
> "And that's the end of the world..."
>
That's probably very true. All announcer links are timed to the second,
including the exact 2 second joining and leaving silences in and out of every
programme and promo. It's professionalism like that which makes me proud to be
British...

Did you know that the music they play up to every hour (you know - the one that
sounds a bit like "Here We Go Round The Mulberry Bush") appears from somewhere
on the announcers desk at the alotted time, but the announcer has it on a cart
too, just in case.

And did you also know that the Big Ben chimes used on various BBC news
programmes are the REAL chimes live? I was amazed. I didn't realise until a
really cold day when the bell seized up or something and they couldn't have
the chimes after all.

And another thing. Big Ben's clock is kept in perfect time by placed old
British pre-decimalisation pennies on the pendulum. One penny equals so many
seconds in a week or something.

I'm waffling.

2562. Re: The BLAZE now ROCK 103.5

Newsgroup: rec.radio.broadcasting
Date: 1994-07-11 04:17:54 UTC
From: sjsobol@wariat.org
Message-ID: <2vqh5i$q0c@vixen.cso.uiuc.edu>
Source record: 39118

Ed Janik (janik@spss.com) wrote re rock 103.5:

: Supposedly, they are aimed at males 25-34, somewhere between classic
: rock WCKG (105.9) and modern rock Q-101, WKQX (101.1) "the new rock
: alternative". What they sound like to me is a traditional AOR format
: exactly like WLUP-FM98 (97.9) "the Loop" was like before they went to a
: talk-heavy-with-AOR-music format (kind of a hip WGN, if you will).
: WLUP and WWBZ are both owned by Evergreen.

interesting....

back in may when I was in Chicago, I had been listening to all of
the stations mentioned above... it's kind of interesting... found
nothing that sounded like a traditional AOR station, just Q101 and 'CKG
and the Blaze.

: So on the way in this morning, my wife & I heard:

: La Grange -ZZTop
: Are You Gonna Go My Way -Lenny Kravitz
: The One I Love -REM
: The Big Empty -Stone Temple Pilots
: Dazed & Confused -Led Zeppelin
: Later on I heard some Van Halen, "Miss You" by the Stones, ...
: Over the weekend they played their whole playlist in alphabetical order.
: Heard some Ozzie, some Springsteen, some Don Henley, some Floyd.

.. but this sounds like the playlist of WMMS (Cleveland) and
WRQK (Canton) which ostensibly are both still AOR, although they
are playing heavy doses of modern rock.

: Yawwwwwwn. Glad I have the new C.D. by the Church sitting right here.

: Sure hope someone starts up a REAL ROCK station here soon...

What's your definition of real rock? A Z-ROCK type playlist?
I happen to like a lot of the stuff you mentioned, as well as
several of the bands you mention in your .sig (which you like, no?)

The point being that REAL ROCK is a matter of opinion. To some people
the Everly Brothers and Elvis and people from that time period define
rock 'n' roll...

: Well, anyway, I'm disappointed that Top 40 stations aren't Top 40
: stations any more and that a hit isn't a HIT across the board
: anymore. Guess I'm too set in my 46-year old ways!

Maybe this way is better, it's certainly more sophisticated, but I also remember the days when you could go from hard rock to almost elevator music. It worked and it was fun.

I just returned to radio after a 4 1/2 year absence. I'm surprised at how sophisticated things have become. I work at a CHR/Dance outlet in West Palm Beach (Star 95.5/WOVV-FM) on weekends. Things are a lot tighter and more segmented than when I started fifteen years ago.

I was talking to the twenty year old overnight jock who had trouble accepting that I "actually played actual records on the radio."

The last time I remember hearing a "yuk" Adult Contemporary record on CHR radio was eleven years ago in 1983. It was "Islands in the Stream" by Dolly Parton and Kenny Rogers. A few months later, as Program Director of a small Hot AC/Oldies station in Waterbury, Connecticut, I added "The Pride is Back" by Kenny Rogers. It was based on an advertising campaign by Rogers for the Chrysler Corporation. The song bombed, and Roger never again reached the Top 40 after "Islands."

Ten years ago, and for many years before, all of the stations had one of less than a half dozen formats: Top 40, Adult/"Middle of the Road" (Remember that term?), News, Country or Urban/Soul. In my hometown, I was told that all four stations once played "Hopelessly Devoted to You" by Olivia Newton-John at the same time.

Today you still get the variety, but you have to press a few buttons. My car radio shows my varied tastes by it's selections: WXEL (NPR News and Classical), WLVE/Love 94/Miami (Jazz), WOVV/Star 95.5 (CHR/Dance), WFLC/Coast 97.3/Miami (Soft AC) and WRMF (Hot AC).

WRMF is the closest station in South Florida to "Top 40," it's a well run outlet that avoids both sides of the spectrum. Not too much (blleech) Michael Bolton, but no rap or dance music. They compete with the local country outlet for the top spot.

I wonder, does an "all over the road" station exist anywhere in America anymore? I think we're waxing nostolgic for old days that weren't necessarily all that good for the business. While we were exposed to many different forms of music, was that what we really wanted? If a station existed that played exactly what we wanted, would we have listened?

We are very unusual simply by virtue of the fact that we care enough about radio and broadcasting to subscribe to this newsgroup. What may have been great for us could have been a downer for the rest of the population.

My station, the logical successor to Top 40 radio, would never consider playing Henry Mancini, or Barry Manilow, but we do play the modern day equivelents to Aretha and the Doors.

While we of the Homer Simpson generation (man it hurts to say that!) may think our generation was superior because we were exposed to "Love is Blue" by Paul Mauriet, I have to remind you that we were forced fed that and music by Ferrante and Teicher and the like. If possible, we reached for the button of the car radio to switch from the "theme from a Summer Place" to "Smokin' in the Boys Room."

And hey, whatever happened to that Supergroup of the early seventies, Brownsville Station?

Looking forward to your comments.

I enjoy reading all the FM-DX stories. We don't have quite the electricity wandering about our blue skies here in Los Angeles, but when the smog is espically thick and tasty, I can pick up KGB-FM and other San Diego stations without using any extra antenna grease. Look, I only have a 3rd comm and an Advanced Ham Ticket (I'm KE6DX BTW [random call too]) but I don't understand how FM skips due to atmospheric conditions. I would like a detailed explanation that won't require a clothing change.

Topic Two:

I just found out there is a 300KW FM station is Memphis and a 320KW soft hit monster in Grand Rapids, MI. Is that why my toaster doesn't get my toast quite dark enough anymore?

Cross-posted to: ba.broadcast,rec.radio.broadcasting

This news story appeared in the Marin County Independent Journal today, Sunday, July 10, 1994:

"Saul Levine, the Los Angeles radio executive who purhased Marin's only commercial radio station, formerly known as KTID, is wondering like the rest of the county when we'll start hearing some music.

"Levine is saying late summer, but the application is still winding its way through the bureaucracy at the Federal Communications Commission.

"Levine has scouted space to lease in Corte Madera and says he's eager to get things going.

"`We have equipment to put in and the first instant we can put it on, we'll put it on,' he said.

"While Levine wouldn't release too many details, he said that he has purchased the rights to the call letters for now-defunct KKHI as well as the station's library of classical records."

After Dick Martin ended his show on WWL (I don't know why) he ended up in Kansas City, probably in the early 60's. I can't recall which station he was on (probably WDAF as that was one of the few KC stations we could get in mid-Missouri at night); Mark probably knows the answer, though this may be before his time. I agree that it was one of the best late night jazz shows available, at least in the mid-west; might even say it was the ONLY jazz show available. The signal was clear in mid-Missouri. My memory is that the KC show was either from or sponsored by a bar-night club on Main Street.

Nope. I disagree entirely. First, I think the best way to show that you care is to *care* -- period. If you've got the right attitude and genuinely like people you can get by with nearly anthing because they know what you're about. Remember, the show is *not* being done for the callers; it's being done for the *other* 99.5% of the listners who never call talkshows. (Yes it's true. Only about 1/2 a percent of listeners actually call in, and it's never gonna change.)

I've used a wonderful button on our Gentner switcher...the "hold" button. The caller can hear but can't talk...I reply and move on without acknowleding their transgression (since many just do it to aggravate you). Works real well and is real transparent.

>Just so we can see who's lacking in courage, I'd like to invite you to

: conversationalists calling in.

It's probably because of his style. He makes it clear what he won't tolerate and the bad callers go elsewhere. I don't think I've ever heard him, but I can't think of any other answer. On a crowded board the nasty callers are the ones *more* likely to get in because of their persistence or because they have speed dialers.

: Even without screening Art Bell gets relatively few liberal
: callers.

This may be because retired people, people on the Social Security dole, and other people with time on their hands tend to be conservative or downright reactionary. I found the liberals are usually working at a job somewhere and don't have the time to call in. Why do I say this? Because when I did weekends I got *far* more liberal callers than I ever did during weekday work hours.

What shift do you do?

I accept your offer, if suitable financial arrangement can be made for my trip to Salt Lake City from Atlanta. If you will pay for a round trip and give me about a week or two to arrange the time off from work, we'll be face-to-face in front of a mike in no time. I'll e-mail you with my home and work telephone numbers so you can contact me.

You should know that I am not clueless insofar as sitting behind the microphone of a radio station is concerned, or sitting at the console during a talk show, either. I've been a ham radio operator since 1967 and a first class radiotelephone operator license (or its equivalent) since 1968. While I was in college in Boston, I was the host of a music show on the college's FM radio station and occasionally edited and announced a half-hour news report on that station.

In addition, during some of the summers while I in college, I was the board operator and news editor and announcer for a 100,000 watt FM station in St. Louis, MO., and an engineer for a commercial 5,000 watt AM (full time)/50,000 watt FM combo in the Boston area. At the latter station, I was the also the board operator during call-in shows. Because of the way our tape machines were arranged, we had not a seven-second delay, but a FOUR-second delay. You had to be pretty quick to cut someone off there, and more often than not, it was the announcer that you had to bleep, not the callers.

I've also had experience backtiming network news to the _bottom_ of the hour. That's because we carried Mutual news back then on the Boston area AM station. I got pretty good at fading down a theme, punching up a 10 second spot at just the right time, and dumping a canned station ID over the top of the news theme in the two or three seconds just before the network announcer started talking.

If I do come out to your station, rather than dump me in front of a microphone, I would expect that you would familiarize me with your station format and technical operations, just as you would any other professional who applied for a job at your station. I would do no less for you if you

were to find yourself in my profession for a day.

As far as guests and topics are concerned, I will be happy to do the show with or without guests, and with or without a topic (i.e., an open line). As you are probably aware, living in Atlanta, I am not particularly familiar with issues of local interest in your area. Furthermore, I do not have a *wealth* of guests that I could call on to be on the show that would be of local interest to your callers. But I might have some. If you would like me to arrange to have one or two, let me know -- otherwise, perhaps you could help me arrange to get one or two out there. I'm game.

I have more to say -- please continue reading.

: Alan L. Cassel <alcassel@crl.com> wrote:

: >Actually, here in Atlanta, we have talk show hosts (on alleged "news"
: >stations) who cultivate their impoliteness and use it as a selling point.
: >My theory is that talk show hosts who resort, for ratings, to insulting
: >callers and others without ready access to the media, are in reality
: >nothing but highly paid _cowards_.

: So what am I supposed to do when a caller:

: - Gets on the show under a pretext?
: - Refuses to limit comments to the topic under discusson?
: - Attacks a guest personally?
: - Rambles on incoherently?
: - Monopolizes the discussion?
: - Displays a hundred varieties of foolishness?

What you are describing are all the things the _host_ does in Atlanta, not the callers! If you would like to hear a particularly good (bad?) example of what I am talking about, please call me at home. My telephone number will be included in my personal e-mail message to you.

It may be that _you_ do not exhibit the behavior on the air that I think is an earmark of a coward. Your remark that:

: I once suggested on the air that I'd like to limit my callers to only
: those who could form a complete sentence.

is as close as you come, but the remark does not appear to be directed personally at any particular individual, unlike the remarks (occasionally by name, and sometimes not even callers to the show) that you can hear almost daily in Atlanta. And, curiously enough, when these hosts have guests, even ones they disagree with, they start being polite.

Don't get me wrong -- I'm still quite seriously interested in doing two hours of your show in any event -- but from what you've said, I don't think you or your behavior on the air comes _that_ close to fitting the description of the talk show host I have in mind, or his behavior on the air.

My model of an ideal talk show is the type of show that _used_ to be on KMOX-AM in St. Louis, i.e., the "At Your Service" type show. I'm not talking about the type of show you call up to find out which mutual fund to invest in, or when to plant petunias, or how to know when your car needs a tune-up, although KMOX sometimes did that, too. What I am talking about is a real radio news person sitting at a microphone and taking questions -- preferably hard questions -- posed to a guest of some importance, e.g., a politician or nationally recognized journalist, after having set the scope of the topics by interviewing the guest.

At KMOX, the callers were screened, of course, but they were also given considerably less time on the air. They asked their question, and the guest answered the question on the air. If the question was sufficiently interesting, the host would follow up or would take follow-up questions from listeners. KMOX almost *had* to work that way, because back then, they had ratings in the 20s and 30s, and could lay serious claim to being the most listened-to station in the country. People would complain that they couldn't get on the shows, if they didn't handle their calls the way they did. Between lengthy newscasts and features every hour, they were able to take perhaps 20-30 callers every 40-45 minutes, depending upon the guest and the topic. But you could get up after an hour of listening feeling that your hour was well-spent.

Most talk stations today don't work that way today, because they can't. They just don't have the listeners in numbers sufficient to attract the most interesting and important guests, or to get enough callers with _different_ interesting questions and opinions in an hour to allow them to run a show the way KMOX used to do it. And unlike KMOX, which had a rule back then that hosts were not allowed to express their own opinions on the air, most talk show hosts today do nothing *but* that.

Frankly, although I know that screening, moderating, and even censoring callers is necessary, I think it takes more courage and professionalism to *avoid* expressing your opinion in certain inappropriate situations than to do so all the time. Not only that, when you *do* express your opinion, you can have more force behind it. Consider Edward R. Morrow and Senator McCarthy, for example.

Give me a call, though. I'm quite serious about wanting to do two hours of your show, and if you tell me not to try to use the KMOX model, I won't.

: G. J. Goldwyn - Musical Technologist | General Consulting

There is WDRE, a two transmitter outfit that is on the air, broadcasting to NYC and Long Island, on 92.7 (WDRE) from Garden City/Westbury, and 98.5 (WMRW) from the Hamptons. They also transmit to Philadelphia from Jenkintown, on 103.9 (WIBF). They play everything from Crash Test Dummies to Nine Inch Nails, to Depeche Mode, to the Breeders. Give them a listen. They do play Hole. Too bad I have a hard time hearing the Philadelphia station from here in Easton, because of the A/C outfit close to here, in Allentown, WAEB:B-104, on 104.1... and Lafayette won't let me put up a directional FM antenna...

2574. Radio Watchers -- Kansas City (7/11/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-07-14 00:12:24 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <301vt8$lg7@vixen.cso.uiuc.edu>
Source record: 39129

This is not going to be your typical "Radio Watchers" report. After spending two hours today telling *one* vendor, "no, we are not going to buy your TCP/IP utility package," I am just plain weirded out.

*****

University of Missouri-Kansas City station KCUR(FM) tonight (July 11) aired a half-hour performance art piece produced by local artists Tony Allard, Dwight Frizzell, and the students of the 'Conceptual Aerobics' class of the Kansas City Art Institute.

The program, called "Midwest Mobile Mix: A Fossil Media Event," aired at 8.30 pm with samples and on-location stereo recordings mixed live in the KCUR studios.

The program was billed as a "100,000-watt, 150-mile radius, live audio broadcast of indigenous audio fossils collected from the Southeast, the Southwest, the Northwest, and the Northeast regions of the Midwest."

The show began with a call to the Lollapalooza concert event simultaneously occurring in Kansas City, Kansas. After Tony Allard answered the phone, he stopped talking and let the ambient sounds of the concert be transmitted over the wire.

Next, sound taped in a vehicle of some type was heard. You could hear the "ping-ping-ping" of a car's seat belt alert and, in the background, a radio (tuned to KCUR) telling you "it's 6.01 in Kansas City."

From that point, the program featured (among other things; this is by no means a complete list) audio of church services, samples from an early 60s educational film on civil defense telling you to "tune to 640 or 1240 on your radio dial for further information" (remember CONELRAD?), a train ride with a woman reading names of the stops, an Indian ceremony, samples of a Harry Truman speech on the formation of NATO, a description of the Missouri Celebrity Turkey Hunt "for celebrities that are turkeys," and audio samples of per-inquiry ads from a TVRO system.

It's impossible to give you the flavor of the show in AIRWAVES; suffice to say that it was NOT "another commercial-free 30-minute marathon of today's lite mix young country hits." It could be tedious at times but, dammit, at least it was something different.

It also has me thinking about something else: why don't news/squawk stations (at least the few that still actually do something heretical like SEND REPORTERS OUT TO COVER STORIES) tape and play actualities in stereo? The technology is portable and readily available. It's shameful that radio has lost the will to use it and has retreated into a pit of regurgitated idiocy!

Imagine what Fred Friendly and Ed Murrow could have done with today's technology.

*****
For years (at least since the early 60s), Missouri has boasted one
of the more confusing situations regarding call letters (on the FM
dial).
There's KXTR in Kansas City, a pretty decent classical station;
often confused with KTXR in Springfield, which used to be notorious for
cutting away in the middle of its Bonneville beautiful music tapes to
jam more spots in every hour.
Now we have another. KACJ Boonville, soon to be on the air in the
Columbia market, has changed its calls to KTLH. This, of course, is not
to be confused with the BoNnEville station in Kansas City, KLTH.
*****
Speaking of that sector of the cosmos, Stan Jones asked in ARJ 692:
>After Dick Martin ended his show on WWL (I don't know why) he ended up
>in Kansas City, probably in the early 60's. I can't recall which
>station he was on (probably WDAF as that was one of the few KC
>stations we could get in mid-Missouri at night); Mark probably knows
>the answer, though this may be before his time.
Well, it WAS before my time. I asked around work today and nobody
seemed to remember. My neighbor in the next module over reminded me
that, until the late 60s, WDAF went off the air at 1 am nightly. Lo
siento mucho.
I know KMBC stayed on a 24-hour schedule, could it have been that
station? In the late 70s and early 80s at 980, there was the overnight
"Jazz in the Night with Julian Riding."
I'm surprised you couldn't get KMBC at night; while directional
toward the west, it's not very directional.
In fact, KMBZ (its present call letters) has an odd directional
set-up, easily visible in much of central Kansas City. It has a regular
vertical radiator quarter-wave tower and then, off to one side, a VERY
stubby self-supporting tower that's half the height of the other tower.
(A great place to view what KMBZ has: on Ward Parkway as it curves
from 55th Street, going down to the Country Club Plaza.)
*****
And then there's Alan Cassel, ex-St. Louisan, also writing in ARJ
692:
>At KMOX, the callers were screened, of course, but they were also
given
>considerably less time on the air. They asked their question, and the
>guest answered the question on the air. If the question was
sufficiently
>interesting, the host would follow up or would take follow-up
questions
>from listeners. <...>
Alan went on to say KMOX had to do it that way because of its huge
(20+-share) audiences. I believe KMOX got those audiences because it
spent considerable effort finding and keeping good, solid air talent,
and backed up the phrase "At Your Service" with a consistent record of
service and professionalism.
There may be another factor, too. Recall that St. Louis in the

1960s and 1970s went through newspaper strikes that lasted several weeks. (I remember two during the 70s -- one of which delayed the Post-Dispatch's 100th anniversary issue.) They probably caused even more people to turn to the radio. Because of the philosphy Bob Hyland had adopted of community service and high ethical standards, those sampling KMOX during the strikes learned they could depend on it and kept on listening even after the presses started running again.
While getting nostalgic for KMOX, though, let's keep in mind that it failed to go after younger audiences, who instead gravitated toward the FM dial. KMOX also did not serve the specific needs of the city's and county's black population.
During the 80s, I thought the perfect combo for market dominance would have been KMOX for the older demos and KSHE for the younger. The irony is that neither station is as dominant as it once was, with both failing to consider the wants or needs of younger generations.

2575. Pittsburgh Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1994-07-14 00:12:25 UTC
From: AMCCOY@delphi.com
Message-ID: <301vt9$lga@vixen.cso.uiuc.edu>
Source record: 39130

(Copyright, Pittsburgh Post-Gazette. Reprinted here
by permission. Republication prohibited in any medium.)

You just never know who's going to pop up as a caller on talk radio these days. Imagine how the folks in St. Louis felt when they heard President Clinton on KMOX. Clinton, usually the bash-ee on talk radio, recently called the news/talk station to do a little bashing of his own.
He described the largely conservative talk radio market ``a constant, unremitting drumbeat of negativism and cynicism,'' and targeted Rush Limbaugh for having three hours a day to say what he wants without response from the other side.
Maybe talk radio is just another curse for the Clinton administration. Just as television changed the way campaigns were waged in the Kennedy-Nixon election, the increasing presence of talk radio as a forum for public opinion - and hosts' opinions - is having a profound impact on the way government conducts its day-to-day business.
In a democracy, criticism should be encouraged and welcomed. But a lot of what goes out over the airwaves is mean-spirited and misinformed. Most often the host - not the public - is the culprit. Maybe the medium should take this turn-about criticism seriously, and learn to hit its targets without taking cheap shots.

Several local stations have been recognized for their work, both at the state and national levels.
WAMO-FM and WDVE-FM have been nominated for Billboard Magazine's Radio Station of the Year award in their respective urban and rock formats. WDVE program director Gene Romano is a nominee for p.d./operations manager of the year.
The magazine has added a new category - best syndicated personality. Nominees include the usual suspects - Don Imus, Howard Stern and Rush Limbaugh.
Stations are nominated by a panel of industry professionals. A ballot appeared in the trade journal's latest issue. Winners will be announced in September.
WTAE-AM cleaned up in several categories in the Pennsylvania Association of Broadcasters' awards.
Its morning news show, hosted by Joe DeStio and Alexandria Chaklos, won for best local newscast.
It also won honors for for best radio promotion

for its sports season programming and for best commercial.
KDKA-am won for best editorial.
The awards will be presented July 16 in Hershey, Pa.

Construction began on a new tower for KDKA last week.
The old one, which had been in use since 1936, was
demolished. The new tower will be installed at the
same Allison Park site by Stainless, Inc., a North
Wales, Pa.-based company that builds broadcast towers.
Program director Diane Cridland said the new tower
will mean a louder, clearer signal for listeners,
especially those in outlying areas.
A backup facility will be used in while construction
is going on. The project should be completed in about
three weeks, Cridland said.

David Cook has joined WXRB-FM for the 8 p.m. to
1 a.m. shift. He comes from a contemporary hits
station North Carolina. And Tanya Chepko is the
new marketing director for WDSY/WXRB/WEEP. She comes to Pittsburgh
from WOLZ-FM in Fort Myers, Fl.

Samuel Hazo's ``One Poem at a Time'' public radio
series is out on cassette. The entire series has
been recorded and can be ordered from Nova Audio Books
(1-800-648-2312). The price is $17, plus $3.50 for shipping.
WDUQ-FM is airing selected features from ``One Poem at a
Time'' this month on ``This Weekend in Pittsburgh,''
Fridays at 3:55 p.m.

Around the Dial:

Stand-up comedy on the airwaves works pretty well,
and so WDVE will do another live comedy segment
July 16. The comic is Tim Cavanaugh, who can be
heard live on the air from the Funny Bone from
11:30 p.m. to midnight.
Filling in for WDVE's vacationing Scott Paulsen
and Jim Krenn this week are selected guest DJs culled
from the listening audience.
Tomorrow, look for some familiar voices for one hour
on the morning show - Mike Lange and Paul Steigerwald.

The Cavani String Quartet will drop in for a live
performance at WQED-FM studios on Ted Sohier's
``Afternoon Classics.'' The chamber ensemble is in
town to close out the Summerfest season this weekend.

2576. Bay Area Radio/TV Station List

Newsgroup: rec.radio.broadcasting

Alan Moore (amo@cs.nott.ac.uk) wrote:

: That's probably very true. All announcer links are timed to the second,
: including the exact 2 second joining and leaving silences in and out of every
: programme and promo. It's professionalism like that which makes me proud to be
: British...

I sometimes cut voicetracks for a local public station in town (KALW 91.7) which runs BBC overnight from midnight to 5:00am (6:00am weekends). The breath pause is taken with exactitude every hour at :59:30 so that stations can break in. The only exception is during Sports Roundup and just before the Newshour where the format is different. Unfortunately, the American distributor (PRI, formerly APR, which puts in automation beeps) does *not* beep the affiliates until after the breath pause. It's done *manually* every hour. Even so, the timing is so exact the automation tones can usually silence the BBC between "This is London" and the start of Lilibolero (the music) for local station ID. It's a 1/3 second pause! They're THAT exact.

: And did you also know that the Big Ben chimes used on various BBC news
: programmes are the REAL chimes live?

I remember when they used to do it a couple times an hour. I have not heard the chimes on the World Service in at least a year, not even at :15:00, which was an almost never-fail time to air them. I miss them. I do remember listening to World Service and the announcer apologizing for the *lack* of chimes when Big Ben was being overhauled. That was probably a decade ago.

2578. Call Letter/Format change in Detroit

Newsgroup: rec.radio.broadcasting
Date: 1994-07-14 00:12:32 UTC
From: wd8jeljim@aol.com
Message-ID: <301vtg$lgo@vixen.cso.uiuc.edu>
Source record: 39133

The long awaited all-sports station WDFN 1130 hit the airwaves in Detroit this week. WDFN, with 50kw (lower at night) had been simulcasting WWWW(FM) for some time. I listened to portions of their (reported) first broadcast day 7-11 and there was plenty of interaction with callers, but there wasn't much fanfare (no jingles or even 'professional' IDs or sweeps were heard.) Quite laid-back. Since I am not a sports fan, I will not editorialize on the programming I heard. But anytime a simulcast situation is terminated, creating a "new" station, I am encouraged.

2579. Capacitor question

Famed New York sports broadcaster Chip Cipolla died July 10th of
complications of cancer at the age of 64. He broadcast many
pro sports teams but would best be remembered as a commentator
for New York Giants football on WNEW-AM, where he also served
as sports editor from 1960-1965 and also appeared on the
Klavan & Finch program.
He lived his final years in semi-retirement in Point
Pleasant, New Jersey.

>>Ham Ticket
>>(I'm KE6DX BTW [random call too]) but I don't understand how FM skips due to
>>atmospheric conditions
Simply put, smog is a sign, not a cause. Whenever a warm air mass gets trapped
under a cold air mass (a condition called a temperature inversion), the
boundary between cold and warm air becomes reflective to radio waves.
The same temperature inversion that traps warm air traps smog. Another
similiar phenomenon is ducting. Sometime drive up into the hills into the
center of a smog mass, your 2-meter signal will be ducted over the ocean for
miles!!! I believe the current record for 2 meter DX is from California to
Hawaii through a tropo-duct (The smog duct we just discussed) by WB6NOA
I hope I kept it simple without being condescending. If you would like a
better explanation email me, or ask me to post it.

Hello!

Can some kind soul explain to the uninitiated
whence the oft-read speak (in Tom Clancy
novels, for instance)
"I read you five by five" is derived?
I take it it means "I read you loud and
clear" or "... at full signal strength"
or some such, but where does it
really come from? Five of what? Watt? .. eh, wat ..
Well, anyway ...
Thanks, and greetings,

Christian

2583. Name My Radio Show!

Message-ID: <301vtq$lhe@vixen.cso.uiuc.edu>
Source record: 39138

Hello... I am a host producer of a two hour radio program for the Canadian Broadcasting Corporation station out of Sudbury, Ontario. I would like your help! Currently the program is into its summer season. I'm back in the "air-chair" in September. Here's where I need your help. I need a new name for the show. When I took over a year ago it had a very cumbersome moniker: "Just After Four" (the program begins at 16:04:30) and then following an international news cast at 1700, the name changed to (yes, you guessed it) "Just After Five).

The show has an arts and entertainment format. We try to be connected as much as we ca to our broadcast area, North eastern Ontario. We air human interest pieces and play quite a bit of music. We also air regional newscasts on the half hour and an International sports cast.

So there you have it. Now I need a new name. I'm sorry I can't offer a huge prize but we do have some nifty graft made up. Sweat suits that include our corporate name and logo.

I'd enjoy any suggestions you might care to make.

Thanks... Barry Mercer, CBC Northern Ontario Radio. Cheers.

2584. Rush

Newsgroup: rec.radio.broadcasting

Source record: 39139

>From Bill:

> No, Rush is smoother than that. He fades the caller's audio with a
> hand gesture to the board op........

I always assumed that he did this, but when his 3-hour radio program was televised on C-SPAN a few months back, I never saw it happen. Of course, he gave queues for other things (breaks, musical selections and other things on cart).

>From Bob Smith:

> Rush may be polite (by comparison) to critical callers, but have you
> ever noticed how few he allows to get on the air?

If you believe Rush, there are darn few people that try to call with an opposing opinion. Just this past Friday someone called and asked him why so few callers disagree with him. His answer indicates that he receives few such calls, not that they are screened out.

>From GaryB:

> Might be good for him, but lousy for the affils who've been shelling
> out mega-bucks for those mega-dittoes.

Hmmm. I had heard (via the Success magazine article about Rush about a year ago) that the show is given away free of charge (with the motivation for taking it being the ability to sell local spots). Is this no longer true (or never true)?

HOME GROWN UTILITIES POP UP!

by Barry Mishkind

Tucson, AZ - In last month's installment, we demonstrated how you can use the BASIC interpreter in your computer to write little utility programs to make certain tasks easier.

The example we used lets you calculate the output power of an FM transmitter, based on the PA voltage and current and the efficiency factor. I've often used this sort of program to generate charts for air personnel at many different stations.

But there's another way in which you can use the code in this little program. Sometimes when checking the logs, I find I don't have a chart at hand. It's back in the control room. So, I thought, why not a quick program to check suspect readings in the shop?

Using the same program we discussed last month, it only takes a couple of changes to turn it into a quick calculator.

First, we prepare it for screen output by adding these lines:

```
10 CLS '<-- This clears the screen
20 LOCATE 10 '<-- This sets the cursor a few lines down from the top
```

to the original program from last month:

```
100 INPUT "Efficiency factor = ";EF
110 INPUT "Plate Voltage = ";EP
120 INPUT "Plate Current = ";IP
125 IP = INT((IP + .0005)*1000)/1000
130 TPO = EP * IP * EF
135 TPO = INT((TPO + .05)*10)/10
140 PRINT TPO; "watts"
```

As we discussed last time, we can let the program enter the efficiency factor by changing line 100 to read:

```
100 EF = .88 '<-- This sets EF to 88%
```

Now we have a neat, easy way to check log suspect entries. However once we do a calculation, the program ends, and we must restart it for another set of numbers. This is easily solved by forcing a test.

```
150 PRINT : INPUT "Do you want to do another calculation";Q$
160 IF Q$ = "N" or Q$ = "n" END ELSE GOTO 10
```

As you can see, the last line tests for either a capital or lower case "N" to terminate the program. Whether you run this from BASIC or as a compiled .EXE file (naming it POWEROUT.EXE, for example), this utility can save a lot of hassle.

Nevertheless, there is one little problem with POWEROUT that you've probably noticed. To use this program, we have to stop everything else. Wouldn't it be neat to be able to just press a "hot key" combination and have the program "pop up" so we could use it, and then go back to what we were doing?

And that is exactly what you can do with any of your programs.

Oooohs and aaaaaahs

What we'll show you now is a way to really amaze your friends and workmates.

Among the various compilers for BASIC programs, I have come to prefer PowerBasic. It has a number of features that allow me to create programs quickly and easily. But one of the greatest new features in Version 3, is the ability to turn virtually any program into a "pop up."

With a few commands, POWEROUT can be set up so any special combination of keys you desire will save the screenful of work you are using, pop up the power calculator, and then return you to where you were. With many DOS applications, you can even "stuff" the answers you get back into your primary application. For example, if you're doing a maintenance log, pop up POWEROUT, and when you return, the power output is inserted in your word processor, for example.

This can be a real great help with information you often need, but can't find. A popup can store a variety of license numbers or frequencies, ready when you need them. Or perhaps a listing of key dates, such as license renewal or tower inspections, that you can update and check anytime you want. (In fact, it would be easy to make this sort of popup alert you with a tone as you got close to important dates.)

Over in the news or sales department, a little popup could hold the key phone numbers for contacts. Pop them up, make your call, and carry on with what you were doing. With a little programming talent, you could probably even get the popup to dial the number for you.

The receptionist or the request line interns probably would welcome a popup or two to show the air shifts, current playlist, even sales department pager numbers. The list of uses is endless. All you need to develop these, or your own custom popups or regular programs is PowerBasic 3.0.

To show you how neat it is to have this capability on your desktop, here are two ways you can try them out for yourself:

First, if you haven't already keyed in POWEROUT from last month, you can get this on a diskette by writing to me. In addition to the BASIC code, enhanced and ready to print out a transmitter power output chart, you'll receive a version of POWEROUT in popup form. Plus, another popup program will be included ready to help your staff calculate wind chill factors in a flash.

Just send $7.50 to cover diskette, postage and handling to Barry Mishkind, 2033 S. Augusta Place, Tucson, AZ 85710.

To receive more information on the many features of PowerBasic 3.0 itself and/or a free demo diskette, call 1-800-780-7707.

Road Warrior Update...

By the way, if you've been considering a notebook computer to carry your work with you, or to control the transmitter from your favorite hideaway, the prices and capabilities are changing rapidly in your favor. One recent standout is the Epson ActionNote 500C, an LCD color unit with 120 mB hD, 4 mB of RAM, a built-in fax/modem, and a carrying case, all for under $2000 on the street.

A road test of notebooks and a discussion of remote computing will be the subject of an upcoming column. Stay tuned.

Barry Mishkind, RW's "Eclectic Engineer," can be reached at barry@coyote.datalog.com" on the interenet.

2586. Re: Talkshow Goodbyes

: Nope. I disagree entirely. First, I think the best way to show that you
: care is to *care* -- period. If you've got the right attitude and
: genuinely like people you can get by with nearly anthing because they
: know what you're about. Remember, the show is *not* being done for the
: callers; it's being done for the *other* 99.5% of the listners who never
: call talkshows. (Yes it's true. Only about 1/2 a percent of listeners
: actually call in, and it's never gonna change.)

I think Neil Rogers does it right (and I apologize for bringing him up
again, I just happen to think he's the most talented man in radio, at
least that I've heard.) He says goodbye to the nice callers or the
callers that have something of value to contribute to the show, and hangs
up on the ones who aren't or don't. In other words, he treats people
like he might treat them in real life.

ObRepeatedPlea : Just another shameless plea to anyone who could send me
a few tapes of Neil's show. I'm getting really desperate.

Just a bit of items while waiting for the Arbitrons to come out..

*I caught a bit of Gary McNamara's show today on WBEN(NewsTalk 930);
I couldn't yesterday because I had my car in the shop to see what was
wrong with it. Based on what I heard,I think he'll do as well as Dave
May did. Gary's about as calm on air as Dave was,and during the 10am
hour,he had an interesting topic:Do you define yourself as conservative
or liberal(and used definitions from Webster's dictionary to define what
the two words meant).

*There's been a good thread on Top 40 on AM radio. It happens that
there is a top 40 station in the area:CHOG(640,50 kW,Toronto;AM 640). Its
music tends to be in that range,with a good splash of alternative thrown
in. However,it's not all T-40:it has a number of talk shows(i.e.Toronto
Talks w/Bill Carroll,Touchtone,The Village Voice,the Sunday Night Sex
Show)in its lineup. Last year,you'll recall,it outlasted CFTR-which was
top 40 for 22 years before they switched to all news as 680 News.(Trivia:
Can you name any 3 air personalities that worked at CFTR-not including
Jesse & Gene or Tarzan Dan,who moved to AM 640 when CFTR ended top 40?
Answer next report.)
Top 40 in Canada can only survive on AM for this reason:CanCon
rules require that an FM station can only have 40% of its music as
current;no such rules exist on AM.(I may be wrong;can any Canadians
check back and correct me if necessary?)

*About WGR:They now begin their newscasts with "Here are the stories
you'll be talking about..." One word:STUPID!!!
Also,if anyone is on a Prime-affiliated regional sports network,
did anyone catch the Double A All-Star Game from Binghamton,N.Y.last
night? Pete Weber,the long-time voice of the Bisons,did the play-by-play.

*Hopefully,this will end the KB changes I noted in my 7/8 report:
The G-Man has been terminated with extreme predjudice. Which is to say,
as of yesterday,G.Gordon Liddy is no longer on KB. This represents about
the sixth lineup change in a year-and-a-half. How it's happened:

Jan.93:Howard Stern,local talk,Alan Colmes,local sports talk
Spr.:Add Liddy
Jun.:Drop Colmes,add Don & Mike as well as Pete Rose
Spr.94:Add the Gaches
May:Drop Don & Mike
Jul.:Drop Liddy;add Tom Leykis,The Fabulous Sports Babe & Dr.Laura
Schlessinger

Sounds like KB needs a new tag line-The Bird 1520(for being all satellite)

*About the TVRO our moderator has:he was referring to the fact
that he could get hundreds of stations-it's through a Single Channel
Per Carrier(SCPC)system.

FAB...(for any Thunderbirds buffs)

Art Bell, the nationally syndicated host based in Las Vegas, last week reached a milestone of 100 and 101-stations on the CBC network. He is carried on KOGO-AM (600, 5kw, U) San Diego; and KDWN-AM (720, 50kw, DA-I) Las Vegas.

Is there a list of available stations; or if he is in your town/reception area, could you post??

I am also told that he has a UU.NET group called alt.fan.art-bell or something to that effect. Can anyone confirm?? [The company I work for has a firewall on alt. newsgroups. :~( ]

Thanks!

I read in this morning's (Wednesday's) Wall Street Journal that the month of May (1994) was the first month in history that radio advertising revenue topped one billion dollars. In this forum many of us have sometimes expressed dissatisfaction with the state of broadcast radio today, but it looks like the industry is doing SOMETHING right.

2590. Re : How are Boston's Country Stations fairing?

Newsgroup: rec.radio.broadcasting
Date: 1994-07-14 06:48:46 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <302n4e$sd1@vixen.cso.uiuc.edu>
Source record: 39145

From: fox@nanook.enet.dec.com (David B. Fox) :

>Was wondering about how the two Boston Country convert stations are doing since
>they changed formats a while ago.

....
>I also used to listen to WBCS (formerly WCDJ) as the only full time Jazz station
>in town. Jesse Sanditch was a great DJ and widened my jazz horizons
>considerably. Anyone know where he is now?

If I'm not mistaken, he might be a part of WMJX's Sunday morning jazz
show...

>Am curious how they're ratings are. Talk was that both weren't going to survive
>and that 'CLB had the deeper money pockets. How are they comparing rating-wise
>to my now no so new favorite station WBMX?

In the winter book, Hot AC WBMX-98.5FM registered 4.1 rating in the general
12+ demo which was good enough for 8th place. WCLB 105.7FM('Hot New
Country') had a 2.1 almost doubling WBCS 96.9FM('Boston Country Station').
In a desparation move 2 weeks ago, WBCS lured away 'CLB's night-time jock/
consultant and 20-year Boston vet Harry Nelson to take over as its new
program director. Last week Nelson raided 'CLB for some on-air
talent. Another longtime Boston personality Jim Roberts
who was doing part-time/fill-in work at 'CLB is now part 'BCS crew.
He's doing 3-7pm show. Jim O'Brien who held that slot for a year
was let go...
Nelson and Roberts worked together at at WROR 98.5FM(now WBMX) during
1980's. Nelson was PD and Roberts hosted a night-time show. Roberts
was let go a couple years ago by 'BMX management.

WBCS is definetly in trouble. I'm not sure how much longer can they
go on with the C+W format...It's not necessarily the question
of which company[Greater Media(WBCS); Fairbanks(WCLB)] has 'the deeper
money pockets'. I think the problem might be Greater Media's management
team in Boston. They have 2 FM signals - country+western WBCS 96.9FM
and AC WMJX 106.7FM. Both stations are in somewhat of a downtrend for
the past year or so - 'BCS is getting creamed by 'CLB and 'MJX is steadily
losing a share of its audience to both, surging Hot AC WBMX and a solid
AAA WBOS 92.9FM...Greater Media people in Boston are quite stubborn
about sticking with a country format at WBCS and not making any
waves at WMJX. It seems like they're doing things on principle
instead of adjusting to competition...

Speaking of WBMX, if Arbitrends('rolling averages') are any indications,
their spring book(to be released later this week) will be the best in

the history of that AC station...Not bad at all.

-Mark

2591. Bruce Williams/Talknet in Seattle

Newsgroup: rec.radio.broadcasting

It appears that KJR has decided to go 100 percent sports and is no longer carrying the Bruce Williams show/Talknet. Does anyone know if another radio station will be picking Bruce up? It seems like his show would be a natural for KOMO, KING or KIRO. I can't believe that some station won't pick up one of the most popular shows in America.

Propagation of VHF and UHF signals over relatively short distances of a few hundred miles or less is typically due to "tropospheric ducting". The troposphere "bends" the signals so that they follow the curvature of the earth. Temperature inversions seem to enhance this (they keep the smog close to the earth, too). I'm no meteorologist, perhaps others on here can provide more detail about this.

2593. Crank up the Transmitter

Newsgroup: rec.radio.broadcasting
Date: 1994-07-14 06:48:54 UTC
From: sroberts23@aol.com
Message-ID: <302n4m$sdd@vixen.cso.uiuc.edu>
Source record: 39148

>>I don't understand how FM skips due to atmospheric conditions.

The way I understand it, when cool air (which is denser than hot air) rides on top of the hot (instead of the normal hot on top of cool, radio waves (FM, business band, and some others) will hit the area where the two air masses meet and not be able to penetrate the cooler air. Kind of like a mirror does for light. So, they ride along the boundary for (sometimes) great distances. Why it works for some forms of radio and not others, I believe, has entirely to do with wavelength -- AM is too long. I think it effects most things between the FM wavelengths and light. (I know it at least effects up to the high 100 megahertz range).

The inversion of cool and hot air is also what causes the ozone to be held near the ground -- that's why FM skip can be expected whenever the smog gets bad.

At least, that's how I understand it.....

Best,
Scott

Source record: 39050

Well, thanks to Entertainment Tonight on 6/11/94, I got a look at the new Top Secret Rick Dees Burbank Studio. Wow! KIIS-FM still relies heavily on carts. They do the same thing at the "Kiss" station in Dallas. I believe it is Gannett's Theory that Music sounds better on Cart than on CD. Actually, I think it's done to prevent the jocks from playing the wrong songs.

So, Dees had at least 8 people in the studio helping him. I thought Howard Stern with 4 plus Robin was a lot, but 8??? I'm sure he kicked a few out before ET came in so that there would be room for the cameras (and his ego). And Dickie Dees new board is a round knob pot board. Are slide pot boards out now along with CDs? Will vinyl make a resurgence soon at KIIS? What? No Disco Duck on CD? Aha!

Subject: THE YIDDISH VOICE - New Boston Radio Show

FOR IMMEDIATE RELEASE
Boston, MA., 12 July 94
Contact: Mark David (617) 738-1870

THE YIDDISH VOICE -- NEW BOSTON RADIO SHOW

First Program is in Memory of the Lubavitcher Rebbe

The Yiddish Voice, a brand new Yiddish-language weekly radio show, is set to begin broadcasting here on WUNR 1600 AM/Boston every wednesday evening from 7:30 pm to 8:30 pm.

The show features music, poetry, comedy, interviews, news, commentary, and announcements of current events, all of it in the Yiddish language.

The Yiddish Voice (to be known, in Yiddish, as 'Dos Yidishe Kol') is actually a "spin-off" from another all-Yiddish Boston radio show, The Yiddish Hour, which has been broadcast out of WBRS 100 FM/Waltham, a non-commercial station, for the past three and a half years.

The new show will overcome the number one "complaint" about the old show: lack of reception. The new show will operate on a 5,000 Watt commercial AM station, and will reach all of the Metro Boston area, whereas the old one was only heard in Waltham and surrounding towns, on FM.

The Yiddish Voice will operate on a not-for-profit basis, but will seek advertising, grants, and donations to cover such costs as station airtime, equipment, records and tapes, and promotional materials.

The all-volunteer staff making the transition from the Yiddish Hour to the Yiddish Voice include Mark David, the show's producer and regular host and Hasia Segal, a native of Lithuania, who will continue to offer frequent special presentations and exclusive interviews of important personalities. Numerous other contributors will continue to be featured regularly. Some programming will be shared between the Yiddish Hour and the Yiddish Voice.

The first broadcast will be Wednesday, July 13, at 7:30 p.m. This program is specially dedicated to the memory of the Lubavitcher Rebbe, on the occasion of of the Shloyshim (30 days), marking 30 days since his passing away. The guest speaker is Rabbi Haim Cement, of the Lubavitz Yeshiva in Brookline, Mass.

: There may be another factor, too. Recall that St. Louis in the
: 1960s and 1970s went through newspaper strikes that lasted several
: weeks. (I remember two during the 70s -- one of which delayed the
: Post-Dispatch's 100th anniversary issue.) They probably caused even
: more people to turn to the radio. Because of the philosphy Bob Hyland
: had adopted of community service and high ethical standards, those
: sampling KMOX during the strikes learned they could depend on it and
: kept on listening even after the presses started running again.
: While getting nostalgic for KMOX, though, let's keep in mind that it
: failed to go after younger audiences, who instead gravitated toward the
: FM dial. KMOX also did not serve the specific needs of the city's and
: county's black population.

You seem to be implying that younger audiences are not interested in
community service or high ethical standards. And even if you are not,
KMOX seems to be leaning at least a little bit away from that with its
current programming, apparently in an effort to attract a younger audience.

That leaves me a bit puzzled about what younger audiences *are*
interested in, if not community service and/or high ethical standards,
and where, if anywhere, we are going to find these things in the media if
young people (who will be old people tomorrow) are not interested in them
now.

. . . Rush Limbaugh proves that radio can be a gas appliance . . .

2599. KTID & Saul Levine

Newsgroup: rec.radio.broadcasting
Date: 1994-07-14 06:49:03 UTC
From: LanceBKOST@aol.com
Message-ID: <302n4v$see@vixen.cso.uiuc.edu>
Source record: 39054

When I heard that Saul Levine (Mt. Wilson FM Broadcasters) is trying to buy KTID in San Rafael, it sounded fine to me, However, hoping that this isn't going to be a wasted format on a wasted signal.

Saul Levine is a dedicated Classical broadcaster. He owns KKGO-AM&FM here in SoCal. KKGO-FM is obviously the money maker here. It has respectable ratings (High 1's-Very low 2's) in the most vicious market on the planet (Outside of K-Mart on Dollar Days). KKGO-AM is another story. It is a 10k Daytime signal that JUST signed on at 1050, licensed to Frazier Park, which is about 70 miles north of LA. In listening to the FM, they mentioned that you could pick up the AM "From Magic Mountain north thru the Grapevine.." A notorious Radio graveyard... It was mentioned that the AM would try to serve Bakersfield more than LA. Makes sense. The problem is this, KKGO for MANY years has been into the simulcast of the FM on a weak signaled AM. Preferably an AM that no one can get. They were on at 540AM for a while, which is licensed to Costa Mesa, but transmitting from Hesperia, 100 miles away..(Figure THAT one out.) They blew that up after a while and began an AM/AM simulcast with KJQI (1260AM-San Fernando Valley-Music of your Life) which is also owned by Levine. So now in the LA "area" Saul Levine OWNS 3 AM's and an FM that is paying the bills for the whole lot of them.

I hope that KTID doesn't just wind up as another far-flung station on which to simulcast KKGO. I like KKGO, don't get me wrong. But Saul, If you're gonna do classical, Do it locally. There are more announcers who can pronounce those wierd Classical names than we all think. (I however, am not one of those. My own name is difficult enough....)

Lance Ballance
Overnight Personality
KOST-FM Los Angeles
"Coast 103.5. Continous Soft Hits"

[Moderator's Note: I believe I heard from someone that the owners of KTID have secured the rights to the KKHI calls AND their music library. Sounds like he is going local with it. Bill]

2600. An answer for Leykis' feelings to KFI?

Newsgroup: rec.radio.broadcasting
Date: 1994-07-14 06:49:09 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <302n55$seo@vixen.cso.uiuc.edu>
Source record: 39055

Some time ago,the r.r.b. board debated why Tom Leykis was booted
from KFI and why he was still rubbed raw by it. Maybe I can answer
this. This excerpt is from the April/May 1993 issue of EXTRA!,FAIR's
publication:

"KFI,one of L.A.'s most prominent talk stations,had implemented a
'topic-approval policy' some months prior,requiring hosts to get management
pre-approval of all topics discussed. But evidence leaked from inside KFI
indicated that the policy was applied only to Leykis,in an attempt to
limit his show's political content.(The New York-based (Rush)Limbaugh
never submitted his topics for pre-approval.)
-sidebar by Janine Jackson

That may explain it;then again,it may not.

WLS-FM's new id (found this one kind of funny)
"Irradiating 4 million milliwatts from the top of the ...building
this is WLS-FM"
So what's 4 million mW...I guess 4KW? Must be their microwave
carry to the transmitter? Is my math right?

2606. RadioRopa Info on long wave ?!

Newsgroup: rec.radio.broadcasting
Date: 1994-07-14 06:49:20 UTC
From: blank@cip.informatik.uni-wuerzburg.de
Message-ID: <302n5g$sfa@vixen.cso.uiuc.edu>
Source record: 39061

Hello,

Yesterday I wanted to listen to the "RadioRopa Info DX-Report" via the long-
wave frequency on 261 khz.
I was very surprised not to hear the DX-Report from 20.00 to 21.00 UTC (22.00-
23.00 CET) but to hear a russian broadcast. What happened ? Does RadioRopa
Info no longer use the long wave frequency ?
I don ' t have a short wave receiver and do not have the possibility to
get satellite radio, so I depend on the long wave transmissions in order to
listen to RadioRopa Info.

Can anyone tell me what happened to this broadcast ?

In article <2vqh5j$q0f@vixen.cso.uiuc.edu>,
Mike Dowling in WPB <mikedow@gate.net> wrote:

>Today you still get the variety, but you have to press a few buttons. My
>car radio shows my varied tastes by it's selections: WXEL (NPR News and
>Classical), WLVE/Love 94/Miami (Jazz), WOVV/Star 95.5 (CHR/Dance),
>WFLC/Coast 97.3/Miami (Soft AC) and WRMF (Hot AC).

As someone who listens to the radio, but doesn't have any influence over the programming, I've become rather irritated by both the increasing fragmentation of the ``modern'' formats (i.e., AC, CHR, and probably CW), and the increasing numbers of stations running the same programming.

This problem is exacerbated in large markets. If we consider just Boston and adjacent markets (Manchester, Worcester, Providence, and Cape Cod), there are at least SIX stations playing some variant of AC, including three in the Boston market alone. Boston seems to have two CHRoid outlets (one CHurban and one dance-CHR), but to get just plain ol' hit radio, it's necessary to look elsewhere. This sort of thing doesn't happen in smaller markets, since when the pie is smaller, you have to take a larger slice in order to make a profit.

Most people (taking my parents as paradigmatic) don't want to change the station. What they want is something that they can put on, which will provide sufficient background noise, but won't irritate them. This has caused owners and managers to make their stations be as bland, as tasteless, as inoffensive as possible. This results in people having a ``choice'' between ``Mix 98.5'', ``Variety 99.1'', ``Wish 99.5'', and ``Magic 106.7''. (Not to mention ``Lite 92.5''!)

The problem, of course, lies in the fact that these stations play pretty much all the same music, and keep on playing it, over and over and over again. Most of these stations have more variety in their bumpers than in their programming! (Of course, they claim to not do this, and in a literal sense, they are probably correct. To my ears, however, there is not much difference between alternating ``Any Time You Need a Friend'' and ``Time Love & Tenderness'', and alternating /different/ Mariah Carey and Michael Bolton songs.)

So, the station personnel have ensured that I'll try their station (by not playing really irritating programming) for about fifteen minutes, after which point I'll get bored and change stations or put on a CD.

As a result, I've pretty much given up on the music radio scene here in Boston, as there's nothing around that I would particularly want to

wake up (or go to sleep or eat a meal) to. I have naturally
gravitated to WBZ's news programming (it didn't hurt that I know
someone there) during the day, and anything from BBC World Service to
C-SPAN to Headline News at night (unless Brudnoy actually has an
interesting guest, and the station actually bothered to promote it
while I was listening to the news).

> the "Dear Shadoe" section. It sometimes could make you cry. I've really
> missed the show since moving back to the USA (can only listen to Casey Kasem
> and Dick Clark now, both carried on local FM stations).

Shadoe is on AFN and Casey Kasem can be heard on VOA Europe.

Also, the AT40 and similar American shows are carried on a number of European
station, but it is dubbed more or less:

Rock-FM-Radio in Bratislava Slovakia were using original jingles and
the hitlist. This show I also heard on a Czeck private station a few years ago.

On CADENA-40 in Spain you hear Shadoes original voice in English and then it
is translated by a Spanish DJ.

On M40 France (sundays till 13:00) Rick Dees show is broadcast, again a few
times you hear his original voice in English followed by a French translation.

This all looks like franchising, does franchising really exist in radio-land?

To me this looks absurd: like radio with subtitles.
Why on earth would someone listen to an American radio show that is ripped apart
by translations. The American DJ's aren't known in those countries anyway.
I wonder why doesn't the individual radiostation in Europe just take the
top-40-list and make their own show out of it.

I have not checked on German radio stations, I only listen to them very rarely,
satellite radio is so much better.

Personally I find *any* hitlist program *extremly* boring, you just know what
comes next, the variety is so little.

Just a note: Dr. Demento can be heard on AFN MW (873, 1043, 1107) saturday
mornings 0:00-2:00 local time.

2609. Sporadic-E

Newsgroup: rec.radio.broadcasting
Date: 1994-07-14 06:49:27 UTC
From: Chris Gay <KU4A@LEXVMK.VNET.IBM.COM>
Message-ID: <302n5n$sfg@vixen.cso.uiuc.edu>
Source record: 39064

We've had several postings this summer about sporadic-E propagation on the FM broadcast band. The July, 1994 issue of QST Magazine (now available on news stands begining with this issue!!!) has an interesting article about 144 MHz sporadic-E. It was written by Emil Pocock, who has done extensive research in this area for many years. Although the article is oriented toward amateur radio operators interested in the 144 MHz band, there is a good bit of information about Es on the FM broadcast band. At the end of the article is a list of references to other articles about Es. The article starts on page 37.

Lance Ballance was asking about the apparent lack of FM broadcast band Es on the west coast. Interestingly, the article indicates that, at least at 144 MHz, the eastern half of the U.S. appears to enjoy more frequent episodes of sporadic-E. However, on the amateur bands, the only way to know if propagation exists is if there is someone transmitting at the other end of the path. So differences in population density probably affect the data to a great extent. In other words, the band may open between two sparsely populated areas, and not enough people are on the air for the propagation to be observed. I'm sure there are relatively fewer broadcast stations in sparsely populated areas. It is hard for me to believe that there are any geophysical differences that would cause sporadic-E to be less common in the western U.S. There are probably times when the band has been open, but to an area with few stations and the opening may not have been apparent.

I work for a coalition of transportation agencies in the NYC area that coordinates transportration information. One of our responsibilities is to get the information to the public and one of the best ways to do this is through the commercial traffic reporting services (Shadow & Metro in NYC). I'd like to know if anyone out there has some comments on te relationship between the radio traffic reporters in other markets with their local transportation agencies (especially what seems to be working well) or any innovative ideas that stations in other parts of the country may be doing when it comes to traffic reports. Thanks.

Some news of interest for Boston radio listeners...

WILD 1090 AM, the only "real" urban station in Boston, has made some personel changes as of last week. Afternoon drive, formerly occupied by "The Heavyweight" Ray Thomas, now features the former midday guy, Mark Jordan. At midday, newcomer Tanya King, supposedly out of New York radio, takes over for Mark. This leaves Ray Thomas out of the picture. Any news as to the where abouts of Ray Thomas or former WILD afternoon drive jock Dave Cruz would be appreciated.

A rumor going around the radio world here in Boston is the sudden rearrangement at Jammin' 94.5 (WJMN). Rumor has it the upper management came in and cleared house. Possibly Confirming some of this report, Karen Blake who had been with 94.5 through the WZOU days was heared on WPRO 92.3 in Providence. She is no longer on WJMN. Marc Clark, on the other hand, is still giving his corny Marc with a "c" jokes on JMN which shows that everyone hasen't been let go. Rumors are also saying that a format change is in the works for JMN. Top 40/Alternative, could this be possible. Listeners that I have polled had mixed feelings on this topic. Why would JMN change after just a year at their present format which received good ratings for its market? That's radio for ya.

Here's the latest in radio news from Carlsbad, California:

KSON AM & FM, a simulcast country station based in San Diego, has been nominated for "Station of the Year" by Billboard magazine. KSON is only one of the five country stations nominated for the award, a published report in the San Diego Tribune. KSON's Mike Shepard has been nominated as Program/ Operations Director of the Year. The winners for all catagories will be announced Aug. 26 by Billboard.

KSON is at 1240-AM (1kw); and 97.3 (50kw).

KOGO's morning announcer, Steven O. Sellers has accepted an offer to host a morning radio show in San Antonio, Texas. Before joining the Hot Talk outlet, Sellers was at KIOZ-FM (102.1, 10kw) Oceanside. KOGO-AM (600, 5kw, U) KOIZ-FM, KKLQ-FM (106.5), and KKLQ-AM (1320) are owned by Par Broadcasting.

The San Diego Tribune reported that local radio executives have announced a six-week program for "minority" youngsters. Tom Barker, GM of KGB (FM, 101.5) and KPOP (AM, 1360) said, "It's often difficult to find minority candidates whose goals include radio."

More than 15-San Diego county broadcasters will take part. The program ends on August 26. Upon succesful completion, the 20-hour-per-week project will net the students a stipend of $499.

2615. Radio Watchers - Cleveland

Newsgroup: rec.radio.broadcasting
Date: 1994-07-15 06:26:09 UTC
From: ai629@cleveland.Freenet.Edu
Message-ID: <305a61$2je@vixen.cso.uiuc.edu>
Source record: 39070

Here's the latest from the Cleveland area....
for July 13, 1994

WHK Changes On-Air Lineup

After only six weeks as a sports talker, WHK-AM/1420 has replaced half of its on-air lineup.

Tom Bush from 9 am - 1 pm was replaced by Pat McCabe and Rick Bay's 1 pm - 4 pm shift is now held by Tony Rizzo.

The station still has yet to prove itself as competition for either of Cleveland's 2 50,000 watt news/sports talkers WWWE-AM/1100 or WKNR-AM/1220.

Speaking of Sports...

Mike "Mr. Know-It-All" Trivisonno is now the new host of WWWE-AM's "Sportsline" from 6 - 8 pm weeknights.

He replaces Mike Snyder who remains with the station as Sports Director.

More recently, Trivisonno was a fixture on the WNCX-FM/98.5 morning show before the days of Howard Stern.

An Update

Part-time WMMS-FM/100.7 engineer Bill Alford has been indicted by the Cuyahoga County Grand Jury on three counts of breaking and entering, possession of criminal tools, and disrupting a public service.

He is the one who alledgedly disrupted Howard Stern's national broadcast (heard locally over WNCX-FM/98.) aired from Cleveland one morning last month.

WMMS suspended him without pay. The FCC is still investigating.

New Buzzard Morning Show

It's official! The Brian (Fowler) and Joe (Cronauer) Radio Show has taken over as the new Buzzard Morning Zoo on WMMS-FM/100.7

Reports say they were able to negotiate out of their non-compete clause with WENZ-FM/107.9 after that station failed to renew the duo's contract July 12th.

The only leftover from the old Morning Zoo is Ed (Flash)
Ferenc who will continue as news director.

Will the Buzzards again rule the roost? Stay Tuned!

Finally, Outta the Market

Rumors have it that Youngstown's first duopoly is just about
complete with stations WHOT-FM/AM and WBBG-FM/WBBW-AM being
purchased from a New York group.

I need a little help and maybe someone on the net can provide it.

Can anyone supply me information about available PC-compatible software designed to handle the call screening/answering process during telephone talk shows? I'm looking for something that can accommodate at least four lines, the callers name and location, topic and time spent on home.

I used to have a program that pretty much handled all of the above requirements way back in the CP/M operating system days...around 1982 or so. I've since lost the software, the name of the vendor...and, of course, the CP/M computers are long, long gone.

Any help will be much appreciated.

Thanks.

I believe it comes from an obsolete shorthand for evaluating signals, SINPO. It was an acronym for Strength, Interference, Noise, Propagation, and Overall. Each characteristic was rated on a 1-5 scale. Hence, "5 by 5" meant "Perfect reception in every way".

On the other hand, it could be from an old boogie-woogie song, "Mister Five-by-five".

Amateur Radio Operators use the R-S-T system for discussing relative signal strengths and the 'tone' of c-w or morse.

1 is low and 5 is high for Readability and Signal strength (T is for Tone and NOT used on voice). Military ops use the same system (or maybe we amateurs 'stole' it like so many other systems)...so 5 BY 5 means your readability is excellent as is your signal strength.

Only rumor I have which appears to be new news is that Group W may be
shifting network affiliations, and is in talks with the 4 commercial
networks about these affiliations. Historically, of course, Westinghouse
station had been aligned with NBC (going back to the days of their part
ownership in it). A couple Group W stations are CBS affiliates and there
had been talk that these might switch.

As to a sale, a couple rumors I have heard is that Group W might be for
sale to reduce Westinghouse's debt load; since broadcasting appears to be
their only cash cow, it might be necessary to sell in order to satisfy
debt in their electronics and aerospace divisions. But, there has been
talk about this for a couple years, so who knows what's going on. The
rumors persist, but they've gone on for some time.

From: fybush@world.std.com
Message-ID: <305a6a$2jr@vixen.cso.uiuc.edu>
Source record: 39076

I know it's not strictly radio, but there will possibly be
radio consequences:

CBS and Group W have reached an agreement to affiliate all
of Group W's TV stations with CBS. KPIX-TV San Francisco
and KDKA-TV Pittsburgh are already with CBS. WJZ-TV Baltimore
was about to lose its ABC affiliation to WMAR-TV 2. WBZ-TV
Boston is switching from NBC. And NBC affiliate KYW-TV
is being transferred to a new company that will be owned
49% by CBS and 51% by Group W. KYW-TV will become Philadelphia's
new CBS affiliate. CBS is selling its owned and operated
WCAU-TV 10...no buyer yet.

As for radio, no changes, even in Philadelphia, where CBS's
WGMP-1210/WOGL-98.1 will continue to operate separately from
Group W's KYW-1060/WMMR-93.3.

We're in the midst of the biggest TV shakeup in the history
of the business (WBZ-TV and KYW-TV had both been NBC affiliates
from the very start)...and there are bound to be consequences
for the entire broadcasting industry. It's an exciting time.

Saw a blind box in the "east" section of R&R's classifieds looking for on-air talent for a "smooth jazz" format... Anyone know if this is Boston??? I'm getting read to move back to my beloved old home town and would LOVE it if Boston put up a decent jazz station (Hell! ANY jazz station) Would appreciate any insight on this...

Annie in San Francisco

2623. CALL FOR KID REPORTERS

Newsgroup: rec.radio.broadcasting
Date: 1994-07-15 06:26:24 UTC
From: KidCompany@aol.com
Message-ID: <305a6g$2ju@vixen.cso.uiuc.edu>
Source record: 39078

CALL FOR KID REPORTERS
I produce "Kid Company", a weekly 2-hour live news/talk magazine for kids 8-14 on WBZ/Newsradio 1030 in Boston (Saturdays 5-7PM ET). On the air now for over 4 years, we just won a Peabody Award.
Our 350 kid reporters cover regional, national and world news by reading and summarizing newspaper reports on issues that interest them. Kids determine the content of the show. This week kids comment on Haiti, environmental hazards in their own towns, and the best and worst part about travelling with their families. (We also have celebrity interviews; games and contests; book and movie reviews; and a variety of fun features)
I would like to locate kids 11-16 around the country who would be interested in becoming Kid Company correspondents. As a correspondent, he or she would be responsible for reading their local newspaper, e-mailing us if there is a story of national interest emanating from their region, and being willing to talk on the phone with us on a monthly basis (our dime). In return, we would send them airchecks of their radio show appearances. Kids (with parent's permission) should respond with a short resume (include age, interests, hobbies, a description of their town, and name of their local newspaper) by E-mail to "kidcompany@aol.com"
Stephen Snyder, creative producer, Kid Company, Boston, MA

2624. New York radio ratings

> From: CPOS@aol.com
>
> A rumor going around the radio world here in Boston is the sudden
> rearrangement at Jammin' 94.5 (WJMN). Rumor has it the upper management
> came in and cleared house. Possibly Confirming some of this report,
> Karen Blake who had been with 94.5 through the WZOU days was heared on
> WPRO 92.3 in Providence. She is no longer on WJMN. Marc Clark, on the
> other hand, is still giving his corny Marc with a "c" jokes on JMN which
> shows that everyone hasen't been let go. Rumors are also saying that a
> format change is in the works for JMN. Top 40/Alternative, could this be
> possible. Listeners that I have polled had mixed feelings on this topic.
>
>
Chris,(any relation to Bill on 'BCN? :-),

Karen "The Madame" Blake has practically worked at every station in
a Boston-RI-NH market in her 15 years in radio. She starts Monday(7/18) at
"Hot Young Country" WCLB 105.7FM. She'll take over 10-2pm shift vacated
by another Boston radio vet Jim Roberts who joined a crosstown rival
country outlet WBCS 96.9FM to do an afternoon drive duty.

> Why would JMN change after just a year at their present format which
> received good ratings for its market? That's radio for ya.

They pull in very good overall(12+) numbers but their audience is primarily
economically challenged 12-18 year olds. Try selling that to your sponsors!
Afterall, Pyramid paid $22 million for 94.5. Any smart business person
would try to make his investment pay off in a long run. Richi Balsbaugh,
Pyramid's CEO, knows the dollar value of major city signal.
Current 94.5 demos are simply unattractive to the advertisers. I would
predict for them to pull the plug on WJMN's format right around September.

As far as good dance/R&B music goes, check out Emerson's WERS 88.9FM in
the evening hours. They have a fantastic nightly show that doesn't play
boring 'slow jams' which now fill the airwaves at WJMN.

-Mark

2626. Boston Radio Watch(7-16-94)

Newsgroup: rec.radio.broadcasting
Date: 1994-07-16 07:21:48 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <3081qc$oc8@vixen.cso.uiuc.edu>
Source record: 39081

* I have a feeling we're in for some changes on the Boston radio scene :

1. Rumors are coming from all different directions that Pyramid's newly
acquired CH/Urban WJMN 94.5 will dump its format much sooner than
everybody thinks. New sound is expected to cater to primarily Generation X
audience(19-27). This Top 40 AP format will have a faster. upbeat
dance sound(EMF, Soup Dragons, Stereo MC's, The Farm, New Order,etc).

2. Recent moves by Greater Media indicate that its counry experiment
with 1-year old WBCS 96.9FM is pretty much over. Importing of
highly experienced(mostly AOR and AC) PD Harry Nelson is the signal
that something's up with the Boston's Country Station. Another signal
might be is the fact that Greater Media is taking a serious look at
all of its 'weaker' radio properties nationally. GM's outlet WMGK-102.9FM
in Philly is dumping its AC sound for the ARROW-like format....Can
WBCS in Boston be too far behind in terms of a format upgrade?

* Management at Infinity's AOR WBCN-104.1FM seems to be thinking
that there's nothing better than having your good old friends move
back to town...It brought back two popular personalities over the last 2-3 weeks :

After he was let go by 'BCN's PD Oedipus for frequent tardiness
and other disciplinary problems off the air, and spending the last
8 months in Colorado, Patric Murray is back on weekends and fill-ins as well
as a sidekick on the morning Big Mattress with Charles Laquidara. Charles
is still butchering the news updates, though...

Very talented 'Metal' Mike Callucci is back from a short stint with
Infinity's LA AOR outlet KROQ. Right now, he's only doing speacial feature programs.
It won't be too long before he gets more airtime on WBCN...

* What's up with WRKO-AM 680? The mid-day slot(or should we rename
it as Gene Burns' Memorial MidDay :-) is being filled and refilled
every 2-3 weeks. Starting this week for the next 3, it's former WRKO's
morning hostsess Janet Jaghelian. Seems like American Radio Systems
is not quite concerned about its AM combo WHDH-WRKO. Both stations
are in need of some facelifts, especially WRKO during its very
weak morning drive show which is being hosted by a couple of very
emotionally constapited individuals...
Also,ARS management is ready to let Jerry Williams loose. He wants a new
1 year deal. They're only willing to give him another 6 months...

* The new Group W-CBS 'software' marriage shouldn't really have any impact
on WBZ 1030 AM. Their sister TV station is dropping NBC to become a
CBS affil, though...WBZ Radio is affiliated with ABC Networks for its
newsfeeds. ARS' WHDH-AM 850 is CBS' affiliate in Boston. SportsRadio

WEEI AM 590 is CBS Sports affiliate. As far as I can tell,
CBS-Group W deal only involved the TV side so current radio affiliations
in the radio market stay the same for now....

* Is there anything as lame as TalkAmerica Radio Network(based at Noble's
WSSH-AM 1510 studios in Woburn,Mass) out there?

-Mark

2627. Buffalo/Toronto Radio Watch(7/15)

Newsgroup: rec.radio.broadcasting
Date: 1994-07-16 07:21:49 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <3081qd$oc9@vixen.cso.uiuc.edu>
Source record: 39082

From the #40 market:

*Mark Wozniak,who works at WBFO locally,wired me in regards to the station's new repeater in Jamestown(in the Southern Tier,BTW). WUBJ, at 88.1 FM,began operations early Monday evening. The coverage area(with its 265 W;antenna 558 ft.)includes Jamestown itself and the Chautaqua Institution(which is now open with its summer lectures et al). This is the second repeater for the area;WOLN(at 91.3,115 W,antenna 656 ft.)in Olean signed on in March of last year. The signal can also be picked up in Bradford,Pa.

*More wires:Ben Bass wrote me about more stuff at WBEN,saying that there may be a flip-flop on Gil Gross,continuing after Howard Simon's "1-on-1 Sports" wraps up at 9pm(if so,why are they still running promos for the Larry King/CNN simulcast?). More on that;he's still checking. About Winston Brown:He may be running into more problems. While Bass was listening last Sunday,he noticed that a CBS cast was in Brown's place. Apparently,according to Bass,Brown called the newsroom last Saturday morning and stated that he had personal business which might make him late for the newscast-also claiming that he unsuccessfully tried to call News Director Tim Wenger. Turns out that Tim had called in a bit later and was home the whole time.

*The conflict of WGR v.Am-Pol Eagle continues:a letter to this week's edition agrees that it's not proper for any nationality to be "delibrately degraded or mocked." The letter writer,Richard Krolewicz of Cheektowga,however,wonders why the paper didn't make an outcry over "Mr.Jasinski's own station,WHTT-FM,for their daily questionable and suggestive conversations made by on air morning personlaities,as well as advertisements aired on WHTT,promoting local sex clubs." He adds that he's written Stan and the staff at 'HTT regarding this with no luck.
Let's play Find the Errors in the Letter,shall we?
1.Stan is on the *AM*side,bub-not the FM.
2.Are you sure you're not listening to WUFX(103.3 the Fox)? Seems they're the ones "promoting local sex clubs",because 'HTT gears to the 25-54 crowd.
3.I've lived here all my life,and I can say that Danny Neaverth (in the time I've listened)isn't the type to make "suggestive conversations."

*WWKB-AM/WKSE-FM seem to have new people doing their sweepers;Kiss definitely does(who sounds like he's listened to Capt.Kirk of Star Trek one too many times). Info,please?

*Across the border:CILQ(107.1,Toronto,40 kW,album rock;Toronto's Best Rock-Q107)AM driver Scruff Connors is leaving for the same position at CJKR in Winnipeg(freq.,format-help!). "Brother Jake" Edwards of 'JKR

heads to Q107-essentially a trade.
Let's see...Connors has been at 97.7 HTZ FM in St.Catharines,
in Edmonton,Q107,and now CJKR. Quite a traveler,ain't he?

FAB...

2628. Philadelphia Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1994-07-16 07:21:50 UTC
From: sborre@asc.upenn.edu
Message-ID: <3081qe$oca@vixen.cso.uiuc.edu>
Source record: 39083

WMGK (102.9 FM) in Philadelphia changed format over the weekend to all 70's oldies. It had been Adult Contemporary for nearly two decades according to the Inquirer.

Listening the other night, the station sounded to me a lot like Cox's Coast 107.3 (WCOF) in Tampa Bay with an emphasis on being pop-based (as opposed to rock-based a la CBS's ARROw format).

2629. billion dollar baby

Bill: I sent this Wednesday, but never got the automatic
acknowledgement. So, perhaps it got lost. Sorry if it is a dupe.

Subject: billion dollar baby

I read in Wednesday's (July 13) Wall Street Journal that the
month of May (1994) was the first month in history that radio
advertising revenue topped one billion dollars. In this forum many of us
have sometimes expressed dissatisfaction with the state of broadcast
radio today, but it looks like the industry is doing SOMETHING right.

Message-ID: <3081qk$och@vixen.cso.uiuc.edu>
Source record: 39084

I'm a Chief Engineer in a network(Austereo) in Australia on the look out
for new developments in control room broadcast(radio) consoles.I
desperately need to replace the current consoles we are using,and have
the dollars to do so.
What I'm looking for is a console that is traditional in how the
announcer drives it,but very 90's under the hood! Auditronics,Memphis,TN,
are working on a very interesting project called the DC2000.The DC2000 is
a 8/16/24 channel console that has a RS232 interface and can be
controlled by a PC.The console can be driven automatically or live assist
or totally manually.The console PC interfaces to Computer Concepts'DCS
(which I'm using),in a very nice way.It appears as though Auditronics are
some way off from having a releasable product,so I'm looking around still.
Bearing in mind that the Austereo network doesn't run any automated shifts,
(all live assist),does any one out there have any ideas,or seen anything
that I should be looking at?

Thanks,
Peter Bourke.

I understood that WMC-FM was grandfathered in because it was operating at
the higher power before the FCC set the 100KW limit. I always wondered
about the wisdom of that decision while trying to get the 99.7 mHz r.f.
out of our gear at State Technical Institute at Memphis (right across the
highway from the transmitter site)!

Source record: 39087

About the temperature inversions...
Temperature inversions occur when warm air is above the cool air, not the other way around. Usually inversions occur when the atmosphere doesn't mix enough so that the denser colder air is able to sink. Normally, warmer air is below the cooler air because of mixing processes in the atmosphere, and during the day, the sun heats up the surface, but very little heating actually occurs in the atmosphere directly because of the sun (it's because of longwave radiati
on
radiation being given off by the surface).
Of course, during smog episodes, the cold air is trapped under the inversion, and since cold air doesn't rise, neither does the pollution so it too is trapped near the surface. On hot days with no inversion, there is often less pollution because it mixes away through the atmosphere. Of course, often more ozone is created on these days due to more heat and sun, so in the eastern U.S. that's when the pollution can be bad. But in L.A., it's usually the inversion (and terrain).
About the radio reception...it's along this boundary (often it is very sharp) between the cooler air below and warmer air above that radio wave reflection occurs. Often these inversions have 10 degree differences or more within a few feet! If there were an equal difference, but with colder air above warmer air, the air would mix almost immediately until the "dry adiabatic lapse rate" (assuming the atmosphere is reasonably dry) would be achieved (approx. 9.8 deg. Celsius per km. in the vertical).
Another thing I might add on a slightly different topic discussed here...
The stations with FM power greater than 100 kW usually have towers well below 300 meters...so these aren't necessarily that powerful.
Brandt Maxwell

In article <302n5f$sf9@vixen.cso.uiuc.edu>, francis4@applelink.apple.com (Dexter Wm. Francis) writes:

(on starting a small community station)

Dexter, the news for you is not good. The FCC is no longer licensing the small 10-watt noncommercial FMs that high schools and colleges used to use to introduce their students to broadcasting, and community groups in large cities used to use to reach small and specialized communities. As of now, you can't put up a new FM station with less than the equivalent of 3kW ERP at 100 meters (328 feet) antenna height above average terrain...and that's so both for noncommercial (88.1-91.9) and commercial (92.1 and above) frequencies. On most of the channels you need to operate with equivalent of 25,000 watts ERP @325 feet or greater; some require either 50,000 watts @ 500 feet or 100,000 watts @1000 feet, depending on geographic area. All new FM stations are expected to operate 16 to 24 hours daily. 12 is pretty much a minimum to KEEP a license once you have it; you'll be expected to promise more to get one to build and operate a new station.

New AM stations are currently being licensed only for fulltime operation, which in practice means at least 16-18 hours per day 7 days a week with the option to go to 24 hours a day. You also need at least 250 watts transmitter output (1000 or more is preferred by the federal regulators) into a vertical antenna tower, properly grounded and tuned and at least 150 feet tall. That's expensive....probably $200,000+ to build even with used gear. And that doesn't take into account the fact that most AMs licensed recently, as well as the older ones that tend to be most successful, are actually higher powered stations, often using multi-tower directional setups requiring a lot of land, complex equipment and a half million dollars or more just to build.

You are probably better off purchasing a small and struggling station that's already on the air (or recently dark with authorization to resume broadcasting at a future date). I've seen fulltime 5,000 watt AM stations with good signal coverage change hands in good size cities (Syracuse, NY comes to mind) for as little as $75,000 within the last few years. A 1,000 watt fulltimer on one of the Class IV local channels (1230, 1240, 1340, 1400, 1450 or 1490) might sell for even less. On the other hand, buying a top-50 market station pulling at least a 5 share or better will cost you anywhere from $3,000,000 on up...because at that point you're looking not just at the license and frequency value, but the value of an ongoing and (in all likelihood) profitable business.

Those are the economics of getting into radio today...unfor-
tunately we've chosen not to make the same room for shoestring
broadcasting that other countries like Britain have done.

WMAQ in Chicago is an all-news outlet except for in the evening when they run a sports-talk show (we now have full-time sports talkers WMVP am-1000 and WSCR am-820 2kw which is soon to go 24 hours... the 820 frequency is also WBAP DFW,Tx 50kw...). I am almost certain WMAQ is still Group-W. They have fired their highest paid anchors (one of whom is a friend of mine) and cut budget every way they can. The word from my friend is that Group-W is in financial trouble because of transactions not related to their broadcast services.

BTW, does anybody remember WIND as an adult-contemporary format from the '60's & '70's? They went to all talk, then to an older-adult Spanish format "La Tremenda WIND" (their sister station is a hipper AC Spanish WOJO

"Radio Ambiente" at 105.1 fm). They were owned by Group-W until they were sold to the Spanish-language folks. I really miss the old AC format on that station...where else could you hear "Layla" followed up with "Is That All There Is" by Peggy Lee? I for one am quite chagrinned by the fragmentation of charts and listenership...I thought the trend was about to reverse when Eddie VanHalen played on Michael Jackson's "Beat It", but no such luck (although Slayer and Anthrax have both teamed up with rap artists to fuse heavy metal with rap...I really like the result).

Chicago is currently without a "real rock" format after the demise of the Blaze...so Megadeth could release a new CD and I won't even HEAR of it! :(

We have a "smooth jazz" outlet in Chicago. My friend, it AIN'T JAZZ.
Unless you consider Mariah Carey, Boz Scaggs, Phil Collins and Kenny G
to be JAZZ. Okay, to be fair, they do play stuff by Pat Metheny and
the SHORT version of "Feels So Good" by Chuck Macaroni :) but that
STILL ain't my idea of a JAZZ station. I don't think I've EVER heard
Weather Report, the Count, Stan Kenton...you get the idea.

I have a slight problem: I've created what may be the first Multimedia Morning Show...but it's a little too large to upload (or expect anyone to download) from your traditional commercial online services. At best, I can stick it on my BBS and it would take 20 minutes at 19,200.
We're talking about 3,500,000 bytes when it's compressed.
I kind of feel stupid doing projects like this and then having them sit on my hard drive. Any suggestions? I don't do anything on the Internet except mail and usenet groups...so I don't know how to upload it to an FTP site. As a matter of fact, I wouldn't know which one.
How can I give people access to this project?
FYI: It's the morning show I anchor, the QZOO at Q94, Richmond....voted Best Morning Show in Virginia 2 years running....

Thanks for your input!

ago they were format-dominant in N/T...now they've dropped
almost a full sharepoint since the fall. What happened? Isn't
Lionel holding up well? Or is this the same thing that happened
in LA, where Limbaugh has been sliding downward, started
diving more precipitously in the spring book just released, and
pulled the afternoons and evenings down with him?
If it's the latter, could be we're seeing the beginning of the
end of the Rush phenomenon. That's good in a way because it
means we'll hear more different voices on talk radio. But since
the format has become so closely identified with Rush, it could
also mean the beginning of the end of a lot of talk stations
who used him (or his clones) to try to gain a foothold...and that
is not necessarily good for the long term future of the format.

The station we just took over is carrying Rush and the GM couldn't believe
the price for the mege-dittoes. He asked me and I sent him looking for
G. Gordon Liddy. WW1 is mostlikely bartering his show and it's MUCH
better than Mega-Big Head anyway. BTW, anyone catch the USA Today
editorial tuesday on Rush? Good piece!

Telos has a call screener software that works well and best of all
interfaces with their Telos Hybrid, which is used in many stations.

2642. Re: The Meaning of 5x5

Newsgroup: rec.radio.broadcasting
Date: 1994-07-18 03:06:21 UTC
From: "Larry J. Plato" <ljp@noc.ans.net>
Message-ID: <30crjd$jcn@vixen.cso.uiuc.edu>
Source record: 39098

In issue #696 someone asked about the origin of 5x5, it hails
back to amateur radio, amateurs are always curious about the quality
of their signal, so they gave each other signal reports called RST
reports, r is for readability, s is for signal and t is for tone
r runs from 1 to 5
s runs from 1 to 9 and is measured in decibels (actually it is very
common to refer to someone as 10 over or twenty over etc, this means
10 db over S9 (19 decibels) or twenty over S9 (29 decibels)
t runs from 1 to 9 and refers to the quality of the tone, used only
for morse code, also in the old days before frequency synthesis
someone would often add letters to refer to 'CHIRP' or to denote
someone had a signal of the quality associated with a crystal transmitter.
With the advent of voice the T was unnescesary, so the reports were
shortened to two numbers, 59 is the best common report, although to be honest
I have had 0db signals that were very readable on a quiet night and I think
I speak for every amateur to ever work 40M when I say that 20 over on 7MHZ
doesn't mean much when dodging megawatt AM broadcast signals at night!
For more info buy the ARRL Amateur Radio handbook for 20-30$ US
from the American Radio Relay Leauge in Newington CT, I forget the
address.

I love to hunt for distant AM stations in the night. I have been doing it all my life. Questions:

1) Are all AM receivers created equally? Is there an AM receiver I could buy which would be better then the Proton clock radio I am currently using?

2) Any suggestions for where I can buy a good anntaena and or amp for AM DXing?

I went to Law School in NY a few years back. I loved WFAN. We have had two (KMPC and XTRA now just XTRA) all sports stations here in So. Cal. WFAN was way better then KMPC was or XTRA is. I see that Levy is now on ESPN has he left WFAN? How about those two post Imus guys, ED and ??? are they still on?
Thanks

Re finding a 365pF capacitor - we have this problem
often when buildidng custom equipment here. Your best
friend is a capacitor meter with short (or no) leads and
a box of the itty bitty caps. The toerance of disc and
some ceramics is +/- 20% typically. Polystyrene caps are
even better +/-5-10% typical.

Ignoring the tolerance question for a moment, placing
three "standard" caps in parallel (330pF+33pF+3.3pF)
with short leads will get you 365.3pF. On the other
hand, with a cap meter and a bunch of caps to choose
from you could easily get to 365pF using only two caps
in parallel given the tolerance swings. Of course the
EASIEST way is to find a variable capacitor with a
10-50pF range (typical) and place it across a standard
330 pF cap and tune it with a pF meter until it hits
365pF exactly!

Hello!

Some comments from Carl K. Gorney's recent posting.....wow, I must have just caught WUBJ right after they came on. I was returning to the Buffalo area via I-80 to US-219 and noted them at about the NY/PA line, at about 6:30 pm or so! No sign of it here, with CKLN 88.1 so strong (here being Clarence,in metro Buffalo), plus if anything else does coe in it ends up being WFRW Webster/Rochester or WEFR Erie. Will take some trops I guess.

Regarding Scruff Connors, CJKR is FM 97.5 in Winnipeg, and a rock station, I suspect classic, because I heard them on e-skip here a few years back, and wrote them, and did indeed hear back from. Their logo reads "Classic Rock 97.5". Seems to me he was at that station once before; I know he was out west somewhere for awhile. A Toronto area rock DJ went to CJKR but I can't recall if it was him or not.

The new liners at Kiss 98.5.....I don't know the guy's name, but he also does liners on Z100 (I was in NJ last weekend), and 99X in Atlanta, and others that I don't recall right now (*maybe* New Orleans' 106.1 The Zephyr), so hopefully that helps. I was surprised how little 'pop' and how much 'alternative' was on Z100, although mostly "safe alternative", hi.

Other assorted station items, if anyone is interested....

WLNL 1000 Horseheads/Elmira was not on the air.
102.3 Pittston, PA (Scranton-WB) is now ac and "Wish 102"
There is a network of simulcasting country stations "B-country" in central PA: WWBV 106.1 Beaver Springs, WUNS 96.3 Lewisburg, WWBE 98.3 Mifflinburg and the AM 1010, whose calls elude me.
Rock WZXR 99.3 Williamsport PA has is now relayed on WDKC 101.5 Covington
WVLY 100.9 Milton PA was not on the air
99.9 Avis PA was back on the air as "The Country Bear"
CHLO 103.1 St.Thomas ON is now classic rock "The Hawk"
103.5 Cobleskill NY is now simulcasting WQBK 103.9 Rensslaer, I believe the calls are WQBJ

That's not new...WLS has been doing that here since they started the all-talk format. BTW it's pretty clear...the AM is all Republican right-wing (our current Lieutenant Governor, Bob Kustra, a Republican will replace Ed Vrdolyak (not a misspelling) as afternoon talkshow host soon). ((Mr. Vrdolyak is a former Democratic alderman who switched parties to run against Harold Washington, Chicago's first African-American mayor.)) The FM, with the exception of the Lush Rimjob simulcast is all moderate to liberal. Interesting, huh? Okay...to be fair, Catherine Johns who is on in the evening on the AM is as nonpartisan as you can get...and *very* cynical, but personable. It would be hard not to like her show.

2650. Family Radio's Harold Camping

Newsgroup: rec.radio.broadcasting
Date: 1994-07-18 03:06:38 UTC
From: fybush@world.std.com
Message-ID: <30crju$jdd@vixen.cso.uiuc.edu>
Source record: 39006

The Associated Press reports today that the Rev. Camping is predicting
that the world will end this September. He says he's quite
certain of it, in fact.

What I want to know is: if he's so certain, then I'm sure he'd have
no hesitation signing a document that transfers the licenses and
assets of his radio and TV stations, including WYFR on shortwave,
KEAR *106.9 San Francisco, WFME *94.7 Newark-NYC, etc., to me effective
October 1, 1994. After all, the world will have ended, so the
contract will never take effect, right? And hey, if he's wrong,
so I end up owning radio stations across most of the nation's
big markets. I wouldn't complain... ;-)

Anybody got the guts to actually approach Rev. Camping with the offer?

See ya in October...

-=Scott Fybush - fybush@world.std.com - I don't speak for Harold Camping!=-

2651. Re: Rick Dees and KIIS FM

ggoldwyn@ix.netcom.com (G. J. Goldwyn) writes:

>Well, thanks to Entertainment Tonight on 6/11/94, I got a look at the
>new Top Secret Rick Dees Burbank Studio.

Gee, I was just in that studio two days ago. I didn't realize that it was some kind of shrine while I was there. Of course, Rick Dees himself had gone home for the day, but the "Rick Dees is soooo Stupid" neon sign that indicates a "hot line" call made itself obvious.

>Wow! KIIS-FM still relies heavily on carts.

Many stations do. There are still virtually no digital storage systems that are really ready for major market prime time. This is one "advancement" that is happening in the smaller markets first.

>And Dickie Dees new board is a round knob
>pot board. Are slide pot boards out now along with CDs? Will vinyl
>make a resurgence soon at KIIS? What? No Disco Duck on CD? Aha!

First, don't be fooled. That "old" board has the latest Straight Wire Audio electronics inside. Second, the way I understood the explanation, the insistence on using that board is just a personal quirk of Rick Dees, not a matter of station policy. I think he wants to have the look and feel of Beaumont, Texas, or some such place.

The other studios at KIIS are completely modern (except, of course, for the carts). Frankly, except for the time spent accomplishing the purpose for being there, I was more interested in looking out the eighth-floor window at NBC across the street. When you have seen one radio station, you have seen them all.

2652. Why no Es on the West Coast ?

Newsgroup: rec.radio.broadcasting
Date: 1994-07-18 03:06:40 UTC
From: Robert Carpenter <rc@itchy.ncsl.nist.gov>
Message-ID: <30crk0$jdh@vixen.cso.uiuc.edu>
Source record: 39007

Why don't you San Diego / LA / SFO people hear Es long range propagation on the FM band ?

The answer is probably VERY simple.....you have so many local stations that they override the weaker signals coming by Es. Your situation is much like that around here. I NEVER hear Es distant signals, even when distant hams I am talking to are hearing FM BC stations from this area at the same instant.

Another esample, the morning of June 28th, I drove from Corpus Christi, past San Antonio, to Kerrville, Texas. For 2/3rds of this trip, I could hear FM stations from southern California, starting with XHITZ in Tijuana, and including KLON and KPFK. I also heard stations from the Durango, Colorado, area.

The secret to hearing distant FM stations is to avoid living in a major metropolitan area....where all the channels are occupied. Otherwise you have to have a very selective receiver and rotatable dircetional antenna to null out locals.

Bob Carpenter w3otc@amsat.org

2653. DX anecdotes

another DX story... sorry I forgot about it when everyone was talking about DX's but when you do Windows programming you tend to fry some brain cells...

Turns out that you can get WENZ out in Meadville PA, two hours east of Cleveland. I visited a friend at Allegheny College out there in Meadville, and she was listening to it, and she said that half the student body listens to the station and "you can get it better on the other side of campus" which is even further east.

Interestingly enough, the signal from WENZ is stronger than the signal from WHOT in Youngstown, halfway between Cleveland and Meadville (roughly). WHOT is on 101.1 and Detroit's WRIF comes in over it in many parts of Cleveland (in fact there's one 7-11 store in South Euclid where, if you sit at the far end of the parking lot and tune to 101.1, you will swear you're in Detroit because it comes in *perfectly*.)

From: mikedow@gate.net
Message-ID: <30crk7$jdr@vixen.cso.uiuc.edu>
Source record: 39010

: We have a "smooth jazz" outlet in Chicago. My friend, it AIN'T JAZZ.
: Unless you consider Mariah Carey, Boz Scaggs, Phil Collins and Kenny G
: to be JAZZ. Okay, to be fair, they do play stuff by Pat Metheny and
: the SHORT version of "Feels So Good" by Chuck Macaroni :) but that
: STILL ain't my idea of a JAZZ station. I don't think I've EVER heard
: Weather Report, the Count, Stan Kenton...you get the idea.

Aw c'mon, Ed, the last time I heard it, WNUA in Chicago was the very best contemporary jazz station in America. You're talking about traditional jazz, and while I'm a fan of the older genre, Basie and Kenton are no longer "contemporary music" in the same way that Crosby and Sinatra are no longer "popular" artists." While a tradional/mainstream jazz station would sound great to my ears (but not as incredible as WNUA), it would have have supportable demographics. Not enough young people that advertisers care about. That's why the format just ain't on commercial radio.

When I was lat in Chicago (five years ago this summer, so a lot may have changed), I heard a contemporary, mass appeal format of sophisticated music. Noit soft, not hard, but as they say, smooth. I only wish the sound could be replicated or syndicated. Even Digital Cable Radio is unable to produce this incredible mix.

Sorry to disagree...

--mikedow@gate.net
Mike Dowling in
West Palm Beach, Florida

[Moderator's Note: If you own a satellite dish, among dozens of other audio services, ther are two 'WNUA-LIKE' services. Both are non-commercial. One is on G3/13 the other is on (I think) G5/17. I dont remember which audio carrier they occupy. Bill]

(about KMOX)

It's an open question as to whether those moves KMOX is making will do them any good. Rush Limbaugh's addition to the schedule, at the station GM's behest (and reportedly over the objection of the PD, who wanted to develop young locally-originated talent) hasn't been as well received by advertisers or by listeners as the station expected. Limbaugh's hostile reception from fans at a Cardinals game at Busch Stadium was just the tip of the iceberg. (The PD is an old colleague of mine from Buffalo and told me at least in general terms about his plans for the station last summer. Limbaugh wasn't a part of them.) The station's overall AQH appears to be going downward from its pre-Limbaugh Winter '94 peak. They may still be #1 overall but the competition is now within striking distance for the first time in decades. Wonder how long that GM will last, now that he's blown most of the good will that Bob Hyland spent a generation working to build? My guess is you'll see a management shakeup soon.

Nothing new...it was funnier at my high school station two years ago when we got or poewr upgrade...

"The new and improved WHHS, now broadcasting at an increased power of 14 thousand millWatts, ans still Havertown's Cutting Edge."

Now that's funny because you expect it would say 14 thousand WATTS, but we are only 14 WATTS...we wer 10. Now that was funny...two year's ago.

2660. MiniDisk format for broadcasting

Newsgroup: rec.radio.broadcasting
Date: 1994-07-18 03:06:56 UTC
From: smerdonp@melbpc.org.au
Message-ID: <30crkg$jee@vixen.cso.uiuc.edu>
Source record: 39015

Recently in Australia at the SMPTE-94 show three manufacturers displayed minidisk recorders for broadcast cart replacement use - Sony, Denon and Otari. The Otari had just hit the country, but the others had been doing the rounds for the past few months.
Does anyone have any experience with using these machines in broadcast? Particularly I am interested in how the rather savage ATRAC data reduction holds up in day-to-day use with a wide range of highly produced audio - and when cascaded with other data reduction algorithms.
Also has anyone done a comparitive evaluation of the three machines.
I notice that surprisingly only the Sony does not provide digital I/O.

Is this the format to replace our ageing cart machines??

I would welcome your comments.

Peter Smerdon.

After several delays, WBFO in Buffalo is pleased to announce the sign-on of our second repeater station. WUBJ, at 88.1 FM in Jamestown, about 80 miles south-southwest of Buffalo, began operating early Monday evening (7/13). WBFO now provides full service NPR News and Jazz to the western Southern Tier portion of New York state, between Buffalo NY and Erie PA, through WUBJ. The coverage area includes Jamestown (the home town of Lucille Ball), and the famous Chautauqua Institution. WBFO's first repeater station, WOLN in Olean, began operating March 17 1993. Also in the Southern Tier, Olean is about 55 miles east of Jamestown, some 70 miles south-southeast of Buffalo, and is the home of Saint Bonaventure University. In addition to Olean, WOLN can be heard in the Bradford PA area.

--
Mark Wozniak (bfowoz@ubvms.cc.buffalo.edu)
WBFO 88.7 FM Buffalo, WOLN 91.3 FM Olean and WUBJ 88.1 FM Jamestown

Source record: 39022

Let me also add that E-skip provides some interesting sights and sounds on TV, in particular channels 2 through 6 (54 - 88 MHz). Over many years from various locations in California, I have logged TV stations from every state west of the Mississippi (except Nevada--too close), 3 Canadian provinces, and 2 Mexican states. Longest haul was Mexico City. I have both photos of station IDs and some video tapes (the instability of E-skip receptions really causes some *interesting* problems for the average VCR which apparently uses TV sync signals for maintaining speed control). I also have a number of confirmation letters from the stations, although I haven't been very diligent about that the last few years. Most recent receptions were channel 2 from Amarillo (a PBS station), and channel 3 from Wichita, KS.

This is somewhat of a dying hobby since so many people are on cable. But I guess as long as there are signals in the ether and an ionosphere to propagate them, someone will be trying for DX!

73--Jim, K6ZH, price@nosc.mil

P.S. What is the address for posting directly to this newsgroup? I'm doing this message as a follow-up.

From: davidb6517@aol.com
Message-ID: <30crl8$jf5@vixen.cso.uiuc.edu>
Source record: 39024

Group W and CBS made a deal...no sale though...CBS programming will now be carried on all Group W television stations...not sure about radio though.

This means here in Philly, number four media market in the US, that KYW-TV will be CBS instead of NBE, and WCAU-TV will be sold off by CBS...most likely to be bought by NBC or FOX...if FOX buys it, NBC is stuck with Channel 29 (WTXF?), which is currently FOX.

anyway, big upset.

You're kidding, right? The generation that grew up with Sesame street and now consumes MTV like visual popcorn want instant and constant gratification. Don't bore them with the news...just play the tunes. Whether it's hiphop, alternative, metal or CHR (the alternative crowd might be just a little more sophisticated than this) just shut up and play the music. And don't expect them to know or care who the Stones are or who the Beatles were!

BTW, I heard Julian, Paul, George & Ringo are in the studio as we speak!

My friends at Kiss-108 tell me there's no truth to the rumor that WJMN "Jammin' 94.5" is going to dump its format. What they say they will do is to aim Kiss-108 at the older half of the CHR demographic by making it more a hot AC, then focusing WJMN squarely on the 18-34's.

When Pyramid and ARS looked ready to merge a couple of years ago it seems ARS asked Kiss to help tailor WBMX's sound. The merger didn't happen and now the monster they helped create is eating away at Kiss's 25-54s. If Kiss goes directly against 'BMX they'll lose a lot of younger listeners to 'JMN. But now that Kiss owns 'JMN that's no problem.

Of course, my friends could be pulling the wool over my eyes (and by extension, yours too). I have a friend at WILD who hopes they are.

> affiliates across the country, don't they even feel the need to
> do something yet? What's going on internally over there?

John Gershorn who came back to Boston from a Pyramid station(WUNA) in
Chicagoland about 3 months ago is currently overseeing WHDH-WRKO AM
combo as well as Hot AC WBMX-FM and newly acquired album rocker WCGY 93.7FM.

There's another potential black eye forming for WHDH 850 on the horizon.
According to a column in last week's Boston Phoenix(7/15), Boston
Herald columnist Howie Carr who has 3-7pm show on WHDH could be in
hot legal waters after his former news reporter Christen Graham fed
up about his on-air cracks about her underwear and personal life
quit Carr's show 3 weeks ago. There's a possibility that Graham
could file a sexual harassment suit against Carr and WHDH management.

Graham runs Greater Boston News Service and sells her stories to
radio station across the state. She worked on Carr's show for about
a year and got her daily dose of sexual innuendo from Carr and his callers.
Graham apparently got her hands on a logbook kept by Carr's producer
Kevin "The VirginBoy" Starley where he apparently wrote : "Almost made Christen cry
today. But it was worth it." Asked by the Phoenix reporter if it
was his handwriting in the logbook, Starley answered," Yeh absolutely.
Without a doubt, I can send you a copy if you like."

WHDH-Carr story might get just as ugly as Leykis' 'incident' but
the big difference here is that Carr works for the same paper that helped
to blow Leykis off the air. So, Carr is getting away with it for now..

N> In listening to the FM, they mentioned that you could pick up the AM
N> "From Magic Mountain north thru the Grapevine.." A notorious Radio
N> graveyard...

I know where that is. I just went through there this week.

10k Daytime only? I have a feeling that station would be more useful for broadcasting traffic reports than anything else.

Aside: Once well within the San Joaquin Valley (along I-5), I can enjoy reasonable reception of both Los Angeles (KFI-640, sometimes KNX-1070) and Bay Area (KNBR-680, KGO-810) stations, even in broad daylight. KFI breaks up around Los Banos, while the Bay Area stations tend to fade out around Bakersfield or so.

2688. How hard is it to get a low power FM license these days?

Newsgroup: rec.radio.broadcasting

From: trimm@netcom.com
Message-ID: <30foq5$oaf@vixen.cso.uiuc.edu>
Source record: 39043

I'm moving to Las Vegas later this year (our whole company is moving), and
was wondering if it was still possible for an individual to get a license
for a low power FM radio station (say, 100 watts or so). I figure I could
afford to spend $10K to $20K to initially set up, and maybe another $10K
per year for a few years for additional gear and doo-dads.

Is this realistic?

To:articles@airwaves.chi.il.us

ag365@freenet.buffalo.edu (Carl K. Gorney) quotes an article from the April/May 1993 issue of EXTRA!,FAIR's publication:

N> "KFI,one of L.A.'s most prominent talk stations,had implemented a
N> 'topic-approval policy' some months prior,requiring hosts to get
N> management pre-approval of all topics discussed. But evidence leaked
N> from inside KFI indicated that the policy was applied only to
N> Leykis,in an attempt to limit his show's political content.(The New
N> York-based (Rush)Limbaugh never submitted his topics for
N> pre-approval.)

I've heard vague references to this "topic approval policy", but nothing stating that it was unfairly applied only to Leykis. (Who else was on KFI in mid-late 1992, when Leykis left? I doubt he was the only local host on there with political content)

Notice I said *local* host. How would anyone expect Limbaugh or any other syndicated host to get approval from *each* of the hundred or so stations carring his or her program?

2690. Neil Rogers of WIOD in Miami

Message-ID: <30foqd$oaq@vixen.cso.uiuc.edu>
Source record: 39046

Someone please help me...I'm melting!!! I just moved from Montreal, Quebec and am awaiting word on a radio gig (always fun) here in Ottawa, Ontario. I used to work at CHOM97.7FM (anyone Familiar with it?) and can't wait to start at the new ROCK106.9FM which is at present changing from 54ROCK on A.M. to digital F.M.

My show in Montreal, and almost everywhere else, was dubbed the "Revolution" so I want to work with that. I have been racking my head for about a month now trying to fit the right "air" name that's suitable because "Pete Rainville" (and, no, I did not make that up) just does not have the right "bad" attitude that I'm looking for. Go crazy with suggestions if you have them.

Help me before I implode.

Thanks,

Pete

Courtesy of the Inquirer, here's the Spring Arbitron
Results:
Spring 93---> Spring 94
1. KYW-AM (All News) 7.1 7.4
2. WMMR-FM (Rock) 6.6 6.6
3. WPEN-AM (Nostalgia) 4.4 6.1
Tie. WWDB-FM (Talk) 5.0 6.1
5. WYSP-FM (Classic rk) 5.8 5.6
6. WOGL-FM (Oldies) 4.4 5.0
7. WBEB-FM (Soft A/C) 4.0 4.9
Tie. WUSL-FM (Urban) 4.7 4.9
9. WXTU-FM (Country) 5.1 4.6
10. WIOQ-FM (CHR) 5.7 4.3

Other comments:

For those clear channel and/or baseball fans, WGMP-AM 1210, home of the Phillies, had a 1.1 overall but a ZERO during morning drive when it carries syndicated sports talk.

The Inquirer, citing a New York Times report which was confirmed by officials at KYW, says that a RADIO deal between CBS and Group W will be announced within a few weeks. If the reports are true, that would entail a four station marriage here between KYW, WMMR, WOGL and WGMP. The article then went on to speculate about whether KYW would move to the stronger 1210 signal from the directional 1060 and take over the Phillies games from 'GMP.

Delilah Rose, the evening host at WMGK, is out after the change at 102.9 FM to 70's music last week.

from Bob Smith:

> FWIW, some insiders at Rush affiliates say, and I have heard him
> mention on the air as well, that Rush knows very well what viewpoint
> each caller is going to express on an issue before he takes that
> caller, and either he or his screeners have the ability to shut out
> most dissenters to the Gospel according to Limbaugh.

Certainly there has never been any questions that calls to the show are screened (otherwise why would he have a call screener?). Indeed, by the host's own admission, calls are very tightly screened: the goal is to find callers that are reasonably articulate, have something interesting to say on a topic that is of interest to the program, and (most importantly :-)) make the host look good. And certainly it is possible that a higher percentage of dissenting callers than agreeing callers are screened out, but I have seen nothing that allows me to conclude that this is actually happening.

You mentioned FAIR. I understand there was recently a TV program on which someone from FAIR was discussing Rush, but unfortunately I missed it. I heard second-hand that they talked about him asking listeners to make phone calls to legislators (or whomever). This has never once happened in the year I have been listening to Rush so in my mind the credibility of the FAIR report is questionable (if it is true that they said this). But, as I say, I did not see the program, and, have not heard other assertions they may be making.

. . . .

Well, that sort of puts ol' Rush's First Amendment jehad to prevent
Congressional passage of a "fairness doctrine" law into perspective,
doesn't it? The law would have been unfair to him because it would
require that stations present both sides of an issue, but it's okay for
him to stifle effective competing or rebutting comment.

[...]

> Sorry to disagree...

The source of our disagreement is that you haven't heard WNUA in 5 years. Since then, John Gehron, formerly of WLS Musicradio "the Rock of Chicago" became general manager or whatever the title is, and the station has learned to follow his philosophy at WLS..."We like to be like McDonalds... you always know what to expect". I'm telling you...you'd be disappointed.

Why be sorry to disagree? You should see the flames my liberal politics draw on the chi.* groups :)

Well, Ed. I have been in touch with the sound of WNUA since its inception, and until I exited that fine (yeah right) city this past spring. I find it very listenable, well programmed and it is very successful.

Is it Jazz? Well that depends.

By day they skew strongly Urban/AC with a jazzy feel. That gets them the numbers and the almost universal 'office' vote. Their sound is very easy to agree on. WLIT (Light AC) is also a favorite in offices.

After 7pm, they launch "Lights Out Chicago". The playlist is changed dramatically, the mood is jazzier, the music is more instrumental. Longer cuts, more progressive jazz, less urban AC. All in all it is a well crafted product. It sells well and it is better than another "Soft but not too soft" rock station, Mix or Hot Young Country format.

WNUA has the uncanny ability to attract strong support from many demographic groups (and pseudo groups). Listenership is strong among both blacks and whites. The listenership is heavily professional and middle to upper income, but is also big with housewives and blue collar people too. They are in almost every demographic you can imagine, to a greater or lesser extent.

WNUA is unique in the Chicago market. In fact most markets don't have anything like WNUA. It is a very well run station and their incredible numbers show that.

I just wish they would stop using the word **SMOOTH*** every three words !!! :-), It gets hard to take after a while.

So Ed, what's your beef? The station is successful, it is different, it is not offensive? Is it perfect? No. But I don't hear you coming up with cutting edge ideas on how to improve it and still hang on to the incredible listenership and success they now enjoy.

I like the idea of free-form radio too, but considering what a radio signal like theirs is worth in the third market, I give the current management of WNUA and all of those who risked it all on the 'untried' idea back in the early eighties, stuck with it and fine tuned it to where it is now. How much easier would it have been to just throw another oldies signal on the air? Would that have been better?

Bill

What Makes Talk Radio So Popular?

-- What does talk radio offer a listener who tired of repetitive playlists and obnoxious DJs?

-- What are the most common misconceptions regarding talk radio?

-- Recent events in the news, like the OJ craziness, encouraged So Cal residents to tune in for the latest developments - what would make them stay as regular listeners after (and if) the story dies?

-- How does talk radio fit into the information-hungry society of the 90s?

-- What is the status of talk radio in other cities?

Feel free to respond to patchman@netcom.com

Owing to poor ratings and loads of corporate debt Emmis broadcasting was asked by it's senior lenders to sell the place. They did to Greater Media who took it country. County 96.9 WBCS are the new calls and approach. The station has been in the format for a year and is going nowhere. The Spring numbers show it aboutdead last in the market. Harry Nelson X-KFRC, WRKO, WROR, WODS and Denvers Big Dog is the new PD. The rumor is that they will chnage to some sort of 70's oldies format. What no one seems to realize is that Harry is quite capable to doing a country format. WCLB on the other hand is an interesting experiment in management theory. Most of the people are working as independent contracters rather than staff. That's why Jim Roberts was easily able to move to WBCS.

Format change about a year ago: now it's country.

There's some decent jazz down in the educational ghetto, but it's block
programmed. Try 89.7 WGBH in the evening.

Some stuff from the #40 market:

*WBUF(92.9,A/C;B93)has now added forecasts from the Weather Channel. (I came across this last week when I saw an ad for B93 on the channel-seems like a tradeoff.) Call it what you will,but it's too canned for my tastes. Also,B93 seems to have picked up news from Metro Networks,done by ex-WGR news anchor/reporter Eileen Buckley.

*The battle of Winston Brown v. WBEN seems over. Brown has now jumped to WBLK(93.7,urban contemp.)to handle morning news. (BTW,I caught this yesterday morning-whether he's joined Metro Networks here or not I don't know.) I will say that the phoned-in reports sound absoultely lousy,with more static that what you can hear of the report. Speaking of Metro,Mark Webster has been spotted on a few stations last week handling traffic.

*Another battle-that of Am-Pol Eagle v. WGR-may be over...or is it? The recent edition has a few letters from Bob Rich Jr.(president of Rich Products(and its subsidary,Rich Communications),his wife Mindy-who runs the unit-and WGR/WGRF GM Jim Meltzer. More on this next time.

*I promised to answer my own question on if anyone could name 3 staffers(excluding those who jumped to AM 640 when CFTR went all-news last year). Here's some:Mike Marshall(ex-CKFH,now CJCL(The Fan 1430);pretty sure he's still around),Tom Rivers(ex-CKFM(Mix 99.9),now CJEZ(Z 97.3)'s morning man),Paul Godfrey(who helped get the Toronto Sun off the ground and a player in T.O. politics),and...Rick Moranis. Yes,*that* Rick Moranis.

*Mark Scott(ND at WBFO)sent me a note about a new hire at WBEN. Dave Kerner,who did sports for many years at WEBR and is now a general assignment reporter for WNED(which was WEBR),will start up at WBEN on July 29th as a fulltime sports anchor/reporter. He'll handle AM sportscasts and do work on the Bills pregame & postgame shows. The post was apparently offered to Brian Blessing,but he declined it-with $$$ probably the key factor. Alan Pergament once wrote that while at WIVB, he didn't have the best work attitude there. If true,that may have been another reason-going through Winston's shenanigans was enough without seeing another staffer doing the same thing. Fear not;he'll probably continue with his show on the Empire Sports Network.

*Nice day for some E-slips:
-KMXL(95.1,Mix 95.1)-Carthage,MO(talked about Joplin-A/Cer)
-95.7(positioned as Car 95.7,in Central time zone-city/calls?)
-94.9(probably WIKQ-Greeneville,TN-100 kW)
-2 stations at 95.5(1 positioned as B95,the other as K95-city/calls?)

*Someone mentioned Winn Richards as now working at Seattle's new "young" country station. He used to work at WWKB-AM as its PD and as one of its voices. He rapped KB's owners,Keymarket,as not having any vision-well,Wynn,neither did you. The station under your reign switched format once(from news to talk/sports),and threw so many shows in and out of the lineup that you could be a blackjack dealer in Las Vegas(or anywhere there's gambling these days)and see stuff that stays longer. (BTW,Wynn,were you named after an oil company? I used it once on one of my cars.)

*Back to WBEN:Money That Matters(with Greg Mazurowski)debuted a couple weeks ago Saturdays at 2pm. It moved from WGR,which yanked The Sport of Kings(horse racing)from 'BEN this year. The latter show is hosted by Mike Robitaille,ex-Sabre who also hosts Hockey Hotline on Empire. He also is PR director at the Fort Erie Race Track(makes sense; he's owned horses before).

*One last thing:WKSE(Kiss 98.5)now has David Letterman's Top 10 List rights locally.

FAB...

2705. Washington, D.C., Radio Watch. SPRING RATINGS!

Newsgroup: rec.radio.broadcasting
Date: 1994-07-20 07:11:54 UTC
From: Tom Lacko <LACKO@ENH.NIST.GOV>
Message-ID: <30iinq$4v4@vixen.cso.uiuc.edu>
Source record: 38960

The Spring ratings are in and there are few surprises. Urban WPGC FM 95.5 and Country WMZQ are still king in this area. ABC/Cap. Cities' Mix 107.3, WRQX, is still the most popular AC station but WMMJ, Magic 102.3, and its Urban Adult Contemporary format are on 107.3's heals. Local talk stations WMAL AM 630 and WJFK FM 106.7 round out the top 5 with a 4.6 share each.

The oldies war continues. WBIG, FM 100.3, continues to grow with a 3.6 share, 11th place overall, while competitor WXTR is down to a 1.3 share and is now in 19th place overall. The biggest drop in this book is at Soft AC WGAY, FM 99.5., which went from a 5.2 in the Winter to a 3.8 in the Spring. WGAY just recently added the new morning team of Beverly Fox and David Burd. It's too soon to tell if Fox & Burd are the problem or if there was some quirk in the book. CBS's WARW, ARROw 94.7, grew a half point in this book. The station which features mostly 70's era Rock & Roll is in 16th place overall in this book.

Two sick puppies remain. WTEM's sports format on AM 570 is once again in last place in the overall ratings. And WCXR FM 105.9's Classic Rock format is still hurting. They are down to a 1.6. Here's a breakdown of the these two stations over the last 7 ratings periods.

WCXR FM 105.9, Classic Rock format
Spring '94 Winter'94 Fall '93 Summer '93 Spring '93 Winter '93 Fall '92
1.6 1.9 1.9 2.5 2.6 2.1 2.4

WTEM AM 570, Sports format
Spring '94 Winter'94 Fall '93 Summer '93 Spring '93 Winter '93 Fall '92
0.8 1.2 1.0 1.0 0.7 1.0 0.6

Washington, D.C., ratings of listeners age 12+

Spring '94 Winter '94 +/-

1. WPGC-FM (95.5) Urban 9.8 9.1 +0.7
2. WMZQ-AM/FM (1390/98.7) Cntry 5.2 6.1 -0.9
3. WRQX-FM (107.3) Mix/AC 5.1 4.3 +0.8

In article <30fopr$oa6@vixen.cso.uiuc.edu>, Jack Schnapper <jss@nrc.gov> says:
>
>I have a GE Super Radio III that I purchased at K-Mart for @ $50. I also
>have a Select-A-Tenna which is specifically designed to enhance AM signals.
>With this combination, I am able to receive WFAN from Rockville, MD (just
>outside of D.C.) in the early morning, evenings and even sometimes during
>the day (but with a weaker signal). You can get the antenna from C. Crane
>Company for @ $53. Call C. Crane at 1-800-522-8863.
>
>Jack
>
WHAT???? EQUIPMENT OVERKILL on this rx. WFAN has a great signal all over
the east coast. I pick up the station on a $10 walkman in Maine and Florida.

When I was younger, I used the old pocket transistor radios, inside a
mobile home to receive WABC, WNBC, WCBS, WKBW (with its 6 tower array),
WOWO, WHAS, WLS, CKLW and more. I was a kid doing this living on Andrews
Air Force Base.

To get WFAN in California, good luck with $1000 equipment, except if you
pick it off a bird.

Rob

Hey... I have never actually heard Art Bell, but recently when I
heard a description of his show on another computer forum, I am facinated.

I live in the SF Bay Area, and would like to find out a station where I can
hear him clearly. I was sent a list of stations that are extremely far away
for me to get a clear signal (ie, las vegas, eugene OR...).
Is there a San Francisco/Oakland/San Jose station that broadcasts his show?

The stations that I listed above a have a huge theramin sound to them.
For the 30 seconds I tried to tune them in, I barely heard Art Bell metion
a Usenet newgroup called alt.fan.art-bell. To my knowledge, I have access
to all Usenet newgroups, but this one isn't on my list. Can someone fill me
in here? Thanks a million.

Re: Brother Jake and Scruff Connors trading positions between CILQ (Q-107) in Toronto and CJKR in Winnipeg. CJKR is album rock, as far as I know, although I don't think quite as "heavy" as Q-107. Brother Jake had a previous stint in Winnipeg before his previous Q-107 stint back when CJKR (97.5, by the way) was known as "Kiss-FM" (calls were CKIS). Brother Jake also used to do lots of TV spots for Park Pontiac Buick in Winnipeg.

I seem to recall something about Scruff being suspended from his Edmonton posting after a sexual harassment complaint.....

Sounds like you had the reaction I did, except on a grander scale. I've thought about seeing if they'd like to part with the 88.9 KEAR translator in Ottumwa, Iowa. I'd be happy to have it this October to bring public radio to the area. Of course those other stations would be nice as well. You could make a pile just selling off the NYC, San Francisco, and Philadelphia stations since they're on commercial frequencies.

2718. Carrier-current antenna alternative

Newsgroup: rec.radio.broadcasting
Date: 1994-07-20 07:12:19 UTC
From: rbe3@columbia.edu
Message-ID: <30iioj$4vr@vixen.cso.uiuc.edu>
Source record: 38973

I built a Ramsey FM10a and it does work really well. The only problem seems to be with the propogation through a seventeen story steel and concrete building which my radio station is trying to reach. I have a standard dipole oriented with the signal lobes going vertically. I've considered a ground plane but that does not seem appropriate for vertical coverage.

The Ramsey manual mentions something called "carrier-current" but tactifully evades saying anything more on it. Essentially it is an antenna alternative which allows the signal to be broadcast through a building's power outlets via internal wiring. I have not been able to find any information on this topic in any ARRL book or maazines or anywhere!

If anyone knows how to set up a "carrier-current" antenna configuration or knows where any information on this topic can be found, I would be greatly appreciative. Either post on this group or email rbe3@columbia.edu with any information. Thanks!

2719. r.e. Carts in Rick Dee's studio

Newsgroup: rec.radio.broadcasting
Date: 1994-07-20 07:12:19 UTC
From: Peter Bourke <pbourke@eve.adam.com.au>
Message-ID: <30iioj$4vs@vixen.cso.uiuc.edu>
Source record: 38974

I read in a recent Airwaves about the carts used by Rick Dees (at KIIS?)
and the rotary knobs on the console.The comment was made that there doesn't
appear to be a good replacement for carts for major station use.
That would be an extremely debatable point of view,these days.I have been
using Computer Concepts'DCS system in Australia,since July 1991,at two
different stations(one regional,one major city).This and a few others,are
well and truly,mature systems capable of replacing carts in the on air chain.
I will admit to being worried in earlier days about the flexibility of these
systems,especially in cart intensive applications,like the "zoo"type morning
shows etc.There are now touch screen front ends available to make busy shows
quite a bit easier(point and shoot cart play!).It's interesting that users
of these digital replacements for cart machines,still call the audio
pieces,carts!
There are great operational advantages to be had,using PC based systems in
radio stations.The station I'm currently at use a UNIX based traffic system,
and PC based sytems for audio storage,and accounting etc.These are all
networked,and thus we have a paperless trail from the time a client books
a spot, to the time the client pays the bill after airing of the spots.I
would be interested to hear from others,in other parts of the world who
are doing similar things in radio stations.
Thanks,
Peter Bourke

There's this voice I can hear in my head, that intones in a very Golden Age radio kind of voice (you know what I mean? If you don't, the Shadow does): "This... is the Voice of Doom".

Where is this voice from? I get the feeling it's an old radio show, but I can't place it.

I know that in the "Philidelphia Story", Jimmy Stewart does a parody of it when he makes a prank phone call: "This is the Voice of Doom, and your days are numbered to the seventh son of the seventh son!"

2723. Fairness Doctrine, Religious right and Rush

Newsgroup: rec.radio.broadcasting
Date: 1994-07-20 07:12:27 UTC
From: umar@world.std.com
Message-ID: <30iior$505@vixen.cso.uiuc.edu>
Source record: 38978

Re-enactment of the Fairness Doctrine would not affect Rush Limbaugh in the slightest-- at least that's what the legal bigwigs at last years NAB Radio Show seemed to think. The Fairness Doctrine as it was formerly implemented required STATIONS to present both sides of controversial issues. It said nothing about individual programs or program hosts. I suspect that the real opposition to the doctrine is coming from right-wing religious conservatives who own stations and use them to propagate their views on social issues. These people would have to give the devil his due, so to speak, were the doctrine reimposed.

2724. Re: AM DX QUESTION AND WFAN

>rules require that an FM station can only have 40% of its music as
>current;no such rules exist on AM.(I may be wrong;can any Canadians
>check back and correct me if necessary?)
>
Actually, the CRTC (Canadian Radio and Telecommunications
Commission) only regulates the 'hit:non-hit' ratio of Canadian FM
stations. FM playlists must have %51 non-hit music on them. A CRTC hit
is one that appears or has appeared on a major chart in Canada. That
means Canadian FMs can play an American hit, and if it isn't a hit here,
we get to count it as non-hit.
The current/non-current rules were tossed in a round of FM
deregulation a couple of years ago.
Of course, the CRTC still regulates %30 Canadian music for ALL
radio stations, AM or FM.

Now that KKHI has been replaced by Westinghouse's new version of Talk radio for a few weeks. What do you think of the change.

I do miss the Classical KKHI but the new format has it's merits. I enjoy the mix of news and talk during the week. The switch to music during the weekend is an interesting approach.

Who know maybe some of the boring AM exclusive news and talk stations i.e. KCBS and KGO will take a lesson and add some entertainment value to their formats.

In article <30foq5$oaf@vixen.cso.uiuc.edu>, trimm@netcom.com (Trimm Industries) writes:

(getting a low power FM)

It's very nearly impossible these days unless you are an owner of an existing station seeking to use the trans-mitter as a pure repeater to fill in coverage gaps. Nominally the FCC will license stations with ERP as low as 100 watts IF the antenna site is VERY elevated... enough to give at least equal coverage to a 3000 to 6000 watt station at 325 feet above average terrain. 3000 watts at 325 feet is about the minimum coverage they will license these days, now that the old Class D stations are a thing of the past. Most stations licensed are at least equivalent to current commercial Class A standards. They are also expected to operate at least 12, preferably 18 to 24 hours daily, which will cost a lot more than the budget you are talking about unless you do everything yourself (or have a legion of volunteers at your command). Bob

That depends on what you are looking to do. Do you want to broadcast full-time to the general public. Sounds like you want a Class A FM station, with 3KW of power. You can operate a noncommercial FM for very little money but your budget to get started is a little low, unless of course you have all the equipment ready to go. The good old Class D FM stations (10 watts) are no longer available for application.

If you'd like more information, feel free to e-mail me.

2730. r.e. minidiscs to replace cart machines

Newsgroup: rec.radio.broadcasting
Date: 1994-07-20 07:12:43 UTC
From: Peter Bourke <pbourke@eve.adam.com.au>
Message-ID: <30iipb$50n@vixen.cso.uiuc.edu>
Source record: 38985

In a recent Airwaves,Peter Smerdon,was asking about using Minidisc's
as a replacement for carts in the on air situation.It would appear to me
that this could be a great idea for smaller operations who want something
digital,but don't (or can't) got to a PC based system.
Peter hinted at the possible problems with the bit rate reduction as used
by the SONY system.I currently use an audio storage system that uses APTX100
4:1 reduction,for commercial storage(and any things that used to be on
carts).I then link this to the transmitter site on a STL using the same bit
rate reduction.The audio quality is excellent,with the exciter in the
transmitter being the weak link in the whole system.I have heard of some
male voices that can sound a bit 'edgy' when recorded using this algorithm,
but this is extremely rare.
It will be interesting to see what happens in the future with the linking
in a chain of many different types of compression algorithms.Does anyone
out there have any experience to reprt on,concerning these issues?
Thanks,
Peter Bourke.

I can give you a good clue...a story in the N.Y.Daily News(yes,I
can get the papers up here)last week said that PM drive(handled by
Bob Grant,who's been described as "the sour conservative" by CJR)
dropped over 2 points from the last book-from 6.7 to 4.6. BTW,I had
read in the Post last year that Grant said he'd be leaving in 200 days.
Any change?

> is this the same thing that happened
>in LA, where Limbaugh has been sliding downward, started
>diving more precipitously in the spring book just released, and
>pulled the afternoons and evenings down with him?

Based on this,probably the latter.

(Philly Arbitrons)

Nice to see a solid operation like KYW continue to perform strongly...that 6.1 share for WWDB (which has to be America's #1 FM talker) has got to be close to an all time high as well. But that also tells me there's a lot of talk listenership that's headed their way by default. If the Group W duopoly really wants to make the most of the 1210 AM signal, why not launch a new generation of talk hosts with it? N/T programming has a potential for an aggregate 20 share in any large market (it's close to it in mine) which means there are a number of potential talk listeners out there who are floating around listening to quasi-talkers like the Stern station or WIP...a well-programmed AM 1210 (where you might even revive a popular old callsign from days past, like WFIL or WIBG) could easily get a 4 or 5 share and make money without even having to pull too many listeners away from the existing talkers. Wonder if the CBS/Group W combo will think of it?

Bob (..and all other prospective radio station buyers..):

You might want to try looking in the back of a weekly publication
called "Broadcasting" Magazine, where there are sometimes ads for
stations being sold. There might also be advertisments for Media-Brokers
in the Austin, TX. locality.
Another possible source could be a weekly newspaper called "Radio and
Records". You may want to check there as well.
Thanks, and Good Luck in your search for a station-for-sale in the
Austin Market. Worked in Laredo a number of years back, and it sure is a
beautiful place. Have seen it once with a fellow radio announcer friend,
and I've always wanted to go back someday.

>Subject: Re: Sporadic-E

The neet thing I find about TV DXing is that you often get the video from
one station and the audio from another. Back in 1976 in September I
remember very well seeing news from a station in Cleveland while hearing the
audio from a Beverly Hillbillies rerun on another station. This happens
because the audio and video, being on different frequencies, will propagate
differently and at slightly different angles, hence the two-source reception.

For a few years now, I've been taping from my Super Radio
II to a handheld cassette recorder. I've sometimes wondered
why things would work properly only when the attenuator was
plugged into the SRII and not when it was plugged into the
recorder, but since it worked at all, I've just ignored the
problem.

Recently the playback well of my dual-well stereo cassette
deck died. After finally finding a replacement with the right
features (quick reverse + timer switch), I took a stab at
fixing the old deck and--I still can't believe it--I was
successful. So I put the old deck next to the SRII and my
Sony 2010 for high fidelity recording. The connection was,
well, interesting, using four cables and adapters to go from
mono output to stereo phono input. And I was back to my old
problem. If I jiggled the connections ever so slightly, the
signal would be lost.

I'm staring at the Rube Goldberg linkage wondering
which connector is the loose one when I *read* a sticker
that's been on the front of the SRII since the day I bought
it: "Headset Capable" Could it be? Yes! The output is
monophonic, but the jack itself is a *stereo* jack. The
reason the attenuator worked and the other end of the cable
didn't is that the attenuator hit the jack just right to make
a good connection. Now one connecting cable--1/8" stereo plug
to twin phone plugs--works perfectly.

"Headset Capable." *Not* earphone. Well, duh!

2739. talk radio and transcription services?

Newsgroup: rec.radio.broadcasting

From: hunter@work.nlm.nih.gov
Message-ID: <30iiq1$52q@vixen.cso.uiuc.edu>
Source record: 38994

Hi folks!

I have two questions I hope someone out there in netland can help me with.

First, I'd like to get a listing of the stations and their formats in the top 100 or so markets in the US. Is there some reasonably up to date reference available somewhere? I figure on-line is probably too much to ask, but something that isn't a year out of date would be nice.

Second, I occasionally see references to what I think are commercial transcription services, usually as the source of some newsworthy radio transcripts (e.g. Clinton's interview on KMOX last month). Are there companies that provide transcripts of radio broadcasts? Who are they and how can I find them?

Thanks for any help you can offer.

Larry

2740. Re: Why Is Talk Radio So Popular?

Newsgroup: rec.radio.broadcasting
Date: 1994-07-20 07:13:06 UTC
From: gdallas@aol.com
Message-ID: <30iiq2$52r@vixen.cso.uiuc.edu>
Source record: 38995

In article <30for2$obg@vixen.cso.uiuc.edu>, patchman@netcom.com (J. Patrick Henry) writes:

>- What are the most common misconceptions regarding talk radio?

I think the most common misconception -- and I've seen it reflected in several posts here, including some by people actually in the industry -- is that today's very political talk hosts are merely entertainers -- and are regarded as such by management. The line of thinking seems to suggest that, sure, talk radio today -- in the post-Fairness Doctrine era -- is primarily conservative, but if the ratings numbers were there for liberal talkers it would be primarily liberal instead.
I don't buy this for a moment. If this were true, you wouldn't hear talkers bragging about having just returned from seminars at right-wing think tanks like the Shavano Institute and the Heritage Foundation -- at station's expense. If this were true, you wouldn't hear businessmen telling other businessmen gleefully at Chamber of Commerce breakfasts -- as I did a few weeks ago -- that the owner of the local duopoly pledged to them that no liberal talker would EVER darken his airwaves. If this were true you wouldn't see so many stations continuing to air Limbaugh and local far-right clones even as the numbers sink and the demographic becomes less and less profitable.

>-- Recent events in the news, like the OJ craziness, encouraged So Cal
>residents to tune in for the latest developments - what would make them
>stay as regular listeners after (and if) the story dies?

In this case, are you really talking about "talk radio"? This sounds more like "news radio" to me -- much more KNX than KFI.
Here comes a debatable point, and one which might prompt arguments to the contrary, but my humble opinion is that on our modern-day airwaves it's so hard to tell what's live and what's canned, what's a local announcer and what's a stylized, sanitized satellite program. Thus, lots of people yearn for live, local voices relating something that's happening right then. Even most rapid-fire news stations never used to give "traffic and weather together" every 10 minutes -- but they do now, and I don't think it's ONLY for the information benefit. It's also to serve the human need to be "connected."

>Cleveland traffic reports are much, MUCH more intelligible...
>Cleveland has only half the freeways Chicago does... :)

>I sure wouldn't want to listen to an L.A. traffic report.... :)

Here in Colorado I can pick up KNX from Los Angeles at night, and find their traffic reports MUCH easier to follow than those frantic, rapid-fire, number-laden reports given on Chicago's WBBM or WMAQ. The problem with Chicago reports -- something I haven't heard in any other city -- is that they feel it necessary to tell you some computer's guess about how long it's going to take you to drive from some given point to the Loop. When you try to do that for seven or eight freeways, you come up with that gibberish of numbers that our moderator characterized thusly:

> [Moderator's Note: Ok, Why do all traffic repors come in these long,
: > run-on sentences that are completely devoid of punctuation and sound
: > like this... twentyminutesfromthejunctiononintothecicleatteentyfive
: > onouttotheairportfifteenbackin... <grin> Bill]

Sorry, but if I were driving the Eisenhower, it would do me no good to hear "OntheIkeit's45minutesfromthejumctiontothePostOffice." What I'd rather hear is "Accident in the No. 2 eastbound land of the Ike at Kedzie, traffic backed up to Harlem." THAT would tell me to stay on the Ike until Harlem, get off, take surface streets to Kedzie, get back on and head for the Loop -- in a lot less than 45 minutes!

A friend I visited in Chicago on a weekend in May complained that he had to concentrate so hard to pick any pertinent information out of WBBM's traffic reports that he felt it impaired his safety as a driver! KNX does it much better -- even with a much bigger freeway system.

TRANSCOM, a gov't coalition of transportation agencies in the NYC area, is working with the NY State Police, NY Thruway & NYS Dept. of Transportation to help coordinate transportation information for the upcoming Woodstock concerts (8/12-14). A key to this is getting info out on radio about the best routes to the concert & and routes to avoid for those not attending. I'd like to establish a list or radio stations in NY, NJ, PA and the New England states that would like to get this information. Our obvious target is rock stations, but because of a country music festival at the same time in nearby Hunter Mtn., country staions may also be interested. We also hope to supply some real-time traffic info during the concert by fax.

I'd like some help in two ways. First if your station would like to be added to the fax list for this info please fax me on your station letterhead with your request & the station's fax #. THERE IS NO COST FOR THIS! Second if anyone out there can give me the call letters & city (phone # too if you have it) of country & rock stations in the above area, please send me a reply through e-mail. TRANSCOM's fax Is (201) 963-7488. My e-mail address is I95BernieW@aol.com. THANKS.

> be wrong.
>
> --

the zoo station in Lima (technically Wapakoneta, but studios
are in Lima) was/is WZOQ.

At one time, according to an old M Street Database, they had a mere 44.4
share! now it is more like a 20.

I think WJMN-94.5 in Boston ought to stay urban - Boston doesn't have
much Urban other than the aforementioned WILD, and theyare doing
great - spring Arbitron shows them
third (5.8) behind WBZ (8.0) and WXKS (6.5)

Lane Brent Forsythe came off saying that::

: 1) Are all AM receivers created equally? Is there an AM receiver I could
: buy which would be better then the Proton clock radio I am currently using?

I've heard that the Proton is a good radio, although a good SW receiver
will out perform most "table tops".

: 2) Any suggestions for where I can buy a good anntaena and or amp for AM
: DXing?

Yes, the Kiwa Loop. It is the best indoor MW antenna there is. (if
someone can prove otherwise, please try :) The Kiwa Loop uses
regeneration to achive an ANTENNA bandwidth as narrow as 400hz (not a typo).
The Kiwa Loop is a 100% USA handmade (ok, not all the simiconductors)
product. Each unit is made one-at-a-time by Craig. Believe me, Craig is
pickey on what he will ship out.

Kiwa received the World Radio/TV Handbook Industry Award for it's products.

You can reach Craig at Kiwa (1-800-398-1146) and ask questions.

DISCLAIMER: I have no affilation with Kiwa other than being a satisfied
customer (and hanging around with Craig talking about the "next great
product" :)

In article <30iioj$4vr@vixen.cso.uiuc.edu>, rbe3@columbia.edu (Richard Branden Emmerson) writes:

"If anyone knows how to set up a "carrier-current" antenna configuration or
knows where any information on this topic can be found, I would be greatly
appreciative. Either post on this group or email rbe3@columbia.edu with any
information. Thanks! "

I worked with carrier current radio when I was in when I was at Butler University. If I remember right the manafacturer of the equipment was LPB or something to that effect. I believe that carrier current is only availible for AM. We used to have different transmitters around the campus tuned to frequencies close to 630. If you caught a good power line you might be able to broadcast a few blocks!

No one questions the POTENTIAL of computer-based systems. But what you fail to mention is the number of times you have had little screwups on the air. When working with whizbang new computer toys, people tend to ignore and excuse the times that songs fail to start, or perhaps stop in midplay, or even the times the system fails altogether. Major market stations cannot tolerate this, even in the name of Progress.

For the past six months or so, KBAY/KKSJ has been using a system called RCS. It has been a nightmare. Besides the numerous total system outages, there have been countless screwups--most completely obvious to the listeners. The "experts" come out from the midwest, stroke their chins, and then come up with conflicting solutions. We have been through more than a dozen software updates, getting one a day at one point. Granted, the Computer Concepts system in use previously was far more bulletproof, but then it was not able to perform tasks that are expected of this new monstrosity.

2748. Cincinnati Radio Ratings -- 2nd Quarter 1994

Newsgroup: rec.radio.broadcasting
Date: 1994-07-21 01:04:56 UTC
From: john.simpson@sdrc.com
Message-ID: <30khjo$qdm@vixen.cso.uiuc.edu>
Source record: 38903

News/talk and rock 'n' roll were the big winners this quarter, as all Jacor-owned stations placed in the top 10. The big loser was classic rocker WOFX-FM, "The Fox", whose ratings plummeted to nearly half of what they had in recent quarters.

1. WLW-AM 700 Full Service 12.8
2. WEBN-FM 102.7 Album-Oriented Rock 8.6
3. WUBE-FM 105.1 Country 7.8
4. WKRQ-FM 101.9 Adult Top 40 7.3
5. WGRR-FM 103.5 Oldies 5.8
6. WIZF-FM 100.9 Urban Contemporary 5.3
7. WCKY-AM 550 News/Talk 5.2
8. WPPT-FM 92.5 All Rock 'n' Roll Oldies 4.6
9. WSAI-AM 1530 Nostalgia/Adult Standards 4.4
10. WRRM-FM 98.5 Adult Contemporary 4.2
11. WYGY-FM 96.5 Contemporary Country 3.7
12. WOFX-FM 94.9 Classic Rock 3.6
13. WWNK-FM 94.1 Adult Contemporary 3.3
14. WAQZ-FM 107.1 Modern Rock 1.5
15. WPFB-AM 910 Nostalgia 1.3 (*)
16. WBND-AM 1160 Nostalgia/Soft Urban Contemporary 1.0
WHKO-FM 99.1 Country 1.0 (**)
18. WCIN-AM 1480 Classic R&B/Black Gospel 0.8
19. WTUE-FM 104.7 Album-Oriented Rock/Hard Rock 0.7 (**)
WLQT-FM ??? ??? 0.7
21. WPFB-FM 105.9 Country 0.6 (*)
22. WNKR-FM 106.5 Country 0.5 (***)
23. WGTZ-FM 92.9 Contemporary Hits 0.4 (**)
WCVG-AM 1320 Southern Gospel 0.4
WMOH-AM 1450 News/Talk 0.4 (****)
WROU-FM ??? ??? 0.4
27. WAOZ-AM 1360 Radio AAHS (Children's Music) 0.3

No ratings:
WNOP-AM 740 CNN Headline News
WTSJ-AM 1050 Christian/Country
WUBE-AM 1230 Country (#)
WAKW-FM 93.3 Christian
WNLT-FM 104.3 Contemporary Christian

(*) Middletown station
(**) Dayton station
(***) Dry Ridge, KY station
(****) Hamilton station
(#) Simulcast of WUBE-FM 105.1

2749. Dallas/Fort Worth Arbitrons

Newsgroup: rec.radio.broadcasting
Date: 1994-07-21 01:04:56 UTC
From: "chip (c.d.) kelley" <chipk@bnr.ca>
Message-ID: <30khjo$qdo@vixen.cso.uiuc.edu>
Source record: 38904

>From today's DALLAS MORNING NEWS, here are the top 10 D/FW rankings:

Summer Fall Wint Spring
1 KSCS country 5.4 6.9 6.4 6.5
2 KHKS CHR "106.1 Kiss FM" 4.4 5.9 4.7 6.1
3 WBAP news/talk "NewsTalk 820" 5.9 5.5 5.1 5.9
4 KVIL-FM/AM AC 4.5 5.4 5.9 5.3
5 KOAI jazz "Oasis, Smooth Jazz" 3.7 3.5 4.9 5.1
KYNG hit country "Young Country" 5.3 5.1 4.8 5.1
KPLX hit country "K-Plex" 4.6 4.6 4.7 5.1
8 KKDA-FM urban "K104" 4.5 3.4 3.5 4.2
9 KLUV oldies "K-Love" 4.0 3.3 3.8 3.9
10 KDGE modern rock "Edge" 2.8 2.9 3.1 3.7

Usually, they list the top 20. However, the article that went with the story mentioned urban KJMZ "100.3 Jamz" finished 11th (they had a 4.4 in the winter), classic rock/'70s oldies KRRW "Arrow 97.9" finished 13th (they has a 2.1 in winter).

Another article in the sports section mentioned all sports KTCK "Sports Radio 1310, the Ticket" finished 25th with a 1.2 (up from a 1.1, but still lower than the 2.3 that KAAM had before it was sold and changed to KTCK).

Note on KVIL, the DMN alwats neglects to include simulcasting KVIL in with KVIL-FM's ratings, so the spring rating may be off by .1 or .2.

Of note, KHKS and KDGE's ratings are the highest those stations have ever posted. Also, this marks KSCS's 17th of the last 18 reports time at #1.

>
>It will be interesting to see what happens in the future with the linking
>in a chain of many different types of compression algorithms.Does anyone
>out there have any experience to reprt on,concerning these issues?

Yes. A local station uses a MUSICAM-encoded line for their STL, and
finds it to be extremely neutral sounding. However, when using an MD
deck for playback, there appear to be a number of peculiar artifacts
audible on transients. Horns and cymbals are distorted very strangely.

However, even with the distortion caused by the compression schemes
interacting, it still sounds better than the Tapecaster it replaced.
Admittedly this is saying very little.

2751. Re: AM dx question and WFAN

Newsgroup: rec.radio.broadcasting
Date: 1994-07-21 01:04:58 UTC
From: martin@cod.nosc.mil
Message-ID: <30khjq$qds@vixen.cso.uiuc.edu>
Source record: 38906

I have listened to a lot of east coast stations in
Southern California, much easier from the Inland Empire
(Riverside) than from the LA basin. From Hawaii, I
listened to: WBZ, WCAU, KYW, WGY, WHAM,
KDKA, WWWE, WLW, and WCBS, just to mention a few.
The big problem with WFAN, even at sunrise on a winter morning is that
you've got KTNN (the Navajo Nation) from Window Rock AZ on
660 kHz. That station is completely dominant
throughout the West, as are stations like: KSL, KOA, KOB, KFI, etc.

One Monday morning in Ohio I listened to six California stations,
the rarest for long-distance dx was KKHI-1550. KNX and KFI can be regular
catches on the East coast.
Happy dx,
Doug Martin martin@nosc.mil
(BTW I've now listened to 2954 AM stations.)

2753. Re: Fairness Doctrine, Religious right and Rush

Newsgroup: rec.radio.broadcasting
Date: 1994-07-21 01:05:05 UTC
From: LESMITH@nervm.nerdc.ufl.edu
Message-ID: <30khk1$qef@vixen.cso.uiuc.edu>
Source record: 38908

In article <30iior$505@vixen.cso.uiuc.edu>
umar@world.std.com (Robert O Landry) writes:

>Re-enactment of the Fairness Doctrine would not affect Rush Limbaugh in the
>slightest-- at least that's what the legal bigwigs at last years NAB Radio
>Show seemed to think. The Fairness Doctrine as it was formerly implemented
>required STATIONS to present both sides of controversial issues.

True, it applied to stations. But under the fairness doctrine as originally construed by the Commission, if a station were to run a program (such as that of Rush) that aired only one side of a controversial issue of public importance, it was up to the station to seek out and air responses, i.e., the other side of the issue. Under law, a station licensee is responsible for everything that is transmitted over the licensee's facilities (except, of course, for replies under 47 U.S.C. Section 315(a)), and so under fairness the licensee had to seek out and air that response even if the original program, like Rush's, was syndicated. Station licensees, however, (1) are typically lazy with respect to such requirements and (2) do not wish to give up time for "the other side" that they could be selling to someone (although they usually hide this aspect in some sort of First Amendment rhetoric). So if fairness were reinstated by the FCC or made law by Congress, stations that broadcast Rush's program might attempt to pressure him into seeing that his program adequatly addresses both sides of an issue, or they might be tempted to drop his program entirely in order to the avoid fairness complaints from listeners. So, yes he would be directly affected. That is why he and a number of other talk show hosts led a very effective campaign to pressure Congress not to pass a fairness law. Rush and his cohorts were much more effective in killing that bill than the religious broadcasters (although the support of the NARB certainly helped kill the bill).
There is a book on FCC regulation due out from Longman this September, one chapter of which explains in simple language what the fairness doctrine was and, under the proposed law, would have been. Called, 'Electronic Media and Goverment,' and it's designed to be sort of a how-to book on staying out of trouble in radio and television.

I used to listen to AFN (armed forces network?) who are broadcasting from Frankfurt (here in Germany). Yesterday a german newspapers reported that they stop broadcasting from Frankfurt at the end of the year. I just had them at 1143 kHZ, but would switch to long-wave or short-wave if needed. Does anyone know how to get it in Germany? Or is there another american radio station around? In fact the most I listen to is NFL coverage, so a station without that isn't of much help. Please help a desperate football fan. Thanks in advance for your answer (preferable email).

From: dk@crl.com
Message-ID: <30khka$qer@vixen.cso.uiuc.edu>
Source record: 38912

Ron P. Smith (smithro@Ampex.COM) wrote:

: Now that KKHI has been replaced by Westinghouse's new version of Talk
: radio for a few weeks. What do you think of the change.

They should have kept it classical. KPIX radio is a laughingstock. When 95.7 The Express people talk about 95.7 The Express they always 95.7 The Express put that stupid 95.7 The Express positioner into their speech. A radio fanatic I talk with on the phone frequently didn't even talk about it yesterday, so I assume that for HIM to be ignoring it now is a bad sign for them. The last thing station management wants is to be ignored.

: Who know maybe some of the boring AM exclusive news and talk stations i.e.
: KCBS and KGO will take a lesson and add some entertainment value to their
: formats.

Unfortunately, this is what's wrecking KGO's approach. They're trying to be entertaining. They've lost the #1 position in morning drive, then afternoon drive, now nights. Give us more entertainment and they may lose us in other dayparts, too. I think the new PD Ken Beck, may make some changed for the good; one can hope. He's a bright guy.

In article <30iiq2$52r@vixen.cso.uiuc.edu>, gdallas@aol.com (GDallas) writes:

"The owner of the local duopoly pledged to (local businessmen) that no liberal would EVER darken his airwaves."

You show me that owner and I'll show you a guy who will have his station up on the block (at best) or bankrupt and dark (at worst) within two to three years max. We're watching the gradual decline, both in audience acceptance and in bottom line revenue, of the once proud and format-dominant clear channel station in our market. It's a talker and Limbaugh affiliate with hard-right programming all the way. It has lost five full share points in the last 12 months, even though its non-partisan morning show has held its own...meaning a HUGE erosion in midday and afternoon dayparts where its most partisan programming airs. And the morning newspaper reported it lost over $1.1 million in billing last year. The company that owns it has had to divest other stations in its group, in Buffalo and Youngstown, Ohio, during the past 12 months. You can see the direction they are headed. If they continue to misread the market they will die...and it's their own damned fault. This will repeat itself in market after market. Meanwhile, stations with a more responsive and balanced approach will continue to fare just like KABC, KGO, WGN and the rest...they will dominate and prosper. Eventually even rock ribbed Republicans can presumably start to read the bottom line...and if they don't, someone else will. : Here in Colorado I can pick up KNX from Los Angeles at night, and find
: their traffic reports MUCH easier to follow than those frantic,
: rapid-fire, number-laden reports given on Chicago's WBBM or WMAQ. The

On my trip to Chicago I stayed in Brookfield and almost exclusively used the Ryan and Stephenson expressways. (side note: I90/I94, ostensibly an east/west freeway, goes north and south through the Loop, and I55, a north/south freeway, runs east and west. That makes a lot of sense. :)

The traffic reports on WLS didn't seem to say a whole lot about traffic on the Ryan and less about the Stephenson. Gee, I drove to Chicago. I don't care how long it takes to get to the airport, and if I did need to go out there, I could find another way besides the freeways.

Maybe I just missed something.

What irritates me is the traffic reports in Columbus, Ohio always referring to the "Inbound Freeway" or "Outbound Freeway." People in Columbus probably know which one this is, but I don't!

: > [Moderator's Note: Ok, Why do all traffic repors come in these long,
: : > run-on sentences that are completely devoid of punctuation and sound
: : > like this... twentyminutesfromthejunctiononintothecicleatteentyfive
: : > onouttotheairportfifteenbackin... <grin> Bill]

Not in Cleveland, Bill.. why don't you move? :)

: A friend I visited in Chicago on a weekend in May complained that he had
: to concentrate so hard to pick any pertinent information out of WBBM's
: traffic reports that he felt it impaired his safety as a driver! KNX does
: it much better -- even with a much bigger freeway system.

it's hard to do it worse.

In article <30iinq$4v4@vixen.cso.uiuc.edu>, Tom Lacko <LACKO@ENH.NIST.GOV>
writes:

(Washington Spring 94 Arbitrons)

A couple of interesting questions....both related to news/talk
programming. First, is the format seemingly underperforming its
typical total strength in the DC market, and if so, why? (Add the
shares for all the talk stations in the market and you get only
a total 12.3 share for the format...and less than 16% even if
you throw in the all-news WTOP...vs. a more typical share of 17
to 20 per cent in Boston, NYC, Buffalo, Rochester, and well over
20 percent in Detroit, Chicago and San Francisco. One would think
that in the world headquarters of competitive politics, people
would be MORE interested in politics and issue driven talk, rather
than less...
Also, why hasn't the retooling at WRC/980 brought any results
yet? Is it too soon for the changes to have taken hold? Or isn't
the new lineup being promoted heavily yet?

News from the #40 market:

*Another new hire at WBEN(NewsTalk930)of note. Paula D'Amico has come aboard as a news reporter/anchor;I noticed her last night handling evening news. D'Amico(formerly Paula Greene,must have married)last worked at WGR,as well as WJJL in Niagara Falls-she was also ND for two years at WBNY-FM. My impressions:Still good,but can get flustered during newscasts-and did when trying to give out a phone number.

*Part(I lose track)of the Am-Pol Eagle v. WGR:The 7/14 edition has a number of letters from officials of Rich Communications:Bob Rich Jr. thanked a local church official(a monsignor)for his letter and offered his apology for anything that may have offended the Polish-American community. Mindy Rich's letter to Joe Macielag does likewise(prompting Macielag to reply-from her request to do so-that he was not in contact with GM Jim Meltzer,but had sent him a copy of the letter). Meltzer's letter states that Larry Norton(WGRF AM driver)"will never mention Stan Jasinski on the air again",and adds that "you will never hear the word 'Polack' on any of our radio stations",adding that he felt embarrased because he was a previous winner of the General Pulaski Award. However, the Eagle noted that Rich Michaels,on July 8,said that he was "getting all the Polacks in Cheektowaga mad at me" and "we enjoy Polish humor on this show."

*Last week,Business First's page 2 column ran an "On the Street" box dedicated to morning radio. Here's what they said(and impressions):

-Janet Snyder(WKSE)-up:"Solid as a sidekick,now she gets a shot at breaking the glass ceiling in morning drive slot." No argument from me.
-Dan Neaverth(WHTT)-up:"Even as local radio icon,he's still smart, fresh and funny. And WHTT gig keeps his kids off the street." Agreed,but the part about the kids is a low blow.
-Bill Lacy(WBEN)-<->:"Common sense insights and wit without the mean spirit. But when will WBEN cut him loose to do more of it?" He *was* solo for many years before Kevin Keenan came on board,so why ask?
-Tom Bauerle(WGR);<->:"Vox populi or pandering provocateur? Let's go to the phones..." Given 'GR's reputation,probably the latter.
-Howard Stern(WWKB)-down:"Maybe you need to be a New Yorker to appreciate this wallow through the hog slop,but it just makes Fifth Coast blush." And KB as well,since they can't seem to get anything after him that works. Have they considered going all-sports after Stern?
-Larry Norton(WGRF)-down:"5C asks the eternal question:Can there really be a Best of Norton and Stout? Why ask why?" You could have added the end of a parody ad I have-"Yeah,f--- it-let's get drunk!".

FAB...
C.K.G.

Duckman:Every evil in the world has been the result of selfish,insane greed!

2767. Radio Watchers -- Kansas City (7/21/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-07-23 06:01:23 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <30qbnj$h3t@vixen.cso.uiuc.edu>
Source record: 38922

Until a couple of days ago, it seemed like my front lawn had dried
up along with news of the local broadcasting scene.
It finally rained this week, and some news finally has shown up
here at the Brookside Bureau for the Agriculturally Impaired.
*****
The Midtown zoned edition of the Kansas City Star has profiled
former radio station manager and longtime public-affairs broadcaster
Chuck Moore.
Moore managed KCXL(AM) from 1983 until it left the air in mid-1991
because of what were described in the article as "lackluster ratings."
The station, at 1140, was a 500-watt daytimer programming an urban
contemporary format.
Moore began in Kansas City in 1953 with "Sunrise Serenade" Saturday
mornings on KPRS(AM), now KPRT(AM), the second oldest black-owned radio
station in the U.S.
Over the years, Moore broke the color barrier at KCMO radio and TV,
as an on-camera announcer and radio DJ in 1966. Two years after that,
he developed a public affairs program for KCMO-TV (now KCTV) called "30
Minutes." The show is still on the air under the name "Urban Affairs,"
making it the longest-running public affairs TV program in Kansas City.
In 1992, Moore landed his present position as the manager of public
awareness projects for the Ad Hoc Group Against Crime, a minority-led
group actively working to reduce violent crime in the Kansas City area.
*****
KUDL(FM)'s morning host is setting up an information line for
Kansas City teenagers.
Dan Hurst, who hosts the adult contemporary station's morning show
along with Gloria Goodwin and Darcie Blake, is setting up 276-CHAT in
cooperation with the Marion Foundation and Research Psychiatric Center.
The Marion Foundation was founded last year by the daughter of the late
Kansas City entrepreneur and baseball-team owner Ewing Kauffman.
Hurst told the Kansas City Star that the foundation will also begin
producing a talk show for teenagers next month on KUDL.
*****
The following letter in the "Pitch Weekly" on July 14 concisely
explains the cluelessness of album rocker KYYS(FM)'s attempts to entice
a younger, modern-rock oriented crowd with a nightly new music show:
"This is just a little note for the hosts of the 'New Music Hour'
on KY-102: Jackson Browne may be good. He may even be great. But
Jackson Browne has very, very little to do with New Music."
That's the entire letter.
*****
From Topeka: KTOP(AM) and KDVV(FM) are reported up for sale. One
possible buyer *may* be KMAJ-AM/FM, also in Topeka. Speculation

centers on a shift of the "V-100" format from album rock to classic rock, complementing "Magic 108's" hot AC format without directly competing with it. Both FMs are at the same transmitting site as well. KMAJ is at 107.7; KDVV is at 100.3.
*****
From Columbia (Mo.): It's not official yet, but apparently KCMQ(FM) will get an upgrade from C3 to C1 status, from a transmitter at the KRCG-TV tower northeast of Jefferson City, the Missouri state capital. Competitor KFMZ(FM), owned by Contemporary Media (whose owner, Mike Rice, was convicted July 5 of felony charges in a child molestation case in St. Charles County) was reportedly unable to prevent the upgrade, but did cause KCMQ owner Zimmer Broadcasting to spend an estimated $170,000 on legal work to get the upgrade. KCMQ is at 96.7; Zimmer also owns KTGR(AM), a daytimer at 1580, and KCLR(FM) at 99.3 in the Columbia-Jefferson City market.
*****
Today (July 21) the St. Louis Post-Dispatch profile five top FM DJs who've been in the St. Louis market more than 15 years. Profiled were:
* Mark Klose, now doing afternoon drive at adult-alternative WFXB(FM) after brief stints as a talk show host at KSD(AM) and KMOX(AM). Klose began at legendary album-rocker KSHE(FM) in 1974, assuming the morning drive spot there in 1976, and also worked at KWK-FM (now WKKX) and WMRY(FM) (now WFXB!).
Notable quote: "People feel like they know me, they've grown up with me and my music. We're familiar, like a person they've known most of their lives."
* John Ulett, who's been at KSHE for 18 years, except for a brief time at KEZK(FM). Ulett was the DJ reprimanded for broadcasting a fake nuclear attack warning in 1991 during the war in the Persian Gulf, a surprising lapse on the part of an otherwise competent and sharp professional. KSHE was fined $25,000 and Ulett was suspended for a week.
Notable quote: "We never expected anyone to take it seriously, and I think what saved me was my reputation prior to that happening."
* Guy Phillips, at adult-contemporary KYKY(FM) and its predecessor, top-40 KSLQ(FM), since 1979. Until 1991, Phillips and partner Mike Wall had one of the top-rated shows in St. Louis morning radio. The partnership broke up three years ago, Phillips told the Post, because "we weren't communicating well." Wall is now at WIBV(AM) in Belleville, Illinois.
Notable quote: "I wasn't so interested in being the Funny Guy anymore. I went from just wanting to entertain to feeling what the audience was all about."
* Jackie McCoy, who's stayed with KIHT(FM) through several sets of formats and call letters at the 96.3 spot on the St. Louis FM dial since 1979. When McCoy began, the station was progressive rocker KADI(FM); she's now playing 70's oldies on KIHT. McCoy's husband Jody Owen is morning host at country station KWRE(AM) in Warrenton, Mo. McCoy also does an oldies show on KIHT Sunday and Wednesday nights with a sidekick named "Mad Maynard."

Notable quote: "I always know I can go back to waiting tables or
dispatching cement trucks if I have to."
* Johnny Rabbitt, real name Ron Elz, now afternoon drive DJ at
country WIL-FM. Rabbitt, a St. Louis native, worked at several small
stations before landing the night shift at top-40 KXOK(AM) (now KJSL)
in 1961. In 1967, he moved over to KSHE and its new progressive-rock
format. Rabbitt subsequently returned to KXOK during the mid-1980s
when it was trying to compete with clear-channel KMOX(AM)'s news/talk
format.
Notable quote: "There's no way to predict the next 10 years. In
radio, anything is liable to happen."

2768. San Diego County Spring Arbies

Newsgroup: rec.radio.broadcasting
Date: 1994-07-23 06:01:24 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <30qbnk$h40@vixen.cso.uiuc.edu>
Source record: 38923

Here's the Spring Arbitorn ratings for San Diego County, 15th market.
[I will post next week the North San Diego County ratings, the nation's 54th market.]

Station Format Numbers
+----------+
KSON AM/FM Country 7.2
KKLQ AM/FM Contemp 6.0*
XHTZ-FM Urban 5.6
KSDO-AM Talk 5.5
KJQY-FM Adult Contemp 4.6
XETRA-FM Alternative 3.8
KFMB-AM news/talk 3.8
KYXY-FM Adult Contemp 3.8
KFI-AM (Los Angeles) Talk-news 3.8
KIFM-FM contemporary jazz 3.3

*[KKLQ AM/FM included -- for the most part -- former KKLQ, AM 600. KOGO calls were effective in April; talk format May.]

Los Angeles-based KFI continued to climb in the SD market. [North County, she went from three to two, the top rated AM station]

Morning Drive:

Station Format Numbers
+----------+
KKLQ AM/FM Contemp 10.6
KSDO News-talk 7.3
KSON country 6.5
KFMB-AM News-talk 4.8
XHTZ Urban 4.4
XETRA-FM Alternative 3.7

[Material gathered from the San Diego area-newspapers; Arbitron ratings are copyrighted.]

KKOS-FM Carlsbad (95.9, 3.8kw) notes: A feature in the Escondido Times-Advocate said that the station plays "more" local artists than anyone. As an avid listner, it's true. More than 91-X (XETRA-FM) claims! The current playlist includes The Paladins, A.J. Croce, Robert Vaughn and the Dead River Angles, Cindy Lee Berryhill, Jack Temphchin, and crossover artist Kings Road.

Kings Road is a contemporary Christain-band that has a huge following in the Christain radio scene. KKOS is proving that contemporary Christain artists can cross over.

In the other vein, local Candye Kane, whose 14-track CD has been released told the Times-Advocate how she started to sell her CD. "I had to upstage the group Fem To Fem." The all girl band playes topless. "So I started to play topless." The 44-double-G singer (who speaks frankly about her measurements) said she sold 65-CDs in one night."

If Mick Jager can sing toples, so can she . . . . . `

Thanks!

> From: talk1370@aol.com (Talk1370)
>
>And how many rounds of champagne toasts are they holding at WBZ?

Bob,

:-). Yes, WBZ 1030 is creaming everyone in town right now...
What is more sad is the fact that ARS' WHDH-WRKO tandem is currently quite
content with having an average-to-below average quality product...
When WHDH's 'Boston This Morning'(5:30-9am) all-news block first
debuted earlier this year it had promise. They have fast paced
traffic-weather-sports-news updates but they're still lacking in all areas
of 'live' news gathering/reporting...WBZ always has 2 or 3 reporters
providing live updates from various locations with breaking news stories.
WHDH 850 rarely sends out a reporter to do live remotes unless
it's something really huge. Usually, their reporters get the soundbites
for a news story from WHDH-TV7(same calls; different owners) and then
have a reporter edit it and put the piece together in the studio...

With Rush(12-3 and midnight-3am on tape) in a continuing slump and
Howie Carr(3-7pm) beginning to self-destruct(no big surprise; he's been
fired more times from local radio talk shows than the late Yankees manager
Billy Martin) somewhat, they could use some revamping in the line-up sooner than later....

-Mark

2771. Re: BRUCE WILLIAMS

Newsgroup: rec.radio.broadcasting
Date: 1994-07-23 06:01:32 UTC
From: francini@munch.enet.dec.com
Message-ID: <30qbns$h4c@vixen.cso.uiuc.edu>
Source record: 38926

Here in Boston, WHDH runs Bruce from 7:00 PM on. In the meantime, his sister station, WRKO, runs Gene Burns' satellite show -- CANNED, mind you, since it actually airs from 3-6 PM ET -- when there isn't a Red Sox game on. This isn't often during the 7 months of the baseball season.

This is more than slightly underwhelming. If they insist on running Gene on a massive tape delay, they should put him on WHDH in place of the somewhat uninspiring Mr. Williams.

Better still they should offer Gene a whole pile of money to come back to Boston and retake his old 10-2 slot. Any Boston radio-watchers know how well he did in the Arbitrons when he came up here for one tantalyzing week in June? No one has been able to fill those shoes since.

(202) 887-5718 FCC WORLD BBS

SUPREME COURT RETURNS MUST CARRY CASE

The Supreme Court has remanded Turner v. FCC back to the District Court. Turner challenged the constitutionality of the "must-carry" rules, claiming that they favor local broadcasting over the interest of cable companies and that this apparent favoritis m by the government for one portion of the press over another violated the free speech rights of cable operators. The Supreme Court did not overturn the "must-carry" rules, which remain in effect, but merely sent Turner back to the District Court for fur ther action. The Turner case came about as a result of the passage of the Cable Act of 1992, which reinstated "must-carry" requirements on cable operators.

The "must-carry" rules require cable companies to set aside roughly one-third of their channels for use by local broadcast stations. The government claimed the "must-carry" rules are necessary to eliminate unfair competition between broadcasters and cab le operators. The Supreme Court found that the government's claim of harm to broadcasting was not adequately proven.

Examining Turner from a First Amendment perspective, the Supreme Court decided that the "must-carry" rules are content-neutral and therefore not subject to the strict scrutiny standards usually applied to First Amendment cases. On the issue of economic injury to public

broadcasting, the Supreme Court said that the government must demonstrate that the alleged harms are real, and that the "must-carry" regulations will alleviate these harms in a direct and material way. Thus, the government must adequatel y show that the economic health of local broadcasting is in genuine jeopardy and in need of the protection of the "must-carry" regulations. Assuming an affirmative answer, the government still bears the burden of showing that "must-carry" does not burden more speech than is necessary to correct the problem.

In remanding Turner, the Supreme Court said that there are genuine issues of material fact remaining to be resolved. In order to support the claims of economic injury caused to local broadcasting by the cable bottleneck, it appears that broadcasters wil l have an opportunity to present evidence of economic harm, as well as show how these injuries would be directly alleviated by the "must-carry" rules.

The Department of Justice is seeking information from television broadcasters on economic harm that may result by a lifting of the must carry requirements. If you are a television broadcaster and would like to provide information to the DOJ, you can send e-mail to me (avb@cais.com) and I will provide you with further details.

2777. Re: New York radio ratings

>>In article <305a6h$2jv@vixen.cso.uiuc.edu>, slutsky@tesla.njit.edu writes:
>>(on NYC market spring Arbitrons)

>> Any word on where and why WABC fell down? 12 months

> I can give you a good clue...a story in the N.Y.Daily News(yes,I
>can get the papers up here)last week said that PM drive(handled by
>Bob Grant,who's been described as "the sour conservative" by CJR)
>dropped over 2 points from the last book-from 6.7 to 4.6. BTW,I had
>read in the Post last year that Grant said he'd be leaving in 200 days.
>Any change?

I know a great many people disagree with Bob Grant, but I think you will find as many will disagree with most of the lineup on WABC, and with people like Barry Gray, who is a hallmark of AM talk radio.

I did not see the article about the decline in ratings for Bob, but I know this is not the first time this has happened, and I am sure not the last. Bob is tough, straight to the point, and a real drum banger for the issues which he supports. Would his brand of talk radio work in some parts of the country, of course not. But the same could be and is said of everyone from Larry King to Howard Stern to Don Imus. And I do not see any of them crying at the bank so to speak.

Bob is not going anywhere, he signed a long-term contract in 1993, and ended his long count of the shows he did each day. His new home is wired so he can do shows from his home in New Jersey, he takes time off when he desires, and enjoys respect in his industry.

The entire WABC line-up is solid, and the up and coming team there has to be James and Joel on Saturday and Sunday nights. What would real punch up the station even more would be if they returned G.Gordon Liddy to the line-up and found a spot for Ken Hamblin(sp).

>> is this the same thing that happened
>>in LA, where Limbaugh has been sliding downward, started
>>diving more precipitously in the spring book just released, and
>>pulled the afternoons and evenings down with him?

> Based on this,probably the latter.

Do not know anything about LA radio, they could probably use a Bob Grant out there ;)

I have noticed that there are at least two versions of ABC network news.
For example, in Los Angeles KABC has a different on the hour broadcast than
KMPC. Both are Cap Cities stations. I think the KMPC version is lighter
and focuses more on personality news etc.
Could someone explain this practice to me? Are there industry names for
these different styles of news? Isn't it costly to produce two separate
broadcasts? Is this done for different target audiences or just to
prevent two local stations from having the same exact broadcast? Does
Mutual or CBS or anyone else do this?
Thanks
Lane Brent Forsythe

I'm starting to produce a live radio theatre program in Bristol VA/TN and am looking for any and all information I can find on live sound effects. We are doing the shows before a studio audience and for entertainment purposes we are interested in producing as many of the sound effects as possible live. Any help on ideas in this would be greatly appreciated.

In article <30iiq2$52r@vixen.cso.uiuc.edu>, gdallas@aol.com (GDallas) writes:

"The owner of the local duopoly pledged to (local businessmen) that no liberal would EVER darken his airwaves."

You show me that owner and I'll show you a guy who will have his station up on the block (at best) or bankrupt and dark (at worst) within two to three years max. We're watching the gradual decline, both in audience acceptance and in bottom line revenue, of the once proud and format-dominant clear channel station in our market. It's a talker and Limbaugh affiliate with hard-right programming all the way. It has lost five full share points in the last 12 months, even though its non-partisan morning show has held its own...meaning a HUGE erosion in midday and afternoon dayparts where its most partisan programming airs. And the morning newspaper reported it lost over $1.1 million in billing last year. The company that owns it has had to divest other stations in its group, in Buffalo and Youngstown, Ohio, during the past 12 months. You can see the direction they are headed. If they continue to misread the market they will die...and it's their own damned fault. This will repeat itself in market after market. Meanwhile, stations with a more responsive and balanced approach will continue to fare just like KABC, KGO, WGN and the rest...they will dominate and prosper. Eventually even rock ribbed Republicans can presumably start to read the bottom line...and if they don't, someone else will. Bob Smith, middays WXXI/1370 Rochester NY (glad I'm working for the up-and-coming upstart competitor in town)

>I think WJMN-94.5 in Boston ought to stay urban - Boston doesn't have
>much Urban other than the aforementioned WILD.

WILD 1090 has a much more community based sound but their drawback is the AM factor. Teenagers don't drive around blasting the high end AM's. In my opinion, though, WILD has a better form of programming than WJMN or even WXKS (Kiss 108) for that matter. Last week WILD had comedian Chris Rock in studio and this morning they had Speech from Arrested Development. Very rarely do you hear live interviews on either of the two stations mentioned above. Plus, the jocks at WILD have a little more freedom for personality. Music wise, WILD is the only pure urban station in Boston. WJMN and WXKS play the main stream dance and rap but forget about the deep R&B like Freddie Jackson, Maze, and Zapp. I think if WJMN adjusted their music and talent a bit, the station would be more successful. Unfortunately rumors are pointing towards a format change (Top 40/AP) which would eliminate the urban feel. If you don't mind AM radio and want a true urban station with personality, WILD 1090 is the way to go.

>great - spring Arbitron shows them
>third (5.8) behind WBZ (8.0) and WXKS (6.5)

There's a need for CH/Urban FM signal but 'JMN is not doing it right,IMO :

1. They stopped playing 'Old School' stuff.
2. No reggae, dancehall, acid jazz tunes.
3. Every song now is a painfully boring and artistically mediocore 'SlowJam'.

Great numbers don't always pay the bills. Very young listeners can be a sign of
trouble as well -- remember WHTT 103.3FM?

Pyramid is bringing back its former overnight man on WXKS 107.9FM, JoJo Kincaid,
to handle the afternoon drive on WJMN 94.5 starting on August 8th.
He's coming from AP station in Charlotte('The Edge'). So, the buzz that's been going around
Boston
since early May about 'JMN turning to AP Top 40 for Gen Xers could be the real thing...
But, then again...:-)
Also, 'JMN let go its night-time DJ Marc Clark. He's been replaced by a weekend/fill-in
Christine Fox.

-Mark

OK my tireless admin returned (a few days early) and immediately went to work on the mail problems here. All should be well and if you were sending to the other site, you may now begin sending to the main site again, which is articles@airwaves.chi.il.us.

You may still send to wdp@gagme.wwa.com, if you need to as a standby (in case of future problems) but for now, start sending to the airwaves address. If you were posting via Usenet, continue to do so.

Again, thanks for your patience and thanks to Lance (my admin) for his good work and willingness to deal with this newsgroup, digest, and the extra demands it occasionally places on him.

Bill

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior
Back in time with an uzi-
the Grease uses the equipment in the radio
studio to return to key moments in history

with his uzi
Carlos the International Terrorist-

Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time
==== ======= ====
Washington DC 106.7 WJFK 1900-2300
Baltimore MD 1300 WJFK 1900-2300
New York NY 92.3 WXRK 1800-2200
Philadelphia PA 94.1 WYSP 1800-2200
Los Angeles CA 95.5 KLOS 2300-0000
Atlanta GA 92.9 WZGC 0600-1000

Q: I like what I have read so far, but the Greaseman is not currently in my city. Is there another way I can get hold of this zanyness?

A: Sure there is, there is currently a Greaseman Web server at http://absolut.gmu.edu/greaseman/ where you can listen to some of his bits.

2788. Re: ABC NETWORK NEWS

Newsgroup: rec.radio.broadcasting

ABC has multiple separate networks; an idea that originated in 1968 when ABC Radio was almost out of business and needed to try something new to survive. There are top-hour 6 minute newscasts on the ABC Information Network and the ABC Direction Network. The ABC Entertainment Network feeds shorter newscasts just before the hour. This system has worked incredibly well for ABC, since it gives them immense flexibility in selling ad time. Advertisers can buy a wide variety of station groups through ABC, including just specific time zones (yes, there are separate feeds for each zone, with the same news content but different spots). ABC Radio master control in NYC, at 125 West End Avenue, is a fascinating place, believe me!

>From time to time, the ABC network newscalls (the feeds of voicers, wraps, and actualities that come down the network at :35 past each hour and are used by affiliates in their own newscasts) indicate that a specific cut is exclusive to, say, Direction affiliates. And some of the OJ Simpson coverage has been produced in two separate forms, one for the Information Network (known inside ABC as the I-Net) and one for the other networks.

Mutual and NBC do something vaguely similar, in that their top-hour newscasts are _identical_ except for the sounder at the top, either "Da-da-daaaaahh...MUTUAL NEWS..." or "<G> <E> <C>...NBC RADIO NEWS"... followed by a very brief pause and then the newscast. If you have an NBC Radio and a Mutual affiliate both within range, check it out.

CBS just has the single top-hour cast...don't know whether they customize the spots for different time zones.

"With News...I'm"......

In 1968, ABC got FCC permission to split it's radio network into four distincy
entities- ABC-Contmporary, ABC-Information, ABC-Entertainment and ABC-FM.
Prior to this FCC opinion, networks were only allowed one signal path...in
fact...the FCC ruling on 'chain-broadcasting' actually CREATED ABC out of the
NBC 'blue network.'

Each of the networks was designed to provide format specific news. So, yes,
you are correct.

CBS, NBC/Mutal/Westwood One, UPI and APNN all provide specific products for
specific radio stations.

: and focuses more on personality news etc.

The last trime I checked, ABC had four networks feeds per hour.
They ran their regular network feed at the top of the hour. That's
designed for "hard news" outlets. At the bottom of the hour, they run
ABC "Contemporary news." This is a quick and breezy newscast that once
appealed to FM contemporary station. I don't know who would carry it now
(or even if it's being offered any longer).
At :45, ABC offered the "Direction" newscast. This approach was
more "lifestyle" oriented "news you can use." Many stations (including
two where I was employed), taped the Direction cast at :45 and replayed
it at the top of the hour.
Why does ABC do this? Mainly because it allows them to offer as
many as four stations exclusivity while bringing in a large market share.
Have you ever wondered why "more Americans get their news from
ABC than any other news source?" It because of this, and only because of
this. Without the different networks, the television and mainline radio
network numbers all add up to about tghe same...or at least they did when
I last checked.
Hope that answers your question.

>Could someone explain this practice to me?

ABC pioneered the multi-network concept when in 1968 its single radio network became four: the Information Network, with news on-the-hour, targeted to information-intensive stations...the FM Network with 'casts at :15, originally aimed at mostly 'beautiful music,' and later AOR formats...
the Entertainment Network, at :30, for MOR/perrsonality-type stations (the 'E' net also carried the old Don McNeil Breakfast Club)...and the Contemporary Network, with "news BEFORE the hour!" at :55, for Top-40 formats.

In 1982, two more networks were added: the Rock Network, for AOR (oh, 'FM' changed again, servicing mostly softer sounding FM stations) at :45...and the ABC Direction Network, billed as as 'news you can use'-type, consumer-oriented newscast, at :50. ABC, along with the rest of the networks were still distributed by landliine at this point.

In 1984, ABC became the first commercial network to make the move to satellite distribution, allowing multiple channels of separate [rogramming to be fed simultaneously (initially it was 2o channels, it is currently 60 but soon to expand again). At that time, the Entertainment Network newscasts were moved to the more preferable top-of-the-hour, along with Information. FM joined Rock, for whatever reason, at :45.

After deregukation and with the other changes in the industry in recemt years, ABC is currently doing three newscasts each hour: Information and Entertainment at :00,
and a 'generic' newscast at :45. The ABC Information Network (the only one of the three that is actually identified by name on-air) is carried in Los Angeles on KABC. You are hearing the ABC Entertainment Network newscast (one minute shorter and offering a somewhat more coversational approach) on KMPC. The third ABC produced hourly newscast is not, as far as I know, carried in LA...tho other ABC affiliates there include KFWB,

KLOS, KNAC (Long Beach) and at least one other I'm drawing a blank on.

By the way, while Paul Harvey is pretty much a network unto himself, I think you'll find most of the stations carrying his morning and noon news & commentary shows, and his "Rest of the Story" feature, are Entertainment Network affils.

For Special Events coverage, ABC routinely feeds at least two versions of, say: anchored and unanchored. Lately, for some really big stories that draw lots of clearance, there are two, separate anchored versions...one for Information Network affiliates only, the other available to all others...in addition to any 'clean' feed.

I'm sure I've told you more than you really wanted to know. And, yes, I do work for them.

> news etc.

ABC has a bunch of different sub-networks in their radio side... I *think* they recently streamlined this and eliminated a lot of the extra newscasts, but they at very least have the Information Network newscast, which you'll hear on all-news or news/talk stations, and another newscast you'll hear on other stations. In markets like L.A. with more than one ABC affiliate that's a news/talker, only one will take the Information feed.

At one time, ABC had different newscasts for the Direction, FM, Information and other networks. I don't know if they're all still there.

This isn't even including the "Satellite News Network", a relatively generic 3 minute or 1 minute hourly cast heard on ABC/Satellite Music Network affiliates.

Lane Brent Forsythe (lbrent@netcom.com) wrote:

: Could someone explain this practice to me? Are there industry names for
: these different styles of news?

January 1, 1968, ABC split its operation into 4 networks, Information, Entertainemnt, FM, and Contemporary. Since then they added Dimension. Who knows how many they have now. Originally they were sent out at different clock times: Information network was sent :00 to :05, Entertainment from :30 to :35 or whatever, etc. Each one was designed to reach a slightly different audience, based mainly on age demographics, hence their different styles.

: Does Mutual or CBS or anyone else do this?

Mutual used to do it; they had 3 newscasts, but since Mutual is now owned by Westwood One, which also owns what's left of NBC Radio (but not TV), who knows what's up. One thing I do know is that some stations have dropped Mutual or NBC because the late night newscasts are identical except for the different sounders at the beginning. This can be quite upsetting to stations in direct competition.

>check back and correct me if necessary?)
>
Actually, the CRTC (Canadian Radio and Telecommunications Commission)
only regulates the 'hit:non-hit' ratio of Canadian FM stations. FM
playlists must have %51 non-hit music on them. A CRTC hit is one that
appears or has appeared on a major chart in Canada. That
means Canadian FMs can play an American hit, and if it isn't a hit here,
we get to count it as non-hit.
The current/non-current rules were tossed in a round of FM
deregulation a couple of years ago.
Of course, the CRTC still regulates %30 Canadian music for ALL
radio stations, AM or FM.

In the previous article Branden Emmerson<rbe3@columbia.edu> writes

>The Ramsey manual mentions something called "carrier-current" but tactifully
>evades saying anything more on it. Essentially it is an antenna alternative
>which allows the signal to be broadcast through a building's power outlets via
>internal wiring. I have not been able to find any information on this topic
>in any ARRL book or maazines or anywhere!

Carrier Current is an AM system utilizing the 525-1625khz band. The output of an AM transmitter is fed into a Coupler and then into the wiring of a building.

It is commonly used in university dorms, Campgrounds, and old Drive-in Movies.

The FCC treats this as a part15 device just as your Ramsey FM10a. The Difference is the amount of power you can run and signal strength outside the building or property perimeter you are serving. Power wise I've seen 50watt Current Carrier stations(we have 2 of those feeding 2 dorms each at the University of California at Santa Barbara) they are almost inaudible 50 feet away from the building, but are very listenable inside the buildings.

Ramsey sells an AM version of the FM10a as well. It probably would not be enough by itself to cover the building but multiple transmitters could do the job. BTW the FCC does not prohibit using AM Stereo if you want.

Does anyone have any information on how well the nationally
syndicated "Don & Mike Radio Show" is doing in the various
markets around the country?
The show use to air here in Buffalo, but was cancelled due to
programming problems between WWKB and the Unistar radio network.
Does anyone has any information on the show returning to the
Buffalo airwaves?
Thanks!

<transvox@tyrell.net> writes:

<Competitor KFMZ(FM), owned by Contemporary Media (whose
<owner, Mike Rice, was convicted July 5 of felony charges in a child
<molestation case in St. Charles County)

You beat me to it, Mark; I was going to ask you whatever happened to Mike Rice, whom I met for the first time in 1968 when I was a junior at Orchard Farm High School and he was getting KIRL-AM 1460 going in St. Charles as a Top-40 competitor to KXOK. I was trying to sell him an ad in the high school paper, and he kept interrupting to ask some rather interesting questions about the female staffers of the paper. Hmmm.

Thanks also for the great look at the long-time St. Louis DJs -- all of whom were there when I moved from St. Charles to Colorado in 1979. But my question is this: When I was back in St. Louis in June this year, I heard an older-sounding guy who goes by Frank O. Pinion (Frank Opinion? Well, it COULD have been tackier, but I'm not sure how.) doing a morning show on KSD-FM. A replacement for JC Corcoran there, apparently. I found an article about him in the Riverfront Times, and it said he'd been in St. Louis radio since the mid-70s. I don't remember him at all. Did he go by another name? Or was he on a country station?

And speaking of country, how exciting to hear that Johnny Rabbitt the 1st is back on the air! Thanks for the trip down memory lane.

I must compliment the Management that made the decision to let "Lightning," Kevin and Bean's assistant, (kinda like a paid intern) host the "Best of Kevin and Bean" last week. It is a different day and age when the Number 3 station in Los Angeles allows a young man with minimal on air experience, to take the full reigns of the Morning Show. It was very refreshing to hear a totally human, youthfull sounding voice competing with the LA Big Pipes.

Back in 1976, when I could barely get my 20 year old Squeak Voice on the radio at K-100 FM (now KXEZ, EZ-100 FM) during a Mid to 6 shift, I never thought I'd see the day when stations ops began to realize that listeners care more about sincerity than pipes.

Hence too, I believe, the decision to allow the young 20 something Baka Boys do mornings on Power 106. They are fresh, funny, and can really relate to the kids that listen to the rap they play. Come on, Dees...perhaps it's finally time for you to turn your show over to say...the twins from Full House?

(Copyright, Pittsburgh Post-Gazette. Reprinted here
by permission. Republication prohibited in any medium.)

Radio formats live by the book and die by the book - the Arbitron ratings book, that is. Now a new scorekeeper has entered the fray. AccuRatings are currently monitoring a number of U.S. radio markets, and recently began measuring Pittsburgh as well.

How do the most recent spring ratings compare beween Arbitron and AccuRatings? Compared side by side, they give fairly similar snapshots of the market, with some interesting exceptions.

According to AccuRatings, the top 10 stations are KDKA, WDVE, WBZZ, WAMO, WDSY, WWSW, WVTY, WTAE, WSHH and WJAS.

With Arbitron, it's KDKA, WDVE, WBZZ, WWSW, WDSY, WSHH, WVTY, WAMO, WLTJ and WJAS.J

AccuRatings gathers its data by telephone survey as opposed to the listener diary method used by Arbitron. The service says its market samplings are larger, which can eliminate some of the weird irregularities that happen to stations that may unexplainedly lose ground in one ratings period.

Formats aimed at younger audiences - like urban, contemporary hits, and modern rock - tend to do better in AccuRatings' surveys, while adult contemporary stations are the same or less than their Arbitron figures. Stations aimed at younger listeners or busy working people often find that it's tough to get people to fill out a diary. Hence, they may do better with AccuRatings' telephone surveys.

The local market matches this trend. WAMO's urban format performed much better here according to AccuRatings. It ranked at number 4 instead of 8, with a significant difference of more than three ratings points.

News/talk WTAE also fared better (8th place compared to 12th), although its acutal ratings were fairly close.

WBZZ placed third in both books, but edged closer to the top two withJ with a share that was 2.5 points higher.

A handful of local stations are subscribing to the new ratings. Others are waiting for reaction from the advertising agency community.

Former Pittsburgh Steeler Kevin Willis will be talking sports on WAMO-FM and sister station WYJZ-AM. Willis' sports news updates will air Mondays and Fridays at 8:35 a.m. on WYJZ and 7:35 a.m. on WAMO and Fridays on WAMO at 5:35 p.m.

WYEP-FM has a clearer, cleaner signal. This week, the station doubled its antenna height and increased its transmitter power by 33 percent.

For listeners, the change will mean better reception in suburban and outlying areas, and parts of the city where the signal was spotty. For the station, it means a signal that is more competitive with commercial stations and a chance to expand its audience base. WYEP's technical power has been hampered by old equipment. The new transmission system, which includes transmitter, antenna and transmission line, is being funded by the Public Telecommunications Facilities Program, local foundations and money from listener contributions.

For those who can't make it to Woodstock II but would still like a day in pastoral setting with some good loud music, WRRK-FM is staging its own local version of Woodstock on August 13 at Seven Springs. WRRK will also carry broadcasts from Woodstock throughout that weekend.
The Seven Springs lineup hasn't been entirely confirmed yet, but signed so far are local bands Dharma Sons, Neville Blues, Lost Faith and Sleaze, with more to come.
Admission is $3 and will benefit a local charity, according to the station. The event starts at noon.

Bill,

Re-sending just in case you didn't get this yesterday.

Tom
**********************************************************************
More on ratings! An unknown source has faxed the following drive
time and midday numbers to me. To you Imus in the morning fans who
have been emailing me asking his numbers, I still don't know. All
I know is what you see below and that's that he didn't finish in
the top 10 in AM drive. The numbers below are for all listeners
aged 12+.

Morning Drive, 6 a.m. - 10 a.m. Spring '94 Winter '94

1. WPGC FM 95.5 Urban/Donnie Simpson 8.9 8.4
2. WTOP AM 1500 News 6.1 5.7
3. WMAL AM 630 Local talk/Harden/Brant/ 6.0 6.5
4. WRQX FM 107.3 AC Mix/Diamond in Morn. 5.8 5.5
5. WJFK FM 106.7 Howard Stern 5.4 5.3
6. WMZQ FM 98.7 Country/**Sandy Weaver 5.0 6.4
7. WKYS FM 93.9 Urban/Tom Joyner 4.4 3.8
8. WMMJ FM 102.3 Urban AC 3.8 3.0
9. WBIG FM 100.3 Oldies/London & Ball 3.5 2.8
TIE WWDC FM 101.1 AOR/Harris in the Morn. 3.5 2.9

Mid-day, 10 a.m. - 3 p.m. Spring '94 Winter '94

1. WPGC FM 95.5 Urban 8.7 7.5
2. WRQX FM 107.3 AC Mix 5.8 4.2
TIE WMAL AM 630 Rush Limbaugh 5.8 6.1
4. WMZQ FM 98.7 Country 5.5 6.4
```

5. WJFK FM 106.7 G. Gordon Liddy 5.0 4.9
6. WMMJ FM 102.3 Urban AC 4.7 3.3
7. WGAY FM 99.5 Soft AC 4.5 6.4
8. WASH FM 97.1 Soft AC 4.3 3.9
9. WHUR FM 96.3 Urban 4.2 3.1
10. WBIG FM 100.3 Oldies 4.0 3.3

Afternoon Drive, 3 p.m. - 7 p.m. Spring '94 Winter '94

1. WPGC FM 95.5 Urban 10.0 9.5
2. WJFK FM 106.7 Don & Mike 6.2 5.4
3. WRQX FM 107.3 AC Mix/Loo Katz 5.6 4.6
4. WMZQ FM 98.7 Country 5.0 5.7
5. WMMJ FM 102.3 Urban AC 4.4 3.3
6. WMAL AM 630 Local talk 4.1 3.9
7. WGAY FM 99.5 Soft AC 4.0 5.1
8. WHFS FM 99.1 Alternative Rock 3.9 4.0
TIE WBIG FM 100.3 Oldies 3.9 2.8
10. WWDC FM 101.1 AOR 3.8 2.6

Unfortunately I don't have any demographic break downs but I'll glady post 'em if I get 'em. Last Friday Don & Mike gave some of their numbers on the air so, of course, I rolled a tape on them. Don & Mike say they got the highest ratings in history of their show and of WJFK radio.

Men 25-54: Don & Mike had an 8.5 (1st place)

In Baltimore on WJFK AM 1300 they gave the following numbers:

Listeners aged 12+: 3.3 up from a 2.5

MEN 18+: 4.9 up from a 2.9

ADULTS 25-54: 5.4 (5th place) up from a 3.5 (11th place)

MEN 25-34: 14.4 up from a 7.0

MEN 25-54: 7.3 up from a 5.5

Don & Mike said they are currently ranked #1 in both adults 18-34 and adults 25-34.

If anyone has demographic breakdowns, post 'em! Or, email me and I'll get my fax number to you.

(Note re-send due to mail problems as noted by moderator)

Some notes on trends, new stations, certain formats, from Spring Arbitron
results in various newspapers, etc

70s oldies formats: L.A. KCBS-fm (arrow) 11th place, 3.2 to 3.0 Chicago
WYSY-107.9 in a 5 way tie for 14th, with a 2.6 up from 1.7
0.9 before that! Sandy Eggo KCBQ-FM 19th 2.4 to 2.2 San
Francisco KABL-FM 20th with a 1.6 up from 1.4 Philly WMGK changed to the
format after the ratings came out. Hooray
finally a 70s oldies station I can get. WMGK had finished
12th with 3.6 up from 3.4, behind WBEB-101.1 (hits with
very little talk) in 7th, ahead of Star WYXR who was 13th 3.3
PD Julian Breen offers a voicemail # 610 660 6900 for comments
on what to play or what to leave out, even says he'll try
to call you back if you give him a daytime phone number. St. Louis
KIHT 10th 3.7 up from 1.1 (was KRJY with all (decades) oldies) Seattle KJR-fm
in their first book as 70s had a 2.2 in 20th place Tampa WCOF those liars
(made claims to their audience of being
1st all 70s station in the country) 9th, 5.3 from 5.8 Dallas
FW KRRW (arrow) 14th 3.2 from 2.1 and 1.4 Cincinnati WPPT-FM first book in the
format 4.6 for 8th place! Houston KKRW-FM (arrow) 12th 3.9 from 2.8 and 1.9

Other notes: NYC Hot 97 highest ever 3rd place with their "where hip hop
lives"
and new loud morning team of Yo! MTV Raps' Dr. Dre and Ed Lover
with Lisa G (who went from just doing news to always being on mic)
Dallas the New AC station KOAI is fifth tied with 2 country stations Buffalo
WKSE with its added modern rock leaps 5.9-7.9 for 2nd place,
had been 6th. WMJQ with its 110,000 watts so strong you get
it here in NJ sometimes had less than a 1.8 Charlotte Best ratings in

a while for 95.1 who for a few years was
the awkwardly termed "95 Double Q" (WAQQ) now known as the Edge
programmed by Mark Driscoll 8th place 4.9 but its former
nearest competition WCKZ became Urban AC WBAV. Tampa WRBQ is back in
the top five but is a country station these days. Mpls new New Rock station
KEGE is already 7th with a 5.3, ahead of
eclectic KTCJ/KTCZ in 10th place with a 4.1 Adult Standards doing
extremely well on AM in Cleveland (WRMR-850 is 4th)
and Philadelphia (WPEN-950 is third) - do these cities have
extra large 65+ populations or do they do it so well that
everyone listens? Cleveland WMMS for all its confusion about who to
sound like
continued performing well with a 6.7 good for 5th place while
Modern rock WENZ 107.9 the End finished 14th down 3.3 to 2.3 Hartford
WTIC-FM went Adult Top 40 and rebounded to beat T40 WKSS
6.2 - 5.8 in 4th and 5th place respectively
Lotta AOR and AC in the market, with WHCN, WCCC, plus Springfields
WAQY and New Havens WPLR all placing in the top 20, plus ACs
WRCH, WZMX, WYSR. NYC's WFAN even scored a 2.0 there Detroit finally
92.3 has found a winner format in Urban AC as WMXD in
6th place with a 4.8, similarly former WABX/WDFX makin' it
as Young Country WYCD in 7th place 4.7, was as low as 1.2 a year
ago Here in the "manufactured" market of Monmouth/Ocean (if it were
named
after the largest towns it'd be called Middletown-Brick-Long
Branch-Freehold-Lakewood which no one outside of NJ has probably
ever heard of) the stations in the ratings a mix of NYC stations,
local stations, some Atlantic City stations, Trenton stations,
and WMMR Philly. (Sometimes even Long Island's WHLI-1100 across
the ocean will show). WZVU-107.1 has gone live at least half the
day with oldies and beats NYC's WCBS-FM 3.3-2.8; Country isn't
big in NYC proper (WYNY has a 2 share in NYC but a 4 Round Here)
Pure rock WAXQ is tied with Z100 in 16th place at 2.6.
There's no really big towns here but the combined population
is 986,000 and the median income is high enough to make ad agencies
drool. Never mind that the south end of the market can't get
WHTG, WZVU, the north end can't get WOBM or Atlantic City,
it's like was said before in this newsgroup "we've gotta make
this into an Arbitron market!" Nassau Suffolk the WNEW simulcast with
WWHB-107.1 doesn't seem to help,
WNEW scored less than a 2.1 while WBAB, simulcast on 95.3
at the east end, continues to slide to 9th place 4.1 to 3.5
behind K-rock in the format; WBAB-102.3 was 2nd in the market
last summer. Nassau Suffolk is another one of those odd markets,
at the East end you don't get NYC FMs except for the simulcasts;
at the west end 100 miles away you don't get Sag Harbor or Montauk
or Riverhead stations (not that WLNG exactly kills even in the
"Riverhead" market ratings that M Street lists - a 0.2 in the '94
directory! but at least they're having fun)

(On San Diego ratings)

A couple of questions...can we assume from the absence of KOGO (AM600) from the leader board, that "Hot Talk" is having as little impact in San Diego as it's having back east? Or is it just the Peter Weissbach magic working again---the same magic that took the #1 station in Edmonton, Canada, CJCA, all the way to dark within 18 months in 1992-93? (That's got to be a record for destroying a market-leading station in a major North American city.) Having come very close to joining CJCA as morning man late in 1991 just before he took over, I look on that as the best deal I never made, if only because I'm still gainfully employed in radio.
Also---interesting that KFI is doing well in North San Diego County even as it's clearly on a steep slide in its core Los Angeles market if you believe the last two months of Arbitron trends. Could it be that KFI's core of suburban conservatives is literally moving away from it?
Bob Smith, middays WXXI/1370 Rochester NY

Your best bet in print would be either a fifty-year-old book about radio production, or something from England, where the art never disappeared.

You should also check out the annual Midwest Radio Theatre Workshop, which takes place in Columbia, Missouri, and get in touch with AIR, the Association of Independents in Radio, which includes most of the currently active radio drama producers.

2811. Tom Bodette Radio Program ... gone?

Newsgroup: rec.radio.broadcasting
Date: 1994-07-24 23:08:53 UTC
From: alysa@netcom.com
Message-ID: <30usa5$2p3@vixen.cso.uiuc.edu>
Source record: 38816

Hello,

I was wondering if there is anyone in the Southern California area who knows of any station which may still carry the syndicated radio program 'Tom Bodette'?

Several years ago it used to be carried on KFI in Los Angeles at Midnight Sunday nights (not exactly prime time), and I strongly suspect that I was the only person who listened, (and maybe the engineer doing weekly transmitter 'tweaking').

Anyway, thanks for your patience regarding my question and for any help you might be able to provide.

Alysa

: A friend I visited in Chicago on a weekend in May complained that he had
: to concentrate so hard to pick any pertinent information out of WBBM's
: traffic reports that he felt it impaired his safety as a driver! KNX does

I agree with this. I listen to traffic reports for Philadelphia; I know what roads I'm interested in, and I have to pay very close attention to get what I need.

Yes, I agree some of the information is not accurate--both clear when they say backed up and vice-versa. Could it possibly be that they'll mention a delay if one person in a mobile phone calls up the station and tells about a delay? Could one make up a delay hoping they'll announce it and keep traffic low?

The other thing that's rough on people new to a city, or new to a certain part of the city is the term "usual delay." Like, "95 South in Delaware County, the usual delay from 420 to the Blue Route." If I'm going through a part of the city I don't usually drive through, I don't know what the usual delay is.

```
> From: talk1370@aol.com (Talk1370)
>
>
> interesting posting. There are rumors that Howie Carr will move
> over to WRKO's vacant midday slot....
```

A lot of question marks around this one...You'd have Jerry Williams(2-6pm)
follow Carr's show...Their relationship has soured in a big way
over the past few months...Williams expressed(through print media)
a feeling of betrayal by Carr...Williams considered Carr,who was a
regular contributor to his WRKO show, as his protege. 71-year old
talkshow master felt dissed by a brash Herald columnist whom Williams
helped to bring along in the talkshow biz.
Williams claims that they haven't spoken to each other since Carr
landed a gig on 'HDH earlier this year...Carr told the Boston Phoenix
he owes nothing to Williams and he didn't consider himself as Williams'
protege...

```
> and most of WHDH will go sports (picking up shows now on WEEI, but
> likely to be cut loose if 'EEI goes to mail-order Jesus radio).
^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^
> Why they'd screw up their program lineup on two different stations to do
> that God only knows...can it POSSIBLY be true?
```

Possible but unlikely in any near future, IMO. When WEEI-WBZ deal
didn't go through back in January, there were a lot of speculation
that WHDH would buy off all the sports programming(on-air sports talk
talent, Celtics and Bruins rights, Imus' syndicated show).
And, WEEI would then be sold off to an unnamed Jesus radio outfit.

That didn't quite happen. WEEI got sold to a dubious group called
'Back Bay Broadcasters' (still no phone listing in a Greater Boston
telephone directory :-). There were allegations from a couple of local
radio operators that BBB was simply a front for American Radio Systems
since WEEI's new GM and part owner, Ross Elder, had business ties with
ARS' CEO Steven Dodge. Regardless, 'EEI's new owners then sold off
Celtics' radio rights to WHDH 850 for the next 5 years. The Bruins
will be back on 'EEI for one more season('94-'95) but then will go to
WBZ 1030 AM when the new Shawmut Center opens in 1995-96 season.

Currently, there isn't any kind of sports show on WHDH.

WEEI's GM Ross Elder stated that the station will remain all-sports talk
without any local sports action(they will keep airing NFL,NHL Finals, NBA
Finals games which do not involve Boston teams). In early June, 'EEI
underwent an off-air facelift. PD Phil Sirkin and promotions

director Pat Donley were let go to make room for Bev Tilden who came
from Pyramid's powerhouse CHR WXKS-107.9FM. She was promotions manager
at 'XKS since 1988 during which time the station has made a huge
local/national name for itself...She took over as programming/promotions
director at 'EEI..

WEEI is now the #2 all-sports station in the country...
I think the new owners are not quite ready to mess with a product
which after a very rough start in September 1991 has finally begun
showing signs of building some momentum...

-Mark
'The station that gives Rose Kennedy a reason to live...WBCN 104.1FM,Boston'

RADIO NEWS!

After weeks of comedy and novelty records, followed by an incredibly obnoxious coputer generated voice countdown, July First marked the beginning of the Alliance era of KXRX.

The station is entering a crowded country-music field in Seattle-Tacoma. On FM alone, "Young Country" will be competing with the top-rated radio station in town, KMPS-FM, plus No. 10-ranked KRPM-FM. Gary Taylor, the new general manager of the station, accounced the DJ lineup, which co The station is entering a crowded country-music field in Seattle-Tacoma. On FM alone, "Young Country" will be competing with the top-rated radio station in town, KMPS-FM, plus No. 10-ranked KRPM-FM. Gary Taylor, the new general manager of the station, accounced the DJ lineup, which consists of Seattle-area personalities and big names from elsewhere:
- Mornings: Lisa Dent, who has worked in San Diego and Minneapolis, and Scott Burns, who was a personality here on KJR-AM and KWMX-FM (now KIRO-FM), and was the producer for Charlie Brown and Ty Flint at KUBE-FM.
- Middays: Penny Coyne, a Seattleite who attended Central Washington University and served as program director at KIXI-FM (now KJR-FM).
- Afternoons: Scotty Brink, a veteran of former Top 40 giants KJR, WNBC-AM, KHJ-AM and WLS-AM, along with Sherry Brown, most recently of adult-contemporary KIOI-FM in San Francisco.
- Evenings: Wynn Richards, who most recently worked in Cleveland.
- Late nights: Beau Roberts, the night DJ at KXRX until recently when Alliance bought the station and dumped the album-rock format.
The new program director of KXRX is Eric Logan, who came to Seattle from Oklahoma City.
Although far from official, rumor is new call letters will be KYCW.

OTHER CHANGES!!!

KIRO's veteran talker Jim French retired his mid-morning radio show as of Friday (7/1/94) Jim will be staying on with KIRO doing his "Mystery Playhouse" and "special"interviews. BTW "Mystery Playhouse" is now heard on Saturday and Sunday nights at 9 p.m.

Taking his slot is former KGO, San Francisco evening talker, Lee Rodgers. The "Lee Rodgers Program" will be from 9 a.m. to Noon.

Other changes at KIRO involve the FM, now refered to as "Seattle's FM talk station." The new line-up effective 7/5:

4 a.m. - 9 a.m. Simulcast with KIRO AM, Morning News with Bill Yeend, Linda Thomas and Phil Johnson.
9 a.m. - 12 noon Rick Enloe (local standup comedian and motivational speaker.
12 noon - 3 p.m. David Brenner (recently took over The Larry King Show)
3 p.m. - 6 p.m. Dr. Laura Schlessinger. Los Angeles psychologist and syndicated talk show host. (KFI, Los Angeles)
6 p.m. - 9 p.m. Gill Gross
9 p. m. - 12 mid Leslie Marshall (NY based talk show)
12 mid - 4 a. m. Simulcast with KIRO AM

Speaking of "more" changes, it is now officially KJR-FM,(something that should have been done back in the seventies) and they are about to sound like the KJR we knew and loved in those good old days, very shortly. First, Rick Hanson and now Norm Gregory is making the nostalgia drip. Listen for still another very familiar name in the Seattle Market to return to his roots. Charlie Brown, currently at KUBE, will be added to the lineup in August and making more history. This will be a double-cast as "Charlie and Ty" will also still be broadcasting on KUBE as well as the new KJR-FM. A technical marvel if they can pull it off.
AND while we are on the subject, don't you just love having the old "channel ninety-five" jingles back?!?

The other un-official story is that Ichabod Cain should be back on the air at K-106 after August first. The arena has changed considerably since he has been gone.

2814. Southern California Radio News

Newsgroup: rec.radio.broadcasting
Date: 1994-07-26 03:01:02 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <311u9e$42p@vixen.cso.uiuc.edu>
Source record: 38819

Here's the latest in radio news!

Jim Healy, legendary sports-caster for 30-years in Southern California, died last Friday at the age of 70. His most recent job was a half-hour sound-effect driven commentary/gossip show on (former) all sports, KMPC, 710, Los Angeles. When the station discontinued its sports format in April, Healy retired from radio at the urging of his son, Patrick.

Jim began his career in the mid 40s, as a sportswriter at the "Hollywood Citizen-News" after graduating from UCLA. His break in broadcasting came in 1951 at KMPC.

Jim's son, Patrick, works at the NBC O&O, KNBC, as a news reporter.

+
Milestone: KUSC, 91.5 FM, Los Angeles, has become the 500th station to join National Public Radio. The classical-driven station will overhaul its lineup in August in include NPR news on the hour and four NPR programs: "Latino USA, "Living on Earth" "Horizons," and "Soundprints." In Los Angels-area, KCRW, 89.9 FM, and KPCC, 89.3 FM are also affiliates of NPR.

KABC, 790 AM (5kw), talk-personality Michael Jackson will be in Washington, D.C., Aug. 2-5 to fill in for the vacationing Larry King. Jackson will do his daily 9 a.m. - 1 p.m. (PDT) show from the nation's capitol in addition to the one hour "Larry King Live." The TV show, which is broadcast on "CNN International" also furnishes the audio portion for radio.

In San Diego, the first reelings of the spring arbies happened. KSDO morning voice Ernie Myers, a 41-year veteran was fired Thursday by GM Susan Hoffman after he finished the morning drive. Myers has been fired and re-hired by KSDO before; and Hoffman was Myer's seventh GM in the 11-years he spent at the station.

The G-man cometh: G. Gordon Liddy will use the facilities of KOGO, AM 600 San Diego on Friday. He'll broadcast to his "network" from 7 a.m. to 11 a.m.; while the show normally is on from 9 a.m. to 12 noon on KOGO.

Thanks!

KSSJ 101.9 Jazz 1.5 1.9 +0.4
KSTE 650 Talk 2.1 1.6 -0.5

25-54
1. KFBK, 2. KSEG, 3. KSFM, 4. KNCI, 5. KXOA-FM, 6. KGBY, 7. KQPT, 8. KHYL, 9. KRXQ, 10. KYMX.

Arrow 108 KXOA-FM 107.9 with thier 60's "70's" and early 80's Rock Format and the Point KQPT100.5 "Bands you hever heard of-Songs you don't know" had increased ratings in the spring book (How they did it I don't know).

KFBK is still #1 but now taking a downward slide especially in 25-54, down a titanic drop of 3.1 share.

KST (650AM) talk format took a dive with its major reshuffling maybe Leykis will help. I know this sounds stupid but Sacramento's AM radio dial is stuck on the right side at 1530 !

Stations going well is KSAC 1240 with its All sports format up 0.3 to 1.0 Not bad for a 1000 watt station

Hot Talk 1140 KHTK its 50, 000 watt flamethrower signal with Imus, Don and Mike, could only come up with a 0.5. I'm sure changes are in the works !

In article <30us8o$2n2@vixen.cso.uiuc.edu> fybush@world.std.com (Scott D Fybush) writes:
>ABC has multiple separate networks; an idea that originated in 1968 when
>ABC Radio was almost out of business and needed to try something new
>to survive. There are top-hour 6 minute newscasts on the ABC Information
>Network and the ABC Direction Network. The ABC Entertainment Network
>feeds shorter newscasts just before the hour. This system has worked
>incredibly well for ABC, since it gives them immense flexibility in
>selling ad time. Advertisers can buy a wide variety of station groups
>through ABC, including just specific time zones (yes, there are
>separate feeds for each zone, with the same news content but different
>spots). ABC Radio master control in NYC, at 125 West End Avenue, is
>a fascinating place, believe me!

For more info on this, there is an out-of-print book called "Inside ABC"
that describes the thought that went into the original 4-Network feed
(Info, FM, Entertainment, and Contemporary) back in '68. Direction and
the old Rock networks were added in the early 80 (i seem to recall 82 as
the year...); due to the limitations of the old network studios at 1926
Broadway in NY, the facility at 125 WEA was built in the 83-84
timeframe, with the 125 West End building going online in October 84 (I
have a photo of Master Control that was taken a couple of seconds
>after< the first show started from the new facility...I will scan it
in and send it to the moderator, if anyone is interested...)

The idea of splitting the commercial time zones was called "clock time"
around the network. The idea was that instead of an advertiser buying a
commercial based on east coast timing, at, say, 8AM (for the information
News Around the World feed), which would translate into 5AM for the los
angelinos, the advertiser would buy 8AM across the board (and pay us
the premium for the guarantee of 8AM across the country...), and we
would cycle the spots through. Also would allow us to feed
region-specific spots for advertisers in the same buy.

The equipment was a bear to maintain (discrete logic...); the 125
building started with instacarts (which were a pain to load every
evening at 11PM) and are now, I think, digital.

(btw, last I checked, the 'casts were only 5 minutes long...)

Having helped to install 125 West End while I worked for the alphabet,
I have to say I miss it sometimes...

>Could someone explain this practice to me? Are there industry names for

ABC has several services available on its network. I've heard two:
ABC Information and ... ah, darn, I can't remember it's name, but I think
it was the same one you mention. They're all named ABC *, where * is
an indicator of what kind of info is delivered. A PD I once worked for
explained the differences between all the services, but alas, that was
three or four PDs ago and I've slept since then!

David Alpert (dra@pipeline.com) wrote:

: In 1984, ABC became the first commercial network to make the
: move to satellite distribution....

Nope, that was Mutual in 1981, when it was owned by Amway. In fact, when Amway sold Mutual they kept the satellite system and leased it to Mutual. I remember at the time in 1981 when a station in Newport Oregon got their Mutual dish. The people there loved it because they had to pay all the costs to get Mutual via 5kHz landline before this (Newport not being big enough to get network compensation or even have their landline paid for by the network).

: By the way, while Paul Harvey is pretty much a network unto
: himself, I think you'll find most of the stations carrying his
: morning and noon news & commentary shows, and his "Rest of the
: Story" feature, are Entertainment Network affils.

Originally, Paul Harvey was an Entertainment offering, which may explain why those stations still have him, but so many powerhouse stations, which generally are Information affiliaites (such as KGO in SF) took Harvey that they opened it up separately.

>Prior to this FCC opinion, networks were only allowed one signal path...in
>fact...the FCC ruling on 'chain-broadcasting' actually CREATED ABC out of the
>NBC 'blue network.'
>
In actuality, since the network was landline based, the FCC had no input
into this decision. ABC Radio Networks is not a broadcaster, per se,
just a programming source, that originates programming for broadcast by
other stations.

The FCC ruling that forced NBC to sell its blue network to Edwin Noble
so he could form the American Broadcasting Company had to do with
monopolization of broadcast networking, not multiple broadcast programs
on a single network chain. FCC did not regulate content or style, I
have no idea what they would do in today's climate.

Now, the obligatory trivia question (and those that know me will
understand why I ask...):

Why were the networks called "Red" and "Blue"?

(extra credit if you can name the round robin circuit names for either
or both...)

This has been a fascinating thread. Let me add a few questions for those who know more than I.

1. What are the current networks? In the mid 80s they were Information (at :00), Contemporary (:28), Entertainment (I forgot the feed) and Direction (:45).

2. Does anyone have the affiliate list in New York, Hartford/New Haven, Miami or West Palm Beach (my past and present homes).

3. With Elevator Music/Easy Listening station gone, who would carry the Contemporary network?

4. Does Westwood One now own NBC radio, and how much to they share with Mutual? I have some background on the Mutual Television network that almost developed in the late forties and early fifties. Channel Nine (the WOR, now WWOR) was to be tha flagship. Let me know if you want more info.

I would like to get into making radio ads for local businesses. Could someone please give me some advice on where to start? I have a small 8 track studio that I could produce the ads on. I would really like some info on how the industry is set up. Do the advertisers usually have their own ads already made and then just give them to the stations? Who hires the ad writers, the station or the advertisers. If anyone has an idea of where I could turn for info, please let me know.

Thank you very much!

(on CanCon rules and Canadian radio formats)

Jay---
A general question or two on radio in Ottawa these days;
first, is the AM band in your market generally being depop-
ulated? I hear that CBO moved its AM news/talk programming
off 920 AM, presumably to someplace on the FM band...and
now, CJSB is moving its rock music to FM---have both of
those AM frequencies gone dark, or is something else being
programmed on those frequencies? (I'd think the 540 channel
with 50,000w day, 10,000w night non-directional would be an
especially desirable place to stay...we'd kill for it here...)
Also, is anyone in Ottawa now doing a fulltime talk format
comparable to CFRB in Toronto or CKLW in Windsor/Detroit?
(I have a lot of respect for both stations and wonder if anyone
in Canada's capital is emulating them...) If so, who's doing it
and how are they doing with it? Last time I was in Ottawa a
few years ago there didn't seem to be a fulltime talker anywhere
on the dial, at least not in English...

(In case this was part of the mail that got lost----)

While living in Hawaii, I often got up at sunrise to log
Alaskan stations. The morning I logged KVOK from Kodiak, I
believe they were using 250 watts. Anyway, they were having a contest,
and the first caller who could identify the following song
would win a dozen doughnuts from some bakery in Kodiak.
They gave the number, and I started dialing, of course,
putting in the 907 area code first. Next,
I'm on the air identifying "Young Love" by Sonny James.
Then, they ask for my address, on the air, and I proudly say,
"35627 Kamehameha Highway, Kaneohe, Hi.@" and the announcer asks how I
like my visit to Kodiak? When I reply that I've never been
there, and ask him to mail me the doughnuts, he
sort-of flipped out. Maybe they used my dx report as a
promo!

> extra large 65+ populations or do they do it so well that
> everyone listens?

As one of two on-air personalities who have been with WPEN since it began Adult Standards almost 15 years ago, in my very humble and unbiased opinion, we do it well. Also the 50th anniversary of WWII has helped. Many of the songs which are considered standards were written during that time. Although we normally program more modern versions of those songs, during the anniversary period we are able to couple the events of WWII with original versions from that time. This helps the 65+ to remember those times and the under 65 to understand what their parents and sometimes grand parents went through.

Couple this with non-rock hits of the 50's through today, personalities who understand good music and a hands-off management, and you get good radio which anyone can listen to and enjoy.

This is, naturally, my own opinion but one I suppose the management of WPEN also shares.

If you're talking about Tom Bodett's "End of the Road", which ran on a surprising number of high powered commercial stations (such as KXL in Portland and KGO in San Francisco), the show ended a couple years ago because Tom couldn't find enough sponsorship. I was a faithful listener, and have always liked him so much more than Garrison Keillor (who in my opinion makes fun of small-town people). But, Motel 6 pulled decided not to renew the contract, and he didn't have enough other sponsors able to fork over enough cash to keep it going.

Tom Bodett still operates in Homer Alaska and does his Motel 6 spots from there.

2840. XETRA-AM Sports Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-07-26 03:02:11 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <311ubj$45e@vixen.cso.uiuc.edu>
Source record: 38845

John Maffei, staff writer for the Oceanside Blade-Citizen, had a half-page article on XETRAs new morning line up. Here's part of what he said:

"For about the 40th time since it went to an all-sports format
eight years ago, XTRA has gone to a new lineup.
The one big difference between this one, and all the others is this
time the station might have a winner.
Channel 51's (KUSI TV, San Diego) John Ireland and Steve Mason, the
prodigal son, fill the 5-9 a.m. slot. Chet Forte and Steve Hartman remain
in the 9 a.m. - noon slot, Jim Rome stays in the midday period (noon-4 p.m.)
and Lee Hamilton holds down the drive time (4-8 p.m.)
Rick Schwartz, part of the ill-fated Berger, Prescott and Schwartz
morning team, goes back to the 8-midnight slot where he was so successful
while teaming with Mason.
Schwarts's knowledge and sense of humor make him a perfect fit for
the night job.
But XTRA officials aren't worried about Schwartz, Rome, Hamilton or
Forte-Hartman.
The big gamble is mornings, where the station has taken a beating
since moving Forte-Harman out of that slot.
Ireland will keep his job at (KUSI) channel 51, but his duties at
XTRA have forced him to give up his play-by-play gig with the Sockers.
Artie Ojeda, of LA Channel 13 gets the Sockers job."

Sidenote:

XETRA's morning now set, the showdown for the fall is coming. With the SD Chargers, UCLA, and San Diego State in the fall, they may have written themselves into a corner. The UCLA and SDSU contract calls for all games to be carried live. There are three to five possible Bruins/Axtecs conflicts that could be impossible. This on top of carrying ESPN radio on Saturday's and Sundays.

Prime Ticket, working ahead of these conflicts, has carried the audio of XETRA. The cable-based sports channel operator in Southern California will add their own play-by-play.

Message-ID: <314eoj$ga2@vixen.cso.uiuc.edu>
Source record: 38846

In article <311ua5$43o@vixen.cso.uiuc.edu> mikedow@gate.net (Mike Dowling in WPB) writes:
>
>This has been a fascinating thread. Let me add a few questions for those
>who know more than I.
>
>1. What are the current networks? In the mid 80s they were Information
>(at :00), Contemporary (:28), Entertainment (I forgot the feed) and
>Direction (:45).

The original feed (and I am taking this off of a copy of a log that I
saved from late 1981...) clock hour:

xx:00:00 Information News
xx:15:00 FM News
xx:27:00 Entertainment News in Brief
xx:30:00 Entertainment News
xx:51:30 Contemporary News in Brief
xx:54:30 Contemporary News

Overnight periods the news in brief was dropped for E and C networks;
the newscast for I/E were the same as were F/C.

400 hz tone, 2 sec in duration, 10 seconds before each feed as a cue
signal.

I/E was fed out of studio 5, F/C out of studio 6 at the 1926 Broadway
facility.

It was fun. It was work, but, you felt, the first time you ran the
board yourself, that this was where it was happening. Wouldn't trade
that experience for all the tea in the East.

Just my $.02.

>three or four PDs ago and I've slept since then!

CBS Radio has basically had the same operations for years. They have the seriously
Hourly news reports which are 5 minutes long at the top of the hour, with small
90-seconders for the FM (Specyrum) stations at the bottom of the radio.

There are also different newsfeeds at different parts of the hour for each type
of station, wgere usally the news cuts vary in length -- a more newsy station
wanting longer cuts than an FM which would probably want nothing over :11.

How about because the patch cords at the various AT&T network switching
centers were colored red for the main NBC network and blue for the
somewhat smaller and less influential NBC network--the one that eventually
became Edward Noble's ABC?

i understand the associated press has started a 24-hour news program service. wonder if anyone has heard it...would like to know what stations have picked it up, and what you think of it.

also...re: the postings on fm long distance reception...you can greatly increase everyday reception with some fairly low-budget hardware. radio shack offers a small directional yagi for $17 (15-1636). i use it on a five foot tripod (cost $30) on my garage (came with house, big budget and big mortgage). a hook the antenna up to a g.e. superradio 2 or 3 (cost about $50) and you should be able to pull in stations as far away as 100 miles (or more...depending on the usual factors such as your location, antenna height, local interference, the power of the station you're listening to, etc). in the eastern twin cities metro, i regularly get KCCK 10 KW, from cedar rapids iowa (kirkwood community college) and WNMU in marquette michigan.

almost forgot. unless you want to listen to stations in only one direction, you need an antenna rotor and control box. around $60 also available at R.S.

its worth the hassle and lost saturday afternoon if you enjoy f-m tuning. it really does pull in the stations

however, i still prefer a-m

Yes, Tom Bodette (not sure how to spell his name) is the Motel 6 guy. (Motel 6 ought to put out a tape or CD of the "best of Tom Bodette" ads, some are classics). He formerly did the "End of the Road" show (it was carried, among others, by WAVG in Louisville) which was sort of his version of Garrison Keelor. His new show is called something along the line of "Tom Bodette and Friends" and involves some readings, monologues, some contributions from other performers around the country, etc. It is a little different than the old "End of the Road" show. It runs for an hour, and has at least one Motel 6 ad in it. I wish I had taped a few of them off of KMOX before I returned here to Ecuador in January. It's a classy program. --Ken MacHarg

A side note...

The Digital Generation Systems folks came by to a Bay Area Broadcast Engineers Society (BABES) lunchen about a year ago. (They are the ones that build these boxes that send spots to stations via phone lines and modems.) One of their pitch-men is Tom Bodett. In the program, there is a infomercial by Tom talking about how the DGS box is saving some bucks and time for him since he is out in the middle of "Nowhere", Alaska. It's rather amusing. If you get a chance call the DGS in San Francisco folks for a demo.

ATTENTION NET NOVICES AND NET PROS ALIKE
CONTACT YOUR LOCAL TALK OR OTHER RADIO STATION
AND INSIST THEY CARRY THE FOLLOWING PROGRAM
THIS SUNDAY JULY 31,1994 AT 10-12 AM PDT

FOR IMMEDIATE RELEASE:
Contact Michael Zwerling, KSCO Radio AM 1080
(408) 475 1080 or (408) 685 1999

Santa Cruz,California
July 26,1994

The Internet (AKA the TRUE "Information Superhighway") is no longer the guarded,
private kingdom of geeks, nerds, academicians, and other computer-literate elite. It is
NOT a computer network---it is, rather, the ultimate, instant world-wide PEOPLE
network; a randomly-accessible stream of adventure, amusement, education, entertainment, friendships, information, and news for EVERYONE. It is also a
beckoning frontier of incalculable business opportunities for the entrepreneurial-
minded.

The "NET" has indeed been cracked for all to utilize, experience and enjoy. The best
part of all is that most of it is available for little or no charge, and it is currently
believed to be growing at the rate of one million new people per month. The future
has arrived, and talk radio is the perfect, natural interactive mass medium to introduce
and explain it to the masses.

"RADIONET" is the brainchild of Cynthia Zwerling, a UC Berkeley graduate in
architecture, and a consummate creative visionary. She writes:

"While heading down the highway, turn on and tune in to RADIONET, a fantastic
journey into cyberculture. Get your engines running.

Are you ready to log on? We're taking the traditional radio show format into
the 90's, adding more ways to participate. If you're already jamming in

the
fast lane, we invite you to share your short cuts and backroads, and if
you've just merged in, we'll help you get up and running in record time.

Our objective is to be the most dynamic, informative and interactive radio
show ever. If you want to contribute to the show, call KSCO at (408)
475-1080, to go
on the air live, FAX to (408) 475-2967, or e-mail to czrider@aol.com.

When you send us anything over the Net, we'll either incorporate it into
the
show or respond promptly. It's the show that combines the best aspects of
talk radio and the Internet, enhancing your communication experience.
Connect with people all over the US. Learn interesting new ways to use
your
computer to learn, meet people, and get involved.

Each week, you'll meet fascinating guest speakers who are revolutionizing
so
many aspects of our lives."

Regular contributors to RADIONET will include:

* John Bates, a contributing writer for Wired and Surfer magazines who
will
share his Net travel stories and present special interviews with cutting
edge
personalities;

*Andrew Mayer, interactive software designer/producer who will review new
CD
ROM multimedia products; and

*Bob Hogg of TTM Multimedia Systems who will discuss the politics behind
the
escalating cable and telephone company power plays, as well as the
societal and
cultural ramifications of the rapidly evolving, merging technologies.

RADIONET is the new conduit for meetings of the minds, locally and
nationally. RADIONET will be syndicated on a live, exclusive market
barter basis
each Sunday beginning July 31, 1994 to radio stations throughout the
Western
Hemisphere, or within the footprint of Digital (DATS) Satcom C5 Satellite,
via
Transponder 15, Channel 02-0, from 10 AM to 12 Noon Pacific Time.

PERSONS INTERESTED IN HEARING RADIONET SHOULD CONTACT THE
PROGRAMMING DEPARTMENT OF THEIR LOCAL TALK RADIO STATION(S),
AND REQUEST THAT THE RADIONET BE CARRIED. THE PROGRAM WILL
BE FED LIVE VIA SATELLITE AS SET FORTH ABOVE.

>Lawrence) writes:
>(on CanCon rules and Canadian radio formats)
[...]
>I hear that CBO moved its AM news/talk programming
>off 920 AM, presumably to someplace on the FM band...and
>now, CJSB is moving its rock music to FM---have both of
>those AM frequencies gone dark, or is something else being
>programmed on those frequencies?

The former CBC AM frequency has gone dark, while the 540 slot is slated to, after a 6 month simulcast with the new FM. There has been some talk around town of a move to bring a "Music of your life" format back on 540, targeted 50+, but I haven't heard anything about that in quite a while. There's another rumor running around that An existing AM in Ottawa would like to move down to 540... see below...

(I'd think the 540 channel
>with 50,000w day, 10,000w night non-directional would be an
>especially desirable place to stay...we'd kill for it here...)

That's exactly why that station is rumored to be interested in the frequency...but again, I haven't heard much about it since the original hoopla surrounding the original announcement that 540 would be available.

> Also, is anyone in Ottawa now doing a fulltime talk format
>comparable to CFRB in Toronto or CKLW in Windsor/Detroit?
>(I have a lot of respect for both stations and wonder if anyone
>in Canada's capital is emulating them...) If so, who's doing it
>and how are they doing with it? Last time I was in Ottawa a
>few years ago there didn't seem to be a fulltime talker anywhere
>on the dial, at least not in English...

CJRC has been doing talk in French for some time now. 580 CFRA, where I work, has been all talk for about a year now, and we've been doing quite well with it. If you listen to CFRB, you'll remember Lowell Green. Lowell now hosts a show on CFRA. (12:30-15:00, M-F). If you listen(ed) to CKLW, you may rememeber Fred Ennis. Fred is on CFRA M-F, 15:00-17:00. We're positioned as "Ottawa's News/Talk Radio".

As an aside, regarding the ongoing thread on Newscast outcues, we end our newscasts with: "Local News, Frequent Updates, with 580 CFRA, you'll never miss a thing!"

Talk radio today is as diverse as the people who listen to it. In any given crowd of people, you've got Limbaugh dittoheads, Dr. Dean Edell disciples and devotees of Howard Stern.

Do you look to Rush as a source of hard news and political analysis or pure entertainment?

Speaking specifically of Rush, do you agree or disagree with claims that he is racist and/or sexist?

Does the taboos he breaks titilate you?

Can an entertainer excuse him/herself from the bounds of common courtesy and polite behavior?

If you listen to him, do you find Rush entertaining most, part or none of the time?

Please respond directly to my e-mail address: patchman@netcom.com

Thanks for the input,
Patrick Henry

I remember part of it. I was a loyal listener to Wolfman Jack on XERB, Baja California (Mexico), in the 1960s. So, what's so special about Wolfman? Well, he played R&B music that nobody else was playing. He took phonecalls from 14-year old girls and said things that would make people blush today ("Are you getting nekkid for me, babeh?"). He sold baby chicks mail order by the boxload and "45 FABulous hits for $4.45, babeh..." He was an original, and the "Sunshine Station that serves the nations" was the only place you could get him. I'd stay awake long past my bedtime here, pulling in XERB on a tiny little radio. Later I learned to wrap wire around it and hook the wire to my back yard fence.

Then there were the mail order ministers selling the leather crosses, bottles of holy water, and neck chains from XEMO in somewhere like Nuevo Laredo.

But one thing I liked best of all was that even the bland local DJs at lots of small stations played REGIONAL music, stuff that didn't make the charts nationally.

Most local radio ads are produced by the local radio stations. The on-air staff provides the talent and either a professional copywriter employed by the station or - more likely - a station account executive writes the ad. My company (Tapscan, Inc.) has a software package that provides copy management and a database of themed, professionally written commercials (Continuity Director).

The financial rewards for an entrpreneur in this venue are probably minimal. But, then again, look at Dick Orkin!

>I would like to get into making radio ads for local businesses. Could someone
>please give me some advice on where to start? I have a small 8 track
>studio that I could produce the ads on. I would really like some info

I don't profess to being an expert on radio advertising, but having worked as a radio traffic manager for eight years, I can give a little guidance.

Radio advertising is done on two levels: the local level and the agency level. Let me address the latter first. Advertising agencies use highly creative people to produce and execute their ads, geniuses like Dick Orkin, Bert Berdis, Ken Nordine (the only man who can make hydrocarbon exhaust emissions sound exciting) and Stan Freberg come to mind. Those tapes are then dubbed and trafficked to stations.

On the local level, however, everything is more shoestring and slightly less creative. Generally, radio stations employ copy writers and their own production people to produce recorded advertisements, or the jock can read live copy. Few radio stations on the fringes of major markets have the time or inclination to be as creative as the Orkins and Berdises, so usually local radio spots are usually straight-read or two-person skits with announcer interlocutions.

The two ways you can get in: (1) Knock on the doors of your local radio station and see if they need any production people. Give them a reel or cassette with some spec spots on it. Or (2) set yourself up as a production company and market your services to advertising agencies in your area. Perhaps some of their clients want to get into radio, but don't know how to get spots produced.

Good luck!

I have heard bits and pieces of the service on both KOMO-1000 Seattle, WA and KNUU-970 Las Vegas, NV. It's a bit like CNN Headline News, in that it is in 30 minute blocks, but, IMHO, it has two distinct advantages over CNN Headline News:

(1) The "blocks" in each half hour are generally smaller, thus making it much easier for affiliates to insert as much local programming as necessary. HLN has a huge 13 minute news block at :00 and :30, and that eats up most of the hour.

(2) The service is designed for radio, not television as HLN is.

I would venture to say that most HLN affiliates would do themselves a _lot_ of good by picking up AP's 24 hour news channel. Comments?

Bob Smith sent out to the faithful readers of Airwaves Journal:

>A couple of questions...can we assume from the absence of
>KOGO (AM600) from the leader board, that "Hot Talk" is having
>as little impact in San Diego as it's having back east?

KOGO's impact on talk radio has made KSDO (the other guys) smarter.
While I like the syndicated Art Bell; the rest of the syndicated programs
are left-overs from other stations. (G. Gordon Liddy, & Morton Downey Jr.)
The local live shows of Dave Dawson, and Peter Weissbach . . . seen a
couple of bad press postings complaining of Dawson talking about anal sex
in front of a school kids. He (Dawson) gets on a Libertarian band wagon
and makes the wheel squeek; and stays too long. George Weber, the 6 p.m
to 9 p.m. live show is interesting; but there is TOO much good radio on
(KFI John and Ken's last hour, Stephanie Miller from 7 p.m. on); and
(don't believe I going to type this) Tom Leikis.

For me, the only bright spots are Imus in the morning and Art Bell on KOGO.

> KFI is doing well in North San Diego County even as it's clearly
>on a steep slide in its core Los Angeles market if you believe the
>last two months of Arbitron trends.

On KFI: The Rush-man cometh down. He exploded on the radio scene, stole
Larry King's fame (as most listened to radio show) and then continued to
say that. Sorta drove me away. He's on three stations here (KSDO, KFI
live, KCEO Carlsbad, taped delay); so it's Rush overload.
I've heard that Paul Harvey is [again] the most listen to radio program.
That can explain some of KFI's numbers being down, but haven't seen the
hard numbers.

[I have wondered why KOA-Denver wanted the Rush man so much; the numbers
haven't supported the move.]

In this market, the listener has quanity and quality. If KFI is taking
a dive, the local-live shows will win against syndicated programming --
as long as the local talent is that: talent. Dips in the ratings makes
for smarter, tighter radio. Don't count KFI out, there's too much talent
there (John & Ken, Mr. KFI, Stephanie Miller, Dr. Laura, Bill Handel . . .)

Just my opinion.

2871. KGEI/SF Shutting Down

Newsgroup: rec.radio.broadcasting
Date: 1994-07-28 02:27:42 UTC
From: dk@crl.com
Message-ID: <31752u$buv@vixen.cso.uiuc.edu>
Source record: 38876

KGEI San Francisco will be shutting down Sunday night. KGEI, which studios and transmitter are located at Redwood Shores in Redwood City (30 miles south of San Francisco, next to KNBR's transmitter plant), for decades was the only commercial shortwave broadcaster on the West Coast.

KGEI was the Latin American service of Far East Broadcasting, headquartered near Los Angeles. KGEI was their only station in the Western Hermisphere. They still have 140 others around the rest of the world. KGEI had broadcast mainly religious and public affairs programming in Spanish (with 30 minutes a day in English) on 9615 and several channels in the 15 MHz band as well.

KGEI was begun by General Electric for the 1939 World's Fair, and at that time was one of dozens of domestic shortwave stations in the USA. During the 1960s KGEI's control was in question due to its use as a propaganda tool against Fidel Castro, though nothing was ever proven. KGEI boasted reception in nearly every city and town in Central and South America.

A few months ago KGEI was shown on Dr. Gene Scott's program because he had bought and dismantled a surplus antenna of theirs for use in his own Central American shortwave station.

KGEI's shutdown follows on the heels of cutbacks by the Voice of America, CBC-Radio Canada, the BBC, Christian Science Monitor, and other broadcasters who today prefer to distribute much of their programming via satellite to local AM and FM band broadcasters. Does this mean the end of shortwave broadcasting in the Western Hermisphere?

Will anyone buy KGEI, or will it be entirely dismantled and its site on San Francisco Bay be used as a wildlife wetlands?

Yes. I was there. I wasn't very impressed with the technology, but Tom sounded pretty good. What annoyed me was that they pushed this as being "CD quality" and it clearly wasn't. But, for someone like Tom producing spots in the middle of nowhere it was a good solution.

This DGS system was supposed to be a way to feed high fidelity commercial material from a central location to subscribing stations so that updates could be done quickly and not have to rely on courier services or the mail for spot feeds.

I would have liked the system if they had created something for stations to send dubs among THEMSELVES. So many times a station produces a spot, a client likes it, the station sends copies to other stations where the client has bought time. THIS would be a good solution rather than a centralized operation.

Oh well, in a couple years it'll be SOP to feed this stuff via The Little Garden, or one of the other hip, up-to-date Internet providers, since all the stations will be wired in anyhow.

This is probably a significant reason why those stations which
actually produce their own programming get a much wider audience than
they do durning the day. For example, I've heard Norm Nathan on WBZ
get calls from West Virginia, Pittsburgh (now how did they manage that
with KDKA blasting on the adjacent channel?), Detroit, Fort Wayne, and
a number of other far-afield locations. Last Saturday the Dumb
Birthday Game had a contestant from a city in Ontario that begins with
a B whose name I can't remember.

What's really scary is when you can distinguish US and Canadian
stations by the particular variety of satellite country they play...

There's a simple reason for all-syndicated-all-the-time---the laughable "deregulation" of the Reagan era FCC brought in a slew of station owners and managers whose sole interest is the fast buck, not serving their license community. Half of these jerks came into radio because they saw CITIZEN KANE and thought it would be fun to run a radio station, and they couldn't make their pile of money selling insurance.

2880. New England Radio Watcher - WBZ, WHDH, WEEI

Newsgroup: rec.radio.broadcasting
Date: 1994-07-28 19:40:22 UTC
From: fybush@world.std.com
Message-ID: <3191j6$gll@vixen.cso.uiuc.edu>
Source record: 38885

Big changes coming! First the facts: WBZ is dropping its weekend
afternoon specialty talk for sports-information. The current
schedule looks like this:

SATURDAY

12:30 Second Opinion (medical)
1:00 Auto Works
3:00 Money Managers
5:00 Kid Company
7:00 Lovell Dyett Show (talk)

SUNDAY

12:00 First Day with Dave Maynard (talk/lifestyle features)
6:00 Calling All Sports
9:00 Looking at the Law Live
11:00 Norm Nathan Show (talk)

The new schedule will look like this:

SATURDAYS (starting 9/3)

12:30 WBZ Sports Saturday
7:00 Kid Company
9:00 Lovell Dyett

SUNDAYS (after Patriots season ends)

12:00 WBZ Sports Sunday
6:00 Calling All Sports
9:00 Looking at the Law Live

The new sports shows will reportedly be to sports what WBZ's all news
format is to news...heavy on sports news and sports features, light
on callers and opinion pieces. Combined with Patriots football and
starting in 1995 Bruins hockey, it will make BZ more of a sports player.
A new staff is being brought in for the sports show.

Now onto the rumors...

If what I'm hearing is true, there's about to be a shakeup involving
American Radio Systems' WHDH 850 (50kw DA-2) and "Back Bay Broadcasting"'s
WEEI 590 (5kw DA-2, and a tight DA at that -- nothing to the east or
west). Back Bay transferred Celtics rights to 850 when it bought WEEI
earlier this year. Now it appears Back Bay is selling the entire WEEI
programming and calls to ARS. Yep, starting this fall, ARS will own
WEEI AM 850...with the same schedule as 590 had (including Imus in the

Morning and Eddie Andelman in the afternoon). As for 590, Back Bay will sell it to an unnamed religious broadcaster. My guess is Salem Communications -- they are strong in the northeast, they already own WEZE-1260, and they're doing duopoly deals in some of their markets.

WHDH's talk would then consolidate with WRKO like this:

CURRENTLY:

WRKO: 6-10 Clapprood and Whitley, 10-2 various fill-ins since Leykis left (lately Janet Jeghelian), 2-6 Jerry Williams.

WHDH: 5-10 News All Morning, 10-12 Money Experts, 12-3 Rush, 3-7 Howie Carr

New WRKO: 6-10 Clapprood and Whitley, 10-12 Jerry Williams (IF they can break his contract which locks him into 2-6), 12-3 Rush, 3-7 Howie Carr.

It would create one talk monster, and relieve the headache that WHDH has been to ARS. It would also remove the WHDH calls from local radio for the first time since 1924. The calls are still on TV, with Sunbeam's WHDH-TV 7.

Will this all really happen? It's sounding VERY likely.

-=Scott Fybush - fybush@world.std.com - Not the opinions of WBZ=-

2881. WBZ moves to all-sports....on weekend afternoon

Newsgroup: rec.radio.broadcasting
Date: 1994-07-28 19:40:23 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <3191j7$glm@vixen.cso.uiuc.edu>
Source record: 38886

* WBZ AM 1030 announced yesterday(7/27/94) that beginning Sept 3rd(Labor Day Weekend) it'll introduce sports-oriented programming on weekend afternoons -- Saturdays 12:30pm to 7pm and Sundays 12-6pm(when NFL's Patriots are not playing).

That means Saturday's regular shows 'AutoWorks'(1-3) and 'The Learning Center'(3-5pm) are history. And 'KidsCompany' that aired from 5-7pm will be now heard at 7pm. Sunday afternoon David Maynard show will be history as well.

WBZ's new sports programming will be a mix of talk and info(ESPN Radio) style with score updates and commentary.

It's a very interesting move Group W folks considering that WEEI AM 590(SportsRadio 590), Boston's original 3-year old all-sports radio signal will be beefing up its weekend schedule as well. Currently, WEEI's afternoon/night weekend programming is all ESPN Radio or various Las Vegas-based nationally syndicated sports talk shows. (Sunday's late afternoon locally produced 'Sports Huddle' is the only exception). 'EEI's major plans call for local sports talk shows to be introduced during these time blocks to replace all the syndicated stuff....

Personally, I think it's an excellent move by 'BZ to get rid of some stale programming on Saturday/Sunday afternoons on city's # 1 station. However, I would have prefered all-news during those afternoon blocks instead but, hey, anything is better than what they have now...

I would like to hear a spin on this one from our net resident WBZ staffers...They'll probably tell us that it's all business and that with promising Patriots on its airwaves this season and the Bruins coming aboard next year for the following five, local sports teams will blend in fabulously with this new weekend all-sports talk product.

I'll buy that. But, I'm convinced(don't ask me why and I'll tell you) that there's something a little personal here as well and involves kicking some ('EEI)butt . Here's my read on this :

It's a good move for WBZ. Period. But based on what happened ~6 months ago, it's hard not see 'BZ acting like a scorned lover here. After courting 'EEI for well over 3 months this past fall/winter when the Celtics Broadcasting pulled a done deal off the table. One of the major reasons was this guy by the name of Imus(5:30-10am). Imus factor gave the 5W sports station a nice ratings boost in the fall book. Greedy Celtics then tried to redo the deal.(up the ante by a million or so). Needless to say, WBZ walked. I really give them a lot of credit with

not putting up with this BS from the Celtics. 'EEI finally got sold to a questiobable group of investors with alleged ties to a mucj bigger company(ARS). WBZ was one of a couple of local broadcasters which publically called for the FCC to investigate 'EEI sale to BackBayBroadcasters. The matter died down.

Now, with all that 50,000 watts of power WBZ is going for some weekend blood.

>Mutual or CBS or anyone else do this?

Yes, several of the networks provide multiple types of service. ABC has
several different services,

ABC Information: The full blown news service, Paul Harvey, Gordon Williams,
etc. Usually run by all-news or full-service stations
with a heavy news/information presence.
ABC Direction: Similar to Information, not as complete. Kind of an
"Information lite" service, I've heard it primarily
on all-talkers.
ABC Rock: For music stations. Brief little news nuggets, personality
/celebrity stuff, etc.

There may be others, those are the ones I know of.

Westwood One still has Mutual and NBC Radio, of course.

CBS also has several services, I don't know the names of them.

The reasons are obvious: By having multiple services you can get more complete
penetration into each market, as you can have multiple "exclusive" stations
in each area. Also, you have double (or triple or more) the number of
avails to sell, with only an incremental increase in personnel costs.

>will not change until technology improves.

There are a couple of factors at work here:

1) There is simply too much revenue at stake to risk downtime (especially
for commercial storage) of a "newfangled" digital system. So while the big
market stations have the cash to upgrade, the fear of a system crash may
keep them from doing so.

2) Many of the larger market stations already have relatively new analog
equipment. There isn't the pressure to replace failing hardware that you
see in smaller markets (where cost-concious management is more likely to
take a change on digital gear, since it can be less expensive than analog).

Most stations I've been to take a middle approach. They're experimenting
with digital production and/or storage, probably have a CD player (or two
or three) in the control room, but when it comes down to the nitty-gritty,
the basic core of the day-to-day operation still relies on the same technology
it has for the past 30+ years.

David A. Kaye (dk@crl.com) wrote:
: Tim Pozar (pozar@kumr.lns.com) wrote:

: : The Digital Generation Systems folks came by to a Bay Area Broadcast
: : Engineers Society (BABES) lunchen about a year ago.

: Yes. I was there. I wasn't very impressed with the technology, but Tom
: sounded pretty good. What annoyed me was that they pushed this as being
: "CD quality" and it clearly wasn't. But, for someone like Tom producing
: spots in the middle of nowhere it was a good solution.

Yes, the DGS boxes are using Dolby AC-2 technology to compress
their audio files. The DGS folks were taken to task about representing
themselves as "CD quality" (and rightly so) when in fact they
aren't. It is _certainly_ better than 90 percent of the tape dubs
we get in with the bad biasing and weird head alignment that most
of the tapes are recorded with.

: This DGS system was supposed to be a way to feed high fidelity commercial
: material from a central location to subscribing stations so that updates
: could be done quickly and not have to rely on courier services or the
: mail for spot feeds.

It still is that. I belive the only advantage to the DGS distribution
stream (other than a debatable better quality) is the speed that
they can distribute the tapes over "conventional" methods like a
dubbing house and FedEx. They price the distribution exactly the
same as the old fashion way.

It seems to be pretty reliable. Although, about once every couple
of months DGS calls and asks us to reboot the machine as it may
wedge in some strange state. This has been happening less lately.

I do find the box that they package it in is dreadful for a production
room. It is basicly a PC with a standard PC power supply fan
screaming away. The display and control pad is built into the same
box and is meant to be either mounted in a rack or sit on top of
some production room furniture. I asked for and got them to build
a "custom" version where I could bury the box in my production room
furniture and just have a monitor and a PC keyboard sticking out.
This cut down the noise considerably. It is a little confusing to
the operators as the keyboard is not meant to control the thing as
DGS's custom keypad is. We also needed to put some labels on the
keyboard to help the Ops use the thing.

: I would have liked the system if they had created something for stations
: to send dubs among THEMSELVES. So many times a station produces a spot,

: a client likes it, the station sends copies to other stations where the
: client has bought time. THIS would be a good solution rather than a
: centralized operation.

: Oh well, in a couple years it'll be SOP to feed this stuff via The Little
: Garden, or one of the other hip, up-to-date Internet providers, since all
: the stations will be wired in anyhow.

Good points. I think that this could happen pretty soon. If we
start to see Digital Audio Workstations using open-standard networking
like IP or IPX files could be shipped easily over the Internet.
Stations could develop their own private IP connections out of
leased 56Kb/s or T1 lines if they have issues with security. Which
brings up yet another audio distribution scheme discussion...

Any one have one of these SONET boxes in their production rooms?
Yet another computer monitor to light up the production room...

>

Don't know how many stations have picked it up, but we will as of Aug 1.
The new service is very nice. The network is set up so that stations can
jump in at almost any time. As the previous poster indicated, they do
program in 30 min blocks. But they also end each story at the top of the
minute, allowing stations to jump in the middle of a newscast if they like.

Also, the network refers to itself as "The News Station". Thus, if you are
swift, you can slap your local news in just before the top of the hour, do a
legal ID, and make it sound like the news operation is local.

I'll keep you informed, if you like....

The now defunct Blaze has changed its call letters to WRCX using
the positioner Rock one o three five. For 2 weeks they had no
live jocks, now they have a full staff including Mankow's Morning
Madhouse and Charlie Logan (who was on the Loop and the Blaze
after Evergreen bought it) in his usual afternoon drive position.
Still hear Ozzie and Metallica mixed in with Pearl Jam, Spin Doctors,
Scorpions, ZZ TOP, Pink Floyd, Yes (some really nice old long Yes
cuts...i refuse to use the "cl.." word) etc. No Psychedelic Furs,
Frente, Sundays or anything like that...and I haven't heard any
of the early 80's local bands like Off Broadway that you would have
heard plenty of on the Loop...it's kind of an updated Loop format...
harder but still a mix of old & new. I miss Slayer :-(
Oh, well...that's why there are CDs I guess...

Here's a nut for you net.trivia experts to crack:

I have several Redbook magazines from 1933 (among my small collection of old magazines), all with extensive radio schedules for the networks. In their Radio Section they would often profile a current radio celebrity.

In one of these issues there is a profile for a personality known only as "Cheerio". He had a morning program ,15 minutes I believe, which was carried over the NBC network as a "sustaining" program. This gentleman was apparently some sort of philanthropist who wished to boost peoples morale and inspire them...and he insisted on complete anonymity. No one was permitted to refer to him as anything but "Cheerio".

His *face* was known, however...Recently a used bookstore here in Chicago came up with a book from the 1930's written by "Cheerio", which included a few pictures of him. (The price was beyond my reach, but it would be lovely to add to my collection! :))

Every now and then I run across this article--written by Merlin Aylesworth--and it starts my curiosity wandering...who *was* this man? How could a complete unknown have the #1 morning program of his day....was his identity ever revealed? Questions questions...

I may post the article here, but first I should see if permission needs to be obtained....many of these old magazines are re-copyrighted (because of their short-story content, I suppose) and would be under protection today.

Does anybody have any idea who this guy was, or whatever became of him??

Source record: 38899

Well, at WCRB(FM) Boston we don't use carts for anything but news cuts. Commercials, promos, and short features are on a DigiCart hard disk drive in the air studio. They sound much better than our old analog carts ever did and nobody ever loses them or forgets to recue them. Once a week the entire 1 GB disk is backed up to Bernoulli disks in case something should happen to it.

Do we have problems? Sometimes. On Christmas eve a board op erased every commercial in the station. Power surges occasionally cause the machine to freeze up. When we bought the DigiCart machines-- we have one in each studio-- the software had some problems, but the major ones were fixed in the next revision.

Analog carts are not 100% reliable either. Heads get dirty; overzealous jocks knock them out of alignment; carts miss cues; people misplace carts. When I was CE at KDON (AM-FM) in Salinas, CA one day I got a call from a jock who couldn't get any slot in his 3-decker to play. A music cart had jammed; he had to go to vinyl until I xould get there to fix it. And you can never, never get a cart machine to exhibit flat response to 15k, stay in phase, or come anywhere near the signal-to-noise ratio of digital.

To too couldn't get any slot in his 3-decker to play. A music cart had jammed; he had to go to vinyl until I xould get there to fix it. And you can never, never get a cart machine to exhibit flat response to 15k, stay in phase, or come anywhere near the signal-to-noise ratio of digital.

To top it off: digital is cheaper. A single DigiCart replaced three old analog cart machines. More advanced systems like the Computer Concepts can run whole networks of stations.

The KGEI site will most certainly remain in use. Remember, San Francisco's 50kw KNBR/680 also transmits from there. I was out there last November, and it's remarkable to see the way development is encroaching. I imagine when the site was built decades ago it was isolated at the end of a marshy peninsula. Now there are condos and homes and offices lining the entire 2-mile stretch of Redwood Shores Road from Rt. 101.

KNBR, by the way, has one of the very last top-loaded Franklin antennas in use in this country. I have video of it if anyone cares to trade...

Anyone know the exact time and freq when KGEI will breathe its last? Reception is never great on this coast, but it's worth a try!

As I understand Rush, he says that attacks on him that use
phrases such as "mind numbed robots" are really attacks on his
listeners. Calling that Stalinist is a bit of a red herring.

Rush does sometimes get into an issue a bit much, but
considering that the Democrats' health care takeover proposals
represent a major change in this country's way of life, some
excess in his reaction may be justified. Fortunately Hilary's
Health Care Bus Tour is providing some comic relief. Rush's new
"Dr. Hildare" bit is funny unless you're a leftie.

What I found amusing are the news reports that Rush's OJ ads are
being pulled. I suppose if the mainstream press were a bunch of
right wing wackos the report would headline the fact that Larry
Ling's OJ ads are being pulled without mentioning that all talk
show OJ ads are being phased out as planned.

>Chayefsky's NETWORK when Howard Beale changed his tune after his meeting with
>Mr. Jensen? I just hope the company dismissal policy is changed this time...

I have been following this line of thought for a few days and finally thought I;d step in at this point...

I was willing to give Howard Stern and Rush Limbaugh their due until I decided one day to start listenting to their news content. Both programs have an WFUL lot of news content in them and I decided to see how they compaired, if it all in their use of news.

It was.... in the winter sometime and I remember hearing Robin Quivers give rather detailed, well-informed facts about almost every news story she brought up. I was familiar with most of them since I have just finished my Morning Drive air shift that day. Howard Stern of course spent the better part of two hours trying to malign half the content, etc.... but Robin told the basics and the details of the stories.

That afternoon I tuned into Rush Limbaugh and he was reading a wrire story on hostorians who had rated the presidents in order of how well they would be rememered for their jobs in office in the coming decades... and Reagan was listed 3rd, LAST on the list. Limbaugh went ballistic over this saying it was proof of liberalism by incompetant historians., etc. What killed me was how I had read THE SAME EXACT Associated Press article just hours before, and he chose to ignore 98% of it.... and just concentrate on the Reagan part of the story -- what caught his interest. It was if the rest of the article didn't even exist. No explanation of how the choices were made.... who made the choices.... just the results of where Reagan fit in.

It was at THAT point that I realized how Rush decided to use his facts. He choses very carefully what he uses out of particular stories for his own use.

Granted, Robin is allegedly a news person and reports facts.... and Rush is a talk show host who gives commentary. However, since Rush claims to just state the facts and comment from there... I submit he doesn't state the facts from the get go.

Just a little opinion (A looooooong one this time)!

First,if you're wondering why you didn't see a Radio Watch this
Tuesday(7/26),it's because the Free-Net was off line,due to thunderstorms
that moved through the area during the night. Now,on to business:

*First,the ratings(from the 7/30 Billboard,6am-midnight,12+ only):

Stn./freq. Format/positioner(winter rank) W94 Sp94 +/-
---
1 WYRK(106.5) Country(1) 11.0 11.5 + .5
2 WKSE(98.5) Contemporary hits(Kiss 98.5)(6) 5.9 7.9 +2.0
3 WBEN(930) News/talk;Bills(NewsTalk 930)(2) 9.7 7.6 -2.1
WJYE(96.1) Adult contemporary(3) 9.2 7.6 -1.6
5 WGRF(96.9) Classic rock(97 Rock)(10) 4.7 7.3 +2.6
6 WBLK(93.7) Urban contemporary(8) 5.1 7.0 +1.9
7 WUFX(103.3) Album rock(103.3 the Fox)(7) 5.4 6.2 + .8
8 WGR(550) News/talk;Sabres/Bisons(NewsRadio 55)(4) 7.7 6.1 -1.6
WHTT(104.1) Oldies(Oldies 104)(5) ! 6.6 6.1 - .5
10 WECK(1230) Adult standards/jazz(11) 3.8 4.6 + .8
11 WMJQ(102.5) Hot adult contemporary(Q102)(9) 4.8 4.4 - .4
12 WBUF(92.9) Adult contemporary(B93)(12) @ 3.6 2.8 - .8
13 WWKB(1520) Talk/sports;H.Stern(The Big 1520)(T-14) 1.7 2.1 + .4

15 CFNY(102.1) Modern rock(The Leading Edge)(13) # 2.1 1.6 - .5
16 WDCX(99.5) Religious(16) 1.4 1.3 - .1
17 WUFO(1080) Adult urban/gospel(The Pacesetter)(?) $ .7 1.1 + .4

Symbols:
!-FM only
@-Switched from soft A/C about 1 month into book
#-Brampton,Ont.(Toronto market)
$-Daytime operation only

Some analysis:
-WBEN:not sure where specifically it dropped,but a guess is that Limbaugh
might have something to do with it-or Arbitron's notorious survey techniques
might.
-WBUF:its switch to mainstream A/C hasn't yet paid off. As I've said before,
this market can't support 3 A/C's of varying stripes.
-WHTT:Doing the Prize Jukebox promotion hasn't stemmed a 5-book drop. Could
expanding the playlist help(i.e.to more unfamiliar oldies)?
-WKSE:Seems adding to its playlist(albeit safe alternative)has paid off-or
it could be those surveys again.(To correct testnet!paul@pegasus.att.com:
it's NOT modern rock-it more accurately reflects the Billboard Hot 100 chart.)
-WGR:Usual drop,which can be attributed to the Bisons.
-WGRF:Could someone please tell me why?

-WUFX:Think the dancing big guy's ads helped?

*According to this week's Metro Weekend,WJYE is one of the five stations up for the Station of the Year in Adult Contemporary,as nominated by the National Association of Broadcasters. Also in the running:KOSI in Denver, WKQI in Detroit,WLTW in New York City and WSPT in Stevens Point,Wisc. It'll be announced at the NAB convention in Los Angeles October 15.

*The same issue had a profile of Tim Wenger and Susan Rose,the duo who host WBEN's Buffalo's Evening News weekdays 4-7pm. Wenger and Rose,who are also married,noted that they were worried that there might be a policy prohibiting married couples from working at the station(there hasn't,not when 'BEN was owned by Algonquin or-currently-by Keymarket. This isn't the first such situation,either:Kelly Sinclair and Kevin Belcastro worked on the FM side(when it was Majic 102),while Rob Lucas met his wife there as well(she's still there,BTW).

*Now,the latest chapter in the Am-Pol Eagle v. WGR saga:The Erie County Legislature got into the act,with Legislator Ray Dusza submitting a resolution calling on Rich Communications to end the broadcasting of ethnic jokes and terms on its stations. Dusza said he enjoys a good laugh as much as anyone else,"but this continuing use of anti-Polish so-called humor on both...stations has got to end." He added that the Rich family "would never condone such anti-Polish so-called humor,and I am confident they will put an end to it."
Other comments:
-David Franczyk,running for Congress in the 30th District,said that a person who uses such terms must be "a person of low intelligence,a mental midget."(Don't be so restrained,Dave. Let us know how you really feel! :))
-Buffalo Common Councilmember Dale Zuchlewski(North District):"I don't listen to those stations because I know the kind of tactics they use to try to get attention."

*Some thoughts on Tom Leykis:I've listened to him on and off over the past few weeks on WWKB,and he's isn't too bad. He hasn't referred that much to KFI(except when a caller brings it up;it happened last week,and he referred to them as "KKKFI"-in terms of their political leanings-the same with a Seattle competitor,KVI-or "KKKVI"(he was there last Friday). The best way I can describe him is to say the show is like Andy Barrie's(of CFRB) -except Tom's much louder. The show is set up w/topics for each hour,with some quirks(i.e.:In an abortion discussion,Andy restricted calls to men whose loved one went through the procedure;Tom limited calls once to women who had never called a radio talk show before).

*North of the border:Bill Houston's column in Wednesday's Toronto Globe & Mail had a blurb about CJCL(sports;The Fan 1430). Seems the station wanted to throw a going away bash for ex-Maple Leaf captain and center Wendel Clark,but couldn't. Apparently,the city wanted the station to pay $15,000 to cover security and clean-up costs.

*Finally,veteran radio and TV personality Chuck Healy died early today of heart failure at 77. Details forthcoming(because I don't have it with me).

2908. Radio Watchers -- Kansas City (7/30/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-07-30 06:30:01 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <31cs19$9q5@vixen.cso.uiuc.edu>
Source record: 38763

First, a couple of public service announcements (not from the Ad Council):

<<<< PLEA FOR HELP!! >>>>

Displaying a nose for news far exceeded by Charlotte the Arson Dog (cf. Dave Barry column distributed the weekend of 7/23 & 24), Kansas City-area media have yet to publish any story about the spring Arbitrons. To complicate matters, my increasingly significant other is making noises about wanting to get away next weekend to Excelsior Springs. Hence, if I don't get the numbers soon, it will be two weeks before I can analyze them and relay that analysis here. If anyone out there can provide me the numbers (confidentially or otherwise) (12+ needed; 25-54 would be nice as well) please e-mail them to me at either transvox@tyrell.net or mark808@delphi.com. Thank you!

<<<< MORE ADMINISTRIVIA >>>>

I have renewed a yearly subscription with my internet service provider, despite a significant level of service problems. I am hopeful of resolution soon, and the problems do not affect e-mail or telnet. They severely hamper network news and ftp. My e-mail address continues to be transvox@tyrell.net, with a backup at mark808@delphi.com. However, my finger (KC radio log in .plan file) is not accessible to the outside world, and no time frame has been provided for resolution of that situation.

*** *** *** *** *** *** *** *** *** *** *** *** *** *** *** *** ***

KFEZ(AM) owner Thomas Beal was profiled in the "Corporate Ladder" column of the business section of the Kansas City Star on Tuesday (July 26).

Beal, 64, was recently named president of the downtown Kansas City Rotary Club. He is a real-estate developer who bought KJLA(AM) (1190) after floods in the Blue River Valley knocked it off the air in 1990. Beal was an aficionado of KJLA's nostalgia format. After he bought the station, he had its damaged directional antenna refurbished and installed stereo facilities. Beal subsequently changed the KJLA calls to KFEZ.

In Kansas City at present, only KJLA and WDAF(AM) broadcast in stereo. WHB(AM) broadcast in stereo until it was sold last fall.

The profile also said that Beal was a founder of station KBEA(AM) (1480) in 1956. (My records indicate the station was not started until October 26, 1957, and was sold in 1959, retaining the original calls of KBKC until sometime in 1960.) KBEA, now owned by another real-estate developer, Robert Ingram, also programs a nostalgia format.

In the profile, Beal also revealed some long-range plans for the station. Beal said he bought the station anticipating that the FCC would eventually select a digital broadcasting system for the AM dial. Beal told the Star, "I bought this station to go into the next wave."

*** *** *** *** *** *** *** *** *** *** *** *** *** *** *** *** ***
The Kansas City Chiefs football club has published its list of radio affiliates for 1994. One affiliate is in Sacramento (KSAC, 1240), presumably for 49ers fans wanting to keep up with the present Chiefs quarterback.

Other affiliates (larger cities only listed) in Missouri include the flagship KCFX (101.1) in Kansas City, KFRU (1400) in Columbia, KWAS (1230) in Joplin, KIRX (1450) and KRXL (94.5) in Kirksville, KFEQ (680) in St. Joseph, and KWTO (560) in Springfield.

Chiefs radio outposts in larger markets in other states include WIBW (580 and 97.3) in Topeka and KQAM (1410) in Wichita (Kansas), KWKY (1150) in Des Moines and KSCJ (1360) in Sioux City (Iowa), WKY (930) in Oklahoma City and KAKC (1300) in Tulsa (Oklahoma), and in Nebraska, KFAB (1110) in Omaha and KFOR (1240) in Lincoln.

Missourians accustomed to the cross-state rivalry between our two largest metro areas may be surprised to learn there's even a Chiefs affiliate in St. Louis: soft-AC KEZK (102.5) -- surprisingly, not KMOX.

2909. New England Radio Watcher : Worcester MA

Newsgroup: rec.radio.broadcasting
Date: 1994-07-30 06:30:02 UTC
From: fybush@world.std.com
Message-ID: <31cs1a$9qn@vixen.cso.uiuc.edu>
Source record: 38764

Worcester County (Central Mass., some 50 miles west of Boston for the most part) is getting some new sounds on the dial very soon.

WFGL-960 in Fitchburg (2500/1000 w, DA-2) is, according to M Street, back on the air with a religious format. I haven't had a chance to drive out there yet, and adjacent channel WROL-950 in Boston makes them hard to hear hereabouts. WFGL went through some death spasms in 1991, going from a local AC format to big bands via satellite, then switching calls to WXLO(AM) for a few months, then going dark. Montachusett Broadcasting (which also owns 50kw AC WXLO-FM 104.5) then returned the calls to WFGL, cleaned out the studios, and shut it down. The station was recently sold to Calvary Chapel, and will be a religious outlet. It's Worcester County's second, after WVNE-760 Leicester/ Worcester.

And the third is about to show up...Carter Broadcasting's WCRN-830 Worcester, cranking out 7kw days and 5kw at night, DA-2. This was originally licensed to Cherry Valley, a few miles to the west, with 3/1kw DA-2. Rumor has it that CRN will be on the air by early August, likely simulcasting the religious/ethnic mix heard on Carter's WROL-950 Boston and WACE-730 Chicopee/Springfield (heard ID'ing illegally as "WACE Springfield" during Red Sox Spanish-language broadcasts!). 'CRN should make it still harder to hear WHDH-850 west of Boston.

That will leave just one unactivated CP in the Worcester area, WBSO-650 Clinton MA (NE of Worcester). I have seen the contour maps for this signal, and it will be a flamethrower. 10kw day, 1 kw night, and the day pattern will throw city-grade to the east over ALL of Metro Boston. They engineered it as close-in to WFAN-660 as they could...the 0.5 mv/m contours almost touch south of Boston in the daytime. M Street says the CP was cancelled 3/93, but I understand it's been reactivated.

And another 40 miles to the west, in Turners Falls outside Greenfield, WPVQ 93.9 is just about up and running. It's been heard testing, and has a listed phone number of 413-665-0939 in nearby Whately, MA. Speculation is that the transmitter site is that of WGAJ-FM 91.7, on a high ridge overlooking the Connecticut River. Unbuilt in that area is 97.3 WFUB Orange MA. It's an overbuilt and severely economically depressed area, and I can't see how a new station would thrive.

I will try to have tapes of WCRN's first sign-on in the collection as soon as I find out when it will be.

From: Ed Ellers <edellers@delphi.com>
Message-ID: <31cs1c$9qu@vixen.cso.uiuc.edu>
Source record: 38765

David A. Kaye <dk@crl.com> writes:

>In the West, there were the Orange and the Gold networks as well. I
>believe the Orange became ABC Radio West (ABC, CBS, and MBS each had
>Pacific Coast networks), and the Gold was folded into the regular full NBC
>network.

For a time that CBS West Coast network was actually the Don Lee Broadcasting System, made up almost entirely of Don Lee O&Os; it originated some network shows of its own, and in effect that *network* was the CBS affiliate in the markets where it operated.

A similar situation happened for a while in TV in the late 1940s; CBS and NBC actually had separate network schedules with some different programming fed from New York, Chicago and Los Angeles. The Chicago split ended when AT&T finished its line between New York and Chicago; the West Coast splinter continued somewhat longer until AT&T got additional channels working on the coast-to-coast microwave link, which was originally one channel in each direction at some points.

This isn't the same as "AP Network News", is it? I've (in Europe) heard this for years from the US forces radio, usually precceded by the AFN "serving those who serve" announcement, followed by tons of hiss as this news service is cued in, obviously over El Cheapo sat. links from LA. It also has a "AP Network News" with short pause about 2-3 mins in so stations can drop off or continue with the 5 mins version.

Whatever will some of us do for US sounds when the last Imperialist Yankee Invaders leave Europe? Emigrate?

2912. Re: Cheerio

Not the patch cords...nothing patriotic. It's actually a lot less exciting. See, on the original charts that detailed the physical links that made up the networks, the old AT&T network (WEAF, WRC, et al) was shown in RED pencil, and the old Westinghouse network (WJZ, WBZ, etc.) was shown in BLUE. And so the networks came to be known. They were originally just the WEAF chain and the WJZ chain.

Simple as that.

And I'm proud to say that WBZ has been a part of the Blue network, in whatever form (Westinghouse, WJZ network, NBC Blue, Blue Network, ABC Radio, ABN, ABC Radio, ABC Information Network) it has taken over 7 decades.

-=Scott Fybush - fybush@world.std.com - Not the words of WBZ=-

Yes, many performers mentioned this, including Fred Allen, Jack Benny,
and George Burns. Jack Benny's daughter mentions it in her book about
him, telling a story about the cast getting drunk between shows and the
results coming out very different the second time around.

I have some schedules somewhere from the late 1940s when, even though
recording was popular (Mutual recorded most of their stuff) apparently
the big networks had given up on using either recording or 2nd feed; the
radio log clearly shows Jack Benny coming on at 6pm! I'll see if I can
dig this up.

>Anyone have any detailed information on this? It sounds like a lot
>of work! :)

Absolutely correct. The shows did the second show "for the West Coast." Bing Crosby, who would rather have the extra time for golf and other fun pasttimes hired some engineers who developed audio tape. After that innovation, the shows began to be tape delayed.

Some of the shows recorded Acetate disks in the pre-tape era, but they usually sounded scratchy and often skipped. Most performers chose to do their shows a second time,

Take care...
Mark West
Complete Post, Inc.
Hollywood, CA

P.S. Not surprisingly, Bing Crosby Productions was also instrumental in the development of Videotape also (for much of the same reasons).

Actually only some of the shows were done that way, because of the expense,
and it was a three-hour (or more!) delay. This was one of the big reasons why
so many of the big radio shows started originating from Los Angeles in the
late 1930s after some AT&T tariff reductions -- it meant that the cast and
crew were working afternoons and evenings instead of evening and late nights.

Pacific Recorders and Engineering is the Rolls Royce of broadcast audio equipment makers. Their products are generally DAMN good quality but rather expensive. They are the creators of the classic Multimax and Multilimiter audio processors (which were I believe designed by Jack Williams himself), Tomcat cart machines, BMX on-air consoles, ABX production consoles, and a digital audio workstation whose model number escapes me.

I don't know what it might be like to work there, but PR&E's products are highly regarded and widely used by big-name broadcasters. You don't see used PR&E products advertised in the back of _Radio World_ because people don't like to part with them.

Football, American style, "kicks" off this weekend with the SD Chargers and Atlanta Falcons. [In case you still have world-cup fever, it's pig skin time] XETRA-AM (690 50kw, U) carries Saturday's game.

The radio crew include: Lee Hamilton, jim Laslavic and Pat Curran. This is the seventh season at XTRA Sports.

With the boys of summer possibly pulling the spoiler for the season, KFMB-AM, the current home of the Padres, is nervous about the impending strike. Revenues for the station come in on the games. No games. No revenue. KFMB broadcasting group doesn't need this now. The FM side is now known as "The new Star for San Diego." The new format; which is about one month old, is still testing the waters. Advertisements have been printed in the area newspapers, and on the radio w/pictures (and owned) KFMB.

The wait for the next seasons flag-ship station for the SD Padres continues. KFMB is rumored to be the next seasons station; but XETRA-AM is willing to pay the $$$ for the honor. The all-sports station 690 wants a professional baseball team -- and is still rangling with the Angels on broadcast rights -- but is still waiting in the wings.

[Thanks to all who responded with my query yesterday about Pacific Recorders & Engineering. It is appreciated very much!]

Even worse, listening to local programming in different cities and noticing that all the music is the same, all the jingles come from the same package, and all the jocks read the same generic liner cards. It seems that the Billboard charts are the only source of programming nowadays. National "consultants" program a station the same way in Texas as they do in Boston. You can't play a song on the radio today without scads of market research. I'm sure most people have heard the song "Gimme Some Lovin'" by Spencer Davis. That was a hit in Boston, but by a group called the Jordan Brothers. For several years that was the only version I ever heard, until Bill Drake's boys started programming WRKO from Los Angeles. Now the only time I ever hear the Jordan Brothers is on a worn out 45. It's a shame to see so many people discuss today's impersonal radio sound as if it were never any different.

Do you mean radio talkshows that discuss the net rather than internet distributed talkshows? If so, I'd like to tell you about my show "ElectricSpace" on WMBR 88.1 in Cambridge.

My co-hosts Tina Taylor, a Brandeis University sociologist and Dave Evan, New Media Director at CM Communications in Boston produce a weekly talk/ambient music/internet connected show that reaches the metro Boston area.

We are interested in exploring the personal and social implications of new digital communications technologies and actively try to integrate as much radio, telephone and net bandwidth as possible to forge new electric spaces.

I'm a sound artist with experience doing radio, film, virtual reality and public installations and I'm working to craft "cyberspace soundscapes" that accompany text-based virtual reality as experienced in MUD's. These cyberspace soundscapes are surround sound encoded so listeners who have home theatre systems are immersed in the sound space rather than just sitting in front of it as is the case with mono, or even stereo radio.

Tina Taylor is interested in issues of digital bodies, cyborgs and distributed interactive virtual communities and questions of identity representation.

Dave Evans has been actively researching the commercialization of the net - promises and pitfalls. He's also got a keen ear for net gossip ;)

The three of us met about a year ago when we were working on "Cuatomoc's Dream" - a recreation of the ancient Aztech site of Tenochitlan (now Mexico City) that was exhibited at SIGGRAPH '93 by the Boston Computer Society Virtual Reality Group.

On "ElectricSpace" we bring members of the BCS VRG, MIT Media Lab researchers and the occaisional international guest working in VR, techno music, distributed interactive simulation etc. to interact with our callers, us and various net communities.

We also laugh a lot!

peace to all,

Michael Joly

Gentle people,

Here's one that's fairly mindblowing.

Scott Dean, morning host at Terre Haute AOR-outlet WZZQ-FM, handed in his resignation last Monday. His last day at WZZQ will be Friday, August 5.

On Monday, August 8, Scott enters seminary. He's going to be a priest.

He and his co-host, Debbie Hunter, have yet to mention his resignation or intentions on the air.

Peace,
jim grey

bought by the Radio Corporation (they own WKLL 94.9 Frankfort 50KW
AOR,WKRL-AM 1200 N. Syracuse 1KW AOR, WKRL-FM 100.9 N. Syracuse 3KW [CP
6KW] AOR

A few more short sighted broadcasters like this company will surely "KILL"
radio in Utica-Rome. You can't win listeners by programming for your own
personal tastes and constantly changing formats like some other stations
in the market. I long for the days when radio had some regulation...and
life.

I'm a former broadcaster (25 years in "on-air" and "management") that got
out when Reagan gave it the death kiss of deregulation and allowed more
stations on the air. There are just to many in each market competing for
the few advertising dollers that are there. What we really need is to
have about 50% of the stations in this country go "dark." I know that
comment will cause some controversy and discussion here.

2930. Finally something of substance on WOWO

Newsgroup: rec.radio.broadcasting
Date: 1994-07-30 06:30:50 UTC
From: "Blaine E. Thompson" <ad582@DAYTON.WRIGHT.EDU>
Message-ID: <31cs2q$9rv@vixen.cso.uiuc.edu>
Source record: 38785

Good Morning,

Finally, something constructive (and positive) has come out of the "proposed" sale of WOWO AM-FM radio.

Subject to FCC approval, Inner City will own WOWO, but will sign a LMA with Federated Media (Owners of WMEE-FM and WQHK AM-FM) to have them manage the station.

Also, a minor item. WOWO-FM (Huntington-Fort Wayne) has switched frequencies from 103.1 FM to 102.9 FM, primarily for upgrading of their transmitter's power.

I like the idea of an LMA (I think it stands for Local Marketing Agreement) with Federated mainly becuase Federated knows the area. (They have the 3 stations in Fort Wayne, 2 in Decatur, IN -- 20 miles south of here, 1 in Grand Rapids, 1 in Muskegon, and 2 in Cincinnati) They know what works in the midwest. I'm also wondering...I would have thought African-American owned Inner City would have turned WOWO-FM into a Urban Contemporary station. If Federated gets the LMA, would the FM be converted, because they would probably be up against WMEE. (A Federated owned station)

Can't say much about the frequency change, although I bet it was a condition of sale with Inner City. Remember Paul Phillips' post of a few months ago...WOWO employees have "gags over their mouths" So, unfortunately, nothing can be said with names attached.

As always, Comments appreciated, and welcomed.

Blaine

Blaine Thompson
Student, Indiana-Purdue at Fort Wayne

[Moderator's Note: Yeah but this LMA wont change the crippling of WOW's signal, which was the main point of contention among those who had a point of contention. Bill]

2931. Stauffer Communications (WIBW) sold

Newsgroup: rec.radio.broadcasting
Date: 1994-07-30 06:30:51 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <31cs2r$9s0@vixen.cso.uiuc.edu>
Source record: 38786

The publishing company that owns WIBW-AM/FM/TV in Topeka -- as well as the Kansas capital city's daily newspaper -- has been sold for more than $280 million to a Georgia company. The sale was reported in local media Wednesday and Thursday (July 28 & 29).

The sale of the properties owned by Stauffer Communications, Inc. had been rumored for months, along with hints by younger members of the Stauffer family, who apparently wanted to cash in their Stauffer stock. Goldman, Sachs & Company was retained by Stauffer six months ago to explore a possible sale of all or some of the company's properties. The stock was publicly traded, with approximately 300 shareholders.

The buyer is privately held Morris Communications of Augusta, Georgia. Morris publishes 12 daily newspapers; Stauffer publishes 32, including afternoon dailies in Blue Springs and Independence, Mo., suburbs in the eastern part of the Kansas City metro area.

The Topeka company was founded by Oscar Stauffer in 1930. WIBW(AM) started May 8, 1927 and was purchased by Capper's Weekly founder Arthur Capper in 1930. WIBW radio and television were purchased by Stauffer in January, 1957. WIBW(AM) at 580 has one of the few share-time arrangements remaining in the United States. WIBW signs off at 12.30 every weekday afternoon so KKSU at Kansas State University in Manhattan can sign on for five hours. The stations do not even use the same transmitting site.

Stauffer also owns KGNC-AM/FM in Amarillo, Texas, and formerly owned stations in Coffeyville, Kansas; Des Moines, Iowa; and Springfield, Missouri.

It also owns Capper's Weekly and Grit magazines, as well as the Kansas City Royals baseball network.

: For a time that CBS West Coast network was actually the Don Lee Broadcasting
: System, made up almost entirely of Don Lee O&Os; it originated some network
: shows of its own, and in effect that *network* was the CBS affiliate in the
: markets where it operated.

Yes, but that was before Don Lee switched affiliation to Mutual in the late 1930s or early 40s. Bill Paley writes in his book that he had to go down to San Diego or LA or wherever and spend 3 days on Don Lee's boat before he'd even consent to considering affiliating with CBS.

Much of the Don Lee network disintegrated. KFRC and KHJ went to RKO General; KDON became KMBY and dropped affiliation; KFBK, KMJ, KBEE, KOH, etc, went to CBS (all McClatchy stations), etc.

Now, there indeed was a Mutual Pacific network, even on until the late 1970s, but nobody wanted the hassle of running it, so it befell KIRO or somebody in Seattle to run it -- COMBO -- for afternoon drive newscasts and such. You could hear cart clunks on air and occasional crosstalk as they'd sometimes forget to pull the patch from the main network.

>From: steve@up.edu (Steve Ward)
>Subject: Digital vs Cart storage (was: Re: Rick Dees and KIIS FM)
>Date: 28 Jul 1994 19:40:26 GMT

Steve indicated that major market stations are slow to come around to digital
because of: 1. High cost of system crash
2. Most large stations have newer analog facilities
3. Many stations taking a middle approach with a mix of
CD's and carts.

That pretty well summarizes the situation at WCBS-FM in NY. I know that
in less than five years this will change because:

1. Our relativly new facility will be 15 years old.

2. No one is designing a next generation of cart decks - you can still buy
International Tapetronics 99's and delta's. Fidelapac, BE and maybe audicord.
Radio Systems stopped making their deck and no manufacturer will make any
further refinements because hard disk storage or a combination of hard disk
and CD juke box will be next.

3. In a large station that is sucessful, changing the technology on the staff
because it represents some savings and offers a host of features that no one
was asking for can cause more trouble that any engineer really wants. If it
aint broke don't fix it. Analog studios are not dead yet.

4. The concept of data base search and music coming from a mysterious device
in the next room (no matter how simple it is to you and me) will not sit well
with some talent. Other talant will welcome it but we can't have it both ways.

5. My company is experimenting with the new technology in the Arrow format
station in Dallas. We have learned much from the experiance and when the
reliability of the hardware (who knew we had to worry about thermal
recalibation of a hard disk drive) and the software reach the kind of
reliability and flexibility a cart offers (one event per containter, you can
hold it in your hand and the label contains alot of information), you will see
it all over the major markets. And I want it in this revision of the
software not the next one. I don't know of many engineers in NY that are not
already studying whats out there and giving thought to how these systems will
be incorporated into our next studio rebuilds. Always remember - make sure
your power system has large neutrals and good grounds.

2939. DES MOINES GROUP SOLD (KGGO, KHKI, KDMI)

Newsgroup: rec.radio.broadcasting
Date: 1994-07-31 02:44:47 UTC
From: "George F. Davison Jr" <gfdjr@delphi.com>
Message-ID: <31f36v$95c@vixen.cso.uiuc.edu>
Source record: 38795

DES MOINES RADIO STATIONS SOLD TO
CALIFORNIA GROUP

American Radio Systems, Inc. of Boston, MA
has sold stations KGG0-FM, KHKI-FM, and KDMI
(AM) to Community Pacific Broadcasting Co. of
Monterey, CA. Sale price was not disclosed in the
"Des Moines Register" article announcing the sale
(article published July 30, 1994). Community Pacific's
president and chief executive office David Benjamin is
quoted by the "Register" as saying that neither the
formats nor management of the stations will change.
Benjamin indicated that the transaction should be closed
within a couple of months.

KGGO-FM (94.9, 100 kW) is an album oriented
rock station that has been among the top rated Des
Moines stations in recent years. In the January-March
ratings, KGGO-FM was in third place.

KHKI-FM (97.3, 110 kW) recently adopted a
country format, known as "Hawkeye Country". For
many years it was independently owned and broadcast
religious programming. It was sold to American Radio
Systems, Inc. in 1993. As an independent, its call was
KDMI-FM.

KDMI (AM) is the former KSO (1460 5 kW
DA-N)(for a short period of time is used the call
KGGO-AM and simulcast KGGO-FM) It assumed the
former KDMI-FM programming when the FM outlet
went country. It has also increased its sports
programming.

What do you mean, exactly, talk shows on the net? I host a talk show that
is carried World-Wide on Shortwave... and I have an email address... which
is given out on the air.

On my visits to Los Angeles, I always went out of my way to listen
to Jim Healy's half-hour sportscasts on KMPC, which were at the time
part of Jim Lange's show. He used to tip in all those crazy sound bites
including Earl Scheib's trademark "Riiiiiiiight!" and some guy
saying "Get to the point, will you Jim?". It was fresh and irreverent'
and very entertaining. There was nothing else like it in radio.

Sorry, Scott, not true.

During the 1950's, WBZ was the NBC affiliate in Boston. Which is to say, ex-NBC Red. I forget who was ABC, but they were down at the bottom of the dial.

NBC went to WEZE when they took over 1230 (about 1959?). During the early sixties, WBZ was part of Westinghouse's own network, I think.

Bill: Does KTTS still have the "Hymn of the Hour"? In the
late 70s, when Great Empire was just starting, and I was
supposedly going to be transferred to Springfield by
my then-employer Stauffer, KTTS had a hymn every hour on the
hour. Having come from small market radio where we had
a 15 minute program of hymns each day, this was not
unreasonable. I just found it "funny" and ironic to be
listening to a country station (all that beer, truck driving
and cheatin' hearts), and then have a Hymn of the Hour.

2952. Radio Watchers -- Central Missouri (7/31/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-08-01 05:33:20 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <31i1f0$jq0@vixen.cso.uiuc.edu>
Source record: 38707

Boonville radio station KWRT(AM) ended up becoming part of a breaking story Friday night (July 29).

KWRT employee Matt Billings stumbled onto a car containing suspects in the nearby shooting of a Missouri Highway Patrol trooper. The trooper, Cpl. Robert Hayes of Boonville, is listed in serious condition at a Columbia hospital. He was shot five times in the chest and right hand during a routine traffic stop on Interstate 70 one mile from the KWRT studios and transmitter.

Billings was working on an update for the story. As he prepared to leave the station to talk to police, he turned the headlights on in his car. Right then, he saw the suspects' maroon Oldsmobile parked on Radio Hill Road with its lights off.

Billings ran back into the station to call police. Authorities surrounded the area around the station and nabbed one suspect. Another suspect was arrested near midnight at a Boonville restaurant, and two more were apprehended at a grain elevator near KWRT.

Four suspects, three men and one woman, were arrested in connection with the shooting. On Saturday, authorities said they were still unsure of the motivation behind the shooting. One suspect has been charged with attempted murder, three others face concealed-weapons charges.

**** **** **** **** **** **** **** **** **** **** **** **** ****

Meantime, KWRT owner (and Matt Billings' father) Dick Billings has revealed his marketing and programming strategy for new station KTLH(FM) at 93.9. The soft-AC station is targeted at the nearby Columbia market. It began broadcasting at 2 a.m. July 15, according to the Columbia Daily Tribune.

Billings told the Tribune that the station will sell time for about half the corresponding rates of other stations. The highest 30-second spot cost on KTLH will be $15; the lowest $9. The Tribune quoted unnamed "those in the industry" as saying "cutting prices can permanently lower the value of what all the stations have to sell."

Billings and Chicago consultant Ford Colley said hot-AC station KARO(FM) at 101.5 will be the station's main competition. Colley told the Tribune, "K102 hasn't had head-on competition for years," ignoring the presence during most of 1992 and 1993 of KKFA(FM) in Jefferson City -- the "Soft Rock Cafe" -- now KTXY(FM), programming a classic-rock/album-rock mix.

Colley told the Tribune he recommended an adult-contemporary format for "Lite FM" because, "if you look at Kansas City, Chicago or St. Louis, the Number One station is AC." This has historically not been true in either Missouri market: the top two Kansas City stations are country followed closely by an urban-contemporary station; the top St. Louis station still is KMOX, closely followed by urban-contemporary

KMJM and heritage rocker KSHE.
The station's music is on a computerized compact-disc system, with 24 CDs being provided by Colley for each week's programming.
The station currently is a class-A (6,000 watt) station broadcasting from a site approximately 15 miles northwest of Columbia, upgradable to class-C3 (25,000 watts). In east-central Columbia, a GE Superadio III could pick up the signal only if the antenna were oriented carefully.
One announcement I heard while stuck in traffic on the Interstate 70 bridge at Rocheport Saturday proudly invited me to "think of us as radio daycare for adults."
Talk about low expectations.
**** **** **** **** **** **** **** **** **** **** **** **** ****
The advent of KTLH at 93.9 spelled the end for an FM translator in east-central Columbia at 93.5 mHz.
K228CR was originally put on the air after easy-listening KARO(FM) changed to an adult-contemporary format in 1986. Columbia locksmith George Thomas was so upset that easy-listening music was no longer available in the Columbia market that he bought transmitting and receiving equipment to relay easy-listening KEZK(FM) from St. Louis. The equipment was located at his house on Paris Road.
Problem was, Columbia is 125 miles or so from St. Louis, meaning FM reception between the cities is not consistent. Listeners to K228CR often were treated to static OR to other, unintended signals at the 93.5 spot on their dials, especially during sporadic E-skip openings!
The translator went off the air in 1990, and re-emerged from an unknown location (and perhaps with new owners; I never found much out) in 1992, relaying Kirksville's Christian-contemporary KLTE(FM). The translator was still on the air July 4.
**** **** **** **** **** **** **** **** **** **** **** **** ****
Other notes from central Missouri:
* AM station KZMO (1420) in California is off the air. Word on the street is that KZMO-FM (94.3) will be sold to the owner of KLIK(AM) and KTXY in Jefferson City and the AM will go silent permanently. The stations were launched in 1984. The FM is upgradable.
* KARO(FM) has discontinued its relay of co-owned KFRU(AM) on 67 kHz SCA, pending an overhaul of the station's audio chain. KBIA(FM) has activated its 92 kHz SCA, relaying the same upbeat background music service (including the Rolling Stones!) as the 67 kHz subcarrier. The audio of the KBIA 67 kHz subcarrier has also improved considerably.
* From St. Louis, modern-rock KPNT(FM) was having a "Reagan Rock Weekend" of all 1980s new-wave hits. The station did not even run its usual top-of-the-hour IDs. And, driving back Sunday afternoon, I heard Jackie McCoy, subject of the St. Louis Post-Dispatch profile excerpted in AIRWAVES, on "K-Hits" (KIHT, 96.3) AND Mark Klose, also profiled, on "The Fox" (WFXB, 101.1). Klose was, as promised, playing progressive rock tunes typical of those offered by KSHE in the 1970s.
* Also from St. Louis, Crawford Broadcasting may not yet have control of daytimer KSTL(AM) at 690. Saturday at 5 pm, I was barely able to pick up the station's 1000-watt signal -- and, as it has every afternoon since

forever, it was playing polkas.

29 KYCY 93.3 Country 1.1 1.7
30 KRTY 95.3 Country 1.0 1.1
31 KSFO 560 Talk 1.0 1.0

Notes:

* There is probably some confusion left between the call swappings
between 107.7 KYLD (used to be KSOL), and 98.9 KSOL.
% BILLBOARD lists the stations as KPIX; the station was still
classical during the spring survey.
$ KFRC AM & FM simulcasts except for baseball programming on the AM.
```

Analysis (all my wn opinions):

No major surprises/changes. KNBR 680 climbs to second place with
a jump of over 1 point over the winter book, probably due to Giants
Baseball. KCBS drops to third. KGO, as usual, takes the top spot. The
top three stations in the Bay Area are all some form of news or talk.
San Francisco's other talk station, KSFO, is at the bottom. However, Cap
Cities/ABC (owners of KGO) are in the process of purchasing KSFO; the
deal will be finalized on September 1st with all operations moving to the
KGO studios.

It's interesting to note that KABL AM (satellite-fed standards) is doing
considerably better than its sister FM (local 70's oldies), with the AM
rating almost twice that of the FM.

>This isn't the same as "AP Network News", is it? I've (in Europe) heard

I don't think so. The AP Network News I am familiar with for a long time
has Top of the Hour (maybe bottom of the hour also) news and in between
sometimes some clips.

I have checked that AP Network News slot on satellite and the format
is exactly the same as what I'm used to for them.

Now, this new "AP NETWORK NEWS" is supposed to be a 24 hour channel.
I don't doubt it at all for that, but I think this one is a full
news service whereas the other one is a top of the hour news-service
only.

I have been looking for the AP Network 24 hour news in analog SCPC
format and have had no luck -- I have a feeling their distribution
for the 24 hr news is digital delivery only.

With my bad luck, I'm looking at affiliates now that may carry it at
night (so at least I can listen in and see what it is all about).

Message-ID: <31i1f9$jra@vixen.cso.uiuc.edu>
Source record: 38711

According to John Dunning in "Tune In Yesterday" (Prentice-Hall, 1976), Cheerio was a man named Charles K. Field, a second cousin to poet Eugene Field. His show was first heard June 22, 1925 on KGO,San Francisco. On March 14, 1927 it moved to NBC, coast to coast. Part of the time he was sponsored by Sonotone hearing aids, but he contributed most of his fees to charity.

He had a 30 minute morning program six days a week. In 1937, he moved to one evening broadcast a week on the Blue network on Sunday nights. The show ended in 1940.

For this type trivia the above book is an excellent reference. It is out of print, but many libraries have it.

Hope this helps,

Bob Crump,
Memphis, Tennessee

What about the use of 3.5inch computer discs?

We now use these for everything. Cheap, easy to get, and
easy to use.
Our machines sample at 22K, 32K, 44.1K and 48K. In Mono or Stereo.

They can also be interfaced with a hard disk for longer items.

The BBC is now broadcasting programmes from HD.

>differences" according to PD Gabe Hobbs. Hobbs says he would prefer an
>"apolitical" talk host for nights on WFLA. Nevertheless, he says that
>Williams was meant to follow in the footsteps of Jay Marvin, whom Hobbs
>described as a "wild-eyed, left-wing hippie radical type."

As a "long time" listener of WFLA in Tampa, I think that WIlliams never had a chance. The Tampa AM talk radio audience tends to be VERY conservative (ever been to the battle of the talk show hosts?). But, while they tend to be conservative, they also like to be entertained. After the move of Lionel to New York and Jay to WLS (hello Jay), we were left with Gardner and Williams in the afternoons/evenings. Both tend to talk about liberal issues. Lionel and Jay were liberal as well but also, IMO, were funny as hell and enjoyable to listen to.

I've been away from Tampa now while here at Clemson. I don't get down South much but when I do I always tune to 970. I'd be interested to know how the various shows are doing in ratings.

2959. A Chapter of the Dark Days of FM

Newsgroup: rec.radio.broadcasting
Date: 1994-08-01 05:33:31 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <31i1fb$jrd@vixen.cso.uiuc.edu>
Source record: 38715

More research over the weekend at the University of Missouri led to the following from 1951.....

KOZY DELETED -- Pioneer FM Station Turns in License

Pioneer FM station KOZY (FM) Kansas City, owned by Evertt L. Dillard's Commercial Radio Equipment Co., was deleted effective Feb. 15., the FCC reported last week. Done at the request of the licensee, the action was motivated by economic reasons, the Commission said.

KOZY, Class B outlet on Channel 251 (98.1 mc) with effective radiated power of 9.7 kw, has been off the air for about a year, ever since the station lost the lease on its site, Mr. Dillard explained last week.

[98.1 is now occupied by KUDL(FM), which is actually licensed to Kansas City, Kansas.]

Mr. Dillard also is licensee of WASH (FM) Washington, another pioneer FM outlet "which will continue from where KOZY left off," he said. Difficulty in supervising KOZY's operation from Washington also was mentioned by Mr. Dillard.

Mr. Dillard was one of the moving forces behind formation of the FM Assn., which now has been merged with NAB. He is an ex-FMA president.

Kansas City now has only one authorized FM station in operation, KCMO-FM, which is a Transit Radio outlet. A Class B station on Channel 235 (94.9 mc), it is owned by KCMO Inc. [NOTE: It's still there, too.]

Mr. Dillard put KOZY on the air in 1942 as K49KC, operating in the former FM "low band" near 50 mc [44.9 mHz]. Much of the know-how used in establishing KOZY as a pioneer FM outlet came from Mr. Dillard's engineering work and experimentation with FM and high frequency AM during the 1930s. Many of his findings are included in the records of FCC's 1938 FM hearing.

WASH (FM) went on the air under regular commercial operation in December 1946. Prior to that Mr. Dillard operated the station experimentally as developmental outlet W3XL.

2960. Gene Baxter's disrespect (was: Re: Kudos to KROQ & KPWR)

Newsgroup: rec.radio.broadcasting
Date: 1994-08-01 05:33:37 UTC
From: UltimaJock@aol.com
Message-ID: <31i1fh$js2@vixen.cso.uiuc.edu>
Source record: 38716

"TRUST ME...I have worked for Gene Baxter (Bean)....it WAS management's decision.... Gene Baxter NEVER had any respect or appreciation for anyone let alone his interns (speaking from experience!)"---John Musselman (jcm@PrimeNet.com) in Airwaves #727

Unfortunately, I can second that opinion, also from personal experience, this time in cyberspace. For the sin of voicing my displeasure with comic Steve Marmel (who was boosting his April KMPC amateur on-air audition on the Prodigy radio bulliten board---did he ever get the weekend shift he auditioned for?), Baxter and Scott Mason took my resume (which I had sent to KROQ two weeks before) and started ridiculing it on Prodigy, adding little malicious lies along the way.
This wasn't the only online character rape I had to put up with while over there, but the sources of the others (most notably Bob Lassiter, whose bagging on me was at least to be expected, considering his on-air shtick) resorted to simple name-calling. (Does anyone know why Prodigy seems to attract more of that type than CompuServe or the Internet?)
But it IS telling that, among all of the morning hosts heard in Southern California, most of the ones who made it to national television (Stern, Dees, Mark & Brian, Morgan, Imus---who am I leaving out?) got there on their legitimate talents. Baxter's only national television appearance to my knowledge has been the UNSOLVED MYSTERIES episode that reported on Kevin and his scummy "I-think-I-killed-my-girlfriend" phone call hoax.

2961. Group W's "Important Announcement"?

Newsgroup: rec.radio.broadcasting
Date: 1994-08-01 05:33:38 UTC
From: dk@crl.com
Message-ID: <31i1fi$js5@vixen.cso.uiuc.edu>
Source record: 38713
Cross-posted to: rec.radio.broadcasting,ba.broadcast

There was going to be an "important announcement" regarding Group W. What kind of announcement came? That Group W TV stations were going to affiliate with CBS? What's big about that? Hmmm...

An "informed source" vacationing in a far-off land offers this scenario: that Group W is buying CBS's O&O stations. Unclear is whether these will be the radio, the TV or both groups.

If this is true it would account for the mysterious announcement that CBS and Group W would work together on "future projects". BUT, if this is true, it could mean *severe* staff layoffs and/or simulcasting of some of their radio operations. Both Group W and CBS operate radio stations which directly compete in New York, Los Angeles, San Francisco, and maybe still Boston. It would make sense from a merger standpoint.

If this means the TV stations, it would give Group W a full complement of TV outlets covering about 25% of the population, if my counting is correct. Either radio or TV, the impact could be enormous.

Again, this is just speculation, but the informed source is trembling because he is afraid he'll be out of a job if he ever gets back from vacation.

April fools joke or not, I can easily see the above lineup on a
satellite network and selling big time in today's America. In fact
if you take away the name-brand acts, but keep the politics, you are
not too far off from what passes as Christian radio in this great
nation.. Lots of hate, insensitivity and self-rightous pioty (is that
a word?).

I am no holy roller, but if the real Jesus came back today, he might
want to have a word with these so-called Christians, that is if he
woulkd even recognize them. But not to worry, they only operate
hundreds of powerful radio stations and pay no taxes what-so-ever...

But back to the matter at hand..
} Hoiw can they do this in the 1990s? Wouldn't advertisers refuse to be on
} a station that did this? I could imagine a country competitor coming in
} and, even with a bad format, wiping out this station every time they
} attempted to "inspire."

Great Empire's KTTS FM is BY FAR the runaway market leader down here.
We have LOTS of country (in fact we have Both kinds of music here...
Country AND western) but KTTS dominates. Primarily due to an
overwealmingly powerful news and public affairs commitment. My hats
off to KTTS for that. They are truly a 100,000 watt community service
station.

} Somebody reply. Explain this to me.

I just did. If Terry Knab is listening, perhaps he would llike to add
something.

From: PGEORGE@wellesley.edu
Message-ID: <31i1fr$jth@vixen.cso.uiuc.edu>
Source record: 38719

Hi Bill:
I have just got off the phone with one of the control operators of International Broadcasting Station KGEI in San Francisico. It is official that as of Monday morning August 1, 1994 at 0400 (EDT), KGEI will leave the air. However, they did say that the license will still be valid for the time being and the frequencies 15280 and 9615 will still be in force to "Far East Broadcasting" for the next 6 months. It might be a good idea to get in touch with the General Manager to let them know that there are people who are interested in this station. They do have Internet facilities but they did not disclose their e-mail address as they were had pressed for time (for obvious reasons). They will still have people at the station for several weeks for business purposes and whatnot. They did assure me that any QSL requests will be welcomed and will be responded to. It might be a good idea to try to get the e-mail address to the readers of Airwaves Journal and may be the people at KGEI might be interested in sampling the Journal. There may a chance that KGEI might come back down the road. I do think that the station is open for ideas or maybe available for sale. I hope that what I heard at 6:00 pm Sunday night was not the end of KGEI forever. See you soon.

Pete

2965. Low Power Transmitter Kit Sources FAQ

Newsgroup: rec.radio.broadcasting
Date: 1994-08-01 05:33:47 UTC
From: hrick@world.std.com
Message-ID: <31i1fr$jti@vixen.cso.uiuc.edu>
Source record: 38720
Cross-posted to: alt.radio.pirate,rec.radio.broadcasting

Here is a brief list of companies selling low power transmitter kits. Please send me information about any companies not listed, so that I can include them in future versions of this list.

Note to newcomers: to assemble these kits, you must be able to solder components onto a circuit board, and it helps if you know the difference between a resistor and a capacitor. If you haven't reached this stage of electronic know-how yet, consider buying some of the educational kits available from C&S Sales, 1245 Rosewood, Deerfield IL 60015, telephone 800-292-7711. Their electronic components course (item #ECK-10, $14.95) might be especially helpful to newbies.

When assembling radio circuit kits, I prefer to use narrow-diameter silver-bearing solder (Radio Shack #64-013) and a 15 watt soldering iron (64-2051). You may need a more powerful soldering tool for making antennas out of large-diameter wire, soldering really large connectors to a printed circuit board, etc., but the 15 W iron works fine for most kits and reduces the chances of over-heating transistors and other heat-sensitive components.

Ramsey Electronics
793 Canning Pkwy
Victor NY 14564
phone 716-924-4560

The FM-10A is an FM stereo transmitter kit ($34.95 plus shipping) with a few milliwatts of output power; it is based on the BA1404 integrated circuit.

Ramsey kits have well-written instruction manuals, and most of the circuit boards have lots of wide-open space which makes modifications easy. The company also has a good reputation for service. These factors make Ramsey kits a good choice for beginners, in my opinion.

Their AM transmitter kit (item #AM-1, $29.95) and their TV transmitter kit (item #TV-6, $27.95) might also be of interest; however, there is much room for improvement in the design of these two circuits.

DC Electronics
P O Box 3203
Scottsdale AZ 85271

The Improved Stereocaster is another FM stereo transmitter based on the BA1404 chip with a few milliwatts of output power ($29.95 plus $3.50 S&H). It has a smooth fine-tuning control which makes it easy to get on the exact frequency you want, and a voltage regulator for the BA1404 which improves stability. Documentation is not quite as lucid as Ramsey's.

Panaxis Productions
P O Box 130
Paradise CA 95967-0130
(Catalog $1)

This company offers many interesting books and kits. The REB-1 kit is a 100 milliwatt transmitter for the upper end of the AM band ($34.95 plus shipping). The FMO kit ($75) is a high fidelity stereo FM transmitter kit with 2 to 20 milliwatts of output power. The FME-500, a half-watt mono FM transmitter with excellent technical characteristics, can be combined with their stereo generator to build a high-quality low power station (> $200 for the two kits).

Other items of interest include transmitters for the 1750 meter band; a 1-watt shortwave transmitter kit; and more powerful FM transmitters (available only for export to countries other than the USA).

Panaxis kits might not be suitable for absolute beginners; you should have a little experience in circuit assembly before you tackle these.

Supercircuits
13552 Research Blvd
Austin TX 78750

This company sells a low-power TV transmitter for channels 3 thru 6 which appears to be of high quality ($49.95 plus $4.50 S & H). For licensed radio amateurs, they also sell some ham TV transmitter kits with 1 to 2 watts peak output power that can be adapted for use on UHF channels 14 thru 19, and a linear amp for boosting the output of these transmitters.

Free Radio Berkeley
1442 A Walnut St., #406
Berkeley, CA 94709

Items listed in their advertisements include a 5 watt mono FM transmitter kit ($55 plus shipping), a 1/2 to 1 watt stereo FM transmitter kit ($50), plus kits for output filters, dummy loads, RF amplifiers, and antennas.

Some people who ordered kits from FRB have reported that they've waited a long time before receiving their kits. Others have said they had no problems when dealing with FRB.

FRB is spear-heading a movement to challenge the FCC's regulations and is trying to foster a low power broadcasting movement. Contact them for more info. (Internet: frbspd@crl.com)

Xandi Electronics
Box 25647
Tempe AZ 85285
phone 800-336-7389 / 602-894-0992
ok
The XFS108 kit ($41.95) is an FM stereo transmitter, probably based on the BA1404. Their advertisements give no specifics.

Tentronix
3605 Broken Arrow
Coeur d'Alene ID 83814
phone 208-664-2312

Another BA1404-based FM stereo transmitter kit ($24).

/end/

You are correct. Jack Mullins was in the US Signal Corp, stationed in England. He kept hearing strange things on German radio, like full orchestras at 3am and live broadcasts of Hitler's speeches from one city when Allied intelligence was telling them Hitler was elsewhere. In those days, it was easy to tell live from transcriptions because of the significant quality difference. When the Allies invaded Germany, Mullins "discovered" the tape recorder that had been developed by German engineers during the war. He shipped two machines back to the states, got a small radar-motor manufacturer (Ampex) interested in building copies, got financing from Bing Crosby (who also bought early machines) and the rest is history. Mullins later went to work for 3M.

The German Magnetophone machines recorded on steel tape. I presume that it was Ampex and 3M that developed the concept of iron oxide on plastic. Ampex and Bing Crosby Enterprises had a close business relationship for many years, with Crosby appearing in ads for the machines.

>(extra credit if you can name the round robin circuit names for either >or both...)

I was the last new guy hired at the old ABC radio network studios on W66St, just days before they moved to 1926 Broadway. Spent several years in the '70's at master control at 1926. I haven't thought of those circuit names in many years, but I sure should remember them (especially the loop from NYC to Chicago to Wash DC and back to NY.) I do remember "NR" the NYC ATT control point we had to call when there was a problem. The stock answer we'd give the news director when there was a problem was "trouble west of Denver".

Even as late as the '70's, many of the file cabinets at ABC had "Blue Network" labels on 'em. And even in the 70's it was frustrating in that although we were doing 4 newscasts an hour, we knew many many stations were just taking the commercials and not using the news at all. Just like today. In those days, there was not only an engineer and the newscaster, but also a "director". (And some of those directors were absolutely charming people who had wonderful stories to tell about the heydays of network radio.) Today it's all one man combo.

JOE SHAPIRO, NYC.

You are correct. The Germans invented wire recording for exactly that reason. Shortly after the war, Bing Crosby Productions picked up on the technology and extended it to tape. That is why I used the word "developed" rather than "invented" when talking about Der Bingle.

Take care...

As I'm sure others will mention, the first tape recorders in the US were "liberated" from Germany. The original Ampex 200 was copied, er, derived from these machines.

The first maodern tape recorder was indeed invented by the Germans. I have a copy of what claims to be "the first musically important tape recording ever made," by BASF on November 19, 1939. It's the London Philharmonic conducted by Sir Thomas Beecham doing a movement of a Mozart symphony.

The tape recorder found its way into German radio stations in 1938. When the American forces occupied Germany in 1944-45, several of the German Magnetophones were shipped back to America. The first Ampexes were copies of the German machines.

Bing Crosby comes into the story in 1947, when he convinced ABC to buy 12 Ampexes (for $5,200 each). It's my understanding that Crosby was an investor in Ampex.

The program "Ask the Professor" is indeed still around and is syndicated
to some forty or so stations. It emanates from what is now called
The University of Detroit Mercy (Merge between UD and Mercy College).
The show is as interesting and funny as anything on radio. The moderator,
Edwin DeWindt (sp??) and the varying panel members have enormous fun with
the questions sent in from around the country. I keep hoping to see or hear
them tell us of an email address for questions!
Remember, IF you stump the panel, you win-- an autographed photograph,
a photographed autograph, AND a Bumper Sticker!

I believe their mail address is:
Ask The Professor
University of Detroit Mercy
3500 Puritan
Detroit, MI 48235

The show airs in Detroit on Sunday morning on WNIC 100.3 FM at 7am
and at 7pm Mondays and 1pm Fridays on the Detroit Public Schools station
WDTR FM 90.9.

From: topolski@orange.digex.net
Message-ID: <31i1gc$k2i@vixen.cso.uiuc.edu>
Source record: 38727

Two great books about Rush Limbaugh, "Talent on Loan from God" and "Rush," were both written by two different journalists who weren't particularly pro-Limbaugh. Both detail the rises and falls of his radio career, from high school to present day. Required reading.

An act? It's not an act. Both of these books testify to that fact. Rush is being Rush: a conservative in a line of many conservatives in the Limbaugh family.

And I guess that's what hot about Limbaugh. He is himself, without apology. He doesn't try to live to the standards of others. His show is about what he thinks. (Almost) no guests. No topics, other than the events (plural) driving the day.

Is Limbaugh slipping? You program directors and ad-reps tell me. And is it Limbaugh slipping, or the quality of talk-radio alternatives improving, or more conservative talk-radio hosts on the scene (we know this is true), or are people just shying away from talk radio? I don't know the numbers, you do.

But I'll tell you this. As someone who has been listening since just before the '92 election, I've seen my interest wane and strengthen from time to time, occasionally listening to CD's, music radio, watching TV, or other diversions -- but he's been my number 1 favorite talk-show host all along.

>that all the music is the same, all the jingles come from the same package,

Ugh, I agree with all of the above. It also gets on my nerves when you hear the SAME voice-over (usually a man) in all these cities. It gets so annoying and is a matter of lack-of-imagination as far as I'm concerned. It kind of gives the impression that there are only 10 or so real formats in this country with so many different ways of doing them.... and thay all exist in at least 400 markets, all sounding the same.

A pity.

2974. Syndication Costs

Newsgroup: rec.radio.broadcasting
Date: 1994-08-01 05:34:05 UTC

Just curious, but I noted that a local station here, (CFRA-Ottawa) just dropped the Larry King show.

I then got to wondering what a local station pays to get a syndicated show like Larry King, or any other show for that matter.

Regards.

Mike

A general request... Could someone post the Spring Las vegas 25-54 or 12+ numbers when they're available?

I noticed that in Spokane, my station's sister stations (KKZX-FM - Classic Rock, and KEYF-FM, Oldies) came in Numbers One and Two in Men 25-54; 1 and 4 12+ in their best combined book ever. Here in the Tri-Cities, we're expecting advance numbers Tuesday 8/2 and the whole book (thin as it is in this market) by Friday 8/5 - I'll post when I get.

Thanks,

Kevin Cole

2976. WANTED: PROGRAMMING WIZARD

Newsgroup: rec.radio.broadcasting
Date: 1994-08-01 05:34:12 UTC
From: cameron@netcom.com
Message-ID: <31i1gk$k37@vixen.cso.uiuc.edu>
Source record: 38731

OH PROGRAMMING WIZARD:

We have developed a kickass national program distribution system. It makes it possible for consumers living in any part of the US to receive access to a wide range of popular programming that they presently cannot get access to...for a fee.

Over the past two years, our company has acquired the exclusive right to redistribute some *extremely* popular programming. The long and short if it is, we have designed the distribution system, secured distribution rights, and organized a group of "talented individuals" to pursue the full scale development of this project, and now we need an expert to oversee the programming subsidiary.

I am looking for an individual who is excited by the opportunity of being involved in building a "next generation" program distribution system. This is something all the big boys are talking about...but have not quite figured out how to create a market for...yet. We will give them something else to talk about...and possibly buy...in a few years.

The individual we are looking for will: (1) quickly grasp scope of this project and recognize the implications of being first to market, (2) look forward to competing with the big boys, (3) maintain contacts in the broadcast industry, (4) have enough money to live on, (5) be willing to work part-time initially and over the next ninety days move into a full-time mode, (6) but most importantly, you will have a burning desire to build an alternative program distribution system...because you have an inner belief that the way mass media works today...sucks... TOTALLY.

I know you are out there, you have been thinking these thoughts for a long time, what are you waiting for?...send us an email...let's talk.

If you are this person, or you know him/her, please advise.

If we hire the person you bring to our attention, you will be paid a finders fee equal.

Best regards,

-Chris

From: nhmas@gauss.med.harvard.edu
Message-ID: <31mnds$mc1@vixen.cso.uiuc.edu>
Source record: 38748

* Scott's first-rate report on a potential WEEI-WHDH swap makes way too much sense for it not to be true....

I just want to add a thing or two. According to published reports : American Radio Systems is now selling all the ad-time for SportsRadio WEEI AM 590. That even includes all upcoming Bruins' broadcasts on 'EEI this coming season(next year the B's will skate on WBZ AM 1030). The connection between American Radio Systems(WHDH-AM,WRKO-AM, WBMX-FM, and WCGY-FM) and BayBackBroadcasting(WEEI-AM) does indeed exist. On the ownership level? It certainly smells that way..:-)

* WCRB's PD John Dodge is leaving the only 24-hr commercial Classical station in #9 market to become a PD for Children's Media Network in Seatle. Dodge was with Classical WCRB-102.5FM for the past 2 years. The search for a permamnent replacement is underway.

* All Boston rock stations(WBCN,WZLX, WCGY and WAAF) are caught up in the overhyped, made-for-MTV Woodstock '94 scam. AOR WAAF 107.3FM will broadcast most of the concert. CR WZLX-FM will offer the WestwoodOne 25-year anniversary special with performances from the original show. AOR WBCN-104.1 is sending some of its DJs and management types to broadcast live from a nearby 27-acre site acquired by Infinity for its stations providing live remotes from the show. AOR WCGY 93.7FM, as well as above mentioned outlets, is having a big promotional Woodstock '94 ticket giveaway....

* Since it's summer and things are kind of slow in the Boston radioland, here's little something for Boston and non-Boston radio listeners who want have a laugh or two. This is part of the Boston Phoenix article called 'What's my demo?' which appeared December '92 and describes how to choose the radio format that matches your lifestyle. It only sampled 5 major commercial FM in the Boston market :

"....Based on a semi-scientific sampling of airplay and drive-time advertisement, this who you are.

WZOU-94.5(now Churban WJMN; then CHR/dance) - Admit it. You like Michael Bolton. You voted yes on Question 3. You drink Ocean Spray Cran Strawberry juice and listen to people whose names sound like juice - High 5, Snap and Shanice - as well as old standbys like George Michael, Janet Jackson and INXS. You're mainstream kinda customer who watches Star Trek

WZLX-100.7FM CR. Classic rock fans - each and every one of you in the market for cars, car protection, car parts and anything even marginally related to automobiles. You voted no on Question 3, watch the news

on Channel 5(WCVB-TV;ABC) and shop at Jordan Marsh. You're graying-at-the-templess, Lou Reed/Fleetwood Mac/Eric Clapton kinda customer who watches Star Trek

WBCN-104.1FM AOR. Favorite station of hearty, beer-swilling sports enthusiasts who remember Led Zeppelin concerts. You watch news on CNN and chat on NYNEX cellular phones. When someone someone says "BTO", you think of a band instead of a sandwich. You wear sweatshirts and baseball caps and are game for little nutritional slumming at Denny's or McDonald's. Fans of Rolling Rock, the Rolling Stones and Star Trek. (Four months after this article was printed, WBCN added Howard Stern Morning Show to its weeknight schedule. Current 'BCN night-time audience was probably not old enough to attend any of Led Zeppelin concerts :-)

WXKS-107.9FM CHR('KISS 108'). Light beer and pantyhose customers, you are 60% female and 40% male. You keep track of 'free money' songs and eat an occasional Steak in the Neighborhood(restaurant lounge at the Sheraton Hotel in BackBay section of Boston). You listen to hip-hop sex ballads by medium tempo musicians whose fashion tatstes tend toward lame'. KISS's famous 12 songs in a row are on the radio while you drive your Suzuki to the Star Trek convention.

WFNX-101.7FM AP. Surprise! You read the Boston Phoenix. You drink bottled water and buy imported cars and lots of black clothing with the American Express Card, which has recently replaced the Coop(local dept. store) card as your favorite piece of plastic.(bills go to your house now instead of the parents). Your musical memory might not extend much further back than new wave, so Billy Idol is considred vintage music. Congratulations -- you're the only demographic that isn't targeted by Star Trek....."

++
Monterey Bay, California, RadioWatch

KSCO-am1080, Santa Cruz 10K talker, entered the syndication sweeps 7/31 with the satellite premiere of Radionet. Michael Zwerling(owner ZBS and KSCO PD) helmed the two-hour block which promised to"marry talkradio with the Internet... This program will NOT be another computer show--there's a million of them already..."

A variety of intermittently identified voices, lack of structure, and a lack of script, teases that failed to produce segments, contributed to listener confusion. Equally mindblowing were the constant l950's musical jingles promising "KSCO, the sound of beautiful music." One caller asked "what is this show about?"

Explanation of internet features were boring, long-winded, confusing and alienating.

The spread of the computer platform,coupled with access to internet and relatively cheap satellite pricing has made an ideal door for ambitious small-market operators to go national. All that this owner needed was enough money to reach the bar. Will other owners bite? Will KSCO get carriage. Stay Tuned!

KUSP-fM 88.9(NPR) undergoing more change. The board recently appointed Peter Troxell(former development director) to GM, replacing the previously fired(for cause)Marcia Kraus. The station has experienced lagging revenues(funds and sales down)and there are allegations that sales staff had overdrawn their accounts.

Troxell says the long-empty PD position will be filled(air quality has deteriorated in recent years.) Recently departed Carrie Kahn(to San Diego)created an opportunity for station engineer Don Mussel's wife to host PM drive time. Rachel Goodman is known for publishing Citizens for Public Radio.

CHARLEY LANGE (well-known KUSP blues monster) to become the Musicologist-Historian for Harvard Business School funded House of Blues chain. Lange will headup a forum on Compuserve and operate his own Internet site from his home. Internet addresses to follow.

> Could anyone please tell me where I could obtain addresses of American radio
> stations, particularly in PA and TX? Is there an FAQ on this sort of thing?

While looking for information on the television stations in my area, I came accross a publication which has exactly what you want. It's the "Gale Directory of Publications and Broadcast Media". It's intended for people who want to buy advertising space in any kind of publication, Radio, TV or Cable.

It's organized by State, and within the state it's alphabetical. Radio and TV stations are listed by their call sign, so you have to go through the listing to look for them (there is a summary at the beginning of each state, so you can tell if you missed any).

From the Radio/TV standpoint information is a bit limited: the call sign, the frequency (radio) or channel (tv), the street address of the business office, the nearest large market served, some information on ad rates (if they accept ads), and in the case of radio stations only, their power. No transmitter locations.

Since you were looking for addresses, it has everything you want. For the rest of us, it's information is a bit limited, but it may well be the most complete listing of U.S. and Canadian stations since the demise of White's Radio Log.

>>>> One Europe - Many Voices >>>> Une Europe - Voix Multiples >>>>
>>>> Una Europe - Muchas Voces >>>> Ein Europa - viele Stimmen >>>>

The AMARC Pan-European Conference of Community Radio Broadcasters

Ljubljana, Slovenia 15 - 18 September 1994

An invitation to be a founding member of AMARC-Europe and to join an international network of community radio broadcasters

One Europe

As Europe comes together community radio broadcasters face new challenges and new opportunities. Concentration of media ownership, new technology and regulatory change are just some of the reasons why community based radio broadcasters need to co-operate. The Ljubljana conference will provide an opportunity for community radio broadcasters to reflect and respond to the new media landscape.

Many Voices

There are over 1500 community radios in Europe today involving over 50,000 staff and volunteers, and providing an independent and alternative voice to the big media corporations. At the first pan-European conference of the World Association of Community Radio Broadcasters between 150 and 200 participants from local community radios in 26 European countries will gather in Ljubljana to launch a network of European co-operation and mutual support.

Democracy and Access to Communication

The conference theme, Democracy and Access to Communication, will address the key issues in Europe today and the role which community and participatory radio can play. The event will be workshop based with the objective of formulating concrete resolutions and proposals and sharing practical skills and experience.

Conference topics

- New sound broadcasting technologies - implications for local and community radio
- A third sector of radio - the European Community Radio Charter
- The pluralism debate - community radio as an alternative to media concentration
- Voices against intolerance - radio as a tool to confront racism and xenophobia
- Is radio training necessary - the place of training in community radio

- Rights of authors and publishers - is the framework fair to local and community radio
- Programme exchange and news networking - practical initiatives for community radio
- Inter-regional co-operation and solidarity in the world-wide community radio movement
- Electronic networks for international co-operation, news and programme exchange
- Fund-raising for community radio - some successful strategies
- Influencing broadcast law and regulation - legal models and lobbying strategies
- Innovation in programming -changing the sound of radio broadcasting
- The role of community radio in situations of conflict and change.

A new European network

Pan-European co-operation is already underway. AMARC has established a Working Group of community radio broadcasters from thirteen European countries and has assisted with practical projects for co-operation in training, programme exchange and representation. AMARC is also a window on the world for European community radio broadcasters with strong links in Africa, Latin America, Asia, Oceania and North America. The next AMARC World Conference will take place in Senegal in January 1995. AMARC-Europe will:

- represent the community radio sector to European institutions;
- monitor developments in regulation, funding and technology;
- inform members on these and other issues of concern to the sector;
- institute and co-ordinate training on a pan-European basis;
- develop programme co-productions by community radios across Europe;
- assist community radios in Eastern Europe and the developing world

AMARC-Europe will be launched in Ljubljana. Its members will be community radios, associations and production groups. Join us in Ljubljana and be in at the start of a new European initiative for the community radio sector.

Local arrangements

The conference is hosted jointly by the Open Society Fund -Slovenia, the Slovenian Association of Local Radios and Radio Student Ljubljana. The conference will take place at the Cankarjev Dom Cultural and Congress Centre in Ljubljana, Slovenia. A range of accommodation options are available nearby and may be booked at the time of registration. Ljubljana has an international airport and international train station which are well located for travel from East, Central and Western Europe. Visas are required for some countries. Please contact the Open Society Fund - Slovenia if you require assistance in obtaining a visa for Slovenia. Subject to demand, simultaneous interpretation will be available in English, French, German and Russian for the main plenary sessions of the conference.

Registration

Bookings for the conference must be made on the official registration form and sent with payment in advance to the AMARC-Europe Secretariat in Sheffield. The conference fees are sterling 55.00 for members of AMARC and sterling 70.00 for non-members excluding accommodation. Membership affiliation to AMARC may be made at the time of booking. Payments should be made in pounds sterling by eurocheque or international money order. Payment may also be made by international bank transfer to AMARC-Europe, Account No 5005 1672, Bank Sort Code 08-90-33, Co-operative Bank, Islington High Street, London - UK.

Further information

Further information about the conference and registration is available from: AMARC-Europe, 15 Paternoster Row, Sheffield S1 2BX - UK Tel: +44 742 795219 Fax: +44 742 798976 Internet: cra@gn.apc.org

In a previous article, jcallamanno@delphi.com () says:

>Daniel Shields <ar577@freenet.carleton.ca> writes:
>
>>Excuse my ignorance, but, I would like to know what radio stations
>>Alan Colmes is on and, if possible, when he is on.
>>
>>Thanx.
>
>I hear him on WCOL-AM in Columbus ,Ohio. The show is syndicated and
>originates in New York. I Think the network is called "Talk Radio" but I
>could be wrong there.
> Jack

To answer the two:

1. The network Alan's on is known as Major Talk;before that,it was
called Daynet. It is based in NYC,at ABC's main headend(i.e.where the
network newscasts are sent out from-which was recently mentioned here).
2. As far as Dan's request goes:
-In western N.Y.,he's on WYSL(1030 AM;Avon-near Rochester)from 3-5pm
(or until signoff).
-Lockport's WLVL(1340 AM)carries the first hour Tues.-Fri. only.
-For about 5 months last year,he was on WWKB-AM in Buffalo.

Besides that,Alan is probably the most computer-active person around.
He has accounts on AOL,CompuServe,Prodigy and two NYC services,Panix and Echo.
I have his E-mail addresses if anyone wants them. (BTW,I think I'm
beating Alan in terms of how many accounts one has-I'm at 12 & counting. :))

I would like to disagree. While it is true that CD's still have their share of problems for music.... several major market stations have already moved to Hard-Disk, PC based storage systems for playback and storage of all recored non-music material.

One of the best exapmples is the 13 station "Paxson Group" in Florida. Walk into one of their stations, including WLVE in Miami, and you will find it difficult to find a cartridge tape machine.

I routinely visit about 50 stations a year in my job, and systems like those from Computer Concepts are proving their reliability day after day.

There are "cart" machines available that use 3.5" floppies. At first glance this sounds like a good idea. The disks are smaller than carts, easier to store, don't jam like carts and can be dropped on the floor many times.

Having used 3.5" disks extensively as boot disks on Novell network workstations, I'm not sure either the disks or drives are rugged enough for daily use in an on-air studio. I cannot imagine a floppy drive lasting very long with jocks ramming disks into it as they are wont to do with carts. Floppy disk heads get dirty as do tape heads; they can also get misaligned.

My experience with hard disks is they stay aligned and they don't get dirty. Eventually they crash, of course; if you use hard drives back them up regularly!

I back up WCRB's entire commercial inventory to Bernoulli disks once a week.

Hi Stacy!
I have seen this quote from the Tribune floating around here for days. Gabe Hobbs knew very well that Williams was nothing like me. I mean this guy wrote a romance novel for god's sake, and his numbers where never what mine were. Now here's the inside story about last summer. When things went sour in Milwaukee at WTMJ I made a bee-line to Tampa to talk to WFLA. Williams was in trouble at that time with bad numbers. I would have gone back I was so beatin' down from the whole Milwaukee thing. But no, they hung on to him which is to their credit. They gave him every chance. And I ended up at WLS. I hope they find someone good to put on the night shift there. WFLA is a great place to work!

>
>An "informed source" vacationing in a far-off land offers this scenario:
>that Group W is buying CBS's O&O stations. Unclear is whether these will
>be the radio, the TV or both groups.

I work for the CBS O&O station WGMP in Philadelphia, where employees at our sister station WOGL-Fm and TV station WCAU-Channel 10 have all been very nervous about the goings on between Westinghouse and CBS.

The general concenus (especially since CBS cancelled recent contract negotiations with AFTRA) is that the stations are ALL about to be sold. It's not clear whether FOX would be taking over WCAU, but it's more than likely, and since FOX already has a news coperation in Philly, it doesn't need the massive operation WCAU has. As the radio stations, one theory is that the sister radio stations will be given to Westinghouse so CBS can keep WCAU as an O&O instead of selling it like it's required now to do.

It's a mess. I think business in general is going to Hell. That's why I'm looking to get out. I just don't see how it can get better when the almighty dollar rules over all (when it didn't really used to be that way).

Program Notes
English Language Service, HCJB, Quito, Ecuador

September-October 1994
Vol. VI, No. 5

NEWS & NOTES: Big changes are underway in the English Language Service of HCJB. As of the first Sunday in September we are modifying our schedule to bring you a wider variety of programs, some new, and some old ones but at a better listening time in your part of the world.
As we add and change programming, we want to hear from you. Are our broadcast times convenient? What do you think of the programs? Are the frequencies clear? Please let us know what you think.
Computer users: You can access our FTP file server to download program schedules and other information from the English Language Service. FTP file server address: nw311.hcjb.com.ec. Logon as anonymous. Use your internet address for your password.

All days are local days, as opposed to UTC days. This distinction applies only in North America.

M O N D A Y - F R I D A Y
STUDIO 9--Beautiful Andean music, colorful cultures and captivating people are all in our sights. Travel to the Caribbean, the Amazon or the Andes without leaving your favorite chair. Join Curt Cole and Ralph Kurtenbach as they open a shortwave window to the world. Tuesdays feature the series, "Mystery of Mysteries", weighing the evidence for evolution and creation. Heard Monday through Friday at 7:30 and 17:00 to Europe, 10:00 to the South Pacific, and 17:00, 1:00 and 5:00 in the Americas

MORNING IN THE MOUNTAINS (to the Americas only)--A pleasant way to begin your day, Morning in the Mountains combines music, sports, news and inspiration with host Allen Graham and newsman Leonard Kinzel. Tuesdays include the science feature, "Towards Tomorrow." A new Saturday release of this program also begins in September with hostess Karen Schmidt (see Saturday listing). Monday - Friday at 12:00 and 16:00 UTC plus Saturday at 13:30 and 16:00 UTC.

NIGHTSOUNDS--Beautiful Christian music and thoughtful words from Bill Pearce. End your day in a relaxing way as we beam to you

from high in the Andes Mountains. To Europe at 19:30, the South Pacific at 11:00 and the Americas at 4:30 UTC.

FOCUS ON THE FAMILY--Dr. James Dobson's popular program focusing on family issues and social concerns is now heard each weekday evening at 00:30 in the Americas, as well as weekdays at 13:30 and 20:00 UTC.

S U N D A Y
SALUDOS AMIGOS--Now it its 10th year, HCJB's international friendship program continues to foster friendships throughout the world. Just recently, a couple were married who met--you guessed it--as pen pals on Saludos Amigos! Join the fun as Ken MacHarg reads your letters and offers friendship every Sunday. We can't promise anyone will meet their mate this way, but who knows? Heard every Sunday at 7:30 and 17:00 to Europe, 10:00 to the South Pacific, and 17:00, 1:00 and 5:00 UTC in the Americas.

MOUNTAIN MEDITATIONS--A half-hour that calls listeners to think on specific subjects from God's Word, the Bible. Hosts include Ron Cline, Abe Van der Puy, Ben Cummings and Jim Allen. Broadcast Sunday at 19:00 to Europe, 8:30 to the South Pacific, and 19:00 and 00:30 to the Americas.

HCJB TODAY--A new format has comes to this weekly visit with HCJB staff. Continue to expect interesting and informative interviews with the people who work at HCJB, from engineers to medical people to photographers. News headlines will now be cover 4 1/2 minutes of what's been happening in HCJB and around Ecuador, with greater emphasis on Ecuadorian news. Now heard at 2:30 in the Americas, 7:00 Monday to Europe and 8:30 Monday in the South Pacific.

M O N D A Y
YOU SHOULD KNOW (formerly INTROSPECT)--This revamped program goes another step beyond the issues we've been covering on Introspect. Each week we'll look inside and beyond the headlines from all around the globe. Sometimes amusing, sometimes hard-hitting, always something YOU SHOULD KNOW, with host Len Kinzel. Follows STUDIO 9.

MASTER CONTROL--This lively magazine starts this September with features on a variety of current topics, lifestyle issues and Christian themes. Learn how to fight fair in a marriage, or how to sell cookies nation wide! Broadcast at 18:00 to Europe, 9:30 to the South Pacific, and 18:00, 2:00 and 6:00 to the Americas.

SOUNDS OF JOY--Bob Carlson is up front with the sounds of today's Contemporary Christian music, now on HCJB three days a week. Broadcast Monday and Wednesday to Europe at 18:30, the South Pacific at 9:00 and to the Americas at 18:30, 2:30 and 6:30 UTC. Also Saturday to the South Pacific at 8:30 and to the

Americas at 2:00.

T U E S D A Y
EL MUNDO FUTURO--The future world of science and technology with the latest in health and medicine, astronomy, computers and other areas of interest, hosted by Allen Graham. Regular features include "Men of Science, Men of Faith" and the weird and wacky on "Imagine That!" Follows STUDIO 9.

UNSHACKLED--Radio's longest running drama telling true stories of people who turned their lives around through Jesus Christ. Tuesday and Thursday at 18:00 to Europe, 9:30 to the South Pacific, and 18:00, 2:00 and 6:00 to the Americas.

BLUES, RAGS AND ALL THAT JAZZ--Cited by "Passport to World Band Radio" as one of the ten best programs on shortwave, this weekly venture into good music moves to prime time in your area. Produced by HCJB's British studios, the program is heard at 18:30 to Europe, 9:00 to the South Pacific, and 18:30, 2:30 and 6:30 in the Americas.

W E D N E S D A Y
THE LATEST CATCH--Rich McVicar brings you a mid-week update on the latest DX-tuning tips from DXers around the world. Heard at 7:00 and 18:00 to Europe, 9:30 in the South Pacific, as well as 18:00, 2:00 and 6:00 in the Americas.

THE BOOK NOOK--A new book-reading program is coming your way hosted by Marita Regier. Tune in each Wednesday right after THE LATEST CATCH.

HAM RADIO TODAY--Host John Beck makes the most of your radio hobby every Wednesday following STUDIO 9.
Oct. 5: Station logs; medium wave characteristics; antenna parasitic systems; a backward look at radar.
Oct. 12: VOMs; VHF characteristics; discone antennas; a backward glance at Michael Faraday.
Oct. 19: Maritime distress feature; transequatorial mode of propagation; traps; backward look at Marconi and the Cold War.
Oct. 26: Q-codes; scatter type propagation; longwire antennas; backward glance at Loren Windom W8GZ.

SOUNDS OF JOY--See Monday's listing.

T H U R S D A Y
WHAT'S COOKING IN THE ANDES?--Karen Schmidt escorts you on a tour of the kitchens and cultures of Latin America. Regular features include spices and herbs and Food News That You Can Use. Follows STUDIO 9.
Sept. 1: Visit with a local cook who specializes in Mediterranean cuisine, complete with recipes you can try.
Sept. 8: Learn historical, nutritional and cooking tips about the Latin native, the pumpkin.

Sept. 15: A tour of some Ecuadorian bakeries.
Sept. 29: Karen peruses the food of Guatemala and interviews a Guatemalan cook.

UNSHACKLED--See Tuesday's listing.

WOMAN TO WOMAN--What issues affect today's woman? Tune in each week for this interesting focus on topics of concern. 18:30 to Europe, 9:00 to the South Pacific, and 18:30, 2:30 and 6:30 to the Americas.

F R I D A Y
MUSICA DEL ECUADOR--Traditional Ecuadorian music and new recordings of Latin American highlights. Follows STUDIO 9.

ON-LINE--Produced in our U.K. studios, On-Line is a mix of music and features focusing on Europe. Tune in at 7:00 and 18:00 to Europe, 9:30 to the South Pacific, and 18:00, 2:00 and 6:00 in the Americas.

ON TRACK--Good Contemporary Christian Music and helpful thoughts. 18:30 to Europe, 9:00 to the South Pacific as well as 18:30, 2:30 and 6:30 to the Americas.

ODYSSEY--A drama intended for children but with a large adult following. 19:00 to Europe, 19:00, and 3:30 to the Americas.

S A T U R D A Y
MORNING IN THE MOUNTAINS--A new release that expands our previous five-day-per-week offering of HCJB's live morning show. Karen Schmidt hosts this one hour of music, features, news headlines and tidbits. Tune in at 13:30 and 15:00 UTC.

DX PARTYLINE--Are you a dial-twiddler? Do you like to listen to far away countries just for the thrill of hearing a distant signal? That's what DX Partyline is all about. Join Rich and Lisa McVicar for tips on hearing the exotic stations from all seven continents. 7:30 and 17:00 to Europe, 10:00 to the South Pacific, and 17:00, 1:00 and 5:00 to the Americas.

MUSICAL MAILBAG--Get together with the Mailbag crew--Curt Cole, Gail Pfeffer, Ralph Kurtenbach and Giselle Russell--for a half hour of fun and frivolity. We'll read your letters, play music, eat--and eat some more! There's nothing else quite like it on shortwave. 7:00 and 19:00 to Europe, 9:30 to the South Pacific and 19:00, 00:30 and 6:30 to the Americas.

SOLSTICE--A fast paced, contemporary program geared toward youth from HCJB's South Pacific Studios. 18:00 to Europe, 9:00 to the South Pacific, 18:00, 2:30 and 6:00 to the Americas.

SPORTS SPECTRUM--Catch up on interviews and the latest from the world of sports at 18:30 to Europe and the Americas, and 3:00 to the Americas.

Other programs of wide interest:

WORDS OF TRUTH--Archeological authority and Bible teacher
Dr. Clifford Wilson presents a variety of topics such as
creation, pseudo-science, the occult, counseling and more.
Produced in Australia.
THE STONES CRY OUT--Dr. Clifford Wilson and Rev. David
Searle present programs showing how archeology shines light on
Scripture. A production of HCJB-Australia.
CROSS CURRENT--An entertaining program for youth, by youth.
Mixes music and relevant discussion that informs and challenges.
Produced in Australia.
OTHER NEW OFFERINGS: We'll bring you more music, more
inspiration via programs such as NIGHTSOUNDS on weekday
evenings; JOY INTERNATIONAL, AFTERGLOW and AFTERGLOW CLASSICS.
Find contemporary music on SOUNDS OF JOY and ON TRACK.

FREQUENCIES:
Americas:
00:30-04:30 UTC on 9745, 12005 kHz
04:30-05:00 UTC on 12005 kHz
05:00-07:00 UTC on 11925 kHz
11:00-14:30 UTC on 15115, 17890 kHz

Europe:
07:00-08:30 UTC on 9600, 11835 kHz
17:00-20:00 UTC on 15350 kHz

South Pacific
07:00-11:30 UTC on 11925, 9745 kHz

Andean Regional Release
14:30-21:00 UTC on 6080 kHz

Each of these releases may also be found on 21455 kHz Upper side
band.

The next PROGRAM NOTES, covering November and December,
will be published in September. Subscription details and HCJB
program schedules are available upon request. Write to HCJB at

: On my visits to Los Angeles, I always went out of my way to listen
: to Jim Healy's half-hour sportscasts on KMPC, which were at the time
: part of Jim Lange's show. He used to tip in all those crazy sound bites
: including Earl Scheib's trademark "Riiiiiiiight!" and some guy
: saying "Get to the point, will you Jim?". It was fresh and irreverent'
: and very entertaining. There was nothing else like it in radio.

. . .For the record, that was Tim Conway saying "Get to the point. . .".
Conway did several other such sound bites, including a parody of Victor
Kiam's "She is a lovely lady and my apologies to her" in a mock-Norwegian
accent.

The loss of Jim Healy is incalculable to radio. He was the last of a
breed. Sadly, I have seen no fitting tribute to him anywhere in the
local press, except for his friend Dwain Esper's column in the Glendale
News-Press. He was the highest-rated show on KMPC during his last stint
even before the fatal switch to sports-talk (at least, according to
Jackie Autry).

I could talk for hours about Jim Healy. . .Jim Healy, goodnight.

2993. Imus' profile/interview in PENTHOUSE

Newsgroup: rec.radio.broadcasting
Date: 1994-08-03 00:13:12 UTC
From: UltimaJock@aol.com
Message-ID: <31mneo$mi0@vixen.cso.uiuc.edu>
Source record: 38663

While I freely admit to grabbing the 25th Anniversary issue of PENTHOUSE for the Tonya Harding smut reel stills (also got a good laugh out of hearing Bob Collins at WGN play "I Like My Women Kinda Trashy" in *honour* of Tonya at 8:15 today), it may also be of interest to y'all that there's a profile of Don Imus in the same issue.

The author is none other than Al "Publisher of SCREW Magazine" Goldstein, and at one point Imus describes Goldstein's question about whether Imus prefers oral or vaginal sex as "disgusting."

Now, this criticism of Goldstein from the man who released an album circa '75 on Bang Records titled THIS HONKY'S NUTS!, the first track of which was about "inspired profanities and creative ethnic slurs," brings up the question---Has Imus REALLY mellowed?

Say it ain't so, Don!

2994. More Details on Stauffer Communications Sale

Newsgroup: rec.radio.broadcasting
Date: 1994-08-03 00:13:18 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <31mneu$mik@vixen.cso.uiuc.edu>
Source record: 38664

The company buying a Topeka-based media empire apparently plans to spin off the radio stations it's acquiring.

Morris Communications of Augusta, Georgia last Wednesday announced plans to buy Stauffer Communications of Topeka for more than $280 million.

In a news release Monday (Aug. 1), Morris chairman William Morris said the radio and television stations owned by Stauffer would be sold only where the FCC's newspaper cross-ownership rules would require it.

The spin-off would affect WIBW-AM/FM/TV in Topeka, where Stauffer also publishes the Topeka Capital-Journal, and KGNC-AM/FM in Amarillo, where Morris owns the daily newspapers.

Morris said Stauffer's other broadcast facilities -- all TV stations or radio networks -- would remain in the company.

KGNC-AM/FM would be attractive stations for a buyer looking for an agricultural audience -- especially KGNC(AM), with 10,000 watts at 710.

WIBW-AM/FM might be a tougher sell.

While WIBW(AM) has a strong heritage and impeccable reputation, it also has to give up five hours of afternoon air time on weekdays to Kansas State University's KKSU(AM). This is one of the last such share-time agreements remaining in the United States.

WIBW-FM is a satellite-fed country station that has not done particularly well in the Topeka market. WIBW-TV dominates the Topeka market, however, with profit margins reportedly exceeding 35 per cent.

>

Interesting... In the mid-seventies, KGEI ran an english broadcast to Asia on 31 meters. When I was in Texas, I stayed up in the wee hours of the morning to hear it, and got a QSL card from them. I know they were connected with FEBC, which had an office in La Mirada, California. The Asian program was a mixture of music and religious commentary, and if I am correct, was produced by FEBC. I found the locally produced show entertaining. It didn't last long though...

2996. KGEI's Final Goodbye.

Newsgroup: rec.radio.broadcasting
Date: 1994-08-03 00:13:22 UTC
From: PGEORGE@WELLESLEY.EDU
Message-ID: <31mnf2$mjb@vixen.cso.uiuc.edu>
Source record: 38666

As of 4:00 am (EDT) KGEI said goodbye to all of their listeners in Central and South America, for the last time. I personally felt a sense of loss this morning when they "pulled the switch" at exactly 0800 UTC. Though the signal was fading miserably due to the changing conditions to the West Coast and the fact that they mainly aim toward Southeast, you could make out the sadness in the announcers' tone as he said the final sign-off over the station's musical interval signal. Apparently, earlier I was able to decipher that they were reading the station's history in Spanish when they used the words "General Electric". My Spanish is rather poor but I knew what they were trying to do. KGEI left the air at 0800 UTC with no big fanfare, but a rather dignified "Adios" on 8/1/94. My hope is that they may return. The license is still going to be active and the frequencies are theirs for the next six months. Lets wish them luck and wish for them a return to the air soon. It is hard to see a piece of broadcast history slip away like that.

2997. KGEI & KJAZ Say Goodbye

Newsgroup: rec.radio.broadcasting
Date: 1994-08-03 00:13:22 UTC
From: dk@crl.com
Message-ID: <31mnf2$mjf@vixen.cso.uiuc.edu>
Source record: 38667
Cross-posted to: ba.broadcast,rec.radio.broadcasting,rec.radio.shortwave

Two historic stations came to an end Sunday night/Monday morning.

KJAZ, the world's first all-jazz station, said goodbye at 11:55pm with Jerry Dean at the mic thanking people for the 35 years he'd spent at KJAZ (since its inception in 1959). He asked for phone calls to 1-800-359-6447, saying that if all goes well and they raise $500,000 they will go back on satellite and cable systems by October 15.

At the conclusion of the finale (didn't remember what it was), a cart was played with the "KJAZ Alameda/San Francisco" ID, then the station immediately went into Latin contemporary music at 12:00am as KJAZ passed the torch on to KZSF "Zeta", the newest part of Z Spanish Broadcasting's network based in Sacramento.

KGEI (shortwave at 15280 and 9615), the American outlet for Far East Broadcasting, concluded its long history Sunday night at 1:00am (Monday) on 9615 with many thanks to the thousands of listeners who sent and phoned their thoughts and well wishes.

The announcers read many notes from people in Central and South America, and a surprising number from people in the SF and LA areas. They also gave their phone number and address for cards, letters, and QSLs, and in a rather surprising turn, mentioned their bank account at Banamex, a Mexican bank. Unfortunately, my Spanish is shaky and I couldn't quite understand if they were looking for contributions or exactly what, but they did give an account number.

KGEI concludes a history in broadcasting started in 1939 with a demonstation shortwave station begun by General Electric for the World's Fair at Treasure Island in San Francisco. As KGEI "La Voz de la Amistad" (The Voice of Friendship) concluded its final transmission, the locator chimes of KNLS in Anchor Point, Alaska came on...and KGEI, too, passes into history.

2998. More on KTTS' Song of Inspiration

Newsgroup: rec.radio.broadcasting
Date: 1994-08-03 00:13:28 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <31mnf8$mk4@vixen.cso.uiuc.edu>
Source record: 38733

> rrb@deja-vu.aiss.uiuc.edu (AIRWAVES E-PUBLISHING) wrote about KTTS'
"Hymn of the Day" (I think it's actually known as the "Song of Inspiration"):
>
> } From: mikedow@gate.net (Mike Dowling in WPB)
>
> } I assume you're serious about this.
>
We are all dead serious. KTTS (and the other Great Empire stations) do
this.

Note where Great Empire *has* its stations: Wichita, Springfield, Tulsa,
Omaha, and Shreveport. While these are cities of some size, most of them
strongly reflect the opinions and outlooks of their nearby rural areas.
The "Radio Ranch," folksy programming, country music, and a hymn an hour
have meaning for this audience. While it may not strike a chord with you
or me, and while I personally cannot stand this style of programming,
it does succeed.

I'll contrast it to Kansas City. I don't think that style of programming
would work here. Allow me to be excessively anthropomorphic for a
moment. Kansas City wants to be a small town and a big city both
at the same time, and is very insecure (sometimes justifiably so, sometimes
not) about its level of sophistication. That's even though this is a big,
big country market, too. But *all* the country stations here offer a very
slick, "citified" style of programming. You will not find the "Radio
Ranch" on KFKF or WDAF.

(And a drive down Independence Avenue will make you think you're back in an
ethnic industrial section of a Rust Belt city.)

(Again Mike Dowling:)
> } Hoiw can they do this in the 1990s? Wouldn't advertisers refuse to be on
> } a station that did this? I could imagine a country competitor coming in
> } and, even with a bad format, wiping out this station every time they
> } attempted to "inspire."
>
> Great Empire's KTTS FM is BY FAR the runaway market leader down here.
> We have LOTS of country (in fact we have Both kinds of music here...
> Country AND western) but KTTS dominates.

And has since the mid-1970s.

> Primarily due to an
> overwealmingly powerful news and public affairs commitment. My hats
> off to KTTS for that. They are truly a 100,000 watt community service
> station.

>
While I share Bill's admiration for KTTS' news efforts (the newsroom is staffed 24-hours a day with at least one reporter on duty), I think there's more to it than that. KTTS clearly is giving its audience what it wants, hokey as it may seem to you or me.

Great Empire *has* failed in some markets -- most notably, Denver, where KYGO just plastered Great Empire's KBRQ (programmed in exactly the same way) and Great Empire finally called in its cow chips and sold out. This happened, I believe, in 1989, and was the subject of a great Clark Secrest column in the Denver Post, back when the Post still covered radio.

Also note that Mike Oatman, who is (I believe) the CEO of Great Empire (and who still pulls an occasional air shift on KFDI Wichita) was profiled three or four weeks ago in Billboard. He made it very clear that he believes in what the Great Empire stations are doing: fairly broad playlists, heavy news and service emphasis, the song of inspiration, and the general folksy approach of the stations. As I've written Bill in private e-mail, I can't decide whether they are refreshingly different or hopelessly outdated.

2999. Hymns on the hour?

Newsgroup: rec.radio.broadcasting
Date: 1994-08-03 00:13:29 UTC
From: Terry Knab <tknab01@bigcat.missouri.edu>
Message-ID: <31mnf9$mk5@vixen.cso.uiuc.edu>
Source record: 38734

FYI, I am in Sioux Falls, South Dakota, where I can get WOW (Great Empire's Station in Omaha), and they do the exact thing as KTTS. KTTS has been doing the whole "Radio Ranch" thng for 20 years, and they succeed for one reason, people have come to expect the Song of Inspiration. The secret as to why they get advertisers is simple, they are number one, usually with a 18-20 share. In Springfield, people have come to expect that out of KTTS, and their listener base is an older one at that. They use this same formula on each one of their stations, which are:

WOW AM/FM, Omaha
KFDI AM/FM, Wichita (Great Empire has a duoploy here with KICT, which is a rocker)
KWKH AM/FM, Schreveport
KVOO AM/FM, Tulsa

Not too long ago, I talked with George Demarko, who is the sales manager of KTTS, and he explained it best: "We give the people of the Ozarks what they want, so they listen." I have to agree. KTTS is one of the last of a dying breed of full (and we mean truly full) service stations in the country. BTW, KTTS has been able to blow out anyone who has tried to compete, namely KLTQ (which is now AC), and are beating KGMY hands down.

In the other markets, Great Empire is not faring quite as well. KTTS is the only combo they have that is generating the ratings success that will garner them advertisers. If you were to go and try to sell country against KTTS, no one would buy just based on KTTS' reputation.

This is my $.02 worth.

3000. Jack O'Dell & Unshackled

Newsgroup: rec.radio.broadcasting
Date: 1994-08-03 00:13:30 UTC
From: "MacHarg, Ken" <kmacharg@mhs.hcjb.com.ec>
Message-ID: <31mnfa$mk6@vixen.cso.uiuc.edu>
Source record: 38735

To answer a previously posted question, Jack O'Dell who wrote, produced & hosted Unshackled for over 30 years died about 2 or so years ago. It was my privilege to interview him about 7 years ago after an Unshackled taping at Pacific Garden Mission in Chicago. His was quite a story, from alcoholic "soap opera" star to producer of radio's longest running drama. All of the stories on the program are true, and produced each Saturday afternoon in front of a live audience at the Pacific Garden Mission in Chicago. It is like stepping back into the good old days of radio to attend a taping.
By the way, we at HCJB will be increasing our broadcasts of Unshackled to twice a week in good listening times via shortwave starting in September. For our new program schedule, effective in early September, write to me at the address below. --Ken MacHarg

In article <31i1gc$k2i@vixen.cso.uiuc.edu>, topolski@orange.digex.net (Robert M. Topolski) writes:

I think you really hit the nail on the head;Rush is just being Rush. He is, without a doubt, the LARGEST voice of conservativism. He reminds me of Ayn Rand.
It's nice to hear good, clear common sense. I think more people are becoming aware of what our govt is doing to us. Rush has educated millions with his show.
Remember when you became more interested as you not only listened to him but to the whole political scene? Multiply that times however many fans he has and will gain.
He is hated by many, hovever. I have been the subject of many snide comments at work--all because I listen to him at my desk! Oh, well!
I don't think Rush is "losing it", so to speak. I listen to the show every chance I get. More and more are doing the same. Bumper stickers, T-shirts...RUSH ROOMS! I think is already an American Institution!
C-ya!
Rob

>> NIGHTLINE and MACNEIL, LEHRER have swallowed his bait by having this
>> college dropout appear as an "expert" on ecological and economic issues.

--

Limbaugh does not appear on these shows as an "expert" on anything; He is there to offer an opinion, as much as a Jesse Jackson, Gloria Steinam, Ted Danson, or average Joe off the street would.

It was at THAT point that I realized how Rush >decided to use his facts. He choses very carefully what he uses out of particular >stories for his own use.

Sad but true -- but nothing new! I've been in print journalism for 23 years, and have seen Paul Harvey and Pat Robertson ignore 98 percent of news stories and distort them this way for decades now! And both do it in what is deliberately packaged as a "newscast" format -- which in my mind is 10 times worse than what Rush does as a talk-show host. At least it's packaged as opinion, not news. But Robertson packages his as "CBN News" -- and I've heard MANY Paul Harvey affiliates who don't even air the "News and comment" disclaimer at the beginning of his daily show.

3005. HELP: Writing paper

Newsgroup: rec.radio.broadcasting
Date: 1994-08-03 00:13:39 UTC
From: ra55053@uxa.cso.uiuc.edu
Message-ID: <31mnfj$mld@vixen.cso.uiuc.edu>
Source record: 38740

Subject: HELP: Writing paper...
Keywords: SPORTS RADIO

Hey sports fans...

I'm writing a term paper and need your help. My topic is sports radio, specifically the Chicago market, since that's where I'm from. The stations here are WMVP-AM and WSCR-AM. If you have anything you'd like to say about sports radio, please email me at ra55053@uxa.cso.uiuc.edu or roger.aranda@launchpad.unc.edu.

I'll try to reply to all of them ASAP. Here are some of the questions you might want to answer. Also, when answering please leave me your name and a phone number if you are in the 312, 708, or 217 areas...I guarantee complete confidentiality if you so desire.

Thanks! Roger

QUESTIONS:

1) Why do you listen to sports radio?
2) What do you think about sports radio?
#) What changes would you like to see in sports radio?
4) Do you think players and coaches actually pay attention to what you have to say ?
5) Anything and everything will be greatly appreciated!

Source record: 38742

All I know about Stan Major comes from the 15 minutes or so that
I listen to him in the morning on my way to work.

He originates somewhere on the east coast of Florida. He's
a conservative who thinks Rush Limbaugh is a joke. He's
begun a tongue in cheek run for president and he says
he will do away with the IRS (in favor of a flat tax I
believe)

I don't know if he fashions himself like Rush as a "dangerous
man".

I do know I don't care for his show. Also, he's produced by
a net called Talk America or some such net out of Massachusettes.

> like Larry King, or any other show for that matter.

Mike: I don't think it had to do with costs. Larry King is no longer
doing a long-form syndicated radio program -- just the CNN television
show, which I believe is now simulcasted on radio. The time slot
where he used to be on is now filled by (I believe) stand-up comic
David Brenner.

Source record: 38745

In article <31i1gd$k32@vixen.cso.uiuc.edu>, ab376@freenet.carleton.ca (Mike Ligeza) writes:

(on syndication costs)

The reason CFRA dropped King, is because King stopped doing his radio show in May to concentrate on TV. (He is still on radio an hour a day on some stations, as CNN offers an audio simulcast of his TV show for a number of stations to run in late evenings Eastern time.)
As far as syndication goes, often it's free, in cash terms, as the syn-
dicator only wants a few minutes of of your commercial time per hour to sell to national accounts. (That's the "barter" system by which most radio and many TV shows are syndicated.) Others use a mix of up-
front carriage fees and barter for commercial time, with Rush Limbaugh charging some of the highest fees of all (though he is no longer generating
ratings commensurate with his fees). I don't know of any that charge a straight cash fee for carriage while letting the station keep full control
of commercial inventory except Howard Stern and Imus, and their fees are even higher than Limbaugh's but tend to be a better economic propo-
sition for the stations that carry them. Some shows
produced by the major networks actually pay the stations to carry them, but then take over most or nearly all of the commercial inven-
tory in a given hour. (Bruce Williams, and all the Westwood One Talknet hosts, work this way; so does David Brenner and Jim Bo-
hannon on Mutual.) This is how most network TV works, by the way.

Hi:

As we have several users in this NewsGroup who have a background in broadcast engineering... I thought I would try starting a "thread" on "engineering trivia."

I will initally keep this short, since I am uncertain of response levels.

(Answers found WAY-Down on the bottom of this posting)

1. What AM station has the tallest "series fed" antenna in the U.S. ? (Hint; it's over 900 feet)

2. What FM station has the highest "effective radiated power" in the U.S.? What is the power?

3. How many towers were used in the most complex single pattern AM directional antenna ever built? (It's still operating) Where is the station?

jerryr8067@aol.com (JerryR8067) writes:

>>WYUT (92.7 Herkimer 3KW) is back on the air.

>FYI - new call letters are WXUR.

I cannot believe these calls are back in use. They should have been buried 10 feet under and never reactivated. For those unfamiliar with WXUR, it was AM 690 - FM 100.3 Media PA (outside Philadelphia), owned by the Reverend Carl MacIntyre...the fundamentalist minister whose right-wing views and refusal to yield air time to people with differing views caused the station to lose its license in 1973. After WXUR was shut down, MacIntyre tried to broadcast from a ship off New Jersey...until the deck caught fire and the project was ended. 100.3 was later relicensed and is today WPLY-FM. 690 also returned to the air later on under different ownership. Whatever you think of MacIntyre's views, there's no denying that there's a bit of a curse over those calls. I'm just as surprised that the WHDH-TV calls were ever reactivated here in the Hub...the original WHDH-TV 5 lost its license in 1972.

I'll have to give WXUR a listen next time I pass through Herkimer. Last time I was there I hit up 92.7 just in case they were back on... and managed to pull in WPAC-FM Ogdensburg...at least 150 miles away!

>I'm a former broadcaster (25 years in "on-air" and "management") that got
>out when Reagan gave it the death kiss of deregulation and allowed more

>have about 50% of the stations in this country go "dark." I know that
>comment will cause some controversy and discussion here.

Docket 80-90 was a mistake, plain and simple. The Rochester NY market went from competitive to overbuilt in 10 years, like this:

1984 1994

88.1 ---- WFRW, Family Radio (Relg.)
88.5 WRUR, U. of R. WRUR, U. of R.
89.3 ---- WMHN, Mars Hill (Relg.)
89.7 WITR, RIT WITR, RIT
90.1 WGMC, jazz WGMC, jazz
90.5 WRHR (10w) WBER, Monroe Cty. BOCES, prog.
91.5 WXXI, class. WXXI, class.
92.5 WMJQ, CHR WBEE, country (+WKLX 98.9)
93.3 ---- WEZO, EZ list. (+WVOR 100.5)

94.1 ---- CP, Brighton NY
95.1 WYLF, big bands WRQI, AOR "Rock-It 95"
96.5 WCMF, AOR WCMF, AOR (+WRMM 101.3)
97.9 WPXY, CHR WPXY, CHR
98.9 WHFM, rock WKLX, oldies (+WBEE 92.5)
99.7 ---- WZXV, religion
100.5 WVOR, AC WVOR, AC (+WEZO 93.3)
101.3 WEZO, easy WRMM, soft AC (+WCMF 96.5)
102.7 ---- WDCZ, religion
103.9 WDKX, urban WDKX, urban
105.5 ---- WASB-FM, CP, Brockport
105.9 ---- WJZR, locally-owned jazz
106.7 ---- WMAX, AAA

So in ten years, there's been little increase in the total number of owners in the market. Every Class B FM in the market is now duopolized, and the only new local ownership in the market is WJZR 105.9. I'll grant that 80-90 also brought Rochester a very successful AAA station, WMAX 106.7 Irondequoit-Rochester. Beyond that? FOUR new religious stations, all owned from outside the market. Easy listening...we had it already. Who knows what will appear on 94.1 or 105.5? And in the process, Rochester listeners lost access to stations like CBL-FM Toronto (94.1, CBC Stereo), WPCX 106.9 Auburn, which used to be THE country station in town, and WMJQ 102.5 Buffalo, whose 105kw signal would normally cover Rochester if not for WDCZ 102.7. And the 94.1 grant in Brighton will force little WIRQ-FM at Irondequoit High School to go off the air. WIRQ was Monroe County's first noncomm in 1959, with 10w on 90.9. It moved to 93.3 in 1982 when the FCC cleared out the Class D's. The grant to WEZO forced WIRQ to 94.3...and now that channel will be unavailable too...all so we can get ANOTHER satellite-delivered FM in the market.

-=Scott Fybush - fybush@world.std.com=-

3013. Kansas City Radio History V3.0 (ongoing -- long)

Newsgroup: rec.radio.broadcasting
Date: 1994-08-04 06:03:15 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <31q0b3$pr4@vixen.cso.uiuc.edu>
Source record: 38668

THIRD REVISION, 8/3/94: Minor updates and more information about pioneer
FM station KOZY. Also calls into question date of WDAF relocation.

The original version of this history originated in a request
from Barry Mishkind on early Kansas City radio, using 1928 as the baseline.
The best I could do was a 1930 base date (using a photocopy of RaDex
from 4/30). This is something I plan to refine as time permits.

UPCOMING PROJECT: I would like to track down the history of an
experimental AM station (similar to the predecessor of WQXR) that operated
in Kansas City during the mid-30's and subsequently as KITE. KITE is listed
both in an October 1938 issue of RaDeX and in Broadcasting Yearbook for
1942. By 1942 it was at 1590 kHz. It was associated with experimental
TV broadcasts sponsored by the National Radio and Television Schools. The
TV transmitter site was at the Kansas City Power & Light Building.
At the present time, I do *not* have the experimental call letters of
the station. It is not related to the present KPRT (originally KPRS) at
1590, which originated in Olathe, Kansas in 1949.
A friend has shown me a scrapbook of undated Kansas City Journal-Post
articles by John Cameron Swayze (then the Journal-Post's radio editor,
who also read "bulletins" three times a day on WHB) that makes frequent
reference to the "unusual programming" on KITE.
This evidently was one of the few such stations in the country, and I
would like to get some background on high-fidelity AM transmissions during
the 1930s.
I find it interesting, considering the present somnolent state of
Kansas City broadcasting, that experimental efforts of this type were
going on in the 1930s (combined with the presence of an early FM station
from 1942 on).

Footnote Station Frequency Post-1941 Fq* Present Fq Other
(1) WIBW 580 580 580 Topeka, KS
Share-time w/ KKSU
(2) WDAF 610 610 610
(3) KFEQ 680 680 680 St. Joseph
(4) WHB 860 880 710
(5) KMBC 950 980 980 Now KMBZ
(6) WREN 1220 1250 1250 Was Lawrence, KS
Now Topeka, KS
(7) WOQ 1300 (1330) (1330) Off air in 1934
^--of KFH Wichita, had share-time w/ WOQ
(8) KWKC 1370 ---- ---- Only in RaDex

Footnotes:

(*) Most stations changed frequency 3/29/41 as result of Havana agreement.
(1) WIBW on-air 5-8-27. 1930 owner Topeka Broadcasting Assn, controlled by Capper Publishing Co. Topeka Broadcasting Assn bought in January 1957 (FCC approved 12-19-56) by Stauffer Publishing Co., its present owner. Sale of all Stauffer properties to Morris Communications announced 7-27-94. Morris announced spin-off of Topeka properties 8-1-94 to comply with FCC cross-ownership regulations (co-ownership with Capital-Journal newspaper). Still shares with KKSU (formerly KSAC, also listed in 1930 RaDex). KKSU (Kansas State University) has the frequency 12.30 pm-5.30 pm weekdays.
=> Has FM and TV facilities, unavailable in KC. AM: 5 kW, DA-N. Format farm and country. Flagship station of Kansas City Royals.
(2) WDAF started by the Kansas City Star in 1922, owned by the Star until 1957, when Star lost restraint-of-trade case and forced to sell under a consent decree. Sold to National-Missouri TV. Inc. 5-18-58. Sold to Transcontinental TV Co., 7-13-60. Sold to Taft Broadcasting Co. of Cincinnati 2-19-64, predecessor of present owner, Great American Radio and TV Co.
=> FM history: Conditional grant for KCST in 1947, never activated. WDAF-FM (102.1) on-air 3-5-61, presently KYYS. Has TV facilities.
=> AM: 5 kW, ND fulltime, stereo. Format full-service country. Transmitter moved to 79th & Mission Road in Johnson County, Kansas, in 1940s. 1947 guidebook published by Gallup Map & Stationery Co. lists site as "new transmitter"; other sources have told me they believe the relocation occurred at the same time the KMBC site in Westwood was built, approximately 1940 or 1941. Both have the same type of unusual wide-faced square tower.
(3) KFEQ, listed in earlier Radio Service Bulletin lists at Oak, Nebr. Owned by Scroggin & Co. bank, later owned by Barton Pitts and the Bradley family, publisher of St. Joseph News-Press. Sold to Kemper Brown and Bing Crosby 12-31-55. Sold to Jesse D. Fine family 9-19-57. Sold to Panax Corp. 8-30-63. Separated from KFEQ-TV (now KQTV) by sale to KAYS, Inc. March 1969, predecessor of present owner, Beach-Schmidt Group, a chain based in Hays, Kansas.
=> AM: 5 kW, DA-2. Format mixed news/talk and country.
(4) WHB started in 1922 by Sweeney Automotive School (across from Union Station). Owned in 1928 by Sweeney and in 1930 by WHB Broadcasting Association. Purchased in 1931 by Cook Paint & Varnish Co. Changed frequency to 710, DA-2, adding nighttime service, in 1948. Enabled move of KCMO from 1480 to 810 by enabling KOAM Pittsburg, KS to move from 810 to 860. WHB sold to Midcontinent Broadcasting (Robert and Todd Storz chain) 6-14-54, in conjunction with Cook's purchase of KMBC AM and TV, thereby resolving a shared-time situation with WHB-TV and KMBC-TV on channel 9. Station(s) apparently lost CBS affiliation to KCMO AM and TV in the process. Sold to Shamrock Broadcasting (Roy Disney interests) 4-12-85. Sold to Kanza, Inc., based in Carrollton, Mo., 8-26-93.
=> FM history: WHB-FM (102.1) 1948-50. Under Shamrock ownership with KUDL (98.1) 1985-93. Presently relaying programs from KMZU (100.7), Carrollton, Mo.

=> AM: 10 kW-D, 5 kW-N, DA-2. Was stereo under Shamrock
ownership. Dominant Top-40 station in 50s, 60s, and early 70s. Now farm
and country.
(5) KMBC owned by Midland Broadcasting Co. in 1928 and 1930. Traces
ancestry to amateur station (9XAB) started by Arthur B. Church in 1921,
and claims to be Kansas City's oldest station. Went commercial in 1922
as WPE, later moved to Independence as KFIX and KLDS (owned by Reorganized
Church of Latter-Day Saints). Arthur Church regained ownership (as Midland)
in 1928, moved it back to KC as KMBC. Sold to Cook Paint and Varnish Co.
6-14-54, to resolve share-time TV service on channel 9 between KMBC-TV and
WHB-TV. Lost CBS affiliation to KCMO in the process. Church retired
because of ill health. Sold to Metromedia Broadcasting Co. (John W.
Kluge, et al.) 8-29-61. Separated from KMBC-TV by sale to Bonneville
Broadcasting (Utah Latter-Day Saints--Mormons) 5-12-67.
=> FM history: KMBC-FM began 1944 at 46.5, moved in 1945 to 97.9,
apparently went dark 1948. Successor KMBC-FM (99.7) on-air October 1962,
now KLTH.
=> AM: 5 kW, DA-N. Format news/talk. Studios and transmitter at
50th & Belinder, Westwood, Kansas. Bought KCMO-AM/FM last year, forming
a duopoly. History of KCMO noted separately.
(6) WREN on-air 6-15-26. Started by Jenny Wren Co. of Lawrence, Kansas.
The Kansas City Star had proposed a purchase in 1935 but was denied on
grounds of monopoly by the FCC. Moved to Topeka at an indeterminable
time in 1947. Purchased by Alf Landon (1936 Republican presidential
candidate) October 1952. Sold to Pat Paton and Ted Cramer 9-5-85.
Paton and Cramer took station off the air in 1990. Reactivated in
1993 by Michael Glinter with southern gospel format.
=> AM: 5 kW, DA-N. Still nominally has share-time arrangement with
KFKU Lawrence (as it did in 1930), but that has not been used by Kansas
University in at least three years.
(7) WOQ started by Western Radio Co. in 1922, purchased by Unity School
of Christianity in 1924. Surrendered license in 1934. Shared time with
KFH Wichita.
(8) Only mention of KWKC is in 1930 RaDex, listed as owned by Wilson
Duncan Broadcasting Corp. May be predecessor of KCMO (see below).

Other Notes:
* Station WLBF went on the air in 1925, but went bankrupt three years
later. The Star cites KCKN (at 1340 in 1980) as its successor.
Broadcasting Yearbook also apparently considers KCKN as WLBF's successor.
KCKN was started by Capper Publishing Co. (owner of WIBW) in the
mid-1930s. Sold to Cy Blumenthal (Continental Stations) 2-8-57 as part
of Capper sale of WIBW AM/TV. Sold to Seattle, Portland & Spokane Radio, Inc.
(later Kaye-Smith Group) 7-1-65. Purchased by Joseph L. Allbritton in 1981.
Sold to Sconnix Group Broadcasting 6-21-83. Sold to KCBR Limited Partnership
in 1989 (present owner). It is now KNHN, a news/talk station.
=> FM history: KCKN-FM (94.1) on-air 5-28-63. KFKF calls claimed by
Sconnix. AM and FM separated by 1989 sale.
=> Present AM facility: 1 kW, ND fulltime.
* Station KCMO, now our only 50,000-watt signal at 810, did not start

until 6-10-1936 (at 1450 and then 1480). It moved to 810 and its present transmitter site in far northern Kansas City (formerly a town called Nashua) in 1948.
Owned by Tom Evans (drugstore chain owner and associate of President Harry Truman). Sold to Meredith Engineering Co. 11-16-53. Separated from KCMO-TV (now KCTV) by sale to Summit Communications, Inc. 6-21-83. Sold to Pacific and Southern Co. (Gannett) 7-29-86. Sold to Bonneville Broadcasting (KMBZ) fourth quarter of 1993.
=> FM history: KCMO-FM (CP for 98.3, on-air at 94.9) on-air 1948. Never left the air, the only Kansas City FM station with that distinction. Present AM facility: 50/5 kW, DA-N. Downgraded from 50/10 kW, DA-N during 1990 to improve nighttime pattern over suburban Johnson County, Kansas. Present format talk.
* Also of interest is the history of pioneer FM broadcaster KOZY, started by Everett L. Dillard, who later started WASH(FM) in Washington, D.C. Studios and transmitter at the Porter Building at 34th & Broadway. On-air 1942 at 44.9 mHz. Moved to 99.9 mHz in postwar band change and then to 98.1 mHz. Off the air early in 1950 after lost lease on studio and transmitter site. Requested deletion for economic reasons, which was granted by the FCC 2-15-51. The 98.1 allocation was reactivated by KCMK(FM) 3-3-58, now KUDL(FM).

From: Mark Roberts <transvox@tyrell.net>
Message-ID: <31rv1s$ehm@vixen.cso.uiuc.edu>
Source record: 38670

The Kansas City Star this morning (Aug. 4) published an obituary for
Cicely Church, widow of KMBC founder Arthur B. Church. Mrs. Church died
in Colorado Springs July 30 at the age of 98. Mr. and Mrs. Church
moved to Colorado Springs in 1955 after selling KMBC AM and TV to
Cook Paint & Varnish Company.
The Churches owned KMBC from 1927 to 1954. KMBC is now known as KMBZ.
Mr. Church died in 1978. Services were scheduled for today in
Colorado Springs, according to the obit.
KMBZ, at 980, dates its history to an amateur station started by Mr.
Church in 1921. It is presently owned by Bonneville International.

: Sad but true -- but nothing new! I've been in print journalism for 23
: years, and have seen Paul Harvey and Pat Robertson ignore 98 percent of
: news stories and distort them this way for decades now!

The classic case was during Richard Nixon's bombing of Cambodia. Paul Harvey had been for it, as he was for all bombing of Vietnam and surrounding areas. Then suddenly one day he changed his tune. He had "read" the "facts" in the case and stated, "Mister President, I love and respect you, but this time you are wrong." So, what caused Paul Harvey to change his tune? Because his son, Paul Aurant, Jr (now aka Paul Harvey, Jr) had just gotten his DRAFT NOTICE.

(on changes at WFLA)

If Mark Williams (late of WFLA) actually wrote a ROMANCE novel...I wonder how many other talk hosts have written fiction works? I can think of Geoff Metcalf over at KSTE in Sacramento who wrote a spy thriller a few years back (and since he was apparently a CIA spook for a little while himself, it had a certain ring of authenticity about it). Then. of course, there was "I, Libertine," the famous Jean Shepherd spoof of racy novels of the 1950s and 60s. It started out with a shaggy dog story about a book supposedly so naughty it was even banned in NYC, one night on WOR...he ultimately was so bombarded with requests for the book (which existed only in the world of imagination he used to create on 710 AM every night) that he actually had to write and publish a book by that title under a pseudonym! If any-one has a copy, I'd love to buy it...
I'm trying to think of a romance novel set in a talk radio station... maybe a bodice-ripper featuring a handsome, debonair and rather liberal midday host and his sensuous, voluptuous producer?
(BTW we're currently advertising for a new producer for my show, so perhaps that voluptuous producer will arrive to inspire me soon...<g>)
Bob Smith, midday host WXXI/1370 Rochester NY

>2. What is the most powerful F-M broadcast station in the
> U.S.?
>2. WBCT(FM) in Kalamazoo-Grand Rapids, Michigan holds the
> record; 320 KW at 780'.

This station came in decently when I lived in South Bend, IN. I don't know where the stick was, but I seem to remember them ID'ing as Grand Rapids, a hell of a distance for FM to travel. I was a kid then, hard telling how they actually ID'd. Even if they were in K-zoo, South Bend's a real stretch. I've picked up K-zoo FM south as far as Edwardsburg, MI (10 miles NE. of South Bend), but the signal was weak.

I remember WBCT's format was nothing special -- sort of Top-40, sort of not. They used to make a big deal, usually in the ID, about being 500 KW. There was a strange quality about their sound, kind of like they were broadcasting out of a cardboard box. That could have been their processing, though. Again, I was a kid then, maybe twelve, and didn't know beans from apple butter about this stuff. I just liked listening to the radio.

Peace,
jim grey

3021. VOA RELAY ALMOST SHUT DOWN

Hello Everyone.

The following message recently appeared in the FidoNet Shortwave Echo.
I thought readers here would find it of interest.

PLEASE NOTE : I DID NOT WRITE IT !!!! So, do not direct comments to
to me. I am just relaying it.

gst

********** BEGIN ORIGINAL MESSAGE **********

Msg#:37637 *SHORTWAVE*
07-31-94 00:37:00
From: JOHN VODENIK
To: ALL
Subj: CLOSE CALL

Hi everyone. It was a close call this week. Bethany and Greenville just
missed getting closing notices by a few scant hours. GRS was to be cut 50% ,
while Bethany was to be dropped. The battle has just begun. I, or should I
say we, need to enlist your help once again. I request you write to your
senators, and tell them that Bethany and Greenville are necessary parts of the
worldwide VOA system. As I said, things came close.
Only by an early tip off, was I able to derail the plans for a time.
People in Engineering seem to feel that shortwave
has outlived its usefullness at VOA. There is an element that feels the
stateside relay stations are not needed. I could be in big trouble for
this message, but I feel it needs to be said.
Thanks in advance for your help, folks. Best 73 and 88 to you all.
John @ Bethany

Yes, the AMAX specs reads 75 usec de-emphasis. Why the SRF-42 got so much hype at NAB'94 and in other articles is beyond me, other than something was finally out. The unit's noise floor is horrendous, it needs an "AMAX mono" position and Sony should have forgotten about the FM section. The unit also was allowed to squeak through on the less stringent portable AMAX standards of higher THD and no noise blanker. I do use it to feed PA during remote broadcasts but only within the 10mv contour. Word has it that Radio Shack will announce some AMAX products in their so far well protected '95 catalog.

In case anyone is interested in sampling the new AP all-news radio network, one station carrying it is WDJX 1080 AM in Louisville. My four-year-old M Street guide lists it at only 1 KW at night, but it put in quite a powerful signal in Atlanta yesterday evening. When I first heard it, it took a while before I realized that this wasn't some big market station that switched to an all-news format.

I would be interested in knowing of other stations across the country that carry this service, and whether it has any chance of being more successful than NBC's attempt at the same sort of thing almost 20 years ago.

First WNWV, the Wave is looking for a morning jock. Second, I was surprised
to see Steve Sobol's comment that:

---Begin quoted article---

Well, it seems that Cleveland's 92.3 FM has come full circle.

Starting in the Mid-80's, back when they were WRQC, they were Top-40.
In 1990 they changed call letters to WJMO and began playing a heavy
R&B/urban concentration; in fact R&B was all they played.

In 1993, they began mixing in some modern rock with the R&B and rap,
starting with "Channel X" weeknights.

Now they feature a pretty balanced mix of R&B, rap and modern rock.

But today they played Steve Perry. And while I love Steve Perry
(and Journey) they don't fit into any of the above three categories.

This all leads me to believe that WZJM is returning to the traditional
CHR format they started with. But we'll see...

----
although he is right that WZJM is returning to traditional CHR format
(could Cleveland Radio get more boring), their Wrqc days were sort of
their format of the quarter club, they were modern rock, classic rock,
chr -- they just didn't know. Long before that, they were Disco 92, and
one of their jocks was Dean Rufus. He's now back there hosting a Sunday
night "Classic Dance Party". He sounds the same as he did at 92 twelve
years ago or when he was with WDMT in the 80's (at one time as PD).
No more "ooo ooo" like the old days, but the music, the mix and the
attitude are back. Now that is full circle.

Hey, I'm always available but I don't think Gabe would go for a
Conservative college student with just a little bit of experience at a
3000 watt college radio station. ;) Hey, I might just consider moving
back to Tampa for that though.

That doesn't really disturb me. It has been said (I wish it were I who said
it) that if you want to keep your finger on the pulse of the American people,
you must listen to PH and read the New York Daily News. PH was reflecting the
mood of the people--the "glory" of war was no compensation for letting American
youth get killed. I listen regularly but don't think of him as a news source.
For better or worse, he's a mirror reflecting the mood of middle America.

Did anyone else notice that this presidential election was the first time since
(the 60s? earlier?) that PH didn't write his discussion of the outcome--right
or wrong--the day befor election day for broadcast the day after the election.
I called his office about it and was told that "PH didn't care for either of
the candidates". I guess it's a little bit harder to write those broadcasts
and columns when it's not obvious to the meanest intelligence how the election
will turn out.

CSPR-FM is the music and arts station in Canberra, the capital city of Australia. Apart from recording a lot of local music, we also record a lot of radio plays by local, Australian and international playwrights. This is a time consuming and people-intensive business, and it seems a shame that, once produced, the plays do not get very many hearings. We sould be interested in hearing from other broadcasting organisations with an interest in radio drama. Possibilities could include exchange or other forms of cross fertilisation. Talk to me!

How does one go about getting a show syndicated? I have been producing and hosting a nightly radio talk show in Seattle, called "Straight Talk--Recovery Radio for the Northwest." It deals exclusively with issues around alcoholism and other addictions, and the recovery process. There are millions of Americans that are in some recovery or 12 step program. The show is now in its 4th year, brodcasting live, five nights a week from 10PM til Midnight on KEZX AM-1150. The format consists of in-studio or phone-in guests in the first hour that include authors, recovering celebrities, sports figures and people in the news. The second hour usualy features a person in recovery, telling what it was like, what happened, and what it's like now. We take phone calls, and the show is advertiser driven, although the show is NOT the property of the station. They donate the air time to the non-profit organization that owns the show.

Having done this for four years, I'm convinced that it has national appeal, and would be work in syndication. The problem is, I don't know who to contact to make the proposal, or what the proposal should consist of.

And how does syndication work from the other side. In other words, does the syndication company `buy' the show? Is there a split in ad revenue? What about selling it to stations and promotion?

Thanks!

In article <31rv1r$ehc@vixen.cso.uiuc.edu>, jmarvin@aol.com (Jmarvin) writes:

(Who is the best conservative talk host?)

Mark Davis is certainly a strong candidate for the list.
Let's also define what we really mean by "conservative." If we actually mean a less-government-is-best type rather than a disciple of the religious right, Mark definitely belongs, and let's not forget some outstanding libertarian voices like Gene Burns out of WOR in New York. And let's also add a few other national voices as well...Jim Bohannon on Mutual comes to mind, I think we'd agree he's right of center and a consistently good interviewer.
However, it's likely to be a short list of really quality people for a couple of reasons. One, many of the most talented broadcasters are moderate to liberal, or have politics that are very individual---even idiosyncratic---and hard to label. (Jay Marvin, Denny McLain, Tom Leykis and Don Imus come to mind in this context; because of his hard-to-label but always provocative viewpoint, so does Jerry Williams.) So a lot of the best in the talk business are excluded by definition. Two, most "conservative" voices on the air today are really radical Rush Limbaugh wannabes and clones who may match the bombast and venom, and even mimic the voice and inflection, but can't match the wit Rush displayed a few years ago when he was at his best. (Even Rush himself is now a strident cartoon of his best 1990-92 performances but that's another story.) Gordon Liddy, who also has a few imitators around the country, survives basically on his notoriety, which has been reinforced by the 20th anniversary observances of Nixon's resignation. As a broadcast talent he's got potential but he's very much a diamond in the rough, clearly in need of direction which no one probably has the balls to try to give him. (I've just thrashed him second book in a row in my market.) Buchanan on radio for some reason seems flat and lacks the fire he displays on TV...or that he used to show on WRC when he was facing off with Tom Braden. He tends to rise or fall to the energy level of his on-air opposition. You get the feeling that with the right guidance, and a stronger and more passionate antagonist to play against, he'd be a lot better than he is now. There may be some other local or regional hosts who are great...but who most of us east of the Mississippi don't know. Just an opening observation to get the conversation started.
And by the way, who's the best moderate to liberal host?

Some of the names I mentioned above (Marvin, Imus, Leykis) plus Michael Jackson (the one at KABC, not the one that married Lisa Marie) and Alan Colmes are good ones to start a list and an argument with. Hope someday soon I'll have my act sharpened well enough to join them...they all set a good standard to aim for whatever your politics.
Bob Smith, middays WXXI/1370 Rochester NY

There may be some other local or regional hosts who are great...but who most of us east of the Mississippi don't know. Just an opening observation to get the conversation started.
And by the way, who's the best moderate to liberal host?

Some of the names I mentioned above (Marvin, Imus, Leykis) plus Michael Jackson (the one at KABC, not the one that married Lisa Marie) and Alan Colmes are good ones to start a list and an argument with. Hope someday soon I'll have my act sharpened well enough to join them...they all set a good standard to aim for whatever your politics.
Bob Smith, middays WXXI/1370 Rochester NY

Unless his account is hacked, it's the real Tom Leykis. This is the same address he's given out on his show numerous times. The reason I remember is because it's rare that people can fit their entire name into it without leaving out a few letters.

How does one go about getting a show syndicated? I have been producing and hosting a nightly radio talk show in Seattle, called "Straight Talk--Recovery Radio for the Northwest." It deals exclusively with issues around alcoholism and other addictions, and the recovery process. There are millions of Americans that are in some recovery or 12 step program. The show is now in its 4th year, brodcasting live, five nights a week from 10PM til Midnight on KEZX AM-1150. The format consists of in-studio or phone-in guests in the first hour that include authors, recovering celebrities, sports figures and people in the news. The second hour usualy features a person in recovery, telling what it was like, what happened, and what it's like now. We take phone calls, and the show is advertiser driven, although the show is NOT the property of the station. They donate the air time to the non-profit organization that owns the show.

Having done this for four years, I'm convinced that it has national appeal, and would be work in syndication. The problem is, I don't know who to contact to make the proposal, or what the proposal should consist of.

And how does syndication work from the other side. In other words, does the syndication company `buy' the show? Is there a split in ad revenue? What about selling it to stations and promotion?

Thanks!

In article <31rv1r$ehc@vixen.cso.uiuc.edu>, jmarvin@aol.com (Jmarvin) writes:

(Who is the best conservative talk host?)

Mark Davis is certainly a strong candidate for the list.
Let's also define what we really mean by "conservative." If we actually mean a less-government-is-best type rather than a disciple of the religious right, Mark definitely belongs, and let's not forget some outstanding libertarian voices like Gene Burns out of WOR in New York. And let's also add a few other national voices as well...Jim Bohannon on Mutual comes to mind, I think we'd agree he's right of center and a consistently good interviewer.
However, it's likely to be a short list of really quality people for a couple of reasons. One, many of the most talented broadcasters are moderate to liberal, or have politics that are very individual---even idiosyncratic---and hard to label. (Jay Marvin, Denny McLain, Tom Leykis and Don Imus come to mind in this context; because of his hard-to-label but always provocative viewpoint, so does Jerry Williams.) So a lot of the best in the talk business are excluded by definition. Two, most "conservative" voices on the air today are really radical Rush Limbaugh wannabes and clones who may match the bombast and venom, and even mimic the voice and inflection, but can't match the wit Rush displayed a few years ago when he was at his best. (Even Rush himself is now a strident cartoon of his best 1990-92 performances but that's another story.) Gordon Liddy, who also has a few imitators around the country, survives basically on his notoriety, which has been reinforced by the 20th anniversary observances of Nixon's resignation. As a broadcast talent he's got potential but he's very much a diamond in the rough, clearly in need of direction which no one probably has the balls to try to give him. (I've just thrashed him second book in a row in my market.) Buchanan on radio for some reason seems flat and lacks the fire he displays on TV...or that he used to show on WRC when he was facing off with Tom Braden. He tends to rise or fall to the energy level of his on-air opposition. You get the feeling that with the right guidance, and a stronger and more passionate antagonist to play against, he'd be a lot better than he is now. There may be some other local or regional hosts who are great...but who most of us east of the Mississippi don't know. Just an opening observation to get the conversation started.
And by the way, who's the best moderate to liberal host?

John Vodenik is a nice guy and I'd hate to see him lose his job, if it came to that. However, are the VOA's stateside transmitters needed? KGEI just shut down because they couldn't raise enough donations even to cover their electric bill. The BBC has been scaling back its transmissions to the Americas. CBC has been cut back. It goes on and on. Would it be better if VOA just kept the bird and distributed to stations in their target areas? The BBC has had *phenomenal* success with this approach.

Spring 1994: KMXV(FM) changed from S to H 3-30-94.
KJLA(AM) became KCTE(AM), all-sports, 4-29-94.

Winter 1994: No changes for the book.

Fall 1993: WHB(AM) bought by KMZU(FM) Carrollton, MO, leaves O
for K. Otherwise, no changes.

Spring 1993: No changes for the book.

Winter 1993: On 2/19/93, two-thirds through the ratings
period, KBEQ(FM) changed from H to K.
2/3 of KBEQ shares are allocated to H, 1/3 to K.
KXXR(FM) changed call letters to KISF(FM) on 2/5/93, but format
remains H.

Fall 1992: KJLA(AM) changed call letters to KFEZ(AM).

Spring 1992: KQRC(FM) is the former KRVK(FM).

1992: The number of changes makes up for 1991's inactivity.

(1) In a complicated LMA (Local Marketing Agreement, i.e., leasing)
arrangement, KXXR(FM) moved to 107.3 (the former KCFM(FM)) and KFKF(FM)
began programming the station at 106.5, using the call letters KKCJ(FM).
To reflect the changes, KXXR is treated as H. (The call letters KXXR
were not transferred to 107.3 until March 1992; however, all other
elements of the station remained the same.
KKCJ is in category K. It is being entered as a new station.
This arrangement began 2/15/92. It was too late in the period to
affect Winter 1992 numbers.

(2) Shares for categories S and R will be adjusted to reflect
change of KRVK(FM) on 4/3/92.

Also note:
KBEQ(FM) was modern rock from 8 pm - 1 am (beginning
10/24/91) but the rest of the day remains H, so
I am counting as H. Modern rock segment reduced
to 10 pm - 1 am on 6/29/92. Discontinued 8/30/92.

Shares by Duopoly, Spring 1994:

Apollo 9.2 (KMXV, KUDL)
Bonneville 19.3 (KMBZ, KLTH, KCMO-AM/FM)

Sconnix 10.0 (KFKF, KKCJ LMA)

3077. Kansas City Arbitrons (Analysis)

Newsgroup: rec.radio.broadcasting
Date: 1994-08-07 01:18:40 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <321cpg$5oa@vixen.cso.uiuc.edu>
Source record: 38633

Competition among Kansas City stations was especially close in the Spring 1994 Arbitrons. For the first time in at least six years, no station received more than a single-digit share of the 12+ audience. The battle-scarred winner of this book is legendary country station WDAF(AM) with a 9.8 share.

The figures for the last 10 books are in a separate AIRWAVES article.

The 12+ figures were *not* published in the Kansas City Star along with its article on the survey for the first time in at least 14 years. I at first thought this was indicative of continuing erosion in the quality of the Star's coverage of local media. It's still not as bad as the St. Louis Post-Dispatch, which does an article about radio about every century, it seems.

Inexplicably, the Star *did* publish the numbers the next day; meantime, I had obtained the numbers from another source.

The Star's article about the book quoted KCFX(FM) officials as questioning the placement of diaries, claiming the sample represented more women than it should have. KCFX, a classic rock station, placed first with men 25 to 54.

Analyzing the 12+ numbers comes close to analyzing the nutritional value of a LaMar's donut (only Kansas Citians will understand this reference), but it's what I can get.

WINNERS:

* KCMO-FM. The oldies station continues its steady growth with its highest share in at least three years. The station deserves its success; the range of its playlist goes from the 50s to the late 70s, resulting in very little repetition. And they've FINALLY turned down the reverb.

* KMXV(FM). First book out as a "hit" station, though one whose playlist was frozen the first day of the book and has only recently begun to thaw. The "Mix 93.3" format change really amounts to a change in positioning. The playlist is more appropriate for a hot AC station.

* KXTR(FM). Increasingly, it's clear that "Classical KXTR's" sudden spurt in the Fall 1993 book was NOT a fluke. While the station plays the classical "hits," it will throw in less well known pieces every so often, too. The announcers are knowledgeable, personable, and witty without being obtrusive. It's even locally owned.

* KISF(FM). The station actually went *up* compared to the previous book, despite the new positional competition from Mix 93.3. "Kiss 107.3" responded by increasing the urban and dance crossovers. However, the morning show was an apparent weak spot. Two weeks ago, former evening announcer "Boomer" took over what he's now calling "The Temporary Morning Show." For the sake of Boomer's sinuses (which sound worse than mine do in the morning), let's hope so.

* KBEQ-FM. "Young Country Q-104" recovers after a disappointing winter book, and is in fact, about the same place it was in the fall. The only concern here should be the way the shares bounce around from book to book. The station needs to perform more consistently.

LOSERS:

* KFKF(FM). It has not recovered from the advent of "Young Country" KBEQ-FM. The country station did move up from third to second place, but only because of the sharp decline in KPRS' audience share. In its continuing tractor pull with WDAF(AM), KFKF may have pulled its rifle out of the gun rack and shot itself in the tire by continuing to keep the LMA with KKCJ(FM).
* KPRS(FM). Surprise! A decline of 1.6 since the winter survey period, and way down from the previous spring. What happened? Best guess is that KISF's move to more urban and dance crossovers took some listeners away. Perhaps it's also time for KPRS to clean up its audio, which has more distortion than a Rush Limbaugh diatribe. An eight-track tape on a player with misaligned heads sounds better than KPRS (technically speaking), a shame considering the station's unique format and record of community service.
* KYYS(FM) and KQRC(FM). Album rock that's either (KYYS) mired in its past or (KQRC) limited in appeal to real-life Beavises and Butt-heads. KY-102 appears to have stabilized its free-fall by timidly playing maybe one modern rock crossover a day. But over at 98.9, KQRC continues to sink like its slogan, "The Rock." Or maybe its audience has merely gone deaf.
* KKCJ(FM). Why is this thing still on the air? Its "hot country" format turns in lukewarm performance at best. Sure, KFKF may think KKCJ's keeping KBEQ from gaining on KFKF. But isn't it possible that maybe KFKF is hurting itself as well with this misconceived LMA? My neighbor's cat could do a better job of running a radio station.
* KCMO(AM). I don't think Bonneville knows what to do with it. All the news-oriented programming has been shifted to the older partner in the duopoly, KMBZ(AM). What's left is, well, the auditory equivalent of leftovers. KCMO's 50,000 watts (and terrific call letters) deserve better, but that's been the case since Gannett took over 10 years ago and began ruining the place. KCMO, KMBZ, and KNHN may have also felt some effect from talk station KBEQ(AM) (People's Radio Network) and sports station KCTE(AM) ("The Team"), which did not show up in the 12+ numbers.

UNSOLVED MYSTERIES:

* KLZR(FM). The local alternative press raves about the modern rock station located 50 miles to the west in Lawrence, Kansas. The signal, however, is spotty in Kansas City and the station never shows up in the survey.
* KFEZ(AM). Why did this station's share shoot up to 2.2? I think there may be a diary placement problem here.
* KNHN(AM). How does "Mr. Microphone" survive, programming an expensive news/talk format on a station with a bad signal, poor ratings, and studios in a scary part of Kansas City, Kansas? Either someone's sinking a lot of money into this or it has sales people who

can sell refrigerators to Arctic dwellers.

Now that Fuller-Jeffrey, longtime owners of WOKQ 97.5 Dover NH, the 50kw country giant of southern NH and northern MA, have purchased upstart competitor 105.3 WXBB Kittery ME, WXBB's young country format is toast.

Sometime in the last day or two, WXBB got shot with the ARRO. "All Rock And Roll Oldies...ARRO 105.3 FM". No more country competition for WOKQ...and a bit of a threat to crosstown WCQL 95.3 York Center ME "Cool Oldies 95-3" (now duopolized with 100.3 WHEB Portsmouth NH).

And WXBB's former duopoly partner, WWEM 96.7 Rochester NH, is now adult progressive "Mix 96-7". They in turn are now duopolized with WERZ 107.1-WMYF 1540 Exeter NH.

All duopoly all the time...

I have a Denon TU-680NAB which includes a noise blanker. I have
also used communications receivers with noise blankers for
nearly twenty years. I used shortwave receivers with noise
limiters back in the 60's.

In my experience, noise blankers are useful on shortwave when
signals are few and far between when the interference is from
automobile ignition and similar sources. I can't recall any
situation where a noise blanker has improved a signal enough to
make it suitable for pleasure listening for anyone but a
DX-hound.

Longtime country station KGA AM 1510 in Spokane, Washington has changed format to News/Talk, using the slogan "Supertalk KGA".

Since I can only pick up the station at night, programming details are limited.

There's a local news block from 5 to 9 am weekdays, a local general talk show from 3 - 6 pm, sports talk from 6 - 9 pm, and the Michael Reagan show from 9 - Midnight.

KGA really puts out a strong 50K watt signal at night, covering much of the western US.

I'm not sure whether the lack of success by NNIS (NBC News and Information Service) was due to lack of listeners or lack of financial controls. I covered all the 1975 American League Playoff and World Series games in Boston for them as a stringer. Do you know what I made for voicers? $35 a pop twice an hour from 2 hours before the game to 2 hours after. $70 and hour, maybe $400 to $500 a game. As a stringer. In 1975. I was only three years out of college and my regular job as a part time sportscaster in Norwalk, CT was paying me $75 a week. But then of course, it took them about 4 months to pay my invoices. I'm amazed that NBC is still in business, never mind NNIS, based on my experience....

(I've been in medical publishing for over 12 years, so I have no idea what the going rate for something like that would be now--but it still seems like a lot of money by 1975 standards...)

There was a fellow who had a nice voice. His voice was so good that people said, "You should go into radio." Soon he did. He became successful and a few years later bought his own station. He married his childhood sweetheart and had kids. His success grew, how much the people of the town loved to hear his voice. He played "elevator" music and some pop standards, but mostly they tuned in to hear his voice. He cut voice tracks so that he could announce the entire station schedule.

>From 1968 until about 1983, whenever you tuned in 1010 kHz in Delano, California, KCHJ ("The Charles H. Johnes station"), you could hear the melodious tones of Charles H. Johnes himself, announce songs, read public service announcements for the Red Cross, maybe even give a weather forecast. He lived in voicetracks for those 15 years, but only in voicetracks. Y'see, Charles H. Johnes was killed in a car accident in 1968. But his wife couldn't bear to hear anyone else on the radio. So, she kept running his old voicetracks over and over again. This is a true story. I've been there. I've seen it.

gst

********** BEGIN **********

Msg#:38657 *SHORTWAVE*
08-03-94 01:15:00
From: JEFF MILLER
To: ALL
Subj: CAMPING WYFR

ORIGINALLY BY: J.J. HITT in HOLYSMOKE

He's the president of "WYFR Family Radio". A MASSIVE outfit with a few dozen domestic outlets and a =HUGE= shortwave plant (eight 100KW transmitters and two 50KW transmitters) off of Lake Okeechobee in Florida. Most nations of the world don't have transmission facilities that impressive. (In fact WYFR sells time to Taiwan for their 'Radio Free China'.) You can't casually tune across the shortwave bands without hearing WYFR and Camping's voice. They also are on satellite (FM SCPC on Westar 4) and broadcast in Arabic, English, French, German, Hindi, Italian, Mandarin, Portuguese, Russian and Spanish.

All of the above adds up a goodly sum of money. One thing you can say for him is he is not your run of the mill storefront preacher.

As to his beliefs. well, I've heard him tell women who were victims of abuse to stay with their spouse no matter what. I've also heard him spend his entire 90 minute show warning a teenage caller against the 'sin' of masturbation. I've listened to him a lot and I'm not at all certain that he believes in a literal 'Hell' or what his claims of the afterlife are, but he's solidly opposed to divorce under any condition or circumstance.

BOOK REVIEW ORIGINALLY POSTED BY: LARRY SITES IN HOLYSMOKE

WILL JESUS RETURN IN 1994? - THE PROGNOSTICATIONS OF HAROLD CAMPING

A book review by G. Richard Fisher

"We, therefore, should be quite accurate in saying that the New Testament era of sending forth the Gospel officially came to an end on May 21, 1988. ... Thus, May 21, was also the day the 2300 days of the final tribulation were to begin." (1994? by Harold Camping,

pp. 515-516).

The Rapture is post-tribulational, there will be no Millennium and the world will end in 1994, according to Harold Camping, president of Family Radio. His new, 550-page book titled "1994?" is a labyrinth of subjective speculations, private interpretation and numerical guesswork. It was published by Vantage Press, which will publish any manuscript for a fee.

He states his premise on page 533:

"By God's mercy there are a few months left. However, if this study is accurate, and I believe with all my heart that it is, there will be no extensions in time. There will be no time for second-guessing. When Sept. 6, 1994 arrives, no one else can become saved. The end has come."

This book represents all of the strange views of Camping, who is orthodox in the essentials but dogmatizes on many peripheral and prophetic themes. In the book's foreword, he presents his only credentials, that he is "a forty-year student of the Bible." He claims to have discovered clues that establish a "timetable" for events leading up to the second coming of Jesus Christ.

Some of Camping's calculations and conclusions defy understanding. Here are a few examples:

"And 8400 days equals 2 x 42 x 100. Isn't that a strange piece of information? Surely God has interrelated the periods of three and a half days, forty-two months, twenty-three years, and seventy years by the common denominator forty-two." (pg. 237).

"We have learned that this terrible period was typified by the closing experiences of ancient Israel. Thus a period of seventy years could be the time duration of this tribulation. But even more insistently, twenty-three years could be the length of this trauma. We have begun to see that the number 23 is definitely associated with judgment. However, when we analyzed much more biblical data, we discovered that the duration of the final tribulation is in all likelihood 2300 days" (pg 245).

"The priests being 2000 cubits from the people (Joshua 3:4) represents 2000 years from Christ's birth" (page 446).

"The 2000 swine that plunges into the sea point to the year 2000" (page 447).

There is more. On page 489, he writes of 400 shekels pointing to 4,000 years. Then on page 535:

"While there is no biblical sanction for this addendum and therefore it carries no weight whatsoever, there is a curious fact that shows up. During the twentieth century there are only six years that have the unique distinction of having the sum of their

integers adding up to the number twenty three. These are 1949, 1958, 1967, 1976, 1985, and 1994. 1 + 9 + 9 + 4 = 23." He then concludes: "It is indeed curious, and probably not significant at all."

Probably not.

Beside Kabbalistic numerical speculation, the nearest thing to describe Camping's Hermeneutic, is the Jewish term "Pesher." The Dead Sea Scroll Community say most of the Old Testament as prophetic of just themselves. "The Encyclopedia of Jewish Religion" explains:

"The authors of the pesharim believed the Scriptural prophecies to have been written for their own time and predicament and they interpreted the Biblical texts in the light of the acute-eschatological expectations." (pg. 298).

For instance, Habakkuk had little or nothing to do with the coming of the Babylonian invasion. All the words were addressed to the scroll community and was written prophetically about their times. This is not to say that some prophecies do not refer to us but we must be extremely careful since not all the facts and history of the Old Testament are prophetic of today, as Camping supposes.

Another strange speculation of Camping has to do with why there are precise dates and numbers in the Old Testament. He appears to believe that the dating of events in the Old Testament is a prophetic calendar for today. He suggests that the Tribulation is God's judgment on the church and as God judged Israel, so He will judge it:

"The church consisting of congregations and denominations all over the world, will be infiltrated and finally overrun by those who bring false Gospels." (pg. 54).

"Therefore we see very clearly that the temple is the church, the corporate body of believers. It is here that Satan will operate as the man of sin. Thus we know that before Christ comes again, the man of sin (Satan) will take his seat (rule) in the temple (the church, the body of believers) where he will be worshipped as God" (pg. 52).

He then says that the churches of Revelation 2-3 are the churches of the latter days (now) and the synagogue of Satan (pg. 108) and that pastors and elders "will begin to lead the congregation into spiritual adultery" (pg. 109). There is not much hope for the church as the apostasy will be worldwide (pg. 110). "God declares that is will happen, and Satan will rule the church." (pg. 111).

He then interprets Revelation 13:7 and the war with the saints:

"In this revealing verse God assures us that Satan will win in a sense."

There are other dogmatic and divisive statements. He says Daniel 7:25's reference to "changing times and laws" is being fulfilled because churches allow divorce for any cause and permit birth control. He adds to that "the pernicious teachings of free will" (pg. 149). On page 150 he holds that all who believe in a 1000-year reign of Christ in the future do so "because man does not want to talk about judgment day."

Camping goes on to say that "tongues" are Satan's big game plan to destroy the church. Apart from the issue of whether "tongues" are a human/psychological phenomenon, learned or faked, of God, or of Satan, Camping's broad castigations and categorizations are to be deplored. Branding all Pentecostal and Charismatic people as "of the devil" is unfair and wrong.

Camping insists that the antichrist is Satan himself. However, Revelation 13 indicates that he is a "man" empowered by Satan. He twists verses in Revelation to have them say that the tribulation is actually "the absence of physical persecution" (pg. 199). One would never get that from even a quick reading of Revelation and the Old Testament judgment passages.

The final weakness in Camping's system is his compulsion to create facts with Bible numbers. Biblical numerology is a stock in trade for a number of cults. People try to prove all kinds of things by selecting numbers from Scripture and giving them an arbitrary meaning.

For instance, Camping, in his 1974 publication "Adam When?," said that the number 153 (the 153 fish in John 20) stood for the Aaronic priesthood, Christ's priesthood, and the New Testament period. (pp. 277-280). Now, in his book "1994?," he says that "the fish represent the believers who become saved" (pg. 503). So Camping, himself, has changed his mind on what the 153 fish mean. (Another radio preacher says the 153 fish symbolize the United Nations.)

Supposing that numeric patterns give insight into Scripture is a very speculative pursuit called Gematria. Prominent figures associated with this are Ivan Panin, E.W. Bullinger, F.W. Grant, Edwin Hartill, LeBarron W. Kinney and Jerry Lucas. All of these disagree as to the precise meaning of various numbers, showing how subjective it is.

Gematria can be traced to post-Apostolic Greek paganism. Medieval numerology developed into the Jewish Kabbalistic pursuits. Pythagoras and the gnostics are at the root of Camping's system.

So-called "divine numerics" is not a new discovery. It is certainly not a key to deeper Biblical truth. It is a speculative pursuit. Since it is so arbitrary and so subjective as to its methodology, it date not be introduces as a method of interpretation. Its roots are suspicious, its history confused, and its fruit a form of gnostic pride. Bible numerology is no a help, but rather a speculative morass that should be avoided.

3090. Boston's upcoming change on the AM dial

Newsgroup: rec.radio.broadcasting
Date: 1994-08-09 02:37:49 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <326q5t$7g@vixen.cso.uiuc.edu>
Source record: 38646

Accrording to press reports :

American Radio Systems will make a major announcement(the worst kept secret in the city) on Monday, August 15(maybe even earlier) regarding its programming shake-up which will take place on Monday, August 29th :

1. ARS will acquire most of the current all-sports programming and call letters from SportsRadio WEEI AM 590 and will start airing it(including Don Imus' Show) on WHDH AM 850. Also, WHDH calls be dropped and 850 will be known as Sports Radio 850 WEEI. WEEI 850 will air Celtics games starting this season. Red Sox are expected to move to 850 from their current flagship, WRKO AM 680, starting in the spring of '95. Also, ARS is expected to bid for NFL's Patriots rights in 1995. Current Patriots' rights belong to WBZ AM 1030 which is going to put heavy emphasis on sports during its weekend afternoons starting on Saturday, September 3rd.

2. Part of WHDH talk programming(Rush and Howie Carr Show) will move to the sister station WRKO 680 AM.

The new talk line-up which was detailed so well here by our terrific N.E. RadioWatcher, Scott F. is expected to start on Aug. 29th as well.

[WRKO's new PM-drive man will be Herald columnist Howie Carr whose mentor, Jerry Williams, gets moved up(10a-12pm) and cut down in half. Carr is already throwing on-air punches in Williams' direction by refering to talk-show hosts who discuss seatbelt laws on their shows as 'very lame'[Williams is using his show to organize a coalition to repeal current mandatory seatbelt law in Mass.]. It's a good thing that those 2 will be separated by Rush(12-3). I just can't imagine having Williams and Carr back-to-back and doing crossovers at this point of their bitter feud.

71-year old Williams has been doing 2-6 on WRKO since it dropped Top40 and went all-talk in 1981. It marked Williams' return to the market after a 2-year stint in Florida.]

3. There was talk that 590 will be sold off to a religious broadcasting outfit. However, the latest rumors indicate that it'll likely become an all-business radio outlet which Boston market has lacked since Greater Media's failed experiment with WMEX AM 1150 in the early 1990's.

3091. CKDX-Newmarket: good news/bad news

Newsgroup: rec.radio.broadcasting
Date: 1994-08-09 02:37:50 UTC
From: "Niel J. Wolfish" <lobo@io.org>
Message-ID: <326q5u$7h@vixen.cso.uiuc.edu>
Source record: 38647

The good news is (for DXers anyway) that Newmarket Ontario's 1480-CKDX has left the air. The bad news is that it has reappeared on 88.5 MHz FM!

According to Dan O'Connell at the D.O.C., CKDX made the move today (August 8, 1994) and is currently running 60 watts e.r.p. although they have apparently been authorized by the C.R.T.C. to run 700 watts. Their transmitter location is somewhere west of Newmarket, presumably in King Township (where the elevation is higher...). I noted them "testing" last week on 88.5 running the "G.T.O.-Good Time Oldies" satellite program that is heard on all too many Canadian stations these days. During the "testing" period there was silence during the breaks for local spots or IDs. Mr. O'Connell says that they were not authorized to test when I heard them.

Today I listened to 88.5 for 30 minutes and heard the same "G.T.O." programming with the occasional local IDs as follows:

-- "from York Region... we're 88 point 5 FM!"; or
-- "This is the spirit of Ontario, 88-5 FM, The Phoenix!".

No local announcements, or spots. One "national" spot (for a magazine) was heard. At the top of the hour they ran "CTV Radio News". The signal was not audible in downtown Toronto but was about 5 miles north of downtown.

I wonder if anybody in Newmarket knows about the change or even listens/listened to CKDX? They went silent about two years ago, when they were CKAN (which stood for CK-Aurora-Newmarket), and came back as CKDX. CKAN first signed on 1480 in February of 1980 and their signal took a severe beating at night from WHBC-Canton and others anywhere south of their transmitter site (such as in Aurora, Markham, and Richmond Hill).

I was surprised that there are no taped announcements on 1480 telling listeners to "switch their dials to 88.5 FM", especially since they have moved to the "educational" part of the FM dial. However, I gathered from the gentleman at the D.O.C. that they had to abandon their (AM) transmitter site. Somebody can correct me on this, but I think their lease was up. (The site was smack dab in the middle of land that would have made a very profitable subdivision...)

Incidentally, York Region is "served" by at least 3 other stations that program "oldies". Hamilton's 1150-CKOC, Toronto's 1050-CHUM and 97.3-CJEZ are all easily heard in York Region. Well... I guess some people never get tired of hearing Canadian oldies by Edward Bear and April Wine!

3092. COMPUTER RADIO SHOW!

Craig Crossman's Sound Bytes / Computer America - August Radio Schedule

NOTE: Please DO NOT send questions about the show to my address.
See the sig below and the big arrow and note above the sig!

* * * * > WIN "HUNDREDS, EVEN THOUSANDS" IN COMPUTER PRIZES! < * * * *

LIVE SHOW: Come by and meet Craig and his guests and watch the national
Computer America show, aired LIVE every Sunday from Palm
Beach Atlantic College in beautiful W. Palm Beach, Florida!

The national Computer America show is open to the general public
every Sunday from 3 PM to 6 PM! Doors open at 2:30!

Palm Beach Atlantic College is located at 901 South Flagler Drive,
West Palm Beach. Call (407) 835-4338 for details!

SOUTH FLORIDA LISTENERS: Listen to Craig Crossman's Sound Bytes,
"Computer FUN from 11 to 1" Sunday EVENINGS
on Radio Station WJNO, AM1230 and AM1330.

Craig gives away hundreds, even THOUSANDS of dollars in computer prizes
to the ATTENDING studio audience too! Raffle tickets are passed out
to the studio audience (16 years or older) ONLY at the top of the
second hour, at 4 PM. And of course, admission is free and parking is
free. It's ALL FREE! See you there!

READ nationally syndicated newspaper columnist Craig Crossman every
week (locally) in The Miami Herald (Business Monday section) and The
Boca News!

> > > CRAIG CROSSMAN'S AUGUST 1994 PROGRAM LINEUP < < <

August 7 - Removable Storage Devices

Are you always running out of hard disk drive space? No matter how
big the disk, you always need more storage! With a removable hard disk
system, you can have unlimited storage space. When it fills up, insert
another! Among Craig's guests will be APS and IOmega with the latest
in Syquest, Bernoulli, magneto-optical and DAT storage systems.
And one will be given away on this show!

August 14 - Screen Savers and other Utilities

Tired of staring at your screen? Your SCREEN could get tired too!
Screen saver programs save your screen from burn-in. This simple
concept has grown into a major software product! Other related

utilities to demonstrate too! Scheduled guests: Berkeley Systems, Delrina and Access SofTek. Win LOTS of screen saver, wallpaper and utility programs!

August 21 - The Internet

Due to popular demand, another show on this incredible world-wide telecommunications system. Is it right for you? Scheduled guests include Ventana Press (Internet Startup Kit), several Internet experts including Mark Lautenschlager (AGAIN? Heaven help us all!), software publishers, service providers and modem companies!

August 28 - New Operating Systems

If you're tired of plain old DOS, hear Microsoft reveal the latest info on "Chicago" Windows 4.0. Meet Apple with their new System 7.5. See Geoworks with their latest GEOS and new applications! Also, come and meet (if you dare) Special Guest Author, Macintosh Expert and Bon Vivant: Bob LeVitus! (For a BIG tip, Bob might even sign one of his books for you! Just kidding... He'd do it for a small tip...) Yes, LOTS of prizes too!

\ Posted by a Craig Crossman FAN, not affiliated with the radio
======> program, the college, Craig Crossman, his advertisers, or any
/ radio station. (So please DO NOT send questions about the program to me! I don't even KNOW LeVitus, and can't even SPELL Lawt-, uh, Lauten-, uh, Mark.) Please note that all bad jokes in this posting (except for this paragraph) are exclusively Craig's, to prepare you for listening to his on-the-air jokes, which are even worse!

BUT I'll be listening tonight, so, if you call in or fax, tell Craig you saw the schedule on the net -- and where you saw it!

Follow-up postings about the show are welcomed!

>have their share of problems for music.... several major market
>stations have already moved to Hard-Disk, PC based storage
>systems for playback and storage of all recored non-music
>material.

Agreed. Here in Phoenix, I have one station running entirely off of CD jukeboxes and hard disk, and one ready to join it in a couple of weeks. Two others (who are on satellite) use hard drives exclusively.

Failure? Nothing that daily server backups and a good raid system can't solve.

When my company purchased these stations, it walked into studios that had been neglected for 15 years. (not to mention poorly wired...) We had to rebuild.

Given the choice of purchasing the future or buying more analog (and rip it out in less than ten years) we chose to move forward.

I'd do it all over again, too.

>Don't you think the station is right wing enough?

No Jay, I think the station isn't right wing enough. Plus, it would be
nice to have someone come on AFTER Gardner to refute his retoric.

But seriously, Jay, what do you think of the posibility of WFLA having a
daily sports program like they used to have? The Tampa area is a very
sports-minded area. There is a lot to talk about (like bitching about
not having a baseball team, or football team). I know that there are
other sports only talk stations in Tampa that you would have to compete
against but I think that it should be considered.

Also, I know that WFLA has an InterNet e-mail account, any chance that
someone scans this newsgroup from WFLA?

I am looking for a Channel Master Probe Nine (or Probe 9) FM Yagi antenna, model number 4408.

Calls to electronic distributors and MATV systems resellers in Kansas City have yielded no leads. One distributor dropped Channel Master about ten years ago. One MATV reseller told me that the nearest possible distributor might be in Joplin, Mo. but he had no name to call. He also said Channel Master has been cutting back on its distribution network and would not accept direct orders.

Please e-mail any info you might have to me at transvox@tyrell.NET -- thanks.

From: martin@cod.nosc.mil
Message-ID: <326q6i$85@vixen.cso.uiuc.edu>
Source record: 38554

Hi. I still need AM frequency/station lists for four markets:
Oklohoma City, Tulsa, Memphis, and Nashville. I know these listings
are in the M-street directory and the Broadcasting Yearbook, but I am totally
blind and cannot read them. I have heard that the Nashville market has relatively
new stations on 760 kHz and 880 kHz. I would suppose that suburbs of Ok City,
such as Midwest City can be logged from Ok City, but I need a complete
list.
Thanks in Advance,
Doug Martin martin@nosc.mil

Message-ID: <326q6j$8a@vixen.cso.uiuc.edu>
Source record: 38556

Robert Casey listened closely to KBBT's dead air and reported:
>The jock made no mention about being off the air for 45 minutes. And
>he lists some songs he played (and we didn't get to hear) during part
>of that dead time.
>
>Do disk jockeys usually have any real-time indication that the station
>is in fact on the air, and what they are playing is in fact being
>transmitted to the outside world?

A couple times now the stations I've worked for have gone off the air while I was the jock in the booth. At one station, we had no backup transmitter. When our transmitter went down, we'd put on long songs and try to work it back to health. When the transmitter came back up, some music would be going over the air, we'd hear it on our air monitor, and we'd know for sure that yes, we were back up.

At the AM/FM combo I work for now, our policy is that, unless the outage will span a long period of time (i.e., squirrel wanders into power substation and gets fried, killing power all over downtown, and electric company says, "It'll be back up tomorrow"), we are expected to keep going with the format. It can be tough to do on a Sunday afternoon when I'm the only person in the building and I have to put the station back up singlehandedly. Frankly, I've never stopped to ask why we do this!

Peace,
jim grey

From: "Anita L. Miller" <amiller@ADMIN.ALLEG.EDU>
Message-ID: <326q6p$8c@vixen.cso.uiuc.edu>
Source record: 38557

[Moderator's Note; Although not specifically broadcast related, this post seemed appropriate since we were just discussing wire recording recently and because if anyone can assist this poster it is our readers :-). Please reply personally to her. Bill]

I am trying to find out where I could have a wire recording transferred to audio cassette. Can anyone help? My parents' wedding was recorded on a wire recorder, which I am told was once made (or distributed by) Sears.

I have contacted Sears, radio station personnel, and several audio people, but no-one has been able to help--in fact, most people have never even heard of wire recorders. I would be thankful for any leads.

I have been making a video tape of family photos, etc., and I am trying to use old family recordings for the audio portion of the tape, instead of a sound-track.

Please reply to me directly, not to the list.
amiller@admin.alleg.edu

Thanks!

3103. Buffalo/Toronto Radio Watch(8/9)

Newsgroup: rec.radio.broadcasting
Date: 1994-08-10 05:16:51 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <329ns3$t1r@vixen.cso.uiuc.edu>
Source record: 38558

From the #40 market:

*Part(I can't even keep track)of the Am-Pol Eagle v.WGR:The Buffalo News reported last Tuesday(8/2)of a resolution by the Cheektowaga Town Board assailing WGR for airing the infamous skits about Polish-Americans on both its stations. The measure,unanimously adopted by the Board,asked that "Rich Communications...cease such jokes and skits because they offend so many people and are negative in their stereotyping of Polish-Americans." Councilmember Richard Solecki,who along with town Supervisor Dennis Gabryszak sponsored the resolution,said they weren't trying to limit anyone's right to free speech-just that any ethnic humor is inappropriate on radio. Fine. Can we now get to some serious stuff,such as:
-'GR's 1.6 share drop in the last book?
-Rich Michaels' inability to beat WBEN in *ANY* hour of his show?
(His #'s are:10am-6.1 to 5.0,'BEN;11am-7.5 to 5.7,'BEN;12noon-8.2 to 6.1,'BEN; and 1pm-8.1 to 4.6,'BEN-Rush's 1st hour).

*The News' Gusto section ran a cover story on some Canadian radio stations that were sampled to determine how much better they are. It was mistake-ridden(i.e.:1.referring to Classic Rock Y95 as its AM sister station CHML(900),2.calling CHTZ 97.7 Hits FM(it's pronouced that way,but it's 97.7 HTZ FM),3.referring to CFNY as Toronto's Leading Edge(just The Leading Edge),4.getting CHUM's slogan somewhat skewed;it's 104.5chumfm,5.referring to HTZ FM's PD as Randy Taylor-he's just their AM driver),but it showed 2 sample hours from each station. It's too long to type in(I can tell you how to get it),but here's some comments:
-Brian Fukada(asst.MD,Q107):"In Buffalo,either someone's talking on the air or playing a really bad song. Radio's boring as hell there."
-Stewart Meyers(PD,CFNY):"We're guided by the signs we post:'Music Matters.'" The article noted that someone once played Culture Club's Time(Clock of the Heart) at 2:30 in the morning one summer Saturday. A listener called up,wondering why. "Because it sounded right" was the answer.
(BTW,I make no claims as to who's on staff where-I'm just relaying this.)

*Kevin Hosey has some more things to say about WUFX(103.3 the Fox)'s morning team of Ted Shred and Tom Ragan in the August 1 Nightlife: "While most people have been sitting idly,saying nothing about the Town of Darien deciding not to allow heavy metal bands to play at Darien Lake('s Performing Arts Center),the morning jocks proposed suing the town and spent time talking to people who live there. It was funny and made some good points. (FWIW,this referred to 2 concerts-one by Metallica,the other headlined by Pantera-that irritated people living within earshot of the park.)

"Too many of the residents are blaming heavy metal/hard rock bands for causing noise problems;volume is the same,whether it's heavy metal,jazz, country or punk. At least a few Darien residents acknowledged this."
"On the other hand,the Mr.Manly segments,which at times have been hilarious,are now starting to turn homophobic. Yeah,the character's a joke, but targeting homosexuals is old,mean-spirited,vicious and not funny(sorry if this sounds familiar)."

*On WBEN's decision to keep Gil Gross,but drop 1 hour of his show:GM Larry Levite noted in today's Alan Pergament column that forces inside the building and from its listeners was a major factor. He also noted that people just weren't up for King.

*The Globe & Mail recently published the top 1000 Canadian companies in its July issue of Report on Business magazine. Here's how some broadcasters fared(in terms of profits):
-Rogers Commuincations:lost $287 million(why?)
-Shaw Communications:earned $24.5 million
-Standard Broadcasting:lost $1.6 million
-CHUM Limited:earned $14.8 million

FAB...

"Sorry for the delay...there was a tie-up on the information superhighway."

Message-ID: <329ns4$t1t@vixen.cso.uiuc.edu>
Source record: 38559

(Copyright, Pittsburgh Post-Gazette. Reprinted here
by permission. Republication prohibited in any medium.)

The words ``more jazz'' and ``more local programming'' are music to these ears and to those of a town without a 24-hour jazz format. So cheers to WDUQ-FM, which is shuffling its late-night lineup and adding a new local jazz show. ``DUQ After Hours'' is a blend of jazz and blues hosted by Paul Netzel. It airs Tuesday through Friday mornings from midnight to 3 a.m. and Monday morning from 1 to 3 a.m.
``Blues Before Sunrise'' moves up an hour to 3 a.m., and ``CD Jazz'' takes over at 4 a.m. ``Bluestage'' moves to Sundays at midnight.

WYEP-FM has found a new home. The station will relocate its studios to Birmingham Place on South Side's East Carson St. in late September.
The station is currently housed at Chatham College and will double its studio space with the move. It means more room for staff and live-from-the-studio performances, and better technical linkups.
There will be ``no significant'' interruption of broadcasting during the move, according to program director Mikel Ellcessor. Ellcessor also says the recent upgrade of WYEP's transmission system and power increase is paying off. The station has received calls from new listeners in Mercer, New Castle and Youngstown, Ohio.

Locally, there's little radio programming for younger ears. Starting Sunday, WDUQ will pick up ``Rabbit Ears Radio,'' a program devoted to classic children's literature read by well known actors backed up by equally well known musicians. Mel Gibson is the host.
The lineup will include ``John Henry,'' read by Denzel Washington with music by B.B. King; ``The Velveteen Rabbit'' (Meryl Streep/George Winston), ``Pecos Bill'' (Robin Williams/Ry Cooder), and the delightful Grammy-award winning ``The Elephant's Child,'' read by Jack Nicholson with music by Bobby McFerrin
``Rabbit Ears Radio'' will air Sundays at 7:30 a.m.

If you're wondering what you'll do during the looming baseball strike, just be glad you're not KDKA-AM, which as longtime Pirates game carrier will have some extra hours to fill. The station plans to do that with its regular sports talk in the evenings.

KQV reporter/writer Lisa Burns has been chosen as a winner in the
Clairol Mentor program, which recognizes talented young women in a
variety of fields and matches them with mentors who are successful professionals in the same career.
Burns will meet her mentor - Lynn Sherr - this fall during awards
ceremonies in New York.

3106. Re: KBBT Portland had xmitter trouble, off for 45 minutes Aug 6

Newsgroup: rec.radio.broadcasting
Date: 1994-08-10 05:16:54 UTC
From: fybush@world.std.com
Message-ID: <329ns6$t1v@vixen.cso.uiuc.edu>
Source record: 38561

The talk of backup xmitters makes me wonder: Just how backed
up are most AM stations these days? At WBZ we're lucky. We have
two separate AM sites with the following:

45 Newport Road, Hull: Two 50-KW Harris DX50 transmitters. Power supplies
from Hull Municipal electric (default) and diesel generator (backup).

1170 Soldiers Field Road, Boston (studio): One Harris 10kw mono
transmitter. Power from Boston Edison (default) and diesel
generator (backup).

Linking the two sites are not only a microwave STL but also the older
telco lines, which have been left in service just in case.

The only problem we ever had on this was right after the microwave
STL went into place, before the telco lines had been completely
reconfigured as a backup, when the microwave went out and there was
no way to get telemetry signals to Hull to turn the transmitter off.
That has been fixed and can't happen any more.

The station I worked at before this one, a 5kw AM north of here,
had full backup power at the transmitter, but none at the studios.
So when the lights went out downtown, we were off the air even
though the tx site was totally operational. No way to power up
the microwave STL...

-=Scott Fybush - fybush@world.std.com - WBZ Newsradio 1030, Boston=-

[Moderator's Note: When WLUP was powerless, Steve Dahl drove to the
xmitter site (20 miles away) and plugged a mike into a patch panel
there and began broadcasting. A tad rough, but it was great IMHO. Bill]

3107. Why radio is like baseball

(about changes in Boston talk radio)

These changes prove that radio is like baseball. When something or someone fails, keep doing it. And if you can destroy a successful station with your failed pet strategy do it some more. Williams was pummelling Carr in the 12+ numbers for years, which may explain why Carr hated him so much...so you demote the successful act and put the failed one in its place. Limbaugh was being thrashed regularly even by a string of replacement hosts...so replace the replacements with the act they were beating. On top of that, you destroy two other stations enjoying at least some degree of success, tear up people's listening habits and bring back a failed format. Then, on top of it all, you give the one remaining talk station a right-wing cast in a liberal town at a time when right wing talk across the country (including Limbaugh, Liddy and Buchanan as well as all their local clones) just took a horrible beating in the spring Arbitrons, accelerating a three book trend. Brilliant. Does Group W have a mole in top management there? Because it's already clear the one and only beneficiary of all this is WBZ...

Source record: 38564

I am looking for some guidance from experienced persons
on how to enter the field of broadcasting on a part-time basis.

I have repeatedly been told that I have a voice for broadcasting. Usually I
just shrug it off and respond with a courteous "thanks" or "as if I hadn't
heard that before" (highly contextual and dependent on who made the comment).

The bottom line is that I am finally taking this seriously and am considering
broadcasting part-time. Not to step on any toes, but I am happy where I
am (ergonomics consultant) and wish to test my abilities at
broadcasting. My goals are to find part-time work including
promotional announcements, advertisements, narrating, station
calls and general announcing (?).

The problem is, I don't know where to start looking. Should I contact hiring
personnel, program directors, upper management? Should I focus on individual
stations (large/small), mother companies, advertising agencies, marketing
departments of companies who frequently advertise?

I would appreciate any advice you may have.

D. Citron wrote:

>Craig Crossman's Sound Bytes / Computer America - August Radio Schedule
> ..
> ..
> Follow-up postings about the show are welcomed!

The only follow-up comment I have to this posting is that
Craig Crossman is an embarrassment to both the broadcasting and
computer worlds.

In late 1991, I discovered a very good, very informative, very
intelligent program on the Business Radio Network called "Computing Success,"
hosted by Thom Foulkes. Foulkes' program was the first computer-related
show I'd heard that kept the audience's interest through intelligent
discussion and humor. This was a show worth getting up
early to hear (it aired Saturday mornings at 6:00 am in Chicago, with a repeat
on Sunday afternoons).

In late 1992, Foulkes' program left the air when he quit BRN. In
an attempt to fill the slot, the network put in its place "Computer
America," which had the potential for being just as informative and
entertaining as "Computing Success," if not for its host, Craig Crossman.

Not wishing to write off the new show right away, I gave it a chance for a
few weeks; what I heard were bad, sophomoric jokes, Craig taking calls
from listeners and *not answering their questions* (I have three specific
examples of this), and no fewer than thirty-five times an hour these
words were spoken: "I'm Craig Crossman, your computer answer man."
Given Mr. Crossman's lack of touch with the real computing world and
his inability to answer the most basic computing questions, I could
only assume that the term "answer man" was satiric. I stopped listening
after those few editions of the show.

I'd say that I can't fathom how someone like Mr. Crossman remains
on the air, but in the broadcasting business it only takes a microphone
and a few people to listen. I cast my vote by not listening, and
letting BRN and its local affiliate know it.

I admit that I haven't heard the program recently, since we currently
do not have an outlet for the show: in early 1993 the station that
carried BRN (WNVR, 1030 kHz, Vernon Hills, Illinois) was sold, and the
new owners put a Polish-language format in place.

Sorry for the vitriol: when the invitation was given for follow-up
postings on this topic, I couldn't resist.

Here at the campus station for the University of Rochester, we have finnaly moved up and regretfully must depart with our old transmitters. we have 2 working Collins 5kw FM transmitters. Presently they are tuned to 88.5MHz. included with them is the packaged exciter, designed to work with these units. These are great work-horses, that are perfect for an up-and-coming FM College station, or even a small comertial station. They would make excelent fall-back transmitters.

They are currently located in Rochester NY, USA

We need to move these to complete our renovations, so make an offer. further specs are FAX'able on request.

I think the best book about this flamboyant chapter of radio's past is:

"Border Radio," by Gene Fowler and Bill Crawford. Hardcover published by Texas Monthly Press in 1987. There is a softcover version published by somebody else (don't know who, but I saw it at Borders as recently as a month ago). The hardcover has an Eva-Tone sound sheet with it!

Most of the soundsheet is kind of ordinary (too much obsession with Wolfman Jack for one thing) but the snippet of a Rev. Sam Morris sermon on the evils of alcohol is simply *not* to be missed.

The book itself is a great read and the authors have tracked down quite a few people who were involved in border radio.

Wow, with all these changes, even the scorecard is hard to follow. When
I was last paying attention (about five years ago), the following was tru
for Boston AM's...

WBZ was at or near the top of the heap with a full service news/talk format.

WHDH did the same thing and was almost as successful. They were usually
in the top five or so.

WEEI was the CBS all news outlet. They made money, but were't a big factor.

WMEX was a small outlet that took the big calls in hopes of running
oldies on FM. Glen Coligan, whom I worked with many years ago, was the PD.

What happened, and did my memory fail me in a few places?

Here is a press release from the White House.
I downloaded the press release from the PR On-Line BBS in
Maryland at 410-363-0834. I do not work for the U.S. government.

Clinton Names Two To Board Of Corporation For Public Broadcasting
To: National Desk
Contact: White House Press Office, 202-456-2100

WASHINGTON, Aug. 8 /U.S. Newswire/ -- President Clinton
today announced his intention to nominate Frank Cruz and the
reappointment of Henry J. Cauthen as members of the Board of
Directors of the Corporation for Public Broadcasting.

Mr. Cruz of California is chairman and one of the
founders of the Gulf Atlantic Life Insurance Company,
the first Hispanic-owned insurance company in the
United States. He spent fourteen years as a reporter
and anchor for ABC and NBC affiliates in Los Angeles.

Mr. Cauthen of South Carolina is president of the
South Carolina Educational Television Network, a
position he has held since 1965. He is also a former
Vice-Chairman of the Board of Directors of the Public
Broadcasting Service (PBS).

The Corporation for Public Broadcasting is a
private, nonprofit entity, authorized by the Public
Broadcasting Act of 1967, in order to provide high-
quality, educational, informational, and cultural
programming for all Americans. The Board of Directors
sets policies and establishes programming priorities
for the Corporation. To fulfill this mission, the CPB
distributes direct grants for operations and
programming to 340 CPB-supported public radio stations
and 200 public television grantees operating 355
stations in the U. S. and its territories.

3130. Used Broadcast Equipment

Newsgroup: rec.radio.broadcasting
Date: 1994-08-11 17:03:56 UTC
From: mh5260@ARK.SHIP.EDU
Message-ID: <32dlls$mg9@vixen.cso.uiuc.edu>
Source record: 38599

To All-

Does anybody have any sources for used broadcast equipment? If you know
of a company, please E-mail me. I'd like to know their name, fax and voice
phone numbers. I'm looking for things like CD Players, Tape Decks,
Turntables that were made for the broadcast industry.

Thanks,
Mike
mh5260@ark.ship.edu
mh5260@cutter.ship.edu

And I have no connection with Arrow 94.7 in DC, just like the station..

In article <2tp1k9$nvb@vixen.cso.uiuc.edu>, lvbernst@rodan.syr.edu (Lew Bernstein) writes:

In regards to Z89.. we can't quote Arbitron numbers because Z89 is considered a "college" station broadcasting commercial free on the education section of the FM band. But personally I think Z89 takes plenty of younger end cume away from 93Q. How much these numbers affect the ratings is hard to say.. but it's been a Looong time since 93Q was #1 in this market. That probably says something about what impact Z89 is having on the 93Q ratings.

3132. New England Radio Watcher : Arrow 93.7

Newsgroup: rec.radio.broadcasting
Date: 1994-08-12 00:35:24 UTC
From: fybush@world.std.com
Message-ID: <32eg4c$8t4@vixen.cso.uiuc.edu>
Source record: 38581

Changes are coming to WCGY-FM Lawrence-Boston now that American Radio Systems is taking over. ARS already owns:

WRKO 680 (50kw) talk, Red Sox
WHDH 850 (50kw) news, talk -- all but certain to take over the calls and sports format of nominally-independent WEEI 590 at the end of the month.
WBMX 98.5 (full B - 50kw equivalent) hot AC "Mix"

Now they're adding 93.7, and a source reports the entire staff is being fired at the end of the week, and the studios at 33 Franklin Street, Lawrence are being closed. I'm told a new, very small studio has been prepared at ARS headquarters at 116 Huntington Ave. in Boston, and 93.7 will begin operating with a new staff from there next week. The new format: ARRO, the second in New England.

I'm also told that the transmitter will eventually move from its current location in Andover, 22 miles north of Boston, to Middleton, a few miles further south. Right now 93.7's 50kw signal from 430 feet up is only adequate in downtown Boston, and downright lousy to the south. ARS also owns 93.7 WZMX Hartford CT, and may be able to grant itself some interference waivers. But the limiting factor for this signal are Liberty's 2nd-adjacent 93.3 WSNE Taunton MA-Providence RI and 94.1 WHJY Providence. So Middleton may be as far south as they can move it...and that still means a spotty signal over Boston.

As for the format, it launches 93.7 into serious competition with Infinity's classic rocker 100.7 WZLX. Look for some fireworks...

As for WCGY's sister station, 800 WCCM Lawrence, it will stay local for now, but a sale is pending.

Our of curiosity, I was wondering if there were any stations that people knew of that were carrying some or all of the programming offered by the sports network: ASRN.

CBS's WGMP is running it in Philadelphia 24-hours a day (with exception of Phillies baseball) and it's getting killed in the ratins (as it should be to be honest). What I'm saying is... the programming seems to be pretty poor.

Comments? Thoughts?

Houston currently has 3 major local talk shows. We lost the Kathy Whitmire show. This market is huge and could use some new blood with good broadcast talk show skill. Those of you in the talk radio business should try to get AM 700 & 950 to give you a shot!
One owner Dan Patrick owns both our local talk stations and will likely not make changes unless he starts loosing money to the competition, which is non-existent.

Former Mayor Kathy Whitmire - a good show for the issues. She has factual knowledge of how goverment and politics works. She's honest with her opinions, too bad she's moving on.

Roger Gray - This guy's been around too long. He needs to change his style. The attempts at humor on his show are sophmoric at best. He does get some good interviews though. He is also obnoxious to disagreeing callers, which I think discourages them to call in.
Hey Dan Patrick, are you gonna keep this guy around forever?

Former State Senator Mike Richards - Knows how state goverment works and is good at exposing corruption. But he tends to be too partisian and can spend to much time on Democrat bashing without presenting a good case.
He also runs in to trouble with callers who present a good argument against him.
Mike, learn to debate, and become non-partisian on the issues.

John Matthews - Acceptable local show for issues like crime or city hall. But some real shortcomings on analysis of the issues. Quality of the calls is rather poor.
Dan this time slot needs a change!

WKBR-AM 1250 Manchester, NH is back! Bob Bittner is on the air with an easy listening format. I have been monitoring 1250 daily in anticipation of the station going back on the air. I tuned in 1250 last night (Wed 8/10) about 19:00 and listened on and off until it went off the air at 23:00 (I missed the sign off). The music was continuous with the only interruption [that I heard] being the ID at the top of the hour. I tuned in this morning and WKBR was there, so I think the station is here to stay. When I checked 1250 Monday (8/8) there was no signal and I didn't check Tuesday. So the station must have come on either Tuesday or Wednesday. About 8 miles south of Manchester [daytime] WKBR was coming in with about the same signal strength as WGIR. Modulation was not as strong as WFEA (but I was closer to the WFEA transmitter, so that might have affected it). Music sound quality was not quite up to WFEA. I hope that Bob is able to improve the sound once everything is settled and [hopefully] he is able to break even. It would be great to hear WKBR go stereo, but one thing at a time :)

Has anybody else actually listened to this thing? KOMO in Seattle runs it overnight, and I finally stayed up late enough to hear it this week.

It's my opinion that they outdo CNN headline News for superficial coverage.

3140. ANNOUNCEMENT: KCRW World Wide Web Home Page

Newsgroup: rec.radio.broadcasting
Date: 1994-08-12 00:35:40 UTC
From: eamon@netcom.com
Message-ID: <32eg4s$8th@vixen.cso.uiuc.edu>
Source record: 38588
Cross-posted to: rec.radio.broadcasting,rec.radio.noncomm,alt.networks.npr

Hey, y'all ...

I've set up a WWW home page for Santa Monica public radio station KCRW ("NPR's flagship station", as they like to say in the press releases ... ;-) The station is heard throughout southern California -- L.A., Orange and Ventura Counties, Palm Springs, Ojai, Antelope Valley, and Ridgecrest.

In it will be a variety of information about the station, including our current program schedule, lists of recommended albums from our music programmers, the station's Top 20 pop/classical/jazz and Top 60 overall monthly playlists, Harry Shearer's "Le Show" playlists (by popular request, after I announced this page on a local newsgroup), information about KCRW's acclaimed CD release of some of our live performances, RARE ON AIR, and more being added periodically. The info is all there, but it's still under construction as to the look; I want to perk up the graphics and eventually add a little sound, but that's for later.

If you'd like to visit, add it to your hotlist or put a link to it on one of your own pages, the URL is:

ftp://ftp.netcom.com/pub/eamon/kcrw-info.html

The KCRW home page(s) are contained within my own home page that I set up for my roots music radio program (with a Louisiana emphasis) called "Gumbo". This page contains all of my annotated weekly playlists, information on Louisiana and Irish music, artists and venues, Louisiana food and culture, and more. The URL for that page is:

ftp://ftp.netcom.com/pub/eamon/home.html

One more thing ...

Within that page is a link to my Creole/Cajun recipe page, which, according to my access logs, lots of folks hit straight away. So if for you (like me), music and food are overwhelming passions, impress your dinner guests after checking out:

ftp://ftp.netcom.com/pub/eamon/recipe-page.html

Have fun,

Chuck
--
C. E. Taggart \/ eamon@netcom.com \/ KCRW, Santa Monica CA, 89.9 FM

3141. Sports radio comes to Rochester

Newsgroup: rec.radio.broadcasting
Date: 1994-08-12 00:35:40 UTC
From: talk1370@aol.com
Message-ID: <32eg4s$8tj@vixen.cso.uiuc.edu>
Source record: 38589

There's a new sports-radio AM in the Rochester NY market, WCMF-AM/990...confirming a prediction yours truly made in this newsgroup a few months back that sports radio would soon come to the Flower City (although I thought it could be either 'CMF or WHTK/1280 that would go all-sports).
They're going to take an interesting approach, centering on local play-by-play of the AAA International League Rochester Red Wing baseball club, and the Rochester Americans, top farm club of the NHL Buffalo Sabres. (Selected Sabres games will also be carried on the 'CMF schedule, as they were last year.) They'll also have syndicated sports talk from ESPN and other national sports nets, but outside of the Sabres, no major league play by play. (The Bills are on WHAM, the Yankees on WHTK at least until the baseball strike.) 'CMF had been simulcasting their popular AOR FM sister station, and it's possible they may still simulcast the FM's mostly talk/humor Brother Wease Morning Circus (which is a lot like Imus in its overall format). Haven't seen their full schedule or heard them in morning drive since the changeover, and keeping Wease (who actually talks more about sports than Imus on WFAN) would actually fit the format pretty well. Local sports talk will only be heard on weekends at first, although there will be a nightly telephone sports talk show on the schedule some time after the IL baseball season ends in mid-September. Management says that'll probably begin over the winter, but they're probably accepting tapes and resumes now.
This station actually is a forward move for the market. Any time an AM drops simulcasting and offers its own unique format it's a plus for the band and an extra choice for listeners. WCMF-AM is also one of only 3 AMs in the market (the other two are WHAM and WXXI-AM) whose day and night patterns are broad enough to be able to reach most of the population of the market. [The others have to throw their signals so sharply northward during dark hours, including prime morning drive from November thru March, that they are missing most of the suburban areas where the market's population is moving.] So 'CMF-AM has a fighting chance to draw enough share to make it work. The FM, which is #1 12+ without any help from its AM sister now, won't miss the simulcast. TEMPORARY losers could be WHAM/1180, which runs sports talk weeknights, and WHTK/1280, which has Yankee baseball and some syndicated sports talk. The other 2 AMs which are competitive factors in the market, news/talk WXXI/1370 and big-band WBBF/950, aren't likely to see any measurable defections to 'CMF-AM

even in the short run. But we won't know for sure until the fall book comes out in January '95, how much impact it'll have and who (if anyone) will be hurt. I think in the long run none of the AMs will sustain lasting damage, and all the AMs in the market could gain, because SportsRadio 990 could draw listeners back to the AM band and encourage people to browse around and find out about all there is to choose from.
Bob Smith, midday host WXXI/1370 Rochester NY

3142. List of Sports Radio Stations?

Newsgroup: rec.radio.broadcasting
Date: 1994-08-12 00:35:41 UTC

I know I've seen this subject talked about and posted about in the past, but I have neglected to save the results. Does anyone have a list of all-sports radio stations - U.S. and Canada? I check this list relatively often, so if there is one in your area, please let me know.
These are the ones I have so far, so don't bother wasting bandwidth if you see your local station on the list:
WTEM Wash DC 570, WFAN New York 660, KFAN Minneapolis 1130, WGMP 1210 Philly, WIP 610 Philly, WMVP 1000 Chicago, WSCR 820 CHicago, WDFN 1130 Detroit, WSFN 1600 Detroit, WVFM 730 Detroit, WKNR 1220 Cleveland, THE FAN 1430 Toronto, KJR 950 Seattle, WCNN 680 Atlanta, WEEI 590 Boston, WSAI 1360 Cincinnati, KYBG 1090 Denver, Los Angeles WMPC 710, WQAM 560 Miami, KFNS 590 St. Louis, XTRA 690 San Diego??, KTCK 1310 Dallas.
If any information above is incorrect, please let me know also. I'm looking only for large markets - ones that have professional sports franchises (major league baseball, football, basketball, not hockey).
Thanks in advance for your help.

- Pat Coleman

3145. Utica/Rome NY Radio Update

Newsgroup: rec.radio.broadcasting
Date: 1994-08-12 00:35:49 UTC
From: markson@rapnet.sanders.lockheed.com
Message-ID: <32eg55$8tt@vixen.cso.uiuc.edu>
Source record: 38593

Just came off vacation in the Utica & Old Forge area and
have found that:

WWLF 106.7 Copenhagen/Watertown/Kingston is fairly strong
in the Old Forge/Inlet area. It is VERY hard rock (Z-Rock satelite).
I mean REALLY hard rock.

WCIZ 97.5 Watertown is not quite as strong as a year ago. Not too
surprizing as they have supposidly switched from 46KW to 100KW with a
radical cut in HAAT. Perhaps it helps get the signal into the Kingston area.

WXUR 92.7 Herkimer (recently back on the air-was WYUT before going dark
in '91) does not make it into the Old Forge area. It does OK in Utica.
The oldies format seems identical to the one on WODZ 96.1. Seems like
thats one too many.

>>WTLB (1310 Utica 5KW/500w OLD) and WRCK (107.3 Utica 50KW CHR) are being
>>bought by the Radio Corporation...
>A few more short sighted broadcasters like this company will surely "KILL"
>radio in Utica-Rome. You can't win listeners by programming for your own
>personal tastes and constantly changing formats like some other stations
>in the market.
There were several annoyed Hot-107 listeners-it made it into the local
papers. I listened to 107 for awhile. I liked the old format better.
I was [sort of] correct when I mentioned that WRCK might simulcast WTKW 99.5
Bridgeport. In the evenings WRCK simulcasts WTKW with about a 30 seconds
delay. Not sure what you call that!

Speaking of WTKW (haven't heard an ID lately, so not sure if they might
have changed calls), they have greatly inproved their signal into the
Utica/Rome area. That made sampling WRCK/WTKW much easier. In North
Utica, the signal was as good as any other Syracuse FM station. In
Old Forge, it was nowhere near as strong as WNTQ of WYYY (no surprise).

The new Religious station in Utica, WVVC 100.7, seems to put a decent
signal into North Utica. The signal into Old Forge is very poor. Not
sure what the signal sounds like in the car as I was listening to other
things. Most of the music seems upbeat and almost listenable until you
hear the words. WJIV 101.9 (the other religious station in Cherry Valley
is boosting their signal, I wonder if that is because of WVVC!)

Message-ID: <32i770$di1@vixen.cso.uiuc.edu>
Source record: 38516

From the #40 market:

*One of my contacts told me that WGR has let go Bills beat reporter
Jeff Morrison due to financial reasons. He was rehired in March to cover
the Bills. Barry Buetel(who didn't get the WIVB-TV sportscaster job he
auditioned for-Bill Vargus(ex-WWOR in N.Y.C.)got it)will cover the Bills
until hockey season starts up(should be a few weeks with the preseason),
then Darrian Chapman will take over.
Also released was a member of the sales staff and some personnel
at WWWS(1400,business/talk;3WS-Your Money 1400). Smells to me(and this is
only my opinion)like a format change is coming-maybe to talk. Great-this
is *JUST* what the market needs-a 4th talker. :> Both WBEN and WGR fell
in the last book('BEN by 2.6 pts,'GR by 1.6). Could this mean the return
of Don & Mike? Stay tuned....

*About WBNY's Battle of the Bands:it will be on the 21st,NOT the 22nd
(but still on the USS Little Rock at the Naval Park downtown).The bands chosen
for the event are:
-Girlpope
-Jive Injection
-Kindergarden
-Maunder Butterfly
-Snufflufugus
-Suck!
-Tremendo

Last year's winner,A Public Hanging,will also perform.

*Some additional notes on SportsRadio 990:
-Josh Lewin,voice of the Rochester Red Wings,is the program director
(or the sports director,if you will). He'll also host a local show after
the Wings season ends from 9am-1pm on Saturdays. A local nightly talk show
is planned for the near future.
-It's likely that Brother Wease's Morning Circus will be on the
AM side as well.
-The syndicated sports talk will be ESPN(might The Fabulous Sports Babe
get another outlet in the area?),ASRN(American Sports Radio Network-same net
WGMP(The Game)in Philly is on)and Pete Rose's show(which lasted all of a
few weeks in Buffalo).
I think it can succeed. But American Radio Systems(its owners)needs to
heed the advice of a character in an old cartoon:"You gotta have patience,man."

FAB...

3148. San Diego Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-08-13 10:27:45 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <32i771$di2@vixen.cso.uiuc.edu>
Source record: 38502

Here's what is happening in the airwaves of north San Diego County:

Base-a-ball fall out:
XETRA-AM (690, 50kw, U) "loss" of the SD Padres to KFMB-AM (760, 50kw DA) on Tuesday, had the all-sports station talking. Unfortunately, talking like the bad-boy on the block! Lee Hamilton on Tuesday about the re-signing of KFMB: "That is why the Padres are where they are -- bad mangement. We offered $63 million (the last two contracts). They want no part of us; the number two sports station in America. They want no part of me. That's why they're 45-69." [ok Lee, let's see you hit some homers!]

It could also be that the popular sports station from Ensanada to Santa Barbara, has too much sports! In the bid for broadcast rights, XETRA proposed that conflict games go to an un-named Baja California all Spanish station. In north County, the only clear reception from Mexico on the AM side during the day is XETRA and (somewhat) XEXX-AM 1420. The 1420 station carries the Padres in espanol. But the major stopper was XETRA's continuing bashing of the professional baseball team. While the Padres needed the money (XETRA's package was considerably more than KFMBs), they didn't need [or deserve] constant riddling by the sports crew.

[I really thought that XETRA had it in the bag this time; but I believe the owners of the Padres made the best decision for the broadcast rights. All the games will be at a 50kw station; and if XETRA had its way, who knows?]

With the Boys of Summer out for a while, KFMB-AM is planning segements of Padres Talk from 6 - 8 p.m. weekdays until the strike is over. KFMB has also contracted with a computer firm to continue the "season" via PC. The games will be played via the hard-disks, and the results aired on the station. KFMB will not, however, call "fantasy games" like they did in strikes past.

The Escondido Times-Advocate reported in Friday's entertainment section that KCBQ (105.3 FM 29kw, San Diego)plans on playing more rock into their format, to give way to the third classic rock station in the market. 25-year veteran of KCBQ, Rich Brother Robbin was "released" on Monday. Robbin conceived the [oxymoron alert] modern oldies format. He wanted the station to move more towards a pop sound, but GM Bob Huges said, "No." Huges said that research showed that local listnerns want more classic rock.

L.A. notes:
With the strike on, KMPC-AM (710 50kw D-Day, 10kw D-N) Tom Leykis will now air without stoppage from the California A's. Leykis, whos fans are just as vocal, looks forward to head-on with cross town KFI John and Ken.

[effective today, Friday August 12, my e-mail address is: ChrisCarm@aol.com]

Thanks!

ChrisCarm@aol.com Oceanside, California.

From: umar@world.std.com
Message-ID: <32i771$di3@vixen.cso.uiuc.edu>
Source record: 38503

What happened to WEEI? Well, they haven't actually been owned by CBS for about a decade. They were sold in the mid eighties to a right-wing businessman who owned a local chain of pizzerias. WEEI became something of a conservative propaganda voice. Then five years or so ago the Boston Celtics bought the station. Eventually they flung the news format and went to sports talk. Now they've sold out to some folks who appear to be allied to American Radio Systems, owners of WHDH and WRKO.

The WHDH call letters are owned by WHDH-TV Channel 7, which used to own the AM station but sold it to ARS (then known as Atlantic Radio). WHDH Radio has to change calls soon and rumor says will adopt WEEI's call sign and most of its programming. The fate of the 590 station is not clear.

Several months ago there were rumors that Westinghouse, owners of WBZ, would buy WEEI (590 kHz) and WTAG (580) in Worcester, MA, shut down the 590 station and increase the Worcester station to 50 kW. That would have created a fourth Boston AM powerhouse (after WBZ, WHDH, and WRKO). Ten years ago-- perhaps even five years ago-- that would have seriously shaken all of Boston radio, but today most people here listen to FM. A new AM powerhouse would only take listeners from WBZ, WRKO and WHDH, and since WBZ has the most listeners they would stand to lose the most. It is probably better for Westinghouse that they didn't go this route.

So is 590 AM to be thrown to the Christers? That's one rumor. Another has it that 590 will become something like Bloomberg Business Radio in New York.

In any case AM radio in Boston has had its day. There are only so many people who like talk radio in Boston; music on AM is out of the question (at least with current technology). WSSH (1510) is doing talk now. WBUR (90.9 FM) is doing quite a bit of talk. And there's Howard Stern on WBCN (104.1 FM). How many ways can you slice the pie before the business becomes unprofitable?

3150. Boston changes: WBUR< , WODS, WNTN

Newsgroup: rec.radio.broadcasting
Date: 1994-08-13 10:27:46 UTC
From: dschaffe@lynx.dac.neu.edu
Message-ID: <32i772$di5@vixen.cso.uiuc.edu>
Source record: 38504

---I've started a thread in alt.radio.networks.npr about the recent WBUR changes, which I think are great.

---About Tom Doyle and Mike Adams teaming up for WBCS-FM--I'm glad that Austin of Boston is making to AM on WODS, where I think he belongs. Does anyone know who will replace him in the afternoon slot?

---What kind of format is daytime WNTN-AM (1550) airing these days? I've been a sort of beautiful music with vocals, which sounds very generic but doesn't seem to have DJs or ads. The Greek and public affair morning shows are still there, but the Spanish seems to be gone.

Thanks for any info anyone may have.

>WHDH did the same thing and was almost as successful. They were usually
>in the top five or so.

>WEEI was the CBS all news outlet. They made money, but were't a big factor.

>WMEX was a small outlet that took the big calls in hopes of running
>oldies on FM. Glen Coligan, whom I worked with many years ago, was the PD.

>What happened, and did my memory fail me in a few places?

The memory's good. Here's what happened:

WBZ is still at the top of the heap, now with all-news 5a-7p and talk
evenings and overnight.

WHDH is about to cease to exist. After years of ineffective ownership,
the station became a duopoly with ARS's WRKO-680 2 years ago. WHDH has
been through 5 or so morning teams since then...and nothing's
clicked. Even Limbaugh's numbers are sagging. So at month's end,
WHDH is likely to become WEEI-850. See below:

WEEI was sold by CBS in 1982 to "Helen Broadcasting," owned by the
people who own Papa Gino's Pizza. They didn't have the deep
pockets CBS did, and quality suffered for it. Helen sold out in
1990 to the Celtics, who paid top dollar for a sagging station.
News was axed on Labor Day, in favor of all-sports. It finally
began to work with the addition of Imus last year. Then the Celts
sold to Back Bay Broadcasting, widely believed to be a puppet front for
ARS. BBB sold out WEEI's Celtics rights to WHDH, and the Bruins will
move to WBZ in 1995. Now BBB is selling WEEI's calls and format to
ARS. The WEEI format will move to ARS's 850...and 590 will reportedly
be sold and go business radio.

Speaking of which...that's what WMEX tried after abandoning oldies
in 1990. Rod Fritz (later with WBZ, WHP Harrisburg PA, WBZ again,
and now morning anchor on WHDH) was in charge of the local end of
things, and BRN provided most of the product. That went belly-up
in '92, and 1150 began simulcasting WMJX-FM. They're now leased-time
ethnic...mainly Haitian and Spanish.

Scorecards are for sale in the lobby ;-)

N> We all know about, and talk about, Rush. How about a list of who you
N> think is the best unkown conservative talk show host?

One of my favorites is Bill Wattenberg on KGO-810, San Francisco. I'd say he's more conservative than not (except on abortion). In particular, he has a strong dislike for most environmental groups.

Most of his views seem to come from a scientific pragmatism (he is a professor at UC Berkeley), and he is not particularly partisan (i.e. favoring Republicans or Democrats).

I've listened to ASRN and have not been impressed. It it way too much
caller driven (at least when I listened). I haven't had the chance to
listen to ESPN radio much, but I did like SFRN. (I have to be honest, I
used to work for them!). SFRN is much less caller driven, thus you don't
jump topics so rapidly. Now, they do take callers, but they try not to
depend on the phones.

If you are taking about the American Sports Radio Network, then, yes,
a local Albuquerque station carries some of their programming.

Plus it is up on the satellite in analog SCPC format if you don't have
any aff near you that carries it.

>Comments? Thoughts?

What can you say about a network that has a bunch of mid-life-crisis
guys trying to be "hip" as they talk sports? I talk sports with a bunch
of my friends and we never get that dumb and stupid as ASRN and the
One-on-One RN.

I hate sports radio when its national programming - the only sports
radio I listen to is for ballgames and talkshows where callers
call in and ask the coach or manager of their local team questions
about the game or the team -- those are always much more civilized
and don't sound like a bunch of those mid-life-crisis guys.

Robert
roberts@triton.unm.edu -or- roberts@unm.edu
And, yes, I listen to the Phils RN sometimes from satellite...

Message-ID: <32jfud$216@vixen.cso.uiuc.edu>
Source record: 38517

Adult-contemporary KUDL-FM carved out an hour of Friday evening time yesterday (Aug. 12) to launch a talk show aimed at teenagers. The Marion Foundation is cosponsoring a weekly talk show called "the Talkzone Forum," hosted by KUDL morning personality Dan Hurst. Marion Foundation founder Sue Kauffman says the mission of Talkzone is to achieve a partnership among children, parents, and teachers to help teenagers face difficult challenges.

The first Talkzone Forum was conducted off-the-air Thursday night at a local theater. Children and parents switched roles during a question and answer period. Parents asked the kinds of questions they thought kids would ask, and the kids tried to answer the questions the way they thought their parents should answer them.

The Talkzone radio show is regularly scheduled for Sundays at 8 a.m. on KUDL.

****

For those of you keeping score, add this number to the recent 12+ Arbitron listings: KBEQ(AM) (Talk, People's Radio Network), 0.8. This is the station's first book as a talk station. This boosts the share of news and talk stations 12+ in the Kansas City market to 10.0.

Other talk stations in the market (all AM) are KMBZ (Bonneville, Limbaugh, news orientation in AM drive only), 4.5 12+ spring 1994; KCMO (Bonneville, Leykis, no news orientation), 3.7; KNHN (local, CNN/Mutual, some news orientation) 1.0; KCCV (Bott, right-wing "Christian"), not listed.

****

How will the baseball strike affect local Royals outlet WDAF(AM)?

61 Country GM Herndon Hasty told the Kansas City Star yesterday (Aug. 12) that "we have to put our entire sales effort on hold" pending the outcome of the strike.

Hasty would not give the newspaper specific figures regarding revenue losses but, he said, "the words 'substantial impact' would be the best way to put it."

The strike also ends simulcasts of WDAF programming on the 67 kHz SCS subcarrier of KYYS(FM), which co-owned WDAF uses to relay the games to remote talk-show sites.

****

A note for TV/FM DXers: on September 12, WDAF-TV (channel 4) will switch affiliations from NBC to Fox. The NBC affiliation will move to the current Fox affiliate, KSHB-TV (channel 41).

WDAF-TV ("NewsChannel 4") plans to fill some of the holes in its schedule with more news (7-9 am, 5.30-6 pm, and 9-10 pm Central time), but programming for the afternoon block from 1-3 pm and the late night time period still has not been determined. KSHB ("Fox 41") will be moving its lone newscast from 9 pm to 10 pm.

This is the first affiliation switch in the Kansas City market
since 1954 (not counting the 1967 switch of St. Joseph's KFEQ-TV (now
KQTV) from CBS to ABC).

In NY we have "The Computer Show" which is sponsored by the NY Amateur Computer Club. It is on WBAI/99.5, Wednesdays at 9PM. There has been talk of trying to syndicate it to other Pacifica stations for a while, but that hasn't happened yet. Topics cover about 70% software, 30% hardware across all platforms and particular job specifications. They are not ashamed to take a "newbe" question or talk the caller through a basic explaination.

Immediately following it at 10PM is "Off The Hook", which is hosted by Emanual Goldstein, the editor of "2600", the hackers magazine. Various computer topics manage to get mentioned on this program that is mostly about telephone communiations.

On shortwave we have "Spectrum", Saturday nights at 10PM Eastern time over WWCR/5810kHz, also on WFIF/1460, Florence, NJ, (Philly market). Although basicly about radio communications, it has gone into digital communications as a topic on more than one occasion. The producer is an independent computer consultant and Unix guru.

I wonder if he's typical of the right wing. He's notoriously racist, bashing the Japanese and Mexicans at every turn, and suffers from the Rush-like propensity to ignore facts, especially about the environment, the impact of immigrants on California's economy, etc. He scores very well in the Arbs and has a nice voice, but I don't like him as a talk host because he tends to yell at callers and cut them off when they disagree. I think this is bad form.

Incidentally, I've gotten some mail from people who couldn't understand how I could "support" G. Gordon Liddy. I don't. I think his views are stupid, for the most part, and self-serving in the long run. Such responses as "I was only following orders" in regard to his political espionage against the Democratic Party and his "dirty tricks" campaign make him scum. However, PURELY as a talk host, and ONLY as a talk host I like him.

(on WRC changes/trends)

It's interesting and encouraging to note that WRC may be starting to gain...Washington needs a quality competitive talk outlet. However, I have to wonder if not fielding a strong local competitor for Rush Limbaugh isn't going to hold 'RC back. Word is you've dumped Buchanan for a syndicated shrink...is that really going to attract an alternate audience? Or are you going to use that to mark time (and blow out what's left of the Buchanan audience) until the decision is made to go local, maybe when 'RC finally gets that 50-kilowatt transmitter on line in the late fall? Inquiring minds in the talk radio world want to know....

Robert O Landry (umar@world.std.com) wrote:

: The WHDH call letters are owned by WHDH-TV Channel 7, which used to own
: the AM station but sold it to ARS (then known as Atlantic Radio). WHDH
: Radio has to change calls soon and rumor says will adopt WEEI's call sign
: and most of its programming. The fate of the 590 station is not clear.

And that's only part of the story. In one of the few times ever that the FCC has yanked a TV station license, it pulled WHDH-TV's license for channel 5 (I think still WCVB today). As I recall it was because of failure to serve the public interest and failure to be "candid" in its dealings with the FCC. This action SO scared other broadcast people that things such as "free speech messages" and other highly visible public affairs-type offerings spread wildly across the country, lest any other station have its license lifted for failure to serve the public interest.

Message-ID: <32n0o2$s24@vixen.cso.uiuc.edu>
Source record: 38525

There is a station in Atlantic City that appears to be going to a AAA format. The station is billing themselves as New Rock 102.7, but the music is much more mellow than Modern Rock. Right now they are playing a very short list of songs with no commercials.

Interestingly, on 8/7 they were playing nothing but old Monkey hits, and using liners like "Just when you got used to Sonny and Cher, we changed the mix and now we're Monkeying around", and "Your radio isn't broken, we've just lost our minds". On 8/8 they started running King Biscuit Flour Hour, and Rock Over London shows non-stop for about 3 days, and then they started a short list of AAA type songs (Counting Crows, Indigo Girls, REM, Cranberries, and quite a few I don't recognize.)

I don't live in the Atlantic City area, but I'm very interested in following what this station is up to.

OOps.. I guess I misread what you meant. I still like it!

>
> How much are they charging, and how big is your market? And have you
> gotten any kind of listener response yet?
>

I can't really say how much they are charging (I know it is a lot, but I
don't have exact figures). The GSO-WS-HP-BUR market is number 43, I
believe.

We got some TV press during the change over from 'Beautiful Music' (VERY
VERY LIGHT AC) to the news format. So far, positive. People seem to like
the ability to tune in/out quickly and grab the headlines. We've only had
it on since Aug 1, so no ratings are available yet.

From: fybush@world.std.com
Message-ID: <32n0qp$s71@vixen.cso.uiuc.edu>
Source record: 38528

I haven't had a chance to see what absolutely everyone's doing,
but here's how the Strike has affected a few of New England's
biggest broadcasters:

Red Sox flagship WRKO-680 Boston has taken on the complete Pawtucket
Red Sox (International League) schedule. The PawSox' usual network
consists of:

WARA-1320 Attleboro MA (flagship)
WOON-1240 Woonsocket RI
WPEP-1570 Taunton MA
WSAR-1480 Fall River MA
WHJJ-920 Providence (most but not all games)

To this have been added many, but not all, Boston Red Sox stations.
In addition to WRKO, I've heard PawSox games on WKOX-1200 Framingham MA.
WGIR-610 in Manchester NH is not carrying the PawSox, they were doing
some kind of talk last night. WPRO-630 in Providence isn't carrying
them either, probably because WHJJ and WARA have the area sewn up
already. And most interesting, WHYN-560 Springfield is picking up
the games of the Class AA Eastern League New Britain Red Sox, whose
usual network consists of flagship WCNX-1150 Middletown CT. The NBSox
are of particular radio interest, because color announcer Don Wardlow
is blind! I've seen and read several features about Wardlow...he
seems to be a very ambitious guy who deserves to go far. And he and
his partner sound pretty good on the air.

As for me, I'll continue to tune in my Rochester Red Wings on
WCMF-990 Rochester NY...and hope their games might get picked up
by parent team Orioles' flagship WBAL-1090 or WTOP-1500.

[I haven't checked yet to see what the Red Sox Spanish network,
which is WROL-950 Boston, WRIB-1220 Providence, WACE-730
Chicopee/Springfield, and WCCM-800 Lawrence, is doing.]

Source record: 38529

mikedow@gate.net (Mike Dowling in WPB) writes:

>Wow, things are truly changing in Boston. Can somebody give me a short
>history of WMEX? Where were they in the glory years with Arnie
>Ginsburg? What happened to those calls?

WMEX started back in 1934, with 5kw on 1470. The big switch of 1941
moved them to 1510, where they remained for the rest of their career.
The WMEX that Bostonians remember best was the top-40 incarnation that
lasted from the late 50s until the mid-70s, with DJs like Arnie "Woo-Woo"
Ginsburg. In 1975, WMEX went to a news-talk format, with newspeople
like Diane Stern, Anthony Silva, and Bill Lawrence, all of whom now
work at WBZ. A year or two later, the calls changed to WITS "Weather-
Talk-Information-Sports," and the station became all-news. It was
even the Red Sox flagship for a few years circa 1978. In 1981, the
transmitter was relocated from Quincy to 411 Waverly Oaks Road in
Waltham, now with 50kw. A year later, the station became WMRE, with
big-band standards. WMRE went under around 1986, and 1510 was dark
for a year or two. It returned as WSSH-AM, co-owned with Noble's
WSSH-FM 99.5, and playing big bands again. In 1989, WSSH became
WKKU, "Country 1510", went stereo, and even carried the Bruins for
a year. It was too late, though, and a year later WKKU reverted to
WSSH-AM, simulcasting 99.5 FM. By 1991, 1510 was leased time Spanish.
Then the leasers defaulted, and 1510 went dark again before being
revived as a full-time outlet of the Talk America Radio Network.
It's still there...but nobody's listening. Arnie went to WXKS-FM
"Kiss 108" when that station started up in 1979. He's still there in
a management capacity.

> What was the "new" WMEX and does anybody have those calls today?
>Is anybody playing music (in English) __anytime__ on Boston AM? What of
>WRKO? Are they still tralk and Mutual?

The "new" WMEX showed up in 1985, when Greater Media bought the
former WHUE-AM 1150 and paired it with its WMJX-FM 106.7. WMEX
revived the oldies format, but never had the critical promotions
base to take off. In 1990, the format changed to business from
the Business Radio Network. That lasted a year, and then WMEX
began simulcasting WMJX-FM 106.7. The simulcast flipped to WBCS-96.9
when Greater Media put that station on the air in 1993. After a
month or two of that, WMEX went leased-time...mostly Spanish and
Haitian Creole. Ironically, the Spanish broadcasters, Radio
Continentale, are the same ones who allegedly stiffed WSSH-AM!
1150 was briefly silent this morning after a lightning storm,
and returned tonight with a simulcast of WBCS again. We shall see

what's happening there...

Music on Boston AM? Bob Bittner's WJIB-740 (250/5 watts, x-WWEA, x-WLVG, x-WCAS, x-WJIB, x-WXHR, x-WTAO) is 24 hours of easy listening, in stereo when they're on the 250 watt daytime tx. Salem's WESX-1230 and Quincy's WJDA-1300 simulcast satellite nostalgia during the day. And when WRCA-1330 in Waltham (x-WDLW, x-WHET, x-WCRB) can't lease its time, it plays some GREAT jazz!

WRKO is all-talk, and news is now from NBC. Which is the same as Mutual anyway...

> Finally, Scott mentioned Howard Stern on WBCN. What happened to
> Oedepus?

Nothing! He's still PD and still hosts "Nocturnal Emissions" Sunday nights. Charles Laquidara is still on in AM drive, Mark Parenteau in PM drive, and Howard is on 7pm-midnight, where he's become a solid #2 behind WBZ's David Brudnoy.

Source record: 38532

Speaking of affiliation swaps (and my apologies to Bill P. for posting slightly off topic here...)

I'm looking for people in cities that will see affiliation swaps this fall to tape any programming that might relate to the swaps. When WROC-TV (NBC) and WHEC-TV (CBS) in Rochester switched affiliations in 1988, each station did a special about the swap, and I have it all on videotape. I'll be doing the same thing here in Boston on January 2, 1995, when WBZ-TV (NBC) and WHDH-TV (CBS) swap. But I'd love to find people in cities such as Detroit, Philadelphia, KC (Mark?), St Louis, Tampa, Phoenix, Dallas, Austin, Green Bay, Bay City/Saginaw, Birmingham, and anywhere else affiliations will be swapped, to tape programming for me. I'm most interested in cities like Tampa and Phoenix, where new ABC affiliates will have to start brand-new newscasts!

I'm happy to trade for copies of the Boston and/or Rochester swaps, or I'd gladly provide blank tapes and postage. Please e-mail me if you can help me capture this big moment in broadcast history!

Thanks...

From: robert@manukau.ac.nz
Message-ID: <32n0t7$sc0@vixen.cso.uiuc.edu>
Source record: 38534

We have just installed an SCA on an FM ststion as a trial, and intend to
operate it on a full time basis.
The operators will be a partnership between the station owner and the
station engineer.
Now we have the technology here are the questions we don't have the
answers to.
1) What we can get per subscriber for a music service.
2) How much per subscriber we should pay the station.
3) We have music licencing covered, and hardware costs for Decoders
and installs.
No one else in the market has SCA The MUZAC company is on tape, and another one distributed via TELCO line.
Do we pay the station a % of annual revenue, or a fee per subscriber.
We are keen to learn as much about this as possible beforte we sign any customers.
What sort of commission should we pay per connection/client.
How do we stop pirates?

Appreciate direct replies as well as replies to rrb. Thanks.
Robert Jeffares.
Communication Consultants

Source record: 38537

Two items of interest this morning:

* Radio talk show host Steve Shine, Allen County GOP chairman, has local media watchers wondering if he should be broadcasting, despite his political beliefs. Shine says his show is merly a hobby, citing the fact that he has been on radio since age 10 (he is now 41.) He is not concerned, and neither is WGL 1250 AM and 94.1 FM, the station on which his show is heard Tuesday mornings. Apparently, most people don't care, saying they don't expect objectivity from a talk-radio host.

* Decatur, Indiana has a new/old radio station. WADM, AM 1540 started broadcasting again last month under new management. Wells County Radio Corp. has agreed to purchase the station and is currently leasing it, pending FCC approval. The station is currently carrying a simulcast of Wells County Radio's other station, AC WNUY, 100.1 FM in Bluffton.

Well, that's all for this morning. See Ya!

Date: 1994-08-16 06:56:01 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <32pnu1$f4s@vixen.cso.uiuc.edu>
Source record: 38538

A couple of weeks ago or so, you "heard it here first" -- the sale of KZMO(FM), California, Mo. to Brill Media.

M Street Journal has now reported the official announcement of the sale of the upgradable FM at 94.3, but missed a couple of items and got one thing wrong (an unusual lapse on the part of an otherwise terrific newsletter).

Brill owns KLIK(AM) and KTXY(FM) in Jefferson City, Missouri's state capital. M Street correctly reported KLIK's format as country and incorrectly reported KTXY's format as hot AC. KTXY has been an album rock/classic rock hybrid for a year.

Word on the street in mid-Missouri is that KZMO(FM) will either go to a country format to compete with Columbia's KCLR(FM) or will simulcast KLIK, again, to combat KCLR, "Clear 99," the runaway ratings leader in both the Columbia and Jefferson City markets.

KZMO(AM), a daytimer at 1420 kHz, is not a part of the sale. It has been silent since July, and is not expected to return to the air.

(Note: KCLR is licensed to Boonville, with studios in Columbia along with duopoly partners KTGR(AM) and KCMQ(FM), which are also country stations.)

Well I guess August is a good time to go on vacation. While I was away not much happened in radio in and around the nation's capitol.

WPGC FM 95.5 (Urban format) has officially promoted Albie Dee to afternoon drive from his evening shift. Dee has been at the station for about 7 years and had been filling in the afternoon slot since Mike Love left in June.

WARW FM 94.7 (ARROw format) has hired Laurie Spencer to do morning news. Laurie will also handle public affairs director duties. She replaces Rich Johnson who was filling in since Beverly Fox left the station in May to join WGAY FM 99.5 (Soft AC format).

As mentioned in a few posts in AIRWAVES, WWRC AM 980 (Talk format) pulled the plug on conservative talker Pat Buchanan earlier this month. New program director Gary Burns said he didn't want to fight a losing battle. Buchanan aired in the same time slot against Rush Limbaugh on WMAL AM 630 and G. Gordon Liddy on WJFK FM 106.7 and couldn't beat either one of his competitors. For now WWRC is filling Buchanan's old slot with network talker Dr. Laura Schlessinger.

Evergreen Media, owners of WTOP AM 1500 (All news format) and WASH FM 97.1 (AC format), promoted Tom McKinley to executive vice-president of the Washington market. Mr. McKinley has already made some inside changes including promoting WASH's director of sales, Mark O'Brien, to general manager. The move will allow Mr. O'Brien to concentrate on WASH while Mr. McKinley will focus most of his attention on WTOP's day to day operations.

Hi Radio Freaks,

I'm working for Keizerstad 97.7 FM, a dutch radio station. We are planning an Sunday Morning Program (08:00 - 10:00), we need some items! Please give us some clues for items which are good for an sunday morning program. What items do yo have at your station, can be all items which you have during the day. Please help, the new season starts in 2 weeks.

Thanks Patrick.

>by parent team Orioles' flagship WBAL-1090 or WTOP-1500.

Doesn't look like it. WBAL's O's Radio Network carrier was quiet
tonight -- either the RW's are not playing or they are not being
carried over the network.

And the WBAL situation is very consistent with what I've found. On
a check tonight (Monday evening) on all the satellite flagship stations
I can get, I have found all of them with normal programming with the
exception of WBAP. WBAP was playing "the best Rangers games" -- taped
some other times. I think tonight's was Kenny Rogers' perfect game
from a few weeks ago, but I didn't stick around more than an inning
or two.

Looks like many major league broadcast flagship radio stations won't
be carring many minor league affiliate games (well, at least not
over the satellite to the whole baseball network). KABC carried some
AAA Albuquerque Dukes games this past weekend, but I didn't find them
going out over the satellite to all the Dodgers affiliate stations.
WRKO appearst to be the exception rather than the rule.

>[I haven't checked yet to see what the Red Sox Spanish network,
>which is WROL-950 Boston, WRIB-1220 Providence, WACE-730

good idea. I'll have to listen tomorrow and see what WROL is up to --
they are up on satellite also.

3189. The Big Switch in Boston

Newsgroup: rec.radio.broadcasting
Date: 1994-08-16 06:56:10 UTC
From: fybush@world.std.com
Message-ID: <32pnua$f53@vixen.cso.uiuc.edu>
Source record: 38544

It's official...and since you can't tell the players without a scorecard, here's the scorecard:

590 (5kw day/night, very directional N/S) Owner: Back Bay Broadcasting, believed to be a front for American Radio Systems' interests. NOW: WEEI Sports Radio -- Imus 5:30-10am, Dale Arnold 10am-2pm, Eddie Andelman 2p-6pm, syndicated sports 6pm-5:30am. Bruins' play by play for one more year (after which WBZ takes over), Boston College football. WILL BECOME: WBNW Business 590 -- Bloomberg Business Radio 24 hours, except for the Money Experts local talk show 9am-noon. Bruins games stay here for 1994-95.

680 (50kw day/night, null towards Toronto) Owner: American Radio Systems. Now: WRKO -- talk radio: Clapprood and Whitley 5:30-10am, substitute hosts (Tom Leykis' old slot) 10am-2pm, Jerry Williams 2-6pm, Dick Lutsk sports talk 6-8pm, syndie talk 8pm-5:30am. WILL STAY: WRKO -- Clapprood and Whitley 5:30-10am, Jerry Williams 10am-12noon, Rush Limbaugh 12-3pm, Howie Carr 3-7pm, syndie talk 7pm-5:30am. Red Sox rights (assuming the strike ever ends!) stay with WRKO.

850 (50kw day/night, directional N/S) Owner: American Radio Systems. Now: WHDH -- news/talk: News All Morning 5:30-9am, The Money Experts 9am-noon, Rush noon-3pm, Howie Carr 3-7pm, syndie talk 7pm-5:30am. Had acquired Celtics rights from WEEI-590 for 1994-95. WILL BECOME: WEEI Sports Radio -- Imus 5:30-10am, Dale Arnold 10am-2pm, Eddie Andelman 2-6pm, syndie sports 6pm-5:30am. Celts will stay on WEEI-850, and Boston College football will move here from WEEI-590. Red Sox could move over from WRKO for 1996, and they're already promising a fight with WBZ for Patriots rights starting in Fall 1995.

This whole deal started this past winter, when Back Bay Broadcasters, headed by WARA/WWKX (Attleboro MA/Woonsocket RI) owner Peter Ottmar, bought WEEI-590 from the Celtics. There was speculation, never proven, that ARS provided the money for the deal. Ottmar immediately sold the Celtics rights to ARS-WHDH, and the rumors of a WEEI move to 850 began in earnest. Now it's happened. On paper, what's happening is that American Radio Systems is buying the WEEI calls and format from Back Bay Broadcasters for an undisclosed sum. All of WHDH's current programming is being relocated to WRKO-680 or WBNW-590 except for "News All Morning," which

is being cancelled. The WHDH news staff is being laid off, except for News All Morning anchors Pat Carroll and Rod Fritz, and afternoon anchor Listo Fisher, who will move to WRKO. The new WEEI-850 will apparently continue WEEI-590's use of Metro Networks for news. It's possible some of the laid off WHDH staffers might find work at WBNW.

Also up in the air is the fate of Zapis Communications' WVEI-1440 Worcester (5kw day/night), which is LMA'd to Back Bay and simulcasts WEEI-590 into the Worcester market, 40 miles west of Boston. The 850 signal is no better than the 590 signal that far west, so perhaps WEEI-850 will keep LMA'ing WVEI. Or maybe it will be LMA'd to WBNW.

Unanswered as well is the fate of CBS Radio News, which had been with WHDH for about a year. WRKO had been CBS since 1990 (before that it had been on onetime CBS O/O WEEI), so perhaps the CBS affiliation will return to WRKO, which is currently using NBC Radio News in an occasional capacity.

So who wins and who loses? Back Bay Broadcasters loses in a big way. WEEI-590 was drawing decent ratings towards the end, despite a cruddy signal. Imus was picking up WEEI's numbers substantially. Given that Bloomberg has been unable to pick up more than a 0.3 share on flagship 50kw WBBR-1130 New York, it's doubtful they'll do any better here. But then if Back Bay is just a front for ARS, that's exactly what they'd want to happen to 590 now that they've gotten what they wanted all along: the WEEI programming. Ottmar is putting up a brave face; he was quoted as saying Bloomberg has "done well" in New York. Odd definition of doing well. WBBR has been worthwhile to Bloomberg because he can afford to run it at a loss to promote his computer service. WBNW can't afford to run a similar loss.

ARS wins, in that they're taking 3 stations which each had serious weaknesses, and distilling them into 2 stronger stations. The new WRKO-680 will be Boston's only local talk outlet during the day, and with Jerry Williams and Rush Limbaugh plugging the midday hole created by Tom Leykis' departure, the big weakness in 'RKO's lineup will be filled. Jerry and Rush are both sinking, but they'll keep WRKO afloat for now. Howie Carr will move over from WHDH at 3-7pm, and without the competition with Jerry, should do well. The new WEEI will be a much stronger sports station than the current incarnation. They'll have the Celtics and BC football; they're likely to get the Red Sox; and they could get the Pats back eventually. And while the claims in the media that the 50kw signa on 850 will "reach ten times farther" than the 590 5kw signal are obviously ridiculous, the 850 signal is at least superior to 590 in the western 'burbs.

And Westinghouse's WBZ (50kw day/night, directional with a null over the ocean, news 5am-7pm, talk 7pm-5am, sports news weekend afternoons, Patriots football, Bruins hockey starting 1995) will likely be a winner too. Now WBZ competes against WEEI, WRKO, and WHDH, all of which show up at around the same spot in the ratings (low top-10 or lower). After August 29th, WBZ will just have WRKO and WHDH to compete with, since it's unlikely Bloomberg will be any more of a competitor here than in NYC.

Kind of sad, actually...we're losing a call (WHDH) that's been in the market since 1925 [although WHDH-TV continues under different ownership], and we're down to 2 major AM owners and 3 major AM stations. And this is a top-10 market!!!

D-day for the switches is August 29. I won't be here...but I will have tapes one way or another to trade.

3190. Radio "down under"

Newsgroup: rec.radio.broadcasting
Date: 1994-08-17 23:26:36 UTC
From: gcairns@mtpost.apana.org.au
Message-ID: <32u6bc$76l@vixen.cso.uiuc.edu>

In <9406132258.AA34544@deja-vu.aiss.uiuc.edu> rrb@deja-vu.aiss.uiuc.edu (AIRWAVES E-PUBLISHING) writes:
>Hi.

Errr... G'day

>We would be most happy to recieve RadioWatcher reports from Australia.

Guess who's been slack :(

A bit of background to start off:

Radio started here about the same time it did in the US - with sealed-unit wireless sets (ie they were preset to a single station). The radio stations made their money from the sale of the sets: but that was not terribly succesful :)

We then started to see two types of radio (both on the AM band, BTW):
Commercial (like that in the US) and
National (like the BBC in Britain).

That situation continued until the early 1970s when community groups started to lobby for a third sector: volunteer stations run by & for the community, providing alternative programs (similar to the college / public stations in the US, and community stations in the UK). These stations were
(a) forbidden from advertising, and
(b) primarily on the FM band.

In the late 70s, the Commercial sector began pushing for access to FM - and in 1980 (if memory serves me correctly) the first Commercial FM stations opened.

Initially they were restricted to one or two per capital city (ie less than 10 in total) - and they quickly gained the top spots in the ratings. SAFM, for example, was the only Commercial FM station in Adelaide - and achieved around 50% of the audience in a 6-station market!

About 5 years later, the Government started allowing FM stations in "regional" markets - with existing stations given the first option on the new "supplementary" licences. In most cases that meant one new station - but in Canberra, which already had two commercial stations, they got two :)

They, too, achieved better ratings than their AM forebears.

With me so far?

Now is where it gets messy! In 1990, the Government decided to allow even more FM stations - up to two more in each major city. They allocated the

licences on an auction system - which saw some stations paying up to $30-MILLION for the licences alone. This at a time when 30% of commercial stations were losing money.

The licences were only available to existing AM stations - and they had to leave the AM band and hand their transmitter equipment over to the federal government - who use them to broadcast parliament (congress to those of you on the other side of the Pacific).

The result was predictable, if disheartening. Many of the new players were undercapitalised, over-geared financially, and have failed to make any significant inroads.

As an example, in Adelaide, 5DN (my former AM-talk which was acheiving 12%) turned into 102FM (music - primary demographic 25-39 female). It bombed.

In fact, in the first survey after I left, it got 1-point-3 percent. Wags quickly renamed it one-or-two FM.

At the same time, 5KA (a teenybopper AM) turned into KAFM, and similarly failed (although not quite as spectacularly).

While all this was going on, the national broadcaster (remember them?) was getting high-powered FM transmitters all over the country, and setting up a separate "youth network" which is making big inroads into the 10-15 and 16-25 groups.

And, to muddy the waters even more, community stations are now allowed to advertise (although it's called "promotional sponsorship") - turning many of them into quasi-commercial operations - but with _significantly_ lower overheads.

What this has meant is ever-shrinking margins for stations, and ever-more reliance on satellite services, "safe" <but boring> formats and fewer staff.

Not a good time for commercial radio in Australia, methinks!

Hope this has been of interest.

Regards

Graham C

Source record: 38546

And underneath the loud noises from WEEI/WRKO/WHDH undergoing cold fusion...there's some other news to report as well:

Harvard University's WHRB-FM 95.3 (3000w @ 110', and yes that's commercial!) has traditionally been a dead carrier from the end of Harvard's session in June until September. They don't turn it off because they lease a subcarrier year-round. As of last week, their main carrier is now active with a simulcast of UMass Boston's WUMB-FM 91.9 (660w @ 205').

Up in Manchester NH, Bob Bittner has put his WKBR 1250 (5000/5000w, DA-2) back on the air, with automated easy listening.

In Turners Falls MA, (the Greenfield area), WPVQ 93.9 is on with satellite country.

Still no sign of the new WCRN-830 Worcester.

3192. WOWO News and Commentary

Newsgroup: rec.radio.broadcasting
Date: 1994-08-17 23:26:39 UTC
From: SBK1230@aol.com
Message-ID: <32u6bf$76v@vixen.cso.uiuc.edu>
Source record: 38547

The "M Street Journal" reported in their August 10 edition that the WOWO sale will take several different turns. First Inner City will get what they want (*#*#*#) the ability to reengineer the blowtorch to a pilot light and give nighttime service to WLIB but here's the twist. They will sell WOWO to Jacor Communications who will then trade it for Pathfinders
WPPT Cincinnati. The Net result will be a four station duopoly in Fort Wayne for Pathfinder WOWO, CHR-WMEE, and Country-WQHK am & fm and a full complement of four stations in Cincinnati for Jacor.

Although I am not a resident of Ft. Wayne or can listen to WOWO this was a interesting case of radio enterprising. I honestly think this move by Inner City destroys a special station but WOWO will remain on the air to serve Ft. Wayne which it is licenced to do.

Now this brings up what we as broadcasters and friends of the broadcasting should do - PROTECT with legislation or special rules our legendary radio stations from raids of signal and call letter assault especially the 50+ year old stations with original calls.

For example Stockton, California's KWG 1230am which signed on November, 1921 making it 72+ years old. It is the west coast's oldest licenced radio station and has earned National Historical Status

There are many other historical stations around the country hopefully someone from the NAB or a FCC official can start the seed and keep our mighty giants and community work horses
from vanishing forever.

With the Major League players involved in a strike, (Over what? Caviar in the dugouts?) Those hard-core fans (like me) are scanning the dial for anything. Many minor league teams are broadcast, and sound very interesting. And besides...it's still baseball. Only the names and places have been changed to protect the innocent.

Locally, we have a couple of California League teams that have every game on the air.

The Rancho Cucamonga Quakes. (W/Joe Castellano PBP) on KMNY-AM 1600, "MoneyRadio" in Pomona. (At night, however, you can hardly get the station at the ballpark itself. They do have a decent signal during the day.)

The Riverside Pilots. On KCKC-AM 1350 in San Bernardino. {CNN NEWS/Liddy&Leykis} Before the Billionaire Boys Club Went on Strike, KCKC ran the Pilots on Tape Delay after the Los Angeles Dodger games. (KCKC was country for 30(!) Years prior to a switch to Talk a year or two back..)

I have also heard The Las Vegas Stars (AAA-Pacific Coast League) on either KVEG-AM 840 or KDWN-AM 720 , Salt Lake City's AAA team on KSL-AM 1160, and the California Angels.....(oops! They're a Major League team....in name only.)

Lance Ballance

3195. Astounding statements from Chuck Harder

Newsgroup: rec.radio.broadcasting
Date: 1994-08-17 23:26:57 UTC
From: rrb@deja-vu.aiss.uiuc.edu
Message-ID: <32u6c1$77s@vixen.cso.uiuc.edu>
Source record: 38450

Just when you thought that it was safe...

Yesterday, while listening to Chuck Harder's "For The People" program, I heard a set of statements, not said in any apparent jest, that I never thought I would here from any modern-day talk host except perhaps Pat Buchanan.

While discussing AIDS (and assault weapons) Chuck said (approximate quote) ' Cuba has no AIDS problem because Castro has created *sanitariums* where anyone found to carry the HIV virus is placed. (s)he is given good food and care, but is not allowed out in the general population...' (again, not word for word, but definitely an accurate portrayal).

He then went on to say that Clinton's crime bill would take away "assault-type" weapons from people on the basis that they 'might' do something wrong (deadly) with them... but homosexuals (and heterosexuals) with the AIDS virus are allowed to parade around and infect anyone they please with the virus and we can do nothing about it because the civil rights of homosexuals (and heterosexuals) with this virus are greater than our constitutional rights..."

He went on to say that these homosexuals (and heterosexuals) were "walking assault weapons" .

Holy Hitler Batman!

Now I occasionally listen to Harder on satellite for entertainment and thought-provoking conversation. But after hearing that stuff yesterday, I am appalled and amazed. Harder may be a crazy pseudo-kook, but these statements make Limbaugh look liberal and Buchanan look like a fair-minded moderate.

Interesting thing is that he kept specifying Homsexuals (then as an after thought) and heterosexuals) rather than saying merely "people carrying HIV".

The implication was that if we would leave the assault rifles be, and concentrate <no pun> on incarcerating these 'walking assault weapons' (namely people carrying HIV) everything would be OK.

This is out of character even for Chuck (black helecopters) Harder. Is this the new talk messiah that will replace Rush???

Bill

Message-ID: <32u6c2$782@vixen.cso.uiuc.edu>
Source record: 38451

I received the following news from Free Radio Berkeley (FRB) today.

FRB has been offering a variety of kits for FM radio transmitters ranging from 5 to 125 watts. These kits include all the parts, including printed circuit boards and instruction, and can be put together by anyone with a certain amount of technical expertise.

US law allows them to sell the kits but not to sell assembled transmitters to US addresses. The "Brick" is, therefore, only available to non-US residents.

For more information, contact FRB at frbspd@crl.com

Forwarded message follows>

> Our PLL design is working very well now. We are ready to begin production of the first units for sale outside the US. As I described to you before, this unit, The Brick, ... uses a PLL exciter and a 24 watt hybrid amp module. Just add a power source (12-14 volts DC, well filtered), audio input and an antenna.

I'd like a bit of help from you industry folks in what information to include in my tape/resume packet.

Specifically, what should I put in my letter and on my resume? I've done the usual, boring list of stations I've worked at, positions I've held, and an award I've won.

I want to include details on how I started up a college radio news department from nothing to an award winning operation. I also want to include a list of by abilities. Should this be in the resume or the cover letter?

I have the abilities to do board operation up to news production, reporting/writing, and anchoring. I'm willing to do almost anything at a station. Should I just send one package to the News Director, or send one to the PD as well?

Any other general comments and suggestions are appreciated.

3200. Number of US Radio Stations

Newsgroup: rec.radio.broadcasting
Date: 1994-08-17 23:27:07 UTC
From: jamesr3594@aol.com
Message-ID: <32u6cb$791@vixen.cso.uiuc.edu>
Source record: 38455

I tried to post a response to a request for information about the number of US radio stations, last night. I did a little research through the FCC data base and sent the message and the transmission was confirmed by AOL.

Well, I got a lot of mail about that posting. It seems the AOL computer only transmitted a portion of the message. Sorry if it inconvenienced anyone. The information is as follows:

AM Radio Stations 4,925
FM Radio Stations 5,055
FM Educ. Stations 1,707

FM Translators and Boosters 2,253

Source: FCC News Release (# 44313) dated August 12, 1994

If you have any further questions, please feel free to E-Mail me at rjhayes@aol.com. I'm a communications attorney practicing before the FCC and I specialize in radio station matters.

The author asked about what had happened to WMEX-AM, and if anyone in Boston did AM talk).

I'm sure that there are epople here who can give a much better history of WMEX-AM than I can (and I look forward to reading it). As far as AM music in Boston, there are a few daytimers that come to mind. WJIB--740 For decades WJIB was the FM beautiful music station in Boston, but it's owners NBC sold it to someone who ditched the format in favor if light jazz, which they have since ditchec again for country. So, local radio manager Bob Bittner bought the 740 frequency, which had a long history, most notoriously as a folk station in the Cambridge of the 70's, and then as a black gospel station, both of which went belly-up because of serious financial problems of the owners, who were very community oriented (I ought to make clear that the folk and urban gospel formats were not owned by the same people--they both just had the same fate). He programmed it Earth Radio for a few months (mostly 70's AC music and PSAs) and then when the WJIB call letters were made available he grabbed them. The format is basically:
00:USA Radio Networks News
:03:30: Promos and PSAs
:05: 55 minutes of solid, uninterrupted music.

On weekends/evenings/overnights (the station has a tiny night time frequency) there is nothing but music and the five second ID on the hour. The above format does not include any advertising, so he makes his profits from selling Sunday morning to black churches/gospel music promotors, who are probably left over from the earlier incarnation. The station is basically him and an engineer, and he sent out a newsletter detailing in *great* detail his philosophy, history, etc. recently. A Mon. afternoon request program shows that he has a very enthusiastic audience (though a beautiful music call-in request show is a bit bumpy at times).

WILD--1090--This is the only urban station in Boston, so even though it's daytime it has a huge promotional budget and a very strong communtiy prescence.

WADN--1120--This concord station went on a few years ago as the nation's only commercial folk station. It's based in Concord and is also big into community involvment. It's founder, longtime WGBH DJ Dick Pleasants, quit recently because the station has turned into AAA because of it's failure to make money. Simulcasts BBC World service overnight, and does a pretty good job in general.

This message has turned out to be far larger than I thought it would be. If all the info has been said already, I imagine it will just be cut out

by the moderator.]

3204. KLIF'S TALK SHOW STOP IT HOSTED BY BEN dOVER IN TEXAS

Newsgroup: rec.radio.broadcasting
Date: 1994-08-17 23:27:15 UTC

I'm looking for information on the sort of radio shows available for syndication from the US. Is there a magazine for radio (as there is for TV) that will give me the name of the show, a short synopsis, the cost of buying syndication rights to it and which organisation to contact.

Alternatively, can anyone give me the names, addresses, internet addresses or phone numbers of syndication companies in the US or UK. Much appreciated.

Please e-mail responses to : G91L4576@warthog.ru.ac.za or post to this group (I'd prefer e-mail though) Thanks in advance, folks.

Tony

OKAY, here is what I mean...

We have a truckload of coverage of anyone changing a tower light in Boston. We have, arguably, the most complete Missouri coverage possible, from Mark Roberts in Kansas City, and a darned respectinable showing from Buffalo and Upstate NY. I see great post from these three markets almost daily.

I also see great efforts from a half dozen or so *other* markets such as L.A, S.F Bay, San Diego, DC and even Tere Haute Indiana. We have also seen occasional reports from other cities.

Sure I want to know how many Bostonians it takes to change a tower light. Sure its cool to know how many Central Missouri Cows are listening to KTTS. But it leads me to wonder if anything is happening anywhere else...

<enter PBS beg-a-thon mode>

So if you are reading this newsgroup from an under represented city and have not contributed your fair share of articles, then shame on you... you freeloader.

I dont care if you ARE paying some ridiculous price to Compuserve or AOL to access the net. You are not doing your part to support this newsgroup if you are not reporting on anything going on in your city. We cannot continue to bring you fine articles such as Mark Roberts, Carl Gorney, Scott Fybush, Mark Roberts and all the rest unless YOU HELP!!!

<leaving PBS beg-athon-mode>
(it never works for them, why should it work here?)

I know what you are saying to yourself... "How can I possibly post in the shadow of these giants..:" Okay, sure you may not be worthy to rip the news copy for Scott. Sure, your puny posts may pale in comparison to the voluminous vigniettes of Mark Roberts. Yeah, I know that you cant match the pizazz of a Chris Charmicael, but HELL, you could try!

<entering Macho, Marine, Vic-Tanny mode>

Maybe with a lot of patience and humility, even YOU could approach the ranks of these men. Men who have taken on the awesome responsibility

of informing the masses of every auspicious occurance in their respective cities and beyond. Men who have met the challenge, taken the gauntlet and charged forth into cyberspace with nothing but their sheer guts to drive them. Men who know the need and refuse to take NO CARRIER for an answer. The agents of ascii, the minions of modem.

Maybe you could be one of them. The (all too) FEW, the (way too damned) PROUD... The...

```

```
_
|_) _. _|o _ | | | _._|_ _ |_ _ ._ _
| \(_|(_||(_) \/ \/ (_| |_(_ | |(/_| _>
```

Yes, even you in Dismal Seepage Iowa, In Bug Tussle Tennesee or even Chicago Illinois can be an AIRWAVES RADIO WATCHER. Yes you, with the Commodore 64 and the 1200 baud modem. You can be the beacon to the world for the radio happenings in your location.

And we need you.

How much longer can we go on giving the world the impression that Boston Mass is the center of the radio Universe? How long can we allow the under-informed world believe that nothing happens outside of Kansas City? Huh?

So, line up, sign up and enlist today.

<entering, more or less sane mode>

If you have an interest in broadcast radio (and if you dont, you are probably not reading this anyway) and want to share your insights and information with the hungry world, why not become an *official* 'AIRWAVES RADIO WATCHER'?

All you have to do is send me some email saying that you want to do this, tell me a little about yourself and your interest in radio, and tyhen just post at least once a month of interesting (or even boring) happenings in your market.

If you are a radio station employee, air talent ort (gulp) management person, you can post your inside stuff without identifying yourself to the world (if you feel that your insights are just too hot to admit to).

For more info, write to me and Ill see that you get signed up right away.

IT IS YOUR NET DUTY. DO IT TODAY!

To: Multiple recipients of list ROOTS-L <ROOTS-L@VM1.NoDak.EDU>
Subject: Wire recording - many thanks!

I would like to thank everyone who responded to my query about
transferring an old wire recording to audio tape. The response was
overwhelming! Everyone was very generous and accomodating, with numerous
helpful suggestions. Thanks to
your help, I have been able to contact someone who will attempt to
transfer the tape for me.
I am still sorting through the suggestions that I received from everyone,
and hope to contact the people who told me that they have wire
recorders, to see if they would like their name posted to this list as a
resource for others who find themselves in the same dilemma I was in.
Hopefully, I will be able to post a summary to the list in a couple of
weeks. Note--I will not have e-mail access for the next week - if you
need to contact me directly, please do so after 8-23.
Again, thanks to everyone who responded to my post!

3209. Buffalo/Toronto Radio Watch(8/16)

Newsgroup: rec.radio.broadcasting
Date: 1994-08-18 04:54:16 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <32upho$6e8@vixen.cso.uiuc.edu>
Source record: 38464

From the #40 market:

*Two things of note from the Erie County Fair this weekend:
-An attempt was made to break the world record for the largest country line dance(sponsored by WYRK(106.5)and WGRZ-TV(ch.2,NBC)). Over 2,100 showed up to take part,and while it broke some records(i.e.state-by over 1,000),it fell short by about 600 on the world record. It happened to be a wet day,weather-wise,so that could very well be the cause.
-On Thursday,WKSE(CHR,Kiss 98.5)started up their contest,B.O.Geo 2 (subtitled The Next Perspiration,complete with ST:TNG lines)with 3 men and 1 woman going into a Geo and staying there. The rules are that whatever you take into the car stays there,and bathroom breaks are taken every few hours. Beyond that,anything goes(short of nuking the car,I guess :>). Last year,two people stayed in the full 11 days,and the lady got the car(which the guy chivalrously gave),while he got a trip. WPXY(97.9,Rochester,CHR;98 PXY)did the same thing,except it was called B.O.Sphere and 3 people were in it.

*Across the border,CFCA(105.3 in Kitchener)switched from A/C to classic rock,to put themselves into competition against Hamilton's CJXY(95.3, Classic Rock Y95). And they're doing it with an ex-Y95er:Neil Headley,ex-night jock at Y95,is now CFCA's AM driver-as well as a power boost to 100 kW. Even though they're positioning themselves as KOOL-FM,no call letter change is foreseen. Besides Y95,they're also competing against CILQ(107.1,Toronto,album rock-Q107).(Thanx to Sean Healy for that piece of info.)

*Bill Raffel(ex-WNED,now jumping to WBFO as a liasion between the Univ.at Buffalo and 'BFO)wired me to note that Tom Crann is heading back to Los Angeles to be the AM driver at KUSC-FM(which is classical in AM,at least). It's his second go-round at 'USC;he was there for a year before returning to 'NED-FM.

FAB...

3210. WOWO for $ale again?

Newsgroup: rec.radio.broadcasting
Date: 1994-08-18 04:54:17 UTC
From: ChrisCarm@aol.com
Message-ID: <32uphp$6eb@vixen.cso.uiuc.edu>
Source record: 38465

>From the San Diego Reader's Post:

I caught this in Monday's Broadcasting and Cable in the trans-
actions:

WOWO-AM-FM, Fort Wayne, Ind. Purchased by Pathfinder Com-
munications from Inner City for $1.6 million. Stations were
purchased for $2.3 million from Price Communications in March
to Inner City Broadcasting.

WOWO AM is full-service AC format on 1190 (50kw). WOWO-FM
is 103.1 and 3kw.

Broadcasting reports this was filed July 22 with the FCC.

[umm, did I miss something here: Inner City bought WOWO for
$2.3 million and sold it for $1.6 million . . .] Also, could some
one tell me if I read it right: KOLS-FM Dodge City, KS is reducing their
power 100kw? This is the ex-KDCK and ex-KGNO-FM. In a
previous post, it was reported that 1370 KGNO-AM was reducing the night time
from 1kw-directional to 250 watts U.

Thanks!

Chris Carmichael

Message-ID: <32uphq$6ec@vixen.cso.uiuc.edu>
Source record: 38466

Just a reminder that it's NOT too late to step in for WOWO. Inner City Broadcasting is making all its plans...without any FCC approval yet for its purchase of WOWO! Several of us have written to the FCC seeking to stop this sale, without which the rest of this complex deal cannot proceed.

I think it's important for those of us who feel strongly that this is a raw deal to write to the Commission again, opposing ICBC's proposal to sell WOWO to Pathfinder without ever owning it in the first place. The relevant docket numbers are: WOWO(AM) Fort Wayne - BAL940722GE ; WOWO-FM Huntington BALH940722GF. Please note these numbers at the top of your letter, and address it (of course) to FCC, AM Branch, 1919 M St. NW, Washington DC 20554.

Here's my problem with this deal: it does NOTHING for the Fort Wayne community. ICBC buys a local institution for $2.3 million, strips it of one of its assets (its strong signal to the east), then turns around and sells it for $1.6 million. Benefit to Fort Wayne: nothing. Benefit to Pierre Sutton of New York City: a full-time AM in New York for an outlay of $700,000 plus legal expenses. Not a bad deal for him.

It has been argued to me that even after its emasculation, the 1190 kHz signal will still be strong in Fort Wayne at night, and that's true. And I'll agree that WOWO in its present state is not programming to or selling its audience outside the tri-state area of Indiana, Michigan, and Ohio. But by removing this heritage flamethrower, there's no chance that future WOWO owners and programmers will be able to hit that huge audience. Here in the Northeast, 1190 kHz will change from a nice clear service at night to nothing but noise (since WLIB's nighttime pattern would just shoot out straight east from the transmitter in NJ).

In short, if the ultimate owner of WOWO(AM) will be Pathfinder Communications, then Pathfinder Communications should be buying the station directly from Price Communications. The only benefit of the middle step involving ICBC is to add a 16th full-time AM signal to New York City. The Commission should send a nice strong message to Sutton that he can't just buy nighttime power in NYC. Sutton had several opportunities over the last decade to buy full-time AMs in New York. Among the stations that have been sold

in recent years are: WKDM-1380 (5kw day/nite), WBBR-1130 (50kw day/nite), WMCA-570 (50kw day/30kw nite), and WADO-1280 (5kw day/nite). That's what Sutton should have done.

This is a raw deal for Fort Wayne, because even though they keep a local 1190 signal at night, they lose their clear nighttime voice to the East. It's a raw deal for AM listeners east of Fort Wayne, since we'll lose our WOWO signal and get another 10khz of noise. It's at best a miniscule benefit for New York City, considering there were other ways to get the WLIB programming out at night. It's not even an unbeatable deal for Robert Price, who has admitted that he had other higher offers for WOWO (and its complete unaltered 1190 signal), but rejected them out of personal friendship with Sutton.

And that's what it comes down to...a handshake between two rich men in New York...versus a legendary radio signal for millions of listeners. Where's the public interest in THAT?

Alas, the first phase of the deal (the sale of WOWO from Price to ICBC) is rumored to be less than 2 weeks from approval. So we may have to fight a losing battle to keep phase 2 of the sale from taking place...and we may have to fight a final battle once ICBC gets its engineering worked out and applies to reduce WOWO's night pattern.

Remember...the docket number is BAL940722GE.
The address is 1919 M Street NW, Washington DC 20554.
It's time to stand up against the further degradation of the AM band...and make sure there are still a few legendary signals around to draw in the next generations of DXers and programmers and owners.

On MIT's radio station, there is a program called, "Electric Space"
which deals less with computer hardware, and more with the Internet
and cyber- culture. They regularly login to the net and hold
conversations with people on the net live on the air, both those who
are listening to the radio, and those who are out of range. In
addition, they have interviews with artists and other personalities in
the computer underground.

Bill, the homophobic statements you noted from Chuck Harder's radio show today are hardly a surprise to anyone who's listened to the guy over the course of his seven (more?) years in syndication. He's steadily transformed himself from a legitimate consumer advocate to a Limbaugh-like manipulator of mass fears.

You may also want to note that, up until half a year ago or so, Harder distributed Lyndon LaRouche's radio show (direct from Lyndy's jail cell); one of his most frequent guests has been military fanatic Bo Gritz; and he sells the books (via mail order) of Eustace Mullins, whose most recent scribblings in the anti-Semitic CRIMINAL POLITICS magazine (which every PRN affiliate seems to get a copy of without asking for it) claim the Watergate break-in and cover-up centered around a prostitution ring supposedly run by Jewish financiers out of the Democratic National Committee offices (Maureen Dean, John Dean's wife, is supposed to have worked in this ring, according to Mullins).

Hi all,
My son(Kevin) is looking for a full time job as a radio engineer. He has a degree from Austin Technical College in Austin MN in Radio and TV Broadcasting. He is currently working as an engineer for KNXR-FM in Rochester MN. Unfortunely they do not have full time engineers. His hours vary from 16-30 hours per week. Depending who is on vacation. Kevin is 23 and very anxious to get his career into high geer. KNXR is an easy listening station. Being 23, Kevin would rather get into a station that had more "modern music". He has a resume and a demo tape if you are interested in on air talent. Reply to this note or snail mail to Kevin Anderson, 4017 5th st NW Rochester, MN 55901.

>and more coming soon. We're up over 80 stations now, and the baseball
>strike has been very very good for business.

Tom -

Any insight from you on this:

Cap Cities/ABC, who owns KGO 810 in San Francisco, is purchasing KSFO Talkradio 560, and the takeover happens on September 1st, I believe. Rumor has it that ABC is going to put your show on during the afternoon drive segment... confirmation?

And for some backround for everyone else...

KSFO dropped it's simulcast of then oldies KYA 93.3 FM a few years ago and dove into a talk format. Mostly satellite (Liddy, King, Williams, and the WOR hosts), with a local show in the morning and afternoon drive time. The station has never really done well in the ratings (about a 1.3 in the latest book). Cap Cities has bought the station, and will take over operations September 1st (or thereabouts). Rumor around the ba.broadcast newsgroup is that a "Hot Talk" format will be put on KSFO, similar to what Cap Cities did to KMPC (Los Angeles) when they took over the station in May.

Details on the new station programming will be posted here when they happen...

(on New England radio)

Don't know why WHRB ran a dead carrier all summer (or how they get away with it)...or why they just simulcast someone else for no money...do you?
Student co-op-owned stations sometimes end up as big money-makers. Look at WBRU in Providence making its way as a AAA station, or WVBR-FM in Ithaca, now #2 in the Ithaca-Elmira Arbitrons with a more standard AOR format. They have commercial licenses and sell spots year-round...usually 8-10 minutes per hour 6 am-midnight, a couple minutes an hour on the overnight. (They are 24 hour operations.) And the best part is...the air staffs get PAID! Minimum wage or not much more for the most part, but it beats the hell out of washing dishes in the student union cafeteria...
WVBR-FM gave me a start (and some bucks that made life as an undergraduate less impoverished). There are others for whom it was the first step toward gigs on everything from network TV to national radio...why don't they let 'HRB do the same thing? Bob

In article <32pnua$f53@vixen.cso.uiuc.edu>, fybush@world.std.com (Scott D Fybush) writes:

(on the big switch)

Let me repeat a few observations I've made here and elsewhere about the switch. None of it really makes business sense at all. Let's look first at what will happen to WRKO... the management seems to be assuming that because it'll be the only talk radio game in town, people will accept personalities and viewpoints (especially Limbaugh's and Carr's) that up to now, they've been rejecting. Remember, the more moderate and libertarian viewpoint projected by Leykis and the idiosyncratic and always interesting views of Jerry Williams owned Boston talk listeners in 1993.

The spring Arbitrons in markets like New York, Buffalo, Rochester, Detroit, St. Louis, LA, San Francisco and Chicago, show two things. One, right wing talk is losing its appeal in market after market outside the Bible Belt. Two, if people can't get a choice in their talk programming, they don't just stay with talk even though they dislike the host...they leave the format and go back to music or turn off the radio completely. News junkies DO have a place to go, namely non-partisan WBZ, which will be the big winner. More moderate to liberal listeners who now will not have a KABC or KMPC style station to turn to, will either turn off the radio or go back to music, and most likely their first choice will be an AOR or classic rock station if the pattern in LA and SF repeats in Boston. Limbaugh used to be able to hold a lot of listeners who disagreed with him because he was entertaining. Now he's just strident and mean. Unless he gets funny again, very quickly, he's now more of a liability than an asset. (Ask KMOX, which is putting the best face possible on its 2-share drop in the spring book, but is quietly seeking tapes and resumes for an eventual replacement for Rush already.)

As to 'RKO, it will be lucky to hold its own through the fall...within 3-6 months Limbaugh and Carr will be getting the same 3-4 shares on 'RKO that they got on 'HDH, and that will be a real loss for RKO. Limbaugh is dropping fast in market after market, including Boston. The success of sports on 850 isn't assured either, since its signal pattern in the core of the market's not a hell of a lot better than 590's. And as for 590's fate you have to figure it'll either go dark or change format again in a year, probably under yet another new owner. It looks like this is a lot of effort for little or no gain, maybe even

a loss...heads will be rolling in the executive suites some time in 1995 over this one.
Yet another example of how a potentially killer format is being killed by stupid management tricks...
Bob Smith, WXXI/1370 Rochester NY (and overall Northeast/Great Lakes radio watcher)

3222. Paul Gonsalves Louisville affiliates?

IN Philadelphia, at the Phillies Station, CBS/WGMP, we are running the regular ASRN programming, and then a few times a week we're running 'nostalgic' baseball games -- good games (where the Phils always win) from the Nationa League Penant wins to World Series wins, etc.

It's kind of disconcerting to be tuning on the radio and hear baseball when you know everyone i on strike.

One neat thing having the station play games, something 10-20 years old and hearing how advertisements were different and where there was a diferent emphasis on play-by-play or color.

(on DC radio changes)

A question concerning WRC/980; is the move from syndicated
Buchanan to syndicated Schlesinger a concession that the timeslot
can't be won with issue talk, an attempt to counterprogram with
touchy-feely that Burns thinks might make it...or a marking-time
and cutting of losses in preparation for eventual recruitment of a
local act to compete and contrast with a Rush Limbaugh whose
star is gradually fading nationwide?
Will there be further changes in the lineup later this fall, when
that
big 50,000 watt transmitter comes on line and gives 'RC arguably the
strongest regional AM signal in the market? (Some folks inside the
station say they think this isn't the final lineup and more changes,
including local origination across the board from 5AM-8PM week-
days and a heavy promo campaign, may come on line when they
flip the switch and turn on the big signal...) Gonna be interesting...

Subject: The Boston scorecard / WMEX history??
Mike Dowling >>Can somebody give me a short history of WMEX? Where were they in
>>the glory years with Arnie Ginsburg? What happened to those
>>calls?

I worked at WMEX in the "post-glory years," but I can tell you what I heard and what happened when I was there.

WMEX was the major "top-40" station in the sixties during the time of Arnie "Woo Woo" Ginsburg. They were 50,000 watts during the day with a lower signal at night. They broadcast on 1510 am from a transmitter in of near Quinsy, Mass.

In the late sixties, two things happened that lead to their downfall. State Street bank built a large computer center next to the WMEX transmitter. Arnie, who came to radio with an engineering background felt that the construction and operation of the new bank building would have a major negative effect on the WMEX signal. I don't know if this is true, but, for sure, Arnie left, and, by the time I arrived in Boston (after the State Street Bank building was in full operation) WMEX's 50,000 watt signal could hardly be heard in parts of Boston. At around the same time as this, RKO General changed it's WRKO AM from a WOR style talk station to "top-40".

By the seventies, WRKO was in solidly as the top AM "top-40" station and WMEX was floundering. WMEX tried to position itself somewhere between WRKO and WBZ, but there was very little it could do, with music listeners moving to FM anyway. They picked up Red Sox Baseball from WHDH, and used that as the centerpiece of the station. Eventually they dropped all of their music, and went all-talk (this was my first day working there). They held their own as a talk and sports station for a while, with air talent including Jerry Williams, Steve Fredericks, Glen Ordway, and Avi Nelson.

Eventually the station was sold by the Richmond family, and the new owner renamed the station WITS ("Information, Talk & Sports"). This was the end of WMEX 1510 AM. It was during the WITS years that I left the station and the Boston market, so I can't fill in the story from there. I have heard that shortly after I left, the station moved from it's Bay Village studio and also moved the transmitter. The station has since been sold (I don't know how many times) and other stations have gotten and given up the WMEX call letters.

Very impressive indeed. Syracuse is an interesting market to watch, as 95X
(so I've been told) has the highest share of AOR stations nationwide (?!)
Yet, they have lost some clout in the lower demos to the newcomers (100.9 -
who still did not do very well at all)
Naturally I find Ithaca more interesting....
(WVBR kickin' butt...)

3227. Narrowband PCS Auctions

Newsgroup: rec.radio.broadcasting
Date: 1994-08-18 15:50:28 UTC
From: henryc@access.digex.net
Message-ID: <330004$dqp@access2.digex.net>
Source record: 38482
Cross-posted to: rec.radio.info,rec.radio.amateur.misc,rec.radio.noncomm,rec.radio.broadcasting,rec.radio.amateur.policy

The FCC is moving fast in establishing the information superhighway through spectrum auctions. On August 17, 1994, the FCC released the following auction notification for Narrowband PCS:

FCC RELEASES NARROWBAND PCS RECONSIDERATION ORDER
AND FURTHER NOTICE OF PROPOSED RULEMAKING

The Commission today released an order on reconsideration of its Third Report and Order (Third R&O) which established service-specific rules for competitive bidding for the award of narrowband PCS in the 900 MHz band.

The reconsideration builds on the successful completion of the first simultaneous multiple round auction of 10 nationwide narrowband PCS licenses. The Commission made minor changes to its auction rules and strengthened provisions designed to enhance opportunities for designated entities.

Auction Rules

The Commission retained the flexibility to release bidder identities. It will announce in advance of an auction by Public Notice whether it will release bidder identities. The Commission retained discretion to set suggested opening bids or minimum opening bids in order to speed the auction process. The Commission said it would defer until after the regional narrowband PCS auction a final decision concerning the auction design for the 12.5 kHz MTA and BTA paging response channels.

Designated Entity Provisions

The Commission took three steps to enhance the opportunities for designated entities to participate in the auctions and in the competitive provisio provision of service.

Finally, the Commission issued a Further Notice of Proposed Rulemaking in which it indicated that it will consider whether "entrepreneurs' blocks" similar to those adopted for broadband PCS would be appropriate for promoting participation of designated entities in the remaining narrowband auctions. The Commission asked for comment on whether up to 4 MTA and 2 BTA licenses should be included in the plan, if it adopts an entrepreneurs' block. In addition, the Commission asked whether the BTA licenses should be licensed on a regional or national basis.

The Commission also asked for comment on the following issues with respect to an entrepreneurs' block:

Whether bidding credits should be granted to small licenses for a period of three years from the date of the license grant; and whether, for a period of years after that, the Commission should permit the licensee to assign or transfer control of its authorization only to an entity that satisfies the entrepreneurs' blocks entry criteria.

NORTHERN CALIFORNIA RADIO NEWS & HAPPENINGS - August 18, 1994

Westinghouse's Bay Area venture into radio continues to sound horrible. "95.7 FM The Express" broadcasts on 1550 AM as well, the old stations of Classical KKHI, with an "interesting" light information format weekdays, and a "flavors of Jazz" format overnights and weekends. In addition, the station relays sister KPIX Channel 5's newscasts at Noon and 10 PM weekdays. The easiest way to describe the station is that their information anchors are doing a very mediocre job of filling time with fluff interviews, features, and ID's (they give a station ID approximately every 45 seconds, sometimes one right after the other).

Their weekend "Jazz" programming is more a smooth AC/Light Jazz format, from quite a limited library. It's very unusual to hear Peter Gabriel followed by a fusion jazz chart. There has been very little promotion of the station in other media, other than occasional references on Channel 5. It's disappointing to see such a terrible station come from Group W, which has well respected radio news operations in other major markets.

The wait continues for upcoming changes in Bay Area radio... Saul Levine, new owner of what was formerly KTID AM 1510 and FM 100.7, was supposed to revive these currently silent stations licensed to the suburb of San Rafael with a classical format with the calls "KKHI". Newspaper articles have stated that Levine purchased the entire KKHI music library for use at his new station. Also, the Cap Cities/ABC takeover of KSFO 560 is about two weeks away on September 1st. Rumors are that a Hot Talk format will be put in place, with Tom Leykis in the afternoons. Local hosts Gene Nelson (mornings) and Peter B. Collins (PM drive) have received their walking papers.

SHORTS: News/Talker KSRO 1350 in Santa Rosa (north of San Francisco) picks up Tom Leykis weekdays 3 - 5 pm, moving former Governor Jerry "Moonbeam" Brown to evenings... KGO weekend talk show host, TV weatherman, and stand-up comedian Brian Copeland gets his national break this Friday night (19th) on the Conan O'Brian show on NBC. Copeland will be doing a TV version of his radio bit "The News According to Copeland"... Talk on local newsgroup ba.broadcast is that station KMBY 1540 in Capitola-Monterey will switch to a motivational talk and new age station, with programming provided by the Personal Growth Network...

:which saw some stations paying up to
:$30-MILLION for the licences alone. This at a time when 30% of commercial
:stations were losing money.

Not hard to immagine! That happens over here too. An example:
WOKY-Milwaukee around 1980-81 paid $5-6 Million for the liscense to
WMIL-Waukesha, a station that had been "dark" since the early 70's.

:And, to muddy the waters even more, community stations are now allowed to
:advertise (although it's called "promotional sponsorship") - turning many
:of them into quasi-commercial operations - but with _significantly_ lower
:overheads.

Hmmm. Kinda sounds like P.B.S. and some local stations in the
"Non-Commercial" portion of the band!

:What this has meant is ever-shrinking margins for stations, and ever-more
:reliance on satellite services, "safe" <but boring> formats and fewer
staff.

:Not a good time for commercial radio in Australia, methinks!

Sounds like there is not much difference between American and
Australian radio!
However, I have heard some of the production that has come out of a few
Australian stations, and it is great!!!!! Excellent stuff!!!!!

I was scanning through satellite TV the other night at the station, and found Mr. Harder and Mr. Buchanan sharing the same program. It was apparently FTP's new "TV service", which appeared to be a simulcast of the FTP radio show with occasional pictures. Both Harder and Buchanan were at their radio studios wearing headphones.

They also agreed a bit too much for my comfort.

I don't know if they're a one-two punch these days, if their radio programs have combined or if Buchanan was a one-shot guest on Harder's show. But I'm thrilled at all with Pat Buchanan, and even less thrilled that the usually harmless if a bit nutty Harder has apparently joined forces with him.

: Cuba has no AIDS problem because Castro has created
: *sanitariums* where anyone found to carry the HIV virus is placed.

This is correct.

: Interesting thing is that he kept specifying Homsexuals (then as an
: after thought) and heterosexuals) rather than saying merely "people
: carrying HIV".

This is typical of the disinformation spread by the right wing in the USA. The fact is that 75.9% of AIDS cases worldwide are spread by HETEROsexual contact, not homosexual; only in the USA is it predominantly homosexual at this time. This has been changing as the rate of AIDS infection among gay men has been leveling off while among heterosexuals it has been increasing.

: This is out of character even for Chuck (black helecopters) Harder.
: Is this the new talk messiah that will replace Rush???

My guess is that you're absolutely right. Chuck Harder may be noticing that Rush's numbers are beginning to slip, and wants to jump onto the bandwagon early. I've listened to Harder from time to time over the years and have always felt he's an opportunist who will say anything to get a rise out of people. I'm not convinced he has any morals at all.

One thing to keep in mind is that WBRU and WVBR both have the
advantage of having relatively strong signals in relavtively small
markets. WHRB's situation is quite the opposite. There's no way
'HRB can compete for advertising dollars against the larger Boston
commercial FM's with only 3000 watts (and an extremely low height
above average terrain to boot). Plus, WBRU is a first-adjacent to
WHRB, and their signal washes out 'HRB once you start heading out
into the 'burbs. And there are already AAA and AOR stations in the
Boston area, all of which have a stronger signal.

With all that going against it, I'm afraid WHRB will never be the
strong "money-making" venture that its Ivy League brethren are.
I don't see any likelihood of them being able to upgrade their
signal, either...

>money...do you?

WHRB was kicked out of its longtime studios under Sanders Theater in early June. Harvard University does not value its radio station very much. If WHRB went off the air they wouldn't much care.

New studios are under construction at 389 Harvard Street, Cambridge, Massachusetts. The simulcast of WUMB-FM is being done temporarily as a way to serve WHRB listeners during the construction.

In past summers the undergraduate management of WHRB has felt (wrongly in my opinion) that it was better to be off the air than offer programming not produced by WHRB staff. They have a clause in their license specifically authorizing them to go off during summer vacation, so that's what they've done. Since they leased their 67 kHz subcarrier to Italian American Communications of Newton, MA they've kept the carrier on, unprogrammed except for hourly station identification, using a dial-up remote control system.

WHRB has very poor coverage. Their transmitter location is awful (110 feet HAAT), they're short-spaced to WBRU (first adjacent channel, 39.7 miles away), and they're in one of the most competitive markets in the country. If you live more than 5 or 6 miles from Harvard Square you probably can't get them clearly. A construction permit for a new transmitter location was granted earlier this year, but with ridiculously low power and a directional antenna. Even so, it is being challenged by WBRU.

WVBR, WDCR/WFRD, WPRB, WYBC and WBRU, all student-run commercial FMs (and all considerably more successful than WHRB) have none of these problems.

Also you need to know that the students who run WHRB aren't particularly interested in radio as a business. What they want is to expose Boston to their particular tastes in music-- mostly jazz and punk rock with some classical. It's not a serious commercial enterprise. To become one they would occasionally have to play music that was not to their liking; all the cajoling, admonishing and downright threats which various alumni have expressed will not move them.

I am one of the very few WHRB alumni that works in commercal radio for a living. Nothing would make me happier than to see WHRB return to the days when they did serious radio.

Source record: 38400

In article <2u35kh$h3h@vixen.cso.uiuc.edu>, cpaulus@clark.net (Chris Paulus) writes:

:97.9, 98 Rock in Baltimore, MD claims: "Times have changed, and so have
:we...Listen." But you hear the same songs they've played from
before...The
:commercial plays a few tunes, and they say, "This isn't 98 rock any
:more."

:Do they think the listeners are so stupid as to not know if there's
:difference, or if they're just playing the same stuff?

:Chris

The point they are trying to make with that positioner is that music tastes have changed, and they have changed with them. If you recall, "You Give Love a Bad Name" from Bon Jovi was the tune they stopped in the middle of the chorus and stated "This isn't 98 Rock any more." The music definitely has, or should I say had, a harder edge at that time.

Since then, they have made some personnel changes and some programming changes. Russ Mottla (PD) is no longer there, Greg O and Moe, the morning team are gone as well. Kirk "The Kirkster" McEwen is now in afternoon drive. Since these changes, I have noticed changes in the music being played. They've lost some of the edge, and I'm hearing more classic rock than I did 3 months ago.

Peace,

Tom

3245. WFUV New York Transmitter Problems

Newsgroup: rec.radio.broadcasting
Date: 1994-08-19 00:48:34 UTC
From: slutsky@tesla.njit.edu
Message-ID: <330vh2$840@vixen.cso.uiuc.edu>
Source record: 38499

The New York City radio scene has been quiet lately. There have'nt even been any rumours. If Westinghouse and CBS merge broadcasting operations there may be some changes at WCBS New Radio 88 and 1010 WINS. Consolidating staffs would save money.

The only substantial radio news in New York is the problem with WFUV's transmitter. WFUV is the station of Fordham University in the Bronx which broadcasts folk and ethnic programming. They received a directive from the FCC to mve their transmitter. After several years they found a site and started construction. However, their neighbors at the New York Botanical Garden complained that the tower would be an eyesore. (To readers of this newsgroup a radio tower is a piece of art). They have agreed to a cooling off period, but the FCC has threatened to remove WFUV's license if a new tower is not constructed by 12/31/94. They have very few choices since if they move too far to the west they would interfere with WFMU at 91.1 from East Orange, NJ. If they move in other directions they wouldn't cover all of the New York metropolitan area.

I'll keep you posted.

That's quite interesting. The frequncy sounded familiar to me, so I went
to look through my old MW-DX loggings of the ealy 80's.
Yes, I found 1510 (WITS / WMRE) quite often listed there. It was more often
audible than WBZ or WHDH.

Marty, "The Paul Gonzales Show" is one of the three sane elemens of Chuck Harder's People's Radio Network schedule, fed from 11 AM to 2 PM Eastern Time. (The others are Bruce Amsterdam's "Common Ground", from 10 to 11 AM, and Jack Ellery's "Talking to America" from 7 to 9.) PRN lists WSJP-AM 1130 in Murray and WRIK-AM 750 in Paducah as its only Kentucky affiliates, and the Indiana affiliate nearest to Louisville is WSEZ-AM 1560 in Paoli. However, PRN doesn't say whether these stations carry more of its offerings or just Harder.

Source record: 38410

Bob Smith asks why WHRB ran a dead carrier all summer...and why they are letting themselves be used (presumably) for free this summer. Simple: the main carrier isn't the money-maker there. 'HRB makes its bucks by leasing the 67kHz SCA. And of course the people who lease that subcarrier want to be on all summer...hence the dead carrier.

Why don't they become more commercial on their main channel? For one thing, it's a LOT harder to be competitive commercially in market 6 than in Providence (WBRU), Princeton (WPRB), or Ithaca (WVBR), just to name a few commercial Ivy stations. More telling, I think, is the Hahvahd factor. I.e. -- "This is Hahvahd. We don't do that sort of thing here. How (sniff) crass!"

Whatever the case, WHRB does OK for itself. They're moving into new studios this summer, and they have a power upgrade planned. Weep not for them...

dk@crl.com (David A. Kaye) writes:
>I wonder if [Bill Wattenberg, KGO] is typical of the right wing. He's
>notoriously racist, bashing the Japanese and Mexicans at every turn, and
>suffers from the Rush-like propensity to ignore facts, especially about
>the environment, the impact of immigrants on California's economy, etc.
>He scores very well in the Arbs and has a nice voice, but I don't like
>him as a talk host because he tends to yell at callers and cut them off
>when they disagree. I think this is bad form.

A few points:
1. I've never heard Wattenberg make a racial attack on anyone,
particularly the Japanese. He's very careful to distinguish between the
Japanese *people* (whom he always notes are "hard working" and
"productive", and the Japanese government/corporations (which don't "play
fair"). Also, he directs as much criticism against the US government
officials who (in his opinion) have "allowed" the Japanese government and
corporations to continue with unfair trade practices.

He's talked about *illegal*immigration* (not "bashing Mexicans"--there
is a difference!) as well.

2. I actually think he's quite knowledgeable about science and the
environment, as opposed to all the paranoids running around today, saying
everything you eat,drink,smell or touch is going to turn into cancer or
something. I suppose he provides a more balanced coverage of environmental
issues, than the "let's-all-kill-ourselves-to-save-the-planet" types
hanging around talk.environment and elsewhere.

3. Yes, he does yell at people and occasionally cut somebody off. These
are usually people that have a chip on their shoulder to begin with, and
start attacking Wattenburg first.

3260. WOWO Encroachment !!!!!

Source record: 38414

This evening (8/18/94) I began trying to listen to an Elvis Special on 1190/WOWO in Fort Wayne around 2100 EDT. What I got was an very strong hetrodyne signal on top of WOWO leaving reception of that station virtually useless. In checking where the signal was strongest, it seemed to be coming toward the Southwest toward away from my vantage point here in the Boston area. This, of course, could only mean that a station that is licensed to operate Limited Time ended its' broadcast day and never took the time to turn off its' transmitter. I am not naming names, but assuredly it is NOT WANN in Annapolis, Md. I can tell you that every transmitter has a certain "thumbprint", no two transmitters sound quite the same. This transmitter is slightly off frequency and has a very soft hum in its' audio chain. This has happened before about two weeks ago as this station has left their transmitter on, throughout the night with not even a legal ID to make it all within FCC specs. If somebody might shed a little light on this matter it would be appreciated.
Oh, BTW .....the WOWO sale should be decided soon. 73's for now!

A note hear about WBRU: First of all, I resent the idea that BRU is fighting WHRB over their tower out of spite or something - both stations have gotten permission to go to 50,000 effective watts, but we at BRU are having a hard time finding a place in Rhode Island to put the new tower, and HRB threatened to boost their power before we could rather than doing it together. A stronger HRB without a stronger BRU blocks out our signal in southern Norfolk County, including my hometown of Sharon, and 40 percent of our current listiening audiance comes from Massachusetts - we need that coverage.

As for the fellow from the Ithaca station, thank you for mentioning us. We are alternative/cutting edge, not AAA, by the way, and air staff are only paid during summer, winter, and spring breaks (and Thanksgiving weekend, but that's piddling). But we were Rolling Stone's station of the year, medium market.

Howdie:

I wanted to let everyone know that AIRWAVES has joined the World Wide Web. I have a home page started with links to the AIRWAVES archives, the FCC FTP site, and several other places I found while surfing the web, and which have been contributed by readers here.

Right now the web page(s) have a limited amount of stuff on them. Partly because I just learned how to *access* the web a few days ago, and how to *write* links even a shorter time ago than that (like yesterday).

So, what I would like is for everyone who either HAS a www page (which is related to media) or who knows of pages (related to media) to please submit the paths to those pages to me and I'll add them.

Also, if you have knowledge of www indexes and lists of URL's, let me know so I can arrange an entry for the AIRWAVES page in those lists.

I would like to have the AIRWAVES page link out to virtually any media-related page in the world. Of course, broadcast radio is primary, but for the sake of completeness, I will accept anything media-related for now. I have some stuff on shortwave, a great satellite page by Robert Smathers, as well as complete connectivity to the AIRWAVES ftp/gopher site.

The URL for our site is http://radio.aiss.uiuc.edu/~rrb .

To submit new pages (please look at what we have before doing so, in case it is already here) send them to web@airwaves.chi.il.us. If you forget that, just send them any way you can.

Please report any problems with the page or its links.

I may place an "other goodies" page for non-media related stuff too, so send whatever you might have.

Take care

Bill

Hello from the 55th Market in the U.S.

There's been alot in the press about XETRA (AM 690, 50kw, Baja California, Mexico) lately. Since the professional baseball team for the area re-signed with KFMB (760, 50kw DA-II), the mouths of the sports station haven't been too good. This hasn't pleased the Padres team too much; and the newspapers in the county have reported the slams from Sports 690. The only outlet in the southland, XETRA is starting the break the SD Padres fans.

Part of the problem is that one station cannot do it all; and the Noble based giant wants it all. With the SDSU, UCLA, Kings hockey, all on the slate, Noble is looking at buying a station in either the San Diego market, or in Mexico. If this is a possiblity, both federal regulators cannot move fast enough to apease Noble. There are at least four potential broadcast conflicts in the works; and SDSU and UCLA on XETRA have first rights. One possible solution is to have SDSU conflict games on KCEO (AM 1000, 1kw directional). But the coverage isn't the same as the 50kw boomer.

Both Oceanside and Escondido papers on Friday had a half-page devoted to XETRA's full slate [first reported in Airwaves last week!]

While this is a radio venue, the south of the border Fox station is facing a court battle with local independent KUSI. What brings radio into the picture is the "foreign broadcast permit." The fallout -- if in favor of KUSI -- would effect both radio and radio
w/pictures. Court date is Sept. 26. KUSI wants the agreement for the Fox outlet voided because it's a south of the border station. Most of Baja California-base stations have studios in Tijuana and San Diego. It's reported to set precedence for the fifth estate broadcast stations in both mediums. Stay tuned!

The Escondido Times Advocate gave a snapshot of the north county ratings. As previously reported, the top stations include KGB-FM, KCLX-FM, and a strong third is KFI-AM Los Angeles. The conservative-minded area like Rush Limbaugh, and have three stations to choose from: KSDO-AM 1130 San Diego; and KFI on a live basis, and tape-delayed on KCEO, Vista.

For further details on the radio w/capper court hearings, e-mail me, and I'll send details.

Unfortunately for all concerned, KPIX's attempt at talk was an embarrassment. The news interviews in the afternoons were being done by a guy who didn't listen at all to the answers to his own questions, but was more concerned about introducing and reintroducing the guest. The nighttime talk was done by a woman whose idea of talkradio was to talk about sex in as slimy a way as she could. Toward the end of that disaster she was saying "PLEASE call! What does it take to get you to participate? Are you AFRAID to call?" Sheesh; I'm glad they put that one to bed.

Well, Jay, the conventional wisdom on ba.broadcast before the switch was
that KPIX would be all-news, a la KFWB, WIND, WINS, etc...

Boy, were we all surprised. There has been a _lot_ of discussion there
about how bad the station sounds. Now we got lame light-talk-information
during the day, bad jazz nights and weekends.

One of the stations in the network I work for runs a program called "On Computers." Until last week it was hosted by Leo LaPorte and Gina Smith (Editor of Electronic Games). It's not highly technical, but the information is sound, and the things they talk about are well ahead of the magazines. If you want to check it out, it's on Satcom C-5, Transponder 15, Channel 17-1 Sunday from 1-4. I know because I had to fill in for someone running the board.
They have several interesting gimmicks to attract listeners while they are on the air: During the broadcast you can dial a special 800 number that connects to Dell Technical Support, and they will also answer any of your computer questions. And if you're on AOL type the keyword "OC" and you enter their forum. The hosts pick questions from there, as well as the phones, and answer them on the air. It's very good and very popular, even here in West "by God" Virginia. If you're on AOL, check out their forum for an affiliate list.

From: Mitch.Scott@WPCUsrGrp.MB.CA

I just would like to through out a few questions concerning background info on various hosts, ie, former station, "reception" in other cities etc...Firstly, Wes Miner of 830 WCCO in MPLS, he does mid mornings, what market and station did he come from previously? Has he been in the talk radio business a long time? He sounds like a former teacher to me, or someone in the education field. Secondly, John Williams, 830 WCCO, he does various shifts, same question as above. I think I heard somewhere that one of them came from Peoria, not sure tho. BTW to anyone else who has heard John, do share my opinion that this guy is a real talent, someone who eventually will make it to the top 3 or 4 markets? Lastly could anyone give some info on a lady called Maria, on 760 WJR in Detroit, she does evenings and has her share and then some of common sense. Thanks for taking the time to answer my question. ttyl

I'm tired of being forced to reply to posts about the "alleged abuse" of my wife and my treatment program. Hopefully this post will put this to a rest.

I've not been convicted of ANYTHING. I do not know why this rumor keeps haunting me. I've been very open about my treatment program and the fact that I agreed to attend because of time constraints. This entire situation has been more embarrassing to my wife than it has been for me.

To try to counteract the next level of harassment that I predict will haunt me, I want to state publicly that my wife and I have split up. She is still in Boston and I will remain in Los Angeles. This situation is very uncomfortable for me to talk about and I hope that this sets the record strait.

Tom Leykis

I guess it's mu turn. I was wondering if anybody has heard from an old friend of mine that I worked with in both Milwaukee and Chattanooga. His name is Jack Marcus, was also known as "Wierd Marcus" when he was at XEROK-80 in El Paso/Juarez. Also was at KLEO, and in Albuquerque at KRKE.
Thanks
Dennis

3275. RadioWatch Detroit. Leykis comes to town...and more

Newsgroup: rec.radio.broadcasting
Date: 1994-08-22 00:16:11 UTC
From: aa029@detroit.freenet.org
Message-ID: <338qob$q6t@vixen.cso.uiuc.edu>
Source record: 38430

WXYT-AM (1270) announces nationally syndicated talker Tom Leykis starts Monday (8/22) from 6 to 9pm. He replaces local talker Tommy McIntyre, a 37 year veteran of Detroit radio. McIntyre, a conservative talk host, feels the Leykis promo the station is running saying Leykis is, "living proof you don't have to be a right wing wacko or convicted felon to host a show on WXYT" lacks class. McIntyre indicates he's looking to buy a station since, "There's only one side of the desk to be on and the only way to get there is to buy one of the damn things."...also at WXYT, Joe Wade Formicola has been named the permanent replacement for Denny McLain in the 6 to 9am slot. Formicola, formerly morning man at country WWWW-FM (106.7) replaces McLain who left the staion after the Infinity purchase. McLain is also part owner of Farmer Peet Meat Packing.

Speaking of country, WWWW-FM has named Michael J. Foxx their 3 to 7 pm host. Foxx, formerly of CHR/Hot Hits/BeBop...you get the point...WHYT-FM (96.3) starts his first country show in Detroit after doing nearly all the shifts at WHYT...

Meanwhile (and a bit off the radio subject, but guananteed it has a radio twist)...WJBK-TV (2) one of the "former" CBS stations waiting for CBS to find a new affiliate in Detroit (and employer of Michael J.'s wife, Catherine Leahan who anchors newscasts at the station)...has announced Warren Pierce, former mid-day talk host at WJR-AM (760) will begin co-anchoring the station's "Eyewitness Morning" weekday mornings from 7 to 9 am with Jennifer Howe.
He replaces Jerry Hodak who moves to a new 5 pm newscast. By the way, once WJBK goes to Fox...Eyewitness Morning will expand to 6:30am to 9:30am. Pierce began at the station as host of the station's weekend "Eyewitness Weekend", a one hour news and information program seen Saturday and Sunday morning...

And, finally, in our string...WJR-AM (760) announced this week they will remain in their Fisher Building home, after announcing they would move to a building owned by parent company CapCities/ABC which formerly housed WRIF-FM in suburban Southfield. Many rumors had been floated, including a possible move of WJR to the historic Fox Theater owned by pizza king/Tigers owner/Red Wings owner Mike Illitch. The station said the supposedly favorable new lease wasn't the reason they stayed downtown at the Fisher...they just felt good about the city and didn't want to abandon it while new Mayor Dennis Archer is attempting a turnaround. Right.

3276. Radio Watchers -- Kansas City (8/21/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-08-22 00:16:12 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <338qoc$q6v@vixen.cso.uiuc.edu>
Source record: 38431

What do underwear, the Kansas City Royals' pre-strike winning streak, and unemployment have in common?

KISF(FM) program director Mark Feather, who is now Kiss 107.3's *former* program director.

The first week of August, Feather and afternoon DJ Alex Valentine asked listeners to "streak for the (Royals' winning) streak" by putting their underwear on car antennas.

Some Royals fans went farther, according to local media, and streaked at a local park, calling the station on car phones to provide a play-by-play account. One night, according to one report, Feather arranged for two listeners to streak across the outfield at Kaufmann Stadium.

Station general manager Steve Dinkel told local media that "basically most things should be run by the general manager first." (He did not say whether those things should be wearing clothing.)

Dinkel went on to say "there are still responsibilities that go along with [being a radio station.]"

Feather called the dismissal "a trigger mechanism," suggesting that station management had other agendas in mind when it dismissed him. A story in this week's Kansas City Star quoting Dinkel seemed to confirm that. Dinkel told the Star that "the station wasn't reaching the potential it had."

KISF is facing fierce competition from KMXV(FM), "Mix 93.3", which has been airing a watered-down CHR format since the last week of March. Mix 93.3 has a better signal in most of Kansas City as well. Kiss 107.3's 12+ numbers went up slightly in the Spring 1994 Arbitrons to 3.6 while KMXV leapt to a 4.7.

What happened to Alex Valentine? He's now KISF's acting program director. In addition, morning team Kip Taylor and Bobby Quinn were replaced by former evening DJ Boomer last month. Regarding any more dismissals, Dinkel told the Star, "all the changes have been made at this point."

*****

Kansas City TV stations WDAF-TV (NBC, channel 4) and KSHB-TV (Fox, channel 41) are both frantically hiring staff to prepare for the September 12 affiliation swap that will leave both stations hungrier for news stories.

After Sept. 12, Channel 4 will be a Fox station broadcasting 44 hours of news a week, up from its present 23 hours a week.

Newly-minted NBC affiliate Channel 41 will have 12 hours of news a week to start with, compraed to its present 3-1/2 hours a week.

Nearly 90 hours of TV news a week will be available in Kansas City, counting newscasts on the other two network affiliates.

Do Kansas Citians really *want* that much news? This is, after

all, a city that can't support an all-news radio station or a news/talk station that focuses heavily on local events.
"Mr. Microphone," KNHN (1340), comes the closest to being that kind of station in Kansas City. However, it is hampered by a weak signal, and a reliance on washed-up personalities whose political views are unvaryingly and unthinkingly conservative.
Bonneville's KMBZ (980) does program an all-news block during morning drive until 8.30 am. It sounds professional, although it is often weak on local content. But, sad to say, if it weren't for Limbaugh during middays, the rest of the station would sink without a trace. KMBZ only has one news reporter on duty during the day. The efforts of its three other news anchors and reporters are concentrated solely on the morning drive block.
Bonneville's KCMO (810) appears to have given up on news altogether, except for board operators reading wire copy. Farm stations WHB (710) and KFEQ (680) definitely serve their audiences, but any urban listening is just incidental to those stations' core goals.
People's Radio Network station KBEQ (1030) and sports station KCTE (1510) have no local content other than IDs and commercials.
National Public Radio outlet KCUR (89.3) has occasionally scheduled local mini-documentaries (five minutes or so inserted into local slots in Morning Edition and All Things Considered) and a daily one-hour talk show by one of the market's first TV anchors, Walt Bodine. The rest of its informational programming comes from NPR and American Public Radio.
The one station in this market that has a news image is WDAF(AM), "61 Country," but its coverage is heavily oriented toward fires and wrecks. Its coverage of local issues is limited to Kansas City City Council meetings.
Radio news, while not cheap to do, certainly is less expensive than TV news. I wonder if the economics of this market (#29 or #30 depending on how you count it) will justify the added TV news. Will it drive radio news out of the market completely?
Remember, this is the market that helped spawn Rush Limbaugh, the first of many talk show hosts who forgot that the purpose of talk radio is to let *other* *people* *talk*.
*****
Baseball strike update: Local affiliate WDAF(AM) appears to be weathering the strike with no problems, according to station manager Herndon Hasty.
Hasty told the Kansas City Star that "61 Country" has not lost a Royals advertiser since the strike began.
Hasty added, "We have the luxury of having a regular format that doesn't require a special host who's already on staff," so the station can just go on playing country music.
Sports talk hosts on KMBZ said public interest already is shifting to the Kansas City Chiefs football team, presently in training camp.
"Sports Nite" producer Brad Porter told the Star, "People can't get enough of Chiefs information. They want to know if the Number 9 receiver in camp dropped a pass during two-a-days [workouts twice daily]"

KSMO-TV (channel 62) is filling in its schedule with movies and
additional syndicated programs.
*****
Subcarrier update: KYYS is still relaying co-owned WDAF(AM) at 67
kHz on weekends. This subcarrier normally is on only during Royals
home games. The Mormon gospel-oriented "Bonneville International Radio
Network," at 92 kHz on Bonneville's KLTH, is now relaying some talk
shows from co-owned KSL(AM) Salt Lake City, as well as newscasts from
KSL-TV.
******
Antenna update: It's up. It's working as promised. The .plan
file will be updated soon. I'm having a hard time getting away from
the tuner at the moment! A report will be forthcoming.

Can anyone explain the beacon station (or so it seems) at 530kHz which has been broadcasting "GF" in Morse for like 7-8 years at least? I'm up on Lake Erie, so depending on where I am and the conditions I'll either get a French station in Canada or this "GF" over & over & over. Just curious.

Maybe -- just MAYBE -- if Limbaugh falls on his face at RKO, they might just have to bring themselves to carrying Gene Burns' program LIVE (i.e., from 3 to 6) instead of Limbaugh. Put Howie Carr on at 12:00, where I will be guaranteed never to hear him.

One thing not addressed here: what's the fate of SportsCall, the (nominally) two-hour sports show on from 6-8pm on WRKO presently? I've been listening to it for several years, through 3 different hosts and two different formats. Eddie Andleman is just no substitute.

I do a monthly call-in computer show on WNIS, 850AM in Norfolk/Virginia Beach, VA. WNIS is a 50K/25K talk radio station. My show deals with local computer issues, especially Novell networks. It seems that our audience is a broad spectrum, from beginners to experts. It has a good following and does well. The time slot is not the greatest, between two left wing politicos, but we draw well. We have an 800 number for outside of the local calling area, and I have done the show from Comdex in Las Vegas.

I agree with Tom. Let's move on to another subject and let this man just
go out and do good radio. I mean after all isn't that what this is all
about? Or are we here to gossip about each other's private lives?

>stop convicting OJ, Jackson and all the rest of the 'innocent till
>proven guilty' people we all seem to love to convict in the press. Bill]

First let me say that other than having been a guest once on his KFI show wherein he seemed like a very pleasant gentleman, I don't know Tom Leykis or anything about his private life. But I also have to take a bit of an issue with the Moderator.

Public figures (and I am thinking more of Michael Jackson or O.J. Simpson rather than a talkshow host) use the media and publicity to further their careers. But the public eye can be a double-edged sword. It stares incessantly during the bad and the good. It is not realistic for a celebrity to bask in his press releases and media attention and then suddenly say, "I'm entitled to my privacy." A public figure cannot turn his public status on and off with the push of a button.

As far as convicting people, only a court of law can convict anyone. Since this forum is not a court of law, it is not bound by any Constitutional constraints. In other words, the contributors do NOT have to assume innocence at all. They may have any opinion they like and may express it. The only Constitutional provision at play here is that while the Moderator may censor messages, the government may not.

While I may disagree with the way our mainstream press handles just about everything, it is not the reponsibility of the press to assure anyone a fair trial. That responsibilty lies entirely with the court. The media may try someone in the press, but it is the trial in the court that will determine sentence if any. Again, it is the responsibility of the court and the defense attorneys to protect the rights of the defendant.

The only valid reason to refrain from discussion of trials of public figures is because we sick of the topic.

"Can we stop playing Dirty Laundry and let {Tom Leykis} do his job?"---Our Esteemed Moderator in AIRWAVES #765

Bill, I wholly agree. However, there's one major problem with this altruistic concept: too many of our alleged broadcast brethren are paid to do NOTHING BUT play Dirty Laundry. That's their only point of existence in this industry. Some, like super-blowhard Mark Belling at WISN Milwaukee, have the gall to call it "Standing Up for {fill in the market}". The only thing they're standing up for is their own soiled underpants, not the community of license.
I'm formly convinced that most of these hysteriameisters will eventually fall by the wayside; after all, radio, like any other entity, not only eats but also defecates to be healthy. But that process is a long one, and until it is run, P.T. Barnum will continue to look down upon our industry from the Ninth Circle and laugh his posterior off. (I suspect a weeping Ed Murrow might be only a few steps away from him.)

}
} [...] But I also have to take a bit of an issue with the Moderator.
}
[...]
}
} As far as convicting people, only a court of law can convict anyone. Since

Perhaps, John, as far as criminal penalties are concerned (ie jail,
fines, probation) you may be right, no, you *are* right. However, as
far as the damage which can be done to a person's career, reputation
and such, by the blood thirsty public, fueled by a sensationalistic
media, you are incorrect.

While a court of law must take into account evidence, procedure and
give equal time and equal hearing to both the prosecution AND defense,
the media (mainstream or otherwise) is under no such requirement.
When the people are bombarded with sensationalistic half-truths (at
best) and are not given anything resembling the full story, they will
by nature tend toward believing the sensationalistic parts. It is
this factor with which I take exception and offense, and it is for
these reasons that I have chosen not to further fuel the gossip fires
where Tom Leykis (whom I have never even heard on the air, let alone
met).

} this forum is not a court of law, it is not bound by any Constitutional
} constraints. In other words, the contributors do NOT have to assume
} innocence at all.

Well that may be true, but I do assume innocence in these matters
because that is how our system is SUPPOSED to be set up. And I a
appalled by the flippancy with which people decide guilt based upon
nothing but media hype and gossip, passing for news. It is very easy
to sit back and make statements of abuse, molestation, or other wanton
criminal or gross acts, from your easy chair, as if it is just another
show on Fox, just another "real-Crime" drama. As though there is no
real person behind that. I personally feel that such 'ease of

conviction by media" where (as you said) there is no requirement to be anything resembling fair, is a travesty and something I choose not to contribute to via this forum.

I seem to remember you getting pretty bent out of shape in recent months when certain baseless remarks were leveled against YOU by a certain person we both know.

} The only Constitutional provision at play here is that while the Moderator
} may censor messages, the government may not.

Oh, there is that censorship word again. This is not a censorship issue, John, it is an issue of decency and attempting to be fair to Tom, by not forcing him to defend that which has already been decided in his favor by the courts. I know you said in private email that you did not mean ti imply that I DO censor messages, but merely that I *MAY* do so, but unfortunately that is not what you implied and implication is a powerful weapon. Often more powerful than the edict of the courts, which as said before, must be bound by some semblance of reasonability, which the media does not.

} While I may disagree with the way our mainstream press handles just about
} everything, it is not the responsibility of the press to assure anyone a
} fair trial.

Sadly, you are correct. But since it is the press that controls what people see and hear, that does affect the ability to acquire, say, an unbiased jury, and even an unbiased judge. When the public has convicted you, you suffer longer and in many more ways than if the court convicts you. And the news media (of all sorts) is a primary contributor to that, since it has (as you say) no responsibility to fairness.

}That responsibility lies entirely with the court. The media may
} try someone in the press, but it is the trial in the court that will
} determine sentence if any.

Sure, except the sentence of a public who believes that Michael Jackson is a child molester, even though there was never a criminal charge filed. He will have a very hard time selling any more records and his image has been forever besmirched by the wolves in the media who just LOVE to eat their celebs for dinner.

} The only valid reason to refrain from discussion of trials of public
} figures is because we sick of the topic.

Well I agree. I am sick of it, many other readers are sick of it, and it is not broadcast related. So as the subject says...

Enough already.

Bill

From: UltimaJock@aol.com
Message-ID: <338qos$q7n@vixen.cso.uiuc.edu>
Source record: 38441

Jay Marvin, in AIRWAVES #762, identified bogus light bulb sales over the Sun Radio Network as the point of Harder's investigation by a Tampa TV station. Interestingly, a couple of weeks ago, Harder himself recounted on-air a story in which WFLA-TV Channel 8 (look familiar, Jay?) investigated his mail-order sale of some books that he was publishing in direct relation to received orders. Harder claims to have grabbed some of the just-off-the-presses books and taken them to the Channel 8 reporter a few days after the first report aired, the reporter supposedly refusing to run a follow-up piece clearing Harder of the allegations.

Similarly, I distinctly remember PASSPORT TO WORLD BAND RADIO publishing a review a few years ago (1990, I think) of that dinky $29.95 shortwave radio Harder hawks; not only was the most charitable line in the review something about this radio being the best one to travel with if, while in your destination area, it would be "likely to be stolen", but it also questioned the long delay time between Harder's people transacting the credit-card order and actual delivery of the thing, making the "30-day warranty" useless. Some conduct for a bunch that calls itself a consumer advocacy group---and why the hell does RALPH NADER, of all people, associate himself with Harder?

David --- KPIX may be trying to operate with combined staffs (radio and TV) and they may not be union --- but it's not union busting.

By the way ...Group W no longer owns KFBK in Sacramento --- sold it a while ago. and KFWB has been an AFTRA shop for some time.

Oh --- another note. The Group W station in Chicago (WMAQ) has been non-union since Group W purchased the station from NBC. It seems AFTRA called a union meeting shortly after the sale --- two people showed up....one to complain about the union. Group W pays the staff there as much or more than the union stations in Chicago --- top notch benefits too. The employees don't need or want a union.

Yeah --- I work for Group W --- I'm and AFTRAN at KDKA Pittsburgh.

At the risk of horning in, let me add a word or two.

Those of you interested in this may think that you need to be actively involved in the broadcasting business in order to participate.

Well, I haven't spoken into a studio microphone since 1986 and now have a lucrative and hectic career in computer networking project management. (My previous career in all-news radio was merely hectic.) I work 8-to-5 and so don't have a chance to visit radio stations during business hours to make contacts.

All I have been doing is some alert listening and staying on the lookout for radio-related items in the local media.

The report I wrote that got the most response originated in a trip to the small town where my mother's family is from. I was there to arrange my uncle's funeral and had no time to do much else. Still, I took some time to listen to the local radio station, wrote down what I heard and some observations about the town, and typed it back in when I got back to KC.

I still occasionally hear from people who read the report about KTTN and the fact that there are fewer and fewer stations like that.

When Bill first approached me about doing this, I was quite skeptical and required quite a bit of persuasion. My big concern was that I was no longer actively involved in broadcasting. His response was that he thought it was valuable to have other perspectives represented in AIRWAVES as well.

I, too, would like to hear what's going on in other markets (e.g., Houston, where I worked for KTRH in 1985-86, and which pretty much assassinated my broadcasting career) and worry sometimes that the newsgroup associated with AIRWAVES might end up becoming rec.radio.broadcasting.missouri.

So there's my attempt at recruitment....

That's Wes Minter, former PD of WHIO News-Talk 1280 in Dayton, Ohio. I am familiar with him because I applied for an opening there once... and heard his show while in Dayton to drop off my package. I doubt he's new to radio, or he wouldn't have been PD in Dayton. I enjoyed his show very much, what I heard of it. (I declined to pursue the opening there, because I decided to relocate out here in California.)

Don't know anything about the others you mentioned.

3292. WOWO Problems

Newsgroup: rec.radio.broadcasting
Date: 1994-08-22 00:16:43 UTC
From: maya548980@aol.com
Message-ID: <338qpb$q86@vixen.cso.uiuc.edu>
Source record: 38447

Even those of us residing in FT. Wayne are frustrated about the future of a much loved landmark. This past week, WOWO received numerous complaints from those on the East Coast as they were wishing to receive a program on Elvis and there was constant interference. The problem was coming from WLIB in New York....testing the waters as this layperson understands it.

The sale has not officially gone through. An employee of WOWO told us that in conversations to the company attorney, he predicts that it will become official in 2 weeks. FCC officials say it will become official in 2 months.

Apparently the sale from ICB to Jayco (sp?) is contingent that ICB not tamper with WOWO's pattern more than 10% from the center? As a layperson, I ask, "Is this possible?".

Is this a cut and dried matter? This WOWO employee reminded us that it could be fought at each stage of the process...the sale to ICB....protest the change in pattern....protest the sale toJayco...., etc. Does it do any good? In this day and age with discrimination suits so rampant and a tendency to let the "big guy" do what he wants, I wonder.....

3293. alt.fan.greaseman FAQ

Source record: 38448
Cross-posted to: alt.fan.greaseman,rec.radio.broadcasting,alt.answers,rec.answers,news.answers

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior
Back in time with an uzi-
the Grease uses the equipment in the radio
studio to return to key moments in history

with his uzi
Carlos the International Terrorist-

Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time
==== ======= ====
Washington DC 106.7 WJFK 1900-2300
Baltimore MD 1300 WJFK 1900-2300
New York NY 92.3 WXRK 1800-2200
Philadelphia PA 94.1 WYSP 1800-2200
Los Angeles CA 95.5 KLOS 2300-0000
Atlanta GA 92.9 WZGC 0600-1000

Q: I like what I have read so far, but the Greaseman is not currently in my city. Is there another way I can get hold of this zanyness?

A: Sure there is, there is currently a Greaseman Web server at http://absolut.gmu.edu/greaseman/ where you can listen to some of his bits.

3294. Re: Chuck Harder's Xenophobia

In article <33c0fa$ptu@vixen.cso.uiuc.edu>, jmarvin@aol.com (Jmarvin) writes:

>When I worked at both WTKN and WFLA we were always getting board ops from
>the Sun Radio Network who wanted out and they always told the same stories
>about strange goings on at SUN. I wish someone would ask Chuck how he lost
>Sun to the Spotlight crowd!
> Jay Marvin
> WLS FM

In the article "Trials and Tribulations at the Telford Hotel" on page 4 of
FOR THE PEOPLE Magazine, Volume VII, Number 1, Harder claims:
(edited to preserve bandwidth)
"SUN grew like Topsy and added stations weekly. Our problem was that we could
not grow fast enough and attract enough national advertising. We had to rely
on direct-response ads where we sold merchandise and filled and shipped the
orders from our own warehouse. Everything from light bulbs to Cuckoo clocks
was advertised.
Although SUN was almost breaking even, the initial losses and construction
costs drained our {Chuck and Dianne Harder's} personal savings. We needed a
partner with funds. One soon appeared and agreed to do certain things in
return for control of the company. We signed a deal. Months later it proved
to be a disaster.
The new partner had the money, but not enough practical expertise or
knowledge of network radio. Even worse, they had some programming ideas that
mainstream people considered outrageous. We did not understand that perhaps
this was planned. By putting the company in bankruptcy they were then able to
loan the company money and hold a priority claim. We soon learned that all
our life savings, ownership, and effort would be lost to them. They bought
the company from the bankruptcy court for $31,000.00.
Due to the philosophical differences and adverse relationship, we were
soon deleted from the payroll."

Interestingly, he doesn't mention his SUN partners by name; I assume that
this is the Spotlight crowd you refer to, Jay?
Earlier in the same piece, Harder says he joined WFLA in 1985 and moved to
New York for an NBC Talknet show the following year. Possibly the brevity of
his WFLA stint created an emotion on the part of some folks there that led to
the light bulb expose on WFLA-TV?

Good, well-planned promotional stunts can certainly have your radio station be the talk of any market - certainly. Will it effect your numbers? I work in a community under 60,000 yet radio here is very competative. But as someone who has worked in radio here for almost 8 years, being a solid station in your everyday operation seems to me the best way to go. Stunts create talk for a few weeks and maybe creates local media attention but they also can burn you as well.

> morning show was it and will he do more radio?

Yes, we are talking about the same Denny McLain. Don't know how long he has been out of jail, but he was on WXYT for several years. He was a talk show host. His views generally ranged from just a bit left of center to way left during elections. Given his jail time and that his daughter was killed by a drunk driver, his outlook on many issues carried a lot of credibility.

He also formed a partnership with Eli Zaret, a TV sportscaster. They opened a restaurant together and also hosted a syndicated show "Eli and Denny Crossfire" which was great fun.

The last I heard, he was giving up radio, but who knows for sure?

3297. Dick Martin, `Moonglow with Martin,' and WWL

Newsgroup: rec.radio.broadcasting

A couple of weeks ago there was some discussion on this list of Dick Martin and his late-night `Moonglow with Martin' from WWL, New Orleans. I passed along the various comments to Joe Thomas, a friend and fellow Dick Martin fan. Joe wrote back of his experience meeting the man in 1960 or 1961 and gave me permission to post his comments here:

I met Dick Martin at the WWL studios in the Roosevelt Hotel one of the times I was in New Orleans visiting my brother. Dick Martin was a middle-aged man (probably early 40s at that time) with thinning hair, round shoulders, a little pot belly, and a dyspeptic expression (ulcers?). According to what my brother told me later, Dick Martin had a substantial disagreement with the "powers-that-be" at WWL (owned by Loyola University of the South) and left for greener pasture. Said pasture, if memory serves, being Davenport, Iowa, and the "Quad Cities."

Also, if memory serves again, Dick Martin was voted one of the top DJs in the late 50s and early 60s. Another top radio personality from that era was Willis Conover who hosted `Music U.S.A.' on Voice of America. Conover emceed some of the early Newport Jazz Festivals. Back in my high school days I was able to enjoy both `Moonglow with Martin' and, because I was fortunate enough to have a short-wave receiver, `Music U.S.A.'

FCC UPDATE

Vol 1: Issue 6 August 23, 1994

An update on news from the
Federal Communications Commission

---
written by:

Shaun A. Maher, Esq.
Smithwick & Belendiuk, P.C.

(202) 785-2804 FAX
(202) 887-5718 FCC WORLD BBS

CHANGES AT THE FCC

The information superhighway is paving the way for changes at the FCC. Recently chairman Reed Hundt announced the addition of a Wireless Telecommunications Bureau and an International Bureau. Both will be equal in power to the existing Mass Media Bureau. Hundt also announced the creation of a new "Office of Workplace Diversity," indicating more emphasis will be paid to EEO matters in the future.

SBA REPEALS "OPINION MOLDER" RULE

The U.S. Small Business Administration has repealed the "opinion molder" rule which prohibited it from making media loans. The SBA based the old policy on concerns that "constitutionally protected rights of freedom of speech and press should not be compromised by either the fear of government reprisal or the expectation of government assistance." The agency lifted the ban,

believing that current regulatory procedures are adequate to protect the public interest. The SBA estimates that 75,000 small businesses are now eligible to apply for loans. Information on loans can be obtained by calling the SBA Answer Desk (800) 8-ASK-SBA.

SPECTRUM TAX PROPOSAL DEAD

The National Association of Broadcasters has received official notification that the Clinton Administration has withdrawn its billion-dollar spectrum tax proposal. Regarding financing of the new GATT agreement, Chairman of the House Ways and Means Committee Sam Gibbons assured broadcasters that they "need not worry about spectrum fees." According to NAB president Eddie Fritts, grassroots lobbying by broadcasters resulted in more than 120 members of Congress communicating their opposition to the proposed tax directly to the White House. Fritts is now urging broadcasters to thank their individual lawmakers if they were supportive on this issue.

CAR LEASE BILL CLEARS COMMITTEE

The bill allowing radio added leeway to solicit automotive-lease business has successfully cleared another Congressional hurdle. After being approved by both houses, the bill was referred to a conference committee to clear up small differences in wording. In July, the committee approved language in the bill that will allow radio stations to get additional auto-leasing business by substituting an 800 number for the current burdensome lease disclaimers.

The radio language is actually part of a new banking industry bill. Sources on Capitol Hill indicate that the entire bill, including the radio language, could be heading for a vote in both houses soon. Once passed and signed into law by the President, the regulatory agencies will draft the enabling language and the law will take effect.

3299. This ain't the place for flaming!

Newsgroup: rec.radio.broadcasting
Date: 1994-08-24 03:50:58 UTC
From: UltimaJock@aol.com
Message-ID: <33eg32$drn@vixen.cso.uiuc.edu>
Source record: 38354

In the past few weeks, there seems to have been a lot of hacking and flaming going on concerning the accounts and comments of many of us whose posts have appeared in AIRWAVES. Unfortunately, a couple of hacked posts from an individual apparently impersonating Tom Leykis have been e-published because the limitations of e-mail leave little or no convenient possibility of verifying for authenticity. Others have been denied postings because their content was not relevant to the discussion of the issues indicated, but were only intended to attack an individual.

Several people have told me that some of my own posts have a flame-like aroma to them. I unsterstand how such a perception can be made; I harbor passionate emotions about this business, and like anyone else, when I feel the pain, I howl.

But I don't subscribe to AIRWAVES to see or send personal attacks on those who inhabit this industry with me; I only want to see and send information and opinion on the topics and issues that legitimately shape the industry. If someone does something during their shows, or discusses an aspect of the industry in any public forum---including other online services---it impacts the industry in some way and therefore becomes fair game for discussion, whether in praise or criticism.

BUT THAT'S WHERE THE LINE IS DRAWN. It is downright tragic that some of the people who read this seem interested only in making their colleagues smell like skunk droppings. While I may take someone to task for what they do in public, I have no interest in seeing an argument taken outside that realm into questions of an individual's personal value. After all, if a given individual's personal character DOES have a flaw, it's a flaw that all of us are open to having, and there, but for the grace of God, go you or I.

This is a communication industry. I should hope that those who hold personal interests in it would have more to communicate to each other than childish pettiness. I KNOW we can do a lot better than that.

3300. Garry Meier out at WLUP-FM (hooray)

Newsgroup: rec.radio.broadcasting
Date: 1994-08-24 03:50:59 UTC
From: barnhart@mcs.com
Message-ID: <33eg33$drp@vixen.cso.uiuc.edu>
Source record: 38355
Cross-posted to: rec.radio.broadcasting,chi.media

WLUP-FM management have bought out the contract of midday host Garry Meier, who less than a year ago severed his longtime on-air relationship with Steve Dahl over what apparently were long-simmering differences between the two.

Meier, whose solo gig had gotten off to a hopeful start last fall with a 4.0 rating, saw his numbers dive to the low 2's as many listeners, myself included, found the chatter far too dull and a major letdown from the provocative, take-no-prisoners approach of the Steve and Garry show, which ran for nearly 15 years on WLUP-FM and AM and WLS-FM and AM in Chicago.

Garry told Rob Feder he felt management hadn't been behind his show "100 per cent" but that he was already looking forward to his next radio show.

Meanwhile on AM 1000, Steve Dahl, who flew solo for six months after the breakup with Garry (whom he blames for ruining their partnership), spent most of the 7 o'clock hour this morning discussing the demotion of his partner Bruce Wolf, who has made many of us forget there ever was a Garry. Wolf, a smarmy anti-sportscaster who also is featured on Jonathan Brandmeier's afternoon show on the WLUP-FM, was demoted yesterday by the Fox television station where he is sports anchor for the evening news (or, I should say, was until Fox got a self-inflated image of itself and decided it could not have Wolf side by side with NFC football). Dahl did not mention Meier's name or his situation once during the time I was tuned to his morning show. Dahl is carrying his low-rated sports station WMVP (the former WLUP-AM), with a 2.2 rating in the morning, up 0.2 in the first quarter with Wolf, despite virtually zero promotion for his show or his new partner.

Replacing Garry in the middays, as expected, is former Partridge punk turned hyperactive radio dude Danny Bonaduce. Evenings may be filled by pairing news chick Wendy Snyder with local artist-raconteur Tony Fitzpatrick. Tony and Garry are old friends and Tony was a regular guest on Meier's solo show; Snyder broke into radio as the engineer playing the overnight rebroadcast of the Steve and Garry show back when WLUP-AM came on the air in 1987.

There is a newsletter service listing jobs availible in the Broadcast Business.
They have different editions depending on what you want.

The engineering section used to be a mailing, but is now availible on line only
as a BBS.

I'm not sure about the "Air Personality" listings, but their phone number is:
208-465-4821.

The engineering edition has quite a few interesting listings from entry level
tech to chief engineer. I haven't seen the "air" version, but they sent us
a sample of the engineering, I suppose they would do the same for the "air".

Very nice people to deal with, IMHO.

<lots of stuff about WRCK and WTLB>

I'm an old WRCK staffer (before the takeover on June 12)... lots of complaints pouring into the station after the change to classic rock. Two new CHR stations are turning on in the market... WKDY (Now Hot Country 102.5 KDY) is becoming Kiss 102... and WOWB (Little Falls) is spicing up their music a bit, boosting their power and adding live jocks (it was satellite), yours truly being the night jock. WOWB will also be simulcasting on another frequency in Rome very soon, 97.9.

WRCK is playing the same music log, but doing it live in the WRCK studio with a different jock, as TK99 in Syracuse and will be simulcasting by the end of September so I've been told.

$.02 from a guy stuck in this radio mess! :) :)

In blatant cases of interference which can be heard over a wide area, you might consider calling the Watch Officer of the FCC Field Engineering & Monitoring Div.: 202-632-6975 . This number is answered 24 hours a day (or at least used to be). Don't bother them with minor matters; you may find them distracted with something else when you call - after all there can't be more than one person on duty at each monitoring station, especially in the middle of the night.

Don't tell them I suggested this!

Regards from Bob w3otc@amsat.org

3314. WOWO, WLIB,....and KEX?

: pattern at night? Is there another station on 1180, 1190 or

If WLIB plans to transmit in a westerly direction, directed toward, say, Indiana, I'd say this could cause serious interference to KEX in Portland, the dominant I-B station on 1190 along the West Coast. As they have a signal "from Anchorage to Anaheim" as they say, I should think they'd also get very upset at having their signal encroached upon. Anybody in Portland or thereabouts care to call KEX and mention this to them before the filing deadline for WLIB comes about?

Apologies if this is a FAQ: let me know if it is on a FAQ list and where.

Without going into too many details, I have a communications problem that would be best solved by a low-power broadcast station in the FM commercial band.

I have seen these before, typically running advertisement tape loops from a motor vehicle. I have also seen similar stations in the AM band, used for parking information at airports, stadiums, and amusement parks, and for emergency traffic information and NOAA weather radio retransmissions along interstate highways.

What I am contemplating would be a fixed-point station, operating intermittently. This would be at one annual event at a known location lasting 2 weeks, plus several other weekend and week-long events nationally (US) at locations that change year-to-year. Because of this, a license good for operation nationwide would be preferable.

The purpose of this operation would be dissemination of routine and emergency information of interest to those within a severely limited geographical area (typically less than one square mile).

Information I need:

1. What kind of license (if any) do I need for this kind of operation?
a. What FCC regulations apply to this kind of operation?
b. What frequencies are available? (must be accessable by a generally available receiver)
2. What equipment is available for this kind of operation and at what cost?
a. Does it have to be type-accepted?
b. Can it be homebrew within certain technical limits?
3. What perils/pitfalls can I expect and avoid?
4. What else do I need to know about this type of operation?

I do not normally read these newsgroups, so please respond by email.

Thanks in advance.

Heritage album rock station KYYS(FM) may not set the Kansas City market's ratings on fire -- but it nearly caused a fire at a brewery-pub.

KY-102 chief engineer Gary Liebling told the Kansas City Star that the hydraulic lift for the antenna on the station's remote pickup unit got stuck. However, Liebling said, hydraulic fluid continued to build up, even though the engineer running the RPU was careful to avoid a high-voltage line overhead.

Because of the buildup, the RPU antenna eventually touched the line, shocking the engineer and scorching an area 3' in diameter on the wall at the 75th Street Brewery in the Waldo neighborhood of Kansas City, Mo.

Liebling said the engineer was not hurt by the shock, and the station offered to repair the damage, but the brewery owners said they found the blackened wall interesting and decided to leave it there.

*****

News stories on Columbia's news/talker KFRU(AM) about another radio station owner's July felony conviction may cost KFRU's FM partner its transmitter site next month.

KARO(FM) currently rents space on a tower owned by KFMZ(FM). KARO has been given notice by KFMZ management to leave the tower south of Columbia by Sept. 23.

KARO (K-102) rented the tower space after repeated attempts from 1989 to 1992 to get Boone County Planning & Zoning approval to build its own tower failed. Nearby residents complained of possible health hazards from strobe lights. Those same residents are not far from the KFMZ tower, but did not object to its construction in 1989 and 1990.

While no reason has been given by KFMZ management for the eviction, there is speculation in the central Missouri market that the cause is displeasure over KFRU's coverage of the felony conviction of KFMZ owner Michael Rice in St. Charles County on July 5. Rice was convicted of twelve counts relating to sexual molestation of teenage boys. Rice is to be sentenced Aug. 31.

KARO has a back-up transmitter site in east-central Columbia.

While the station's power at the back-up site is restricted, the site ironically would give K-102 better coverage in the city of Columbia, at the cost of losing coverage in the other central Missouri market, the state capital of Jefferson City. The station is also pursuing other possible transmitter sites.

The eviction also has delayed KARO's plans to use its 67 kHz subcarrier to relay talk programming on co-owned KFRU to KWOS(AM) in Jefferson City. KWOS airs some KFRU talk shows and simulcasts KFRU sports programming under a limited SMA (Sales Marketing Agreement).

Other means are evidently being used for the relay to Jefferson City:

one KFRU listener has reported to me that he has heard both stations ID together at the top of the hour during Kansas City Chiefs football games.

*****

Those who can do can also teach. Veteran Kansas City broadcast journalist Walt Bodine is heading back to the classroom this fall at the University of Missouri-Kansas City.

Bodine, one of the first TV anchors on WDAF-TV, currently has a daily one-hour talk show on the university's KCUR(FM), and does restaurant reports on KMBC-TV. During the 1960s, Bodine was the host of WHB(AM)'s late evening "Night Beat" talk show.

Bodine told the Kansas City Star that he would be teaching talk-show and interviewing techniques. He added that he would be covering TV, too: "You bet -- just like Oprah. If somebody gets 100 million viewers a week, we'd better be studying her."

*****

Lawrence (Kansas) modern rock station KLZR(FM) morning host Jay Charles conducted a contest for lesbian listeners this morning (Aug. 23).

Charles first asked listeners if anyone would object if he offered tickets to a Melissa Etheridge rock concert in Kansas City only to lesbian or bisexual women. Etheridge came out as a lesbian earlier this year.

The amazing thing was, all callers supported Charles' idea. So he went ahead with it in a lighthearted but respectful manner, and got five or six callers over a one-hour period who took him up on the offer.

That was a nice antidote to the homophobic ravings heard elsewhere on the dial--but just a drop in the bucket compared to all the verbal bile some conservative radio talk show hosts and "Christian" radio stations generate.

*****

For those of you keeping track of the formats on Topeka (Kansas) news/talk/oldies/jazz station KWIC(FM): the station does have an afternoon drive news block, then an hour of sports talk at 6 pm, followed by satellite-fed oldies from 7 pm on. The 6,000-watt station does appear to be selling spots. It's been on the air since April.

3318. KIDS Radio Dies in Springfield Mo.

Newsgroup: rec.radio.broadcasting
Date: 1994-08-25 05:02:29 UTC
From: rrb@deja-vu.aiss.uiuc.edu
Message-ID: <33h8l5$n6a@vixen.cso.uiuc.edu>
Source record: 38373

Radio Station KIDS (AM 1340 Springfield Mo) will sign off the air on Friday, August 26th for the last time, according to Jean Kramer, station owner.

The locally-programmed children's music and entertainment station has been struggling to survive, supported almost entirely by the owner's personal assets, and has been cutting back its hours of operation from 12 (6:30 AM - 6:30 PM) to the current 6 hours (12:30 - 6:30). But now it is going to go off the air.

I spoke to Jean Kramer today and asked here why she is giving up on children's radio after three years of being one of its biggest promoters. She replied (paraphrased) ... the community will not support its children... there is a lot of talk about family values and such, but it is just rhetoric...

Kramer has been running KIDS in a strange 'half public radio half commercial' sort of fashion with "angels" (businesses who pledge $150 -$300 a month. She has not sought advertising, nor has she accepted donations from individuals.

In speaking with various employees at KIDS (who have asked to be nameless) the story is one of mis-management and other problems.

"KIDS' equipment is horribly out of date and for the most part, broken. There has been no effort to repair or replace anything until it is absolutely non-functional. KIDS air monitor is a clock radio and their mic's are from radio shack and from garage sales. I have seen ham stations with more professional and functional equipment."

"... when I have to put a caller on the air, I have to plug patch cords in and switch between the studio microphone and the phone line because they are both on the same pot. There is no delay and we have to monitor via the studio speaker because there is never any working headphones... Some mics cut in and out and there is always static and feedback from non-muted monitor speakers..."

"Mrs. K has run this station into the ground. She loves the kids but knows nothing about broadcasting. Worse, she refuses to listen to anyone who does. Sad because she has a great idea here, and a decent station, but she seems bent upon doing whatever she wants, and has alienated many of the institutions which would have supported her."

----------"

The stories all fall into the above categories, that the owner loves kids, and wanted KIDS to function but seemed to do everything in

her power to make sure it didn't. One board op I spoke to said " The management had a 'kiss-my-***' attitude toward those who could help, then wonders why nobody helps..."

The station seemed to go into disarray this summer after Operation Manager Hershel Hartford left KIDS to pursue other avenues, unrelated to broadcasting. In the conversations I had with him, he related frustration at the potential of KIDS, but that the station was being held back by lack of funds and lack of initiative. Mr Hartford, though, had none of the harsh words about Jean Kramer that some of the other employees had. Hershel Hartford was the best thing on the air there, and even he must have seen the end coming since he bailed out a scant month or so before the station went dark. Mr Hartford could not be reached for comment.

After Hartford left, there was little or no direction to the station. Hershel was more than an operations manager, he was (as Jean Kramer put it) a 'pied piper' for the kids who listened. Although Kramer claimed that the departure of Hartford had nothing to do with her decision to shut the station down, this reporters impression is that it did have a lot to do with it. My communications with Hartford, before he left, showed clearly that he was a driving and inspiring force behind the station.

It is unclear what will become of the 1340 frequency, except to say that it will be sold to someone... There is talk of the Kansas City based news-talk operation (CNN-1340) coming in and running it as another in its chain of 1340 stations in this area. Fox kids network had expressed an interest and one employee feels that it might become a repeater for Chuck Harder's For The People network.

On a personal note, I am sad to see this station die, but although I have no opinion on the commentary I heard vis-a-vis the alleged mis-management of KIDS, I do agree that the station was never fully utilized as a vehicle for reaching children and families. In all conversations I had with Jean Kramer, she seemed genuinely interested in the kids and seemed willing to do what was needed at KIDS. At no time did I get the impression that she was 'running the station into the ground'.

One problem with kids programming is that Arbitron does not count those under 12 in its ratings and as we all know, the Arb's are the bible to advertisers, especially agency buyers. It seems sad that Arbitron cannot see its way to offering a pre-teen rating category, since anyone with children knows how much of the family purchasing dollar is influenced by the needs and desires of kids. One also only has to look at the tremendous power of kids TV, and the monumental marketing efforts aimed at kids, to see that there is a tremendous, untapped resource here.

Accuratings does count pre-teens, but they are not yet seen as an equal to Arbitron when it comes to agency and other media buys. Hey

Arbitron... wake up!

So 1340 will be dark for a while, and then some cookie-cutter satellite talk format will spring up there. And as Jean Kramer said... "The kids will be the losers."

>Turns out that Michael Bloomburg, who owns WBBR/New York, will run 590
>AM, which will become WBNW. The two fellows from WHDH who do a financial
>talk show will continue that show late-morning on WBNW.

Bloomberg won't own 590, he'll just provide most of the programming.
BTW, the latest word is that when The Switch happens Monday morning,
WBNW won't be ready to go on the air. WEEI's programming will be
simulcast on 850 and 590 for what could end up being several weeks.
And the call letter changes (590 WEEI->WBNW and 850 WHDH->WEEI) also
aren't ready yet...so there will be a few weeks of "WHDH Boston is now
Sports Radio 850 WEEI" and "WEEI Boston is Business 590".

TFAnderson (tfanderson@aol.com) wrote:

: I am looking to start a commercial FM station in the next few years along
: with a few business partners. My question is...what all is involved?

I'd suggest it's best to buy an existing station unless you're willing to pay for an engineering study, then have everybody and their grandfather file for the channel if it's available. Once the FCC agrees that yes indeed it is possible to shoehorn in a station on 99.7 and they put it on its allocation table, everyone files for it. Sometimes they battle it out for years, eventually compromising, buying each other out, or dropping out until only 1 or 2 are left. Of course, if you pick an unpopular town you have a much better chance.

Sure, if you have experience in doing this sort of thing it's cheaper than buying an existing station, but it's nice to buy the whole package and be on the air next month instead of next decade. Your mileage may vary depending on market.

Source record: 38381

The foreign language station on 530 was probably CIAO Brampton-Toronto. This is the old 790 CKMW, after a few call and freq changes. As one of just two North American broadcasters on 530 (the other is in High Level, AB), CIAO (and its predecessor on 530, CJFT Fort Erie ON) has incredible coverage for 250 watts. I can hear it in Massachusetts every once in a while. CIAO is all foreign-language.

Rumor has it that CIAO will move to 590 eventually as part of a swap that will move CJCL "the Fan" from 1430 to 590, move CIAO from 530 to 1430, and eliminate both country CKYC 590 and the 530 frequency in Metro Toronto.

If the station you were hearing was truly in French, then it was likely CBEF-540 Windsor ON.

I believe the station Mike referred to on 540kHz is CJSB. They are no longer broadcasting in French. As of a few months ago (last time I checked) they were "54-Rock. Ottowa's best rock." playing a good hard rock/heavy metal format. From the number of callers they put on the air, they seemed to do well, as the only time I was able to pick them up very clearly was after 9pm (I was DXing them from New Jersey.)
As for the french-language broadcast on 530kHz-- I remember picking up a religious station from Antigua on that frequency. Could very well be it.

Bonus trivia question: Which area, under FCC regulation, sports stations with K, W, and V designators? No cheating!

3328. FOB UPDATE

Newsgroup: rec.radio.broadcasting
Date: 1994-08-25 05:02:53 UTC
From: avb@cais2.cais.com
Message-ID: <33h8lt$n77@vixen.cso.uiuc.edu>
Source record: 38383

Here is the FCC's Field Operations Branch Update for the week of 8/1/94 -

August 9, 1994

FIELD OPERATIONS BUREAU ACTIVITIES FOR THE WEEK OF AUGUST 1

INTERFERENCE TO DISTRESS FREQUENCY:

The Air Force Rescue Coordination Center contacted the FCC's Communications Room last week to report that a signal in the New York City area was blocking the distress frequency used for aircraft radio locator beacons. The Civil Air Patrol (CAP) was unable to pinpoint the problem and requested assistance from the FCC. The FCC's New York office dispatched a mobile direction-finding vehicle to the JFK International Airport where CAP pilots had last heard the interference. FCC engineers quickly found that the signal was coming from the JFK control tower. A Federal Aviation Administration (FAA) transmitter, ordinarily used to communicate emergency traffic on the distress frequency used by aircraft emergency beacons, was being improperly activated by FAA control signals connected to the transmitter via telephone interconnection. The erroneous control signals were turned off and the interference ceased.

ASSISTANCE TO CANADA:

The FCC's Buffalo office received a complaint from Industry Canada (formerly the Department of Communications) in Toronto, Ontario, that one of their licensees was receiving interference that sounded like a fire dispatching operation. The FCC engineers worked with Industry Canada to obtain bearings which indicated the source of interference was somewhere in the area of Rochester, NY. The Buffalo staff could not find a listing in the frequency data base for any fire department operation in the area, but after working with the Public Safety Frequency Coordinator in Rochester, they uncovered an unauthorized relay station that a fire department had installed to fill in a poor signal coverage area. The FCC ordered the transmitter to be shut down, and Industry Canada confirmed that the interference was cleared.

FM BROADCAST INTERFERENCE:

Listeners of radio station KYBG, serving the Denver, CO, area, had been complaining to KYBG that two other Denver area stations were overriding their broadcasts. Station engineers worked for several weeks on the problem without success. KYBG requested assistance from the FCC and, in two days of field work, FCC engineers

identified the problem as an inter-modulation product created within the complainants' own receivers. The complaints came from a small geographic area in south central Denver. Many different models and makes of radio receivers were found to produce their own interfering signal from a mix of signals received from several other stations. The complainants were encouraged to contact the receiver manufacturers for appropriate remedies.

PIRATE RADIO STATION SHUT DOWN:

The FCC's San Juan office, responding to a complaint from the Cuban government, investigated the operation of a clandestine anti-Castro radio station. FCC agents tracked the station to a farm house in rural Puerto Rico by using both long-range and mobile direction-finding techniques. The station, identified as "Haciendas Las Carolinas," in Salinas, P.R., part of the so-called "National Cuban Front," was transmitting messages promoting the overthrow of the Cuban Government. FCC investigators shut down the station, and sanctions are being considered.

To update the situation, Steve Dahl disclosed on air today that he has a contract that expires Sept. 30. It was renegotiated last year after the Steve and Garry breakup. He also disclosed that he has flown to Dallas to discuss possibly becoming a morning deejay in another market (presumably Dallas but he was unspecific on this point).

WMVP continues to withhold vital advertising dollars from Dahl's morning show, yet word of mouth continues to spread, and with Wolf suddenly relieved of his evening sportscast on t.v. one can hope for a greater in-studio presence for Dahl's sidekick (most days Wolf signs in from his home in the 'burbs over a digital line). Over on the chi.media newsgroup recriminations are already flying, with people pointing the finger at WMVP/WLUP GM Larry Wert for abandoning Dahl in favor of Kevin Matthews, who got the WLUP morning show and will soon be nationally syndicated.

Personally, I wouldn't begrudge Steve if he got out of Dodge. He has said on many occasions that Evergreen was the best company he ever worked for; unfortunately, it is looking more and more like just another sad radio story where superior talent is cast aside by dim-witted management.

>WHAT I WOULD LIKE TO KNOW IS, IS HE STILL AROUND?

Murray the K died some years ago. It might have even been during the 70's. He was working at WNBC shortly before his death. I believe (but I'm not sure) that cancer got him at a relatively young age. Shame.

>WHAT I WOULD LIKE TO KNOW IS, IS HE STILL AROUND?

Tragically, cancer took Mr. Kauffman about ten years ago.
Interesting you should ask; just got through watching him in THE BEATLES: THE FIRST U.S. VISIT. The way Bruce Morrow trashes Murray in his book is petty. Between Murray on WINS and B. Mitchell Reed on WMCA, nighttimes in New York during the JFK era must have been a Camelot all its own.

Does anyone around here know how long Murray and actress Jackie Zeman were married? Were they still together when he died?

I'm am in process of building a new FM radio station in Southern New Jersey. It appears that
I am going to be facing some opposition from some of the public based on the radiation scare
that seems to be making it way through the industry, starting with cellular.

Does anyone have any direct experience with this issue. I would like to learn how it was handled
by you and what the results were. An engineering background doesn't prepare one for this sort
of public relations problem.

3342. software for top 941 rock songs of all time

Newsgroup: rec.radio.broadcasting
Date: 1994-08-25 05:03:33 UTC
From: bautista@icaen.uiowa.edu
Message-ID: <33h8n5$nbq@vixen.cso.uiuc.edu>
Source record: 38397

Hi...

I'm posting this for my PD, who has asked me for help doing the
tabulation of our listeners' favorite 941 rock songs of all time.

(you see, we broadcast at 94.1 MHz... get it?!!?!? Yeah, I know,
every station in the country's done this one. We used to do it
a long time ago, and we're going to revive it for our 20th birthday.)

My question is this:

I'm sure many of you have seen or done this before. How did you tabulate
the results? I'm imaginining a high-volume data processing chore here,
(our interns will rue the day!) and I'd like some sort of program that
will allow us to type as little as possible.

Something like: if I've already entered in Led Zepplin's Stairway to Heaven,
I could type "L" and get all the bands that start with that... after I've
typed enough characters so that the artist is unique, I'd get a list of songs.
Typing "S" would narrow the thing down to Zepplin songs that start with "s".

PLEASE respond if you've ever done anything like this... I have two studios
to rebuild before the big party, and don't relish the idea of dusting off my
database programming books.

I can use either MSDOS or mac sofware, although I'd prefer DOS/windows. It's what the
company has.

I'll summarize the responses here. Thanks a million for any help you can give.

In article <33eg3o$dtb@vixen.cso.uiuc.edu>, tfanderson@aol.com (TFAnderson) writes:

(on how to start an FM)

Having worked at stations who were upgrading their facilities (or purchasing or building sister stations), and having friends in the business who are trying it now. I've gotten a good sense of what's involved in a startup or major upgrade and it isn't easy.
First question...what market will you be operating in? Small market operations are cheaper to set up and operate, and you face far less competition for an initial license as well as for revenue once you're on the air. You can get away with depending on a satellite service for most or all of your programming and operate with a skeleton staff if you're not facing serious local competition. (You will not be able to do that and have any impact in a top 50 market, maybe not even in the top 100.)But the big drawback is, there's also much less revenue potential. People say they can operate little Class A FMs (typically 3000 watts ERP @ 300 ft. HAAT) for about $150,000/yr total cost in the small one and two station markets in semi-rural areas. But if you can't sell any more than that in ad revenue, you're nowhere, and some markets don't generate that much revenue per station. It may take $250,000 to $500,000 or more to get it built, equipped, and up and running until you have any consistent revenue even in a small market.
In a top 50 market like the one where I operate (1.1 million metro population) there can be $50-$75 million+ in gross revenue to divide among the stations. But there are also over 30 of them in such markets, AM and FM, and in our town, literally all the available allocations are either covered by operating stations or by CPs about to sign on in the next 12 months. An operating station will have a seven-figure value for the license and physical facilities alone, whether or not you're making any money. An unbuilt CP (there is one left in this town) will set you back $100,000 or more plus the cost of construction, and you'll then have to raise probably about a million bucks to get the station on the air and then run it and market it for 6-8 months until you have a reliable revenue stream to cover the nut.
All things being equal, I'd echo what friends of mine who own stations have said. Unless you stumble on a large market with a format idea that no one has exploited yet, and can

find a sucker to sell you a CP for cheap (or get lucky in FCC comparative hearings) it's much cheaper to buy a struggling station with a decent signal but incompetent management. You may literally buy cheaper than you can build, and with a good format idea, decent staff and enough extra cash to market you and keep you on the air 'till the ad agencies and spot accounts discover you, you can make it pay. But for a decent signal in a market with enough revenue potential to make it a paying proposition in a reasonable time frame (5-7 years from sign-on or less), better raise a million bucks.You may spend only a small fraction of that on the license and facility itself, but you may spend the rest of that million in staffing and marketing that station for the first 12 months until it catches on and starts to make money. There's a start-up AAA format FM in this market that followed this pattern and is really starting to do well after only a couple years on the air.
Good luck...

3346. Radio Watchers -- Kansas City (8/25/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-08-26 03:38:19 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <33jo3b$iic@vixen.cso.uiuc.edu>
Source record: 38301

A couple of notes from taking a spin around the dial last night (Aug. 24) and landing on 104.7 mHz:

** It took four years, but it appears a new FM station at Manhattan, Kansas has finally been built. The 50,000 watt station at 104.7 was broadcasting a stereo carrier (but no program material) until 10.38 pm yesterday. Logs list the station's assigned calls as KTDF. The station did not ID during last night's test.

** Gospel station KVCY(FM) in Fort Scott, Kansas has moved from 101.7 to 104.7. I don't know whether this was because of a power increase or whether the station was moved to make room for other upgrades in southeast Kansas and southwest Missouri. The station relays the Voice of Christian Youth radio network.

====

General observations from listening to the newly expanded offerings made possible by the construction of my receiving antenna system:

** The noncommercial part of the FM dial is clogged with gospel operations. I think this violates the spirit of the FCC's original intent for reserving 88.1-91.9 mHz for noncommercial, *educational* operations. In most cases, the NCE-FM gospel operations offer the same programming as stations in the nominally commercial part of the band.

** It seems almost every FM station in a rural Kansas town is repeating some satellite service offering country music. The observation I am making here is not directed against country music. Perhaps these stations can't afford local programming. Still, if that's the case, why were these things built in the first place?

** The exceptions seem to be the Manhattan-Junction City market (with NO country stations on FM -- though there are such stations in nearby towns) and KVSV-FM in Beloit, which, believe it or not, is a beautiful music station.

Source record: 38303

UltimaJock@AOL.com created a "list" of stations for the "Appleton-Green Bay Market". A few problems here:

First, they are two SEPERATE, DISTINCT, and DIFFERENT markets, not combined as one might be led to believe. The Green Bay Market is Green Bay/Brown County, and the other is Appleton/Oshkosh, including Neenah/Menasha.

Others:

:++++
:620 WTMJ Milwaukee---still has major impact in this market. Talk, but (aside
:from afternoon-driver Jonathan Green on a good day) a complete yawner.
:Flagship for the Green Bay Packers, Milwaukee Bucks, Milwaukee Brewers and
:Wisconsin Badgers broadcasts; they have Jim Irwin anchoring three of the
:four..

Not in the market, not considered in the market, and no impact on market.

:690 WXOL Oshkosh---extremely odd operating schedule: since going mostly dark
:in June, this one-time oldies station now only transmits Sunday morning
:religious programs(!). Archconservative Milwaukee televangelist Vic Eliason
:has announced his plans to buy WXOL, assumingly to retransmit his Milwaukee
:FM station WVCY.

True about odd schedule, but station is skating on thin ice as far as F.C.C. is concerned due to actions by personel as covered in July 13, 1994 Radio World article, page 9.
This station also suffered from "unique" signal patern, causing it to have a couple of strikes against it. Signal pattern strongly directional to south/southwest, causing major part of the Appleton/Oshkosh market to be without coverage. However, travel to the Rockford Illinois area, and you can pick this signal up loud and clear. (When they are on the air).
Last had impact on market rating-wise in mid 1970's when programed by Chuck Lakefield, now in upstate New York. Also went through a few owership/call letter/format changes.
Maybe Vic Eliason can bring the station to some semblence of solvency (sp), as he has done with the former WBON-FM, now WVCY-FM.

:1050 WSGC Kaukauna---limping along after a year of its "Gospel Country"
:format; also carries Appleton Foxes minor-league baseball.

Not worried about being "Competetive, since co-owened with Gospel
WEMI-FM. The former WKAU-AM, later former WQWM, not considered in either
market.

:1400 WDUZ Green Bay---A/C limper.

Define "limper"? By ratings, or personal opinion?
Must be personal opinion, not based in fact.
Adults 35+ (target audience) shows as follows, overall:
Mornings; Third place
Middays: Third place
Afternoons: Fourth
Nights: Tied for First (With WIXX-FM)*

Not bad for a 1,000 watt AM'er. This includes all "out of market"
stations, AM and FM alike. Hardly qualifies as a "limper"!

:1440 WNFL Green Bay---Ex-KFRC newsman John Heinritz in the mornings and
:ex-WISN Milwaukee morning anchor Tom Shannon in the afternoons;
otherwise,
:sports and syndicated talk (Limbaugh, TalkNet).

Tom Shannon exited-stage left quite a while ago. Now carries Gene
Burns.

:1450 KFIZ Fond du Lac---Full-service A/C, Packers/Brewers/Bucks and
:syndicated talk (Buchanan).

Not in either market.

:1530 WMBE Chilton---odd mixture of MOR, rock oldies and polkas.

Ditto, not in either market.

:93.5 WOZZ New London---sluggish classic rock.

Not considered in either market

:98.5 WQLH Green Bay---soft rock.

Obviously haven't listened in quite a while (year or so). Hot A/C.
Also #1 in many adult demos. *

:104.9 WKFX Kaukauna---sattelite oldies.
:107.1 KFIZ-FM Fond du Lac---CNN Headline News and Packers games.

Again, not considered in either market.

: how the FCC will assigning stations to this new band?

: --
: Rob Schaller
: Email: C12019@email.mot.com

The FCC went through a rulemaking that set up the framework for the AM expanded band. At that point, the accepted expressions of interest from AM station owners that wanted to migrate. At this point, the FCC is sorting out all of the expressions of interest, ranking them and trying to accomodate as many as possible. They will eventually issue a list of the expanded band and which licensess have been permitted to migrate. A migrator will have a period of time to do so or lose its rights. If anyone would like additional information on the AM migration process, I'd be happy to post an article about it.

The net ust provided us with a great Boston radio history update, how about Chicago?

I can't quite figure out what the deal is with WLS and the Loops. I last remember WLS as a CHR on AM and FM. The Fm changed calls and the AM went talk. As a kid, I used to listed to John Landecker at night. What a talent!

The Loop was an AOR, verdad? I guess the AM went Hot Talk, and was so successful, the pushed the format over to the FM.

I remember Steve and Gary on WLUP-FM with "Disco Sucks" in the late 70s. Now I guess they're apart.

WGN was the full service, while WBBM was the CBS news outlet (and former home of the notorious Van Gordon Sauter...the man who ruined the CBS news tradition!)

When I was last in Chicago in 1989, I heard the best station I've ever heard anywhere: WNUA, a jazz outlet. They're still there, but what impact do they have? What major staions have I missed?

Looking forward to your response...

In a previous article, WCHSNews@aol.com () says:

>
> I believe the station Mike referred to on 540kHz is CJSB. They are no
>longer broadcasting in French. As of a few months ago (last time I checked)
>they were "54-Rock. Ottowa's best rock." playing a good hard rock/heavy
>metal format.

CJSB is licensed as an English-language station and has never broadcast in
French.

They are now testing their FM transmitter and will soon switch to 106.9 MHz,
discontinuing the AM service on 540 kHz.

> As for the french-language broadcast on 530kHz-- I remember picking up a
>religious station from Antigua on that frequency. Could very well be it.

There are no French-language stations broadcasting in Canada on 530 kHz.
A possible explanation may be that the station is CIAO, a multi-lingual
station located in Brampton Ontario.

Standard Broadcasting, who has a construction permit to move their Ottawa station ("54 Rock" - CJSB AM 540) to 106.9 FM, has fired up their FM transmitter. The FM station is identifying itself as "CKQB-FM 106.9 Ottawa".

The format of 54 Rock was Classic Rock. The format of the new FM station is top secret, however it will not be Classic Rock because the station's promise of performance to the CRTC requires them to play at least 50% current music. Most rumour that I have heard has said that the station will have a Modern Rock or AAA format of some sort.

The transmitter is currently being tested. When it was first fired up, they had some sort of frequency range sweep test going for about 24 hours. They then went off the air yesterday. Late this afternoon, they came back on playing comedy albums (commercial-free and announcer-free), with an automatic ID at 11, 26, 41, and 56 minutes after each hour. They have been off the air for short periods since then, and empty carrier for about an hour once.

The real format, call letters (CKQB may be temporary, to throw us off), and name of the station, are still secret. The station seems to be ready to sign on by Sept. 1. I'll keep you posted.

3357. Gene Nelson's Last Day Friday

Newsgroup: rec.radio.broadcasting
Date: 1994-08-26 03:38:38 UTC
From: dk@crl.com
Message-ID: <33jo3u$ijk@vixen.cso.uiuc.edu>
Source record: 38312
Cross-posted to: ba.broadcast,rec.radio.broadcasting

The Bay Area has lost KKHI, KJAZ, and KGEI, and now it loses a giant.

This Friday, 8/26/94 will be Emperor Gene Nelson's last day on the radio. According to Herb Caen's column in the SF Chronicle, he will retire to a home in Hawaii and point to his picture on the wall of a bar and say, "I used to be somebody."

Gene Nelson came to the Bay Area from Syracuse, New York during the heyday of KYA, a rocker, then the "boss of the Bay" in 1962. A nice likeable mild-mannered guy, with the voice and looks that screamed "Surfer!" he spent the years playing rock, MOR, and oldies at KSFO and KYA with stints doing a talk show on KGO and emceeing events. His footnote in history might be that he was the host of the Beatles' last live concert (Candlestick Park, 1966). Gene Nelson also taught announcing at College of San Mateo (where I was one of his students in the early 1970s).

All told, he spent 37 years in radio. He said, "The best part was that I spent the last 32 of them in San Francisco."

3358. Jim Healy tribute

Newsgroup: rec.radio.broadcasting
Date: 1994-08-26 03:38:44 UTC
From: Rob Spencer <rspencer@netcom.com>
Message-ID: <33jo44$ijp@vixen.cso.uiuc.edu>
Source record: 38313

The Jim Healy tribute aired today, cutting short Tom Leykis' sparkling commentary re something or other. It was a warm and heartfelt tribute by longtime KMPC colleague Steve Bailey, ably assisted by Bob Rowe. Billed as a 90-minute program, it actually ran 106 minutes after commercials were inserted.

Even at that extended length, the show could only scratch the surface of Healy's nearly 50-year career. Healy's network of informants was second to none, which enabled him time and again to beat the competition to the big stories. His reputation for intelligent analysis made him one of the most respected sports commentators in Los Angeles (perhaps second only to Jim Murray).

He was however most beloved for his on-air style. It was reminiscent of Walter Winchell's, with its telegraph-beep transitions and rapid-fire delivery. But Healy's true genius showed in his ability to mix simple yet literate prose with appropriate, well-timed sound bites. Many of these bites became popular sayings in this town, such as "Who goofed? I've got to know!" (from Howard Cosell) and "She is a lovely lady, and my apologies to her" (from Victor Kiam). Readers outside of Southern California may have heard such utterances coming from longtime Healy fan Al Michaels, and wondered what the joke was. Well, now you know.

The show was very complete in covering Healy's career, and in providing comments from many people involved with it (including some of the utterers of the more famous sound bites). There were also some entertaining airchecks from KMPC, KLAC and KABC (now KMPC's sister station). There were however far too few actual clips of Healy at work for my taste. I would have liked to hear more examples of the man whose genius was so rightly being celebrated.

I suspect that this dearth of actual Healy material may have been due to his son Patrick's reluctance to have it aired. This suspicion is fed by Patrick's comment in the August 19 _LA Times_ that he doesn't want to use his father's name for monetary purposes (this in response to questions whether he would market any of his father's work). One can certainly understand this feeling, especially since his father passed away only a month ago, but one hopes he ultimately changes his mind. His father's long and brilliant career merits documentation, and a fitting tribute would be to donate all proceeds to cancer research. One can only hope.

Back in the early and mid 70's I used to listen to a show nightly on WBT 1110 AM in Charlotte, NC called "Lacy Listen's". It seemed to have a cult following with some intresting callers and various topics. Does anyone know what happened to Bob Lacy? Those sure were the good ol' days when you could scan the MW dial and get something different on every station instead of the same old syndicated stuff.

In article <33h8me$n8t@vixen.cso.uiuc.edu>, jbsientz@xmission.com (JBSientz) writes:

(about Murray the K's passing)

A few comments about Murray the K; his recent passing after a long battle with cancer took one of the pioneers who helped shape personality radio as we know it today. He had a crucial role in the development of both modern CHR and AOR formats from his work on the AM and FM bands in NYC.
Unfortunately he's not the only recent loss from that golden era. Just recently Jack Spector, one of the WMCA "Good Guys", died at the conclusion of a weekend air shift at a suburban station on Long Island where he kept involved in radio while in semi-retirement.
This creates the germ of an idea...why doesn't someone gather together, or contact separately, some of the great personalities of the 50s and 60s in NYC who helped set the direction of radio across the country? And then record their memories of how they helped create modern personality radio? Some of them, like Herb Oscar Anderson, I believe are alive and well living in retirement. Others (Bruce

Morrow, Dan Ingram, Ron Lundy, Scott Muni, Harry Harrison and more) are still active part-time or full time on NYC FM stations, especially WCBS-FM and WNEW-FM. They'd all make great interview subjects (Morrow wrote a very readable and entertaining account of his own 40 year radio career a few years back). A book or an audio history drawing on their memories to chart the development of modern personality radio could be an enjoyable read/listen AND a worthwhile contribution to the history of modern pop culture. Without these men and others like them breaking the mold of old-style radio, nobody we hear today---not Imus, or Stern, or Limbaugh or anyone else---would be doing what he does now. None of us would.
This is obviously a project for someone living in the NYC area because that's where most of the key people you'd want to talk to, still live and work. But better hurry, many of these men are approaching 60 or are past 60 and getting ready to retire. Some are already gone, like Murray the K, Spector, and the legendary programmer Rick Sklar. Sure hope someone gets to it soon...it's a story that deserves to be told while there's still time to get the details first-hand.

Don is doing a fine job here; he does the afternoon drive time show
(4-6PM). He's pretty good at promoting himself -- you can get a
bumper sticker that says "Let a Blind Man Drive You Home -- Don Vogel
KSTP". His program is called The Afternoon Saloon. Every once in
a while he does his show live from Billy's on Grand, a bar in St. Paul.
He's one of those guys that can make you laugh out loud.

My only complaint is that every day he has Pat Reusse (sp?) on
to talk sports from about 5:10 to 5:30, just when I am driving home.
(Reusse is a sports columnist for the St. Paul Pioneer Press).
I could deal with listening to Reusse maybe once a month but not
every damn day -- he grates on my nerves. Vogel does a great
impersonation of him, though.

>
The FCC position is that if a site is available to one broadcast
facility, it *must* be available to others. Now, cost is another
matter, and KARO should likely have made sure their lease was extendable
before airing the items. They can either pay the higher rent normally
demanded (the only thing KFMZ can do), or go to court to demand
equity - predatory business practices - or some such lawyer speak.

Source record: 38322

Barry,

"What the Ambassador meant to say was..."

What I meant was, every evening when I sign off at sunset, I continue to hear WLIB in our monitors (which are driven by a Sony AM stereo radio) with a clear, audible tone in Annapolis, MD..... EVERY NIGHT||| I did not hear their reported "open carrier" on 8/18/94 or any other time.

WHY do I continue to hear their signal after I sign off???? I dunno. Maybe, they have one of these new-fangled post-sunset authorizations... OR... maybe they can stay on longer because sunset comes later in a higher latitude. For example, during the months of June and July, WANN signed off at 8:30PM EDT. I seem to recall from my very first radio job when I was still in high school and starting college in 1969 (whew||) at a daytimer in upstate New York (WEHH, Elmira Heights-Horseheads) that we signed off in the Summertime at 8:45 PM EDT. Maybe WLIB still has the same deal. At any rate, they come in like gangbusters when I put our XMTR to bed.

Although I did not hear the hetrodyne of 8/18/94, I will be glad to tell where it did NOT come from... WANN.

Rick Barnes

email:
barnes@pentagon-hqdadss.army.mil

P.S. I hope that you don't mind but I'd like to put a copy of this discussion on the "Airwaves" distribution list as well. Others may (or maynot) be interested.

P.S.#2 Please hold off responding to me. I'm having some minor surgery done tomorrow and I'll probably be "out of it" for a few days.

Rick,

Thanks for the reply.

Yes, I understand the position you are in vis a vis the "proof". I was basically reacting to your statement that you heard (I thought you said) WLIB on the monitor. At any rate, as Bob Carpenter mentioned the number of the FCC duty desk, a few calls from someone who knows they are on the air, would tend to make it more "official" ... and redden a few faces.

As you know, whenever government paperwork starts, it's hard to stop it. <g>

Barry,

If a *FORMAL* complaint should be filed, I don't think that it should come from me. It should come from the gentleman that heard the "jamming" hetrodyne. What I can do is confirm one place where the carrier did *NOT* come from. I would be happy to support that point in a formal setting.

Rick Barnes

P.S. I do know a little about Baltimore radio. During my Army career, I was assigned to Fort Meade from 1974 - 1986 and again from late 1986 - 1988. Since my retirement, I've done a bit of engineering for Radio One of Maryland, WWIN AM-FM/WERQ FM/WOLB AM, and I'm active in the Baltimore Chapter of the SBE. If you have questions about Baltimore radio that I can't answer, I'm sure that I can find someone around town who can answer your questions.

} Oh no!!!!! I'm a Ft. Wayne Komets hockey fan, looks like I may lose my only
} way to follow the team and the International Hockey League.

The above 'nothing can be done' post is hogwash. If you feel the
sale is improper, for whatever reason (but HAVE a reason if you write)
or if you are beins erved by WOWO outside of the immediate Fort Wayne
area (as Walt is). You can w(and should) write to FCC - Mass Media
Bureau, AM branch - 1919 M Street Wash, DC, 20554 The file number(s)
are ...

BAL940311EC for the sale from Price (current owner) to Inner City Broadcasting.
which was filked on March 11 1994.

BAL940722GE for the proposed sale FROM Inner City to Pathfinder
Communications (to be sold after the pattern, etc is cut allowing
Inner City to have WLIB's nighttime license. Filed July 22 1994

See, Inner City is not even going to make a pretense of operating
WOWO, they are buying it, cutting off its .. er.. signal, then turning
it over to someone else How's that for public service?

BUT..... If you plan to do anything, you had beeter get off the net
now, write your letter, and send it. Time is nearly gone.. So act
now, or dont complain when somone silences YOUR station.

Bill

From the #40 market:

*CKEY-FM(101.1,licensed to Fort Erie,but sharing space with CJRN-710 in Niagara Falls,52 kW;Key FM 101.1)is expected to switch a modern rock format this Monday(8/29). Local music will be a good part of its playlist.
Liz Janik,chief consultant for the station,told Friday Morning Quarterback that "the opportunity is here now." She previously worked with CFNY in Toronto,as well as consulting another veteran modern rocker,CIMX (89.1,Windsor/Detroit;89X). Janik notes that,unlike 'FNY,the Key will be geared directly toward Western New Yorkers.(Makes sense;the Key puts a good signal toward WNY-but not toward the west;the production director at 97.7 HTZ FM in St.Catharines-who tipped me off to this a couple weeks ago-says that a booster signal will be put up so that downtown St.Cath. can hear it. BTW,I lost your address-can you get back in touch with me?)
Janik has hired a local music director and is in the planning stages of starting up a local music show,saying that she wants to "reignite the local music scene." Incidentally,the station will have-at first-no air personalities.
I expect the Key will take away some listeners from CFNY,but it will take the fall book to see how much.

*From the Erie County Fair(where I was at last Friday):The B.O.Geo 2 contest is over. All four contestants survived 250 hours in the Geo(which must have been unpleasant-at best;when I looked at it,it looked messier than my home. The back windshield had what seemed to be eggs(or what was left of it),not to mention other stuff. The lone lady got the car via the luck of the draw.

*WGR GM Jim Meltzer suspended midday talker Rich Michaels for violating some talk show guidelines,and took the unusual step of talking about it on air this week(don't know when). He said it was designed to make Michaels set to return on Tuesday)more sensitive. Sorry,Jimbo,I don't buy it. He's a joke-plain & simple. From what I've heard,he has only 1 book-at the most,2-to improve.
Also of note:
-John Otto(filling in middays the last 2)will be back doing 11pm-2am as of Monday. He was released in late October due to budget problems,but later resurfaced as its movie critic. He takes over for Major Talk's Leslie Marshall(who my boss at Alternative Press tagged Leslie Martian).
-Craig Edwards(ex-ND)is leaving to become ND at WWWE-AM in Cleveland (NewsRadio 1100-3WE). Lou Herbert,vet of Chicago & Denver,is expected to take over the job.
-Tom Bauerle has re-upped with 'GR for another year.

*Back across the border(credit to the Toronto Sun's Gary Dunford and
his Page 6 column of Tues.-I was at the CNE):
-Toronto's CFRB(1010,news/talk/Argos;The Source)has dumped its late
night talk shows. An expanded World Tonight will fill most of the pre-
midnight slot,with David Brenner's show jumping from the wee hours to 11:30pm.
After that(at 2am),some of its highlights. 'RB is working on a new late-night
talk idea(which Gary refers to as" Project Ralph").
-CJCL(The Fan 1430)is putting up with the strike by re-running some
the Blue Jays' best games(i.e.World Series,AL Championships,etc.)and doing
realistic computer simulations with the regular team of Tom Cheek & Jerry
Howarth handling the call. The first was earlier this month,with the '92 Jays
going against the '61 Yankees-and losing 4-1 as Maris & Berra hit HRs. After
the game("in true FAN fashion",as Gary notes)the second caller after the
game blamed manager Cito Gaston for leaving P Jack Morris in too long. They're
at it again this Sunday,as the '93 Jays talk on the '75 Reds. Script supervisor
Bruce Herman said it was the most incredible game he ever saw come out of a
computer.
-Mix 99.9 will have a new morning team in place soon. Larry Fedoruk &
Carla Collins(who stayed after Tom Rivers left to jump to CJEZ)were cashiered
a few weeks ago. Rob Christie and Audie Lynds will be the new team(possibly as
soon as next month)as soon as their contracts can be worked out;they were
spotted at the Ex during the Rolling Stones concert last week and were doing
some househunting. Christie & Lynds are credited with shooting CKNG(Power 92)
in Edmonton from the basement to second place. They were also aboard
Standard Broadcasting's annual cruise on Tuesday,where former morning shows
get to walk the plank-and bad attempts at karaoke are made(i.e.,GM Gary
Slaight and CFRB midday talker Jane Hawtin got booed off the stage for trying
to do Del Shannon's "Runaway" last year. Seems Gary should have stayed in
his office,fiddling with his jukebox.
So,what are Rob & Audie going to miss about Edmonton?
Audie:"No sales tax."
Rob:"That 3-story boot on 101st St.(ask an Edmontonian about it)."
Gee,I thought you'd miss the Oilers. :>

*The Democrat & Chronicle did a story on Tuesday about Colleen Brannigan
and Jennifer Michaels,the new morning team at WVOR(Variety 100.5). Colleen
used to work at WBUF(now known as B93),while Jennifer is an area native. The
chemistry is still not complete,as they've only been there 3 months. I'll
put more of the story in soon.

See what happens when I don't file on a regular basis? :) BTW,Bill,nice
to hear the kind words.

FAB...

HELLO ALL 'VBR alums!!!

I am the current P.R. Director at WVBR, and am on a mission to recreate the alumni mailings! It would be incredibly helpful if you could E-Mail me your address and current occupation. I think alumni relations is a key part of WVBR; as such we plan to, sometime in the future, print a newsletter relaying all the exciting things that have happened at WVBR.

In any case, we are still at 227 Linden Avenue, Ithaca, Ny 14850, so come visit, or write. It's always a pleasure to meet 'VBR alumns, and find out "how it used to be...!"

I look forward to hearing from you.

>>Does anyone know what happened to Bob Lacy?<<

Nothing, He was always like that. ;-)

Seriously though, I used to work at WBTs sister FM in the 80s, and know Bob fairly well. He moved into the morning slot at BT for a while, then went to work with WBTV (yup, they have a TV station too) as co-host of the local edition of PM Magazine during the latter half of the 80s. I was co-hosting the morning show on the FM, and when my partner abruptly quit in 1986, Bob volunteered to fill-in as co-host temporarily, so weve actually worked together, though quite briefly. Bobs back on the radio at the FM now, paired with Sherry Lynch as the Bob & Sherry Show. He kinda plays the second banana now, believe it or not. Too bad. Bob is indeed a sharp guy.

Err, no, not French. There is a multilingual station in Brampton, Ontario (Not too far from Toronto) that transmits on 530khz. (I believe the call sign is CIAO.) Often times it is recievable in the Pittsburgh area after 7.5kW WWCS from Canonsburg signs off (when it does that nowadays.)

mikedow@gate.net (Mike Dowling in WPB) writes:

"I can't quite figure out what the deal is with WLS and the Loops. I last remember WLS as a CHR on AM and FM. The Fm changed calls and the AM went talk. As a kid, I used to listed to John Landecker at night. What a talent!"
I assume Jay Marvin has already responded to this point, but the FM station has returned to the calls WLS-FM with a Hot Talk format; once multicasted with the AM but now split except for Limbaugh.

"The Loop was an AOR, verdad? I guess the AM went Hot Talk, and was so successful, the pushed the format over to the FM."
No, actually the AM was dragged way down by moving Brandmeier to afternoon drive to make room for Howard Stern, whose schtick failed miserably. The idea of putting the Hot Talk on the FM and switching the AM to all-sports WMVP was to get the jump on all-sports WSCR before the latter could kick in its 24-hour schedule. Ratings-wise, except for Steve Dahl (who holds equity in the station) and Black Hawks games, WMVP has been even more dismal than Stern.

"I remember Steve and Gary on WLUP-FM with "Disco Sucks" in the late 70s. Now I guess they're apart."
Meier got married again almost a year ago, and Dahl made some comments about the new Mrs. Meier in Garry's honeymoon absence. This led to a split, with Dahl taking over the AM's morning drive and Meier doing the FM's middays. However, last week Meier's contract was bought out (Danny Bonaduce's replacing him), and Dahl is making on-air noises about leaving for another market (possibly Dallas or Los Angeles).

"WBBM was the CBS news outlet (and former home of the notorious Van Gordon Sauter...the man who ruined the CBS news tradition!)"
WBBM's competing fiercely with all-news WMAQ (sold by NBC to Westinghouse in '88), but with the noises about a merger of Westinghouse and CBS, they just might wind up sharing the same house.

(on CKQB-FM's impending debut)

Actually it'll be programmed entirely from the jukebox in the
office of Standard Broadcasting's president Gary Slaight in
Toronto. :-)
Just kidding, although I've visited his office and he does have
a jukebox there. (I hear he uses it to program Mix 99.9 in Toronto
these days.) The word on the street from some of my sources in
the Canadian radio industry is that it will actually be some-
thing not TOO far off what they've been doing on 540 AM with a
little more of a AAA flavor to it than the current CJSB playlist.
What seems odd is that they didn't stick with the AM license as
well as move their music programming to FM, and try to do a
personality talk format with it a few years ago when the oppor-
tunity was there. It would've been a natural when CBC was the
only N/T game in town in the late 80s, and the market cried out
for a personality talker. (Even CBC knew that, and approached
me with the idea of bringing me aboard as CBO/920 morning
host in 1989, but the negotiations crashed and burned when the
issue of money & benefits came up.) Instead, once again CHUM
Ltd. found a hole in the market and filled it, as they do so often
and so well across Canada, by re-formatting CFRA/580 as a
talker. Now there's a hole on the AM band; don't be surprised if
a U.S. station somewhere in the Northeast fills it.

To Danny, Shemp or anyone who might know,

I'm looking for the Netid for Wlup (97.9) or for Danny Bonaduce's
producer Shemp. A few months back, Danny was interested in playing "How to
Host a Mystery". I was wondering if he had played it yet. If he hadn't, I
would be
more then willing to offer my services in running such a game.
Shemp, (if you read this), I had some experience playing and running
such
games. I also just got back from Gen Con, which is a huge Gaming
Convention
held in Milwaukee. While there I played a similar version, with about 30
people
and it was an absolute blast. I picked up a lot of great ideas playing
their
version and would be able to give you one hell of a game.

There is also an article on the Gene and Peter B. in today's (Thursday, August 25) Examiner in the Style section.

I'm just a youngin (20), and I never listened to Gene Nelson when he was doing music. However, in the eight months since I moved back up here from Smog City, I've been a regular listener of Gene Nelson and the rest of the crew.

It was a nice, easy going, fun radio show (especially with the news people, Ginny Pryor and Dave Henderson, and with John Madden), and I always enjoyed listening to it.

I'll be taping the entire final shows for both Gene and Peter on videotape. I'll send anyone who is interested a copy in return for money to cover postage and tape costs. E-mail me directly if you're interested.

However, I am looking forward to hearing Tom Leykis from a local signal.

As a past resident of the Utica area I find that radio activity amazing to watch. Levine evidently has a grand scheme wherein the classic rock & COR formats will give the high-low 1-2 to WOUR and 95X. While I understand WOUR in Utica has suffered, I think 95X is a stronger station. If Levine's plan works out, it may set a model for other close markets. Financially, it is genius - he sells 4 stations and pays less.

WOWB, I assume is "WOW105" - it sounds solid, and I think, with good promotion, it will become quite succesful; the gap left by WRCK changing to Classic rock is huge. Little Falls & Rome, though? seems odd as far as getting advertising is concerned. It was only a matter of time until there was a country sheke-up though - the market was flooded. No surprise considering the demographics.

I look forward to hearing you there and wish you luck. E-Mail for further discussion.

BAY AREA RADIO WATCHER SPECIAL REPORT - August 22, 1994

"The End of a Radio Empire"

San Francisco radio legend "Emperor" Gene Nelson signed off for the last time Friday (August 26th) after a 37 year career, 32 of them in the Bay Area. Nelson, along with the other twenty eight KSFO Talkradio 560 staffers are now without jobs, as Capital Cities/ABC, owners of cross town talker KGO Newstalk 810, take over operations under a LMA agreement. The sale of KSFO to Cap Cities is pending FCC approval.

Nelson's final show included aircheck tapes from his years in the radio business in Syracuse, Cincinatti, Buffalo, and San Francisco, two of his daily interviews with Fox Football commentator John Madden, plus other recorded novelty songs that he used over the years. In studio guests included his wife, who was to jump in with a time and temperature check if Nelson started to "puddle up", and his son.

The final half hour consisted of the entire morning crew saying their final goodbyes, and a final playing of Nelson's traditional Friday song: "Take This Job and Shove It".

Nelson came to the Bay Area in 1962, and has been at KSFO since 1968, except for a few stints at co-owned KYA-FM. He and his wife will now move from their home in the Napa Valley to Kauai.

I have the entire final show on videotape. E-mail me if you are interested in a copy of the show. I'll have more on the take over of KSFO by Cap Cities early next week, after the new programming starts.

3389. North San Diego Report

Newsgroup: rec.radio.broadcasting
Date: 1994-08-28 06:32:13 UTC
From: ChrisCarm@aol.com
Message-ID: <33pb1d$j11@vixen.cso.uiuc.edu>
Source record: 38343

Here's what is happening in the 55th Market:

Baseball still on strike, but KFMB (AM 760, 50kw, DAII) continues to air "Padres Talk" every night at 6 p.m. But, as the strike enters the third week, talk is shifting to the pigskin team.

KFMB-FM (100.7), also known as "Star 100.7," is the San Diego station for the new "Fox Kids Countdown." The two-hour show features cartoon character voices and soundtrack tunes. [Some what like various morning shows around the country!] It airs Sunday morning from 6 to 8 a.m.

KIOZ-FM (102.1, Oceanside) received good news. The station recently signed the team of "Dave, Shelly and Chainsaw" and their morning books are up from 3.2 to 3.8.

San Diego Gulls have moved their radio rights from KOGO to KSPA, Escondido for next season. AM 1450 used to carry the California A's baseball.

It seems the past few months, the SD posts has had it share of XETRA-AM. Well, the all sports station for the southland has a full plate, and still fills the newspapers -- and this report. XETRA-AM is handing four games of San Diego State to cross-town -- err nation -- station, KOGO (AM 600 5kw, U). [of course, there is the $50,000 in the deal too from XETRA to KOGO] As you may remember, the Noble station as the SDSU football, UCLA football and SD Chargers football. There were four conflicts on air time between SDSU and UCLA. Both contracts call for first air rights. Because of the handing off of XETRA, SDSU wants out of the last year for broadcast rights. There is a lot of rumbling about Nobel buying another Baja California station to broadcast sports (sorta like XETRA-II); but like the FCC, the Mexico equivelent moves slowly.

>From the Readers Post:

The former CBS Hispanic radio network has teamed up with United Press International and formed "CBS Americas." The new network will offer hourly news, sports programming, and World Series baseball -- all in espanol.

[I'm having a bit of trouble with my AOL mailbox so if I haven't answered your e-mail request for a San Diego radio log, please re-submit!]

The Sixth World Conference of Community Radio Broadcasters

W a v e s f o r F r e e d o m

Dakar, Senegal, January 23-29, 1995

***************
* U P D A T E *
***************

Contents:
1) Accommodation Plan "C" now available
2) Schedule of activities
3) For more information
========================

ACCOMMODATION PLAN "C" AVAILABLE FOR AMARC 6
============================================

Participants can now choose a third and more economical
accomodation option for AMARC 6. Plan "C" offers double occupancy
in a hotel and includes breakfast and lunch. As with all plans,
it is available for seven, eight or ten nights and includes
conference registration, documentation, services and social
activities. Additional nights are available at US$75.

Plan "A" offers single occupancy in the Hotel Le Meridien and
three meals a day. Plan "B" offers double occupancy in Hotel Le
Meridien and all meals

Duration of stay Plan A Plan B Plan C
============================================================
AMARC 6 plus African meeting
10 nights - January 19 - 28 US$1,100 US$900 US$800

AMARC 6 plus Women's meeting
8 nights - January 21 - 28 US$950 US$775 US$635

AMARC 6 only
7 nights - January 22 - 28 US$850 US$700 US$550

Note: There are a limited number of places available in Plan "C".
Your registration and deposit will reserve your room. If you want
Plan "B" or "C", please let us know if you want to share the room
```

with a specific person or if you want us to place you with another conference participant.

SCHEDULE

The following is the schedule for AMARC 6 and related activities. Note that the meetings held on January 20, 21 and 22 are optional. On January 21 and 22 there will be a regional meeting for Africa and on January 23 there will be a meeting for women active in community radio.

Participants should plan to arrive the day before their meeting starts.

January 19 * Arrival for Africa regional meeting
* Registration from 15:00

January 20 * Registration continues - 08:00-09:30
* Opening session of Africa meeting 10:00

January 21 * African meeting concludes
* Arrival for Women's meeting
* Registration from 15:00

January 22 * Registration continues 08:00-09:30
* Women's meeting begins 10:00
* Arrival for AMARC 6 and registration

January 23 * Registration for AMARC 6 08:00 to 09:30
* Opening of AMARC 6. Plenary at 10:00

Jan. 24-27 * AMARC 6 - panels, workshops, debates, consultations, exhibits, and regional meetings
* Awarding of Solidarity Prize and dinner at Gor�e Island in the evening

January 28 * AMARC General Assembly
* Alternate activities (workshops, local visits) for non-members

January 28 * AMARC General Assembly concludes
* AMARC 6 Closing plenary in afternoon
* Party and concert with local musicians

January 29 * Departure of participants

3391. Re: 530kHz beacon?

Newsgroup: rec.radio.broadcasting
Date: 1994-08-28 06:32:14 UTC
From: duke@interlog.com
Message-ID: <33pb1e$j13@vixen.cso.uiuc.edu>
Source record: 38347

fybush@world.std.com (Scott D Fybush) writes:

>The foreign language station on 530 was probably CIAO Brampton-Toronto.
>This is the old 790 CKMW, after a few call and freq changes. As one
>of just two North American broadcasters on 530 (the other is in High
>Level, AB), CIAO (and its predecessor on 530, CJFT Fort Erie ON) has
>incredible coverage for 250 watts. I can hear it in Massachusetts
>every once in a while. CIAO is all foreign-language.

Speaking of CIAO...

I remember reading somewhere what CIAO/CKMW had a sister FM station that
was the predecessor to CFNY 102.1 - which started up in 1977.

This seemed to hold water because CIAO does/did have its studios at 83
Kennedy S., where CFNY has always been.

Any confirmation?

3392. KZPS to buy KDGE?

Newsgroup: rec.radio.broadcasting
Date: 1994-08-28 06:32:20 UTC
From: "chip (c.d.) kelley" <chipk@bnr.ca>
Message-ID: <33pb1k$j16@vixen.cso.uiuc.edu>
Source record: 38348

The business section in today's DALLAS MORNING NEWS reports that modern rock KDGE-94.5 "the Edge 94.5 KDGE" is expected to be sold to Bonneville for $11 million. Bonneville owns classic rock KZPS-92.5 already in Dallas and has reportedly been looking for another Dallas FM to go with KZPS.

The DMN couldn't get anyone to comment on the sale from KZPS or KDGE, but they report the deal is expected to be signed next week and announced 9/1 with KZPS entering into a LMA with KDGE until the sale is closed in December.

This creates a 5th duopoly in town: (1) KSNN-94.9 "Easy Country Sunny 95"/ KYNG-105.3 "Young Country"; (2) KRRW-97.9 "Arrow 97.9"/KTXQ-102.1 "Q102"; (3) KESS-1270 "La Fabulosa"/KICI-1440 "Tejano Hits Kick"/KLTY-94.1; (4) KHVN-970 "Heaven 97"/KMRT-1480 "La Super"/KJMZ-100.3 "100.3 Jamz"/ KOAI-107.5 "Oasis"; (5) KZPS/KDGE

Also, in today's paper, WFAA-TV-8 resigned with ABC for 10 years as part of new pact with owner Belo and ABC. Co-owned WVEC-13 Norfolk VA also resigns for 10 years and KXTV-10 Sacremento will convert from CBS to ABC next year (but Belo's other 3 CBS affliates - WWL-TV-4 New Orleans, KHOU-11 Houston, and KOTV-6 Tulsa will stay CBS). It means CBS will have to now sign independent KTVT-11 to stay on the VHF dial when KDFW-4 converts to Fox next year (if KTVT can free itself from the Warner Brothers new network).

In other KDGE news, KDGE appears to have dropped Stevens and Pruett's show that originates from KLOL-101.1 Houston.

Chip

3393. KSAC going Spanish

Newsgroup: rec.radio.broadcasting
Date: 1994-08-28 06:32:21 UTC
From: mward@crl.com
Message-ID: <33pb1l$j17@vixen.cso.uiuc.edu>
Source record: 38346

The glutted news/talk/sports/information race in the Sacramento market is getting a little less competitive. All-sports talker KSAC-AM 1240 ("1240 Sports") is being purchased by the owner of Spanish-language format stations in Fresno and Bakersfield, and GM Don Early is reported in today's Sacramento Bee as telling staff that KSAC will go Spanish after Thanksgiving.

While this reduces the number of n/t/sports signals in the market to three (my employer, KFBK, along with 650/KST and Hot Talk 1140/KHTK), it actually creates just one more Spanish station in a market that already had three... KRCX-AM 1110 and simulcast KRFD-FM 99.9, along with the Z-Radio Network flagship station, KZSA-FM 92.1. That isn't even counting Spanish-language news/talker KTRB-AM 860 out of Modesto, which barrels into Sacramento with a 50KW signal.

KSAC's move comes just a couple of weeks after they hired KRBK-TV 31's Grant Napear to host their local afternoon sports talk show (they run the Sports Entertainment Network during most hours). Grant had a little run-in recently with the president of Sacramento's CFL football franchise, the Gold Miners, over his description of the team's recent play on his KSAC talk show. Grant does the 'Miners PBP on 31 with Tim Roye, former KFBK sports director...and the 'Miners president, Tom Bass, also has a KSAC show. Well, as long as they're in English, I guess :)

Speaking of my employer, KFBK ("News Radio 1530")... they recently announced the hiring of morning sports anchor Marc Moser as sports director. It's the latest hire for the station, which has brought aboard 2 full-time reporters, a weekend editor and a new morning producer lately. (In order: the reporters are Rebecca Green and some guy named Mike Ward, the editor is Mark Seelig and the new morning show producer is Jim Burrows.) (And although the Sacramento Bee made it sound like I just showed up on the doorstep at KFBK, I've been there in one capacity or another for a couple of months now. ;)

Semi-unrelated, but for those with an interest in TV - local ABC affiliate KOVR-TV 13 and CBS affiliate KXTV-TV 10 are swapping networks next April 30th. No word yet on how this will affect 13's relationship with a couple of the market's radio stations, but it's unlikely to do so.

Mike

Add one more name to your list: B. Mitchell Reed. He was the evening WMCA Good Guy in the early/mid 60's. As I recall, he was #1 in his time period in '63 and '64, until he returned to Los Angeles and was replaced by Gary Stevens, another person who should be fould and interviewed (he was, last I heard, a *very* successful station broker in recent years).

Mitch Reed died in the early '80's, as I recall.

Annoncement:

Tune in and log on to RadioNet this Sunday, Aug. 28, from 10am-noon!

RadioNet on KSCO AM 1080 broadcasts the digital revolution every Sunday
from 10:00 am-noon, combining the original interactive wireless technology
-
talk radio, with the Internet. We cover the fusion of computers, video and
telecommunications. Log on to RadioNet@ksco.com.

This Sunday's topic:
Electronic distribution of music via the Internet.
Will this spell the end of the corporate-controlled music industry?
The crew from IUMA, the Internet Underground Music Archive , will be on
line and on the air, presenting their alternative method of distribution
that supports the artists, NOT the record company executives.

Also this week:
First there were Baby Boomers, then Generation X-ers, now we have
"Screenagers". Who are they? We'll find out right after our Cyberpizza
gets delivered!
If you live in Silicon Valley or the Monterey Bay Area, please join us!
Calls and e-mail messages are encouraged!

Tune in, log on and chip in, this Sunday at 10am on KSCO am 1080.

Other upcoming guests:

9/11: Harold Hedelman from the Center for Electronic Arts
9/18: Eric Theise of Liberty Hill Cyberwerks and Bay Area Internet
Literacy.

-Czrider, RadioNet Producer and co-host.
E-mail: RadioNet@ksco.com
Station phone: (408) 475-1080 or cellular one: *1080

Source record: 38252

In article <33m87u$kdo@vixen.cso.uiuc.edu>, lrn1@cornell.edu (Lukas Neckermann) writes:

>If Levine's plan works out, it may set a model for other close markets.

As an "old" veteran (25 years) of radio, let me put my "two cents" in here about the Utica-Rome market. It doesn't take a terribly bright person to realize that the reason WOUR has stayed on top or near the top is longevity. This market has had the "change format" plague for years. The only stations to consistantly enjoy good ratings are those that have not changed formats every six months. WFRG, WOUR, WLZW and WIBX (although it's loosing numbers now.) The listener isn't stupid! Newness is a curious thing. But, if the listener doesn't find what he or she is looking for, it's back to the station they came from. Big prizes...raunch...controversy...and newness draw listeners. But...will they stay?
As a person that now is in the position to buy radio time, I still look for consistant...long term demos... A station may be on top today, but on the bottom tomorrow. Give me numbers that last, and stick with a format. It's like starting a new business. You can't expect profits in your first year., or even the second. So if you change formats....don't expect success out of the box. You gotta work for it and earn it.

3398. FALL RADIO SHOW IN L.A.

Newsgroup: rec.radio.broadcasting
Date: 1994-08-30 06:03:29 UTC
From: Merli John <jmerli@nab.org>
Message-ID: <33ui3h$l3s@vixen.cso.uiuc.edu>
Source record: 38253

This isn't as much a plug -- as an offer -- to answer any questions re: the upcoming NAB Radio Show in L.A., because I certainly recognize some names on the AIRWAVES list as past attendees. (I've been on AIRWAVES thru this summer, and work in NAB Public Affairs.) Here are some often-asked questions -- and if you have any of your own -- address them to me here on the list if it may be noteworthy for others, too, or send me a note to my personal address....

Is the NAB Show being combined this year with other conventions?

No. (Again, no!) It will be held CONCURRENTLY with the other separate conferences of RTNDA, SBE and SMPTE, all under the same roof at the L.A. Convention Center.

When is it?: Oct. 12-15 (a month later than usual)

What is new?: The exhibit, World Media Expo, Oct. 13-15, which DOES combine the exhibits (but not the sessions or activities) of the four participating groups. Also, the Radio Show will feature new "format state of the art addresses" focusing on 8-10 of the country's top radio formats from the its inventors and practitioners.

When is the Pre-Reg deadline?: Soon! Aug. 31.

How can I register by fax?: Call NAB HelpFax at (301) 216-1847 from your touchtone fax machine handset. You do NOT have to be an NAB member to access documents.

Will the Radio Station Tours be held this year?: Yes, given the largest radio market in the country as its setting. Wednesday, Oct.12 is the tour date for 8 groups to see a total of about two dozen successful stations (about 3 a tour).

Some key speakers?: Paul Harvey, Reed Hundt, Les Brown, Dan O'Day (also, some major network news types coming to the RTNDA show.)

Anything else? Slip me a note and I'll try to accommodate your questions.

jmerli@nab.org

3399. Re: Can ratings be discussed?

Newsgroup: rec.radio.broadcasting
Date: 1994-08-30 06:03:52 UTC
From: markelliot@aol.com
Message-ID: <33ui48$lf1@vixen.cso.uiuc.edu>
Source record: 38254

In article <33m87n$kdc@vixen.cso.uiuc.edu>, dk@crl.com (David A. Kaye) writes:

"Consumer Reports" sued a company which used its product ratings in its advertising AND LOST!

Arbitron ratings are slightly different than these. Arbitron will probably NOT sue if ratings information was posted on the Internet strictly for informational purposes. Many publications have access to this info, and publish it regularly. What Arbitron WILL sue for is unauthorized USE of this info.. i.e. a station taking it off the 'net and using it to sell advertising time. I'll post a number of a board in Chicago with free access to ARB numbers as soon as I find the phone #.

3400. CJSB, CIAO, and some Canadian questions; plus, the end of WHDH

Newsgroup: rec.radio.broadcasting
Date: 1994-08-30 06:03:56 UTC
From: wollman@ginger.lcs.mit.edu
Message-ID: <33ui4c$lgj@vixen.cso.uiuc.edu>
Source record: 38255

In article <33m87e$kd2@vixen.cso.uiuc.edu>, Talk1370 <talk1370@aol.com> wrote:

[about 540-CJSB Ottawa]

>Now there's a hole on the AM band; don't be surprised if
>a U.S. station somewhere in the Northeast fills it.

I wonder about that. (And I hope that it doesn't happen.) In my neck of the woods, I get WWCS Canonsburg and CBEF Windsor regularly (usually trading off well into the night); I received CJSB only couple of times in my half-year here. (A week ago I was lucky enough to hear CBT Grand Falls, Nfld. sign off.)

It seems to me that any US operator who wanted to start up a 540 in the northeast would pretty quickly have to deal with treaty issues.

That reminds me... Does anyone know why the Canadians seem so enamored of short-spacing their stations, especially the commercial ones? 540 is not even the best example; consider 800, which has CKLW Windsor, CJAD Montreal, and CHRC Quebec on it. If I had reference books in my office, I'm certain I could come up with more.

To re-join this with the other thread, 530-CIAO is a regular for me here in Brighton.

Another Canadian question: The week of the 15th, 940-CBM Montreal did not sign off overnight. Rather, when they usually would have turned on a test tone (which I have been told some of their relays carry all night), they instead switched into a relay of the CBC Stereo service on CBM-FM. Does anyone know why? That same week, 1070-CBA Moncton left a dead carrier up overnight, almost blocking out the usual CHOK Sarnia.

Now, as promised, the end of WHDH:

First of all, it turns out that WHDH still legally exists; they haven't managed to get the 850 call changed to WEEI even though 590 has been WBNW at least over the weekend. Still, it's just as well, considering the send-off that ARS gave them (which strengthens my resolve even more not to listen to ARS stations if I can avoid it). The final few seconds of News/Talk 8-50 WHDH went like this:

- Horn playing taps
- 15 sec. of a toilet flushing
- a number of hard-to-identify miscues (hit midnight here)
- legal ID: ``WHDH Boston, WBNW Boston, WVEI Worcester''
- WEEI Jingle

- break into running ABC newscast

It all seemed really sloppy to me (not to mention tasteless). I think Sunbeam will be quite happy when they are no longer sharing the WHDH call with that crew. As promised, the ``new'' slogan is ``Sportsradio 8-50, WEEI'', although they haven't found a way to work that into their jingle yet.

3401. An ugly shift at the campus radio station

Newsgroup: rec.radio.broadcasting
Date: 1994-08-30 06:03:58 UTC
From: jfurr@acpub.duke.edu
Message-ID: <33ui4e$lhq@vixen.cso.uiuc.edu>
Source record: 38269
Cross-posted to: alt.fan.joel-furr,rec.radio.broadcasting,rec.humor

When I was a student at the University of Georgia (1985-1988), one of my friends was a law student named Larry Welborn. Larry had attended Clemson and had worked as a late-night DJ at the Clemson campus radio station.

Larry told me a story once of the lengths he had to go to get requests late at night on his punk-rock and alternative radio show, which popped into my head today in a supermarket checkout line and which I rushed home to post for your listening entertainment.

It seems that late one night, Larry was hanging out, doing his show, chatting with some friends who had wandered by, and getting essentially no requests. I guess a campus radio station in South Carolina doesn't have a _lot_ of listeners for a late-night punk rock radio show.

Larry got irked by the lack of requests. He got on the air and said that if requests didn't start coming in, he'd be forced to do something drastic.

No one called in.

Larry said "All right, you made me do it. I'm putting this record of Sammy Davis Junior singing 'Candy Man' on and I'm going to keep it playing over and over until I get some requests."

He put the record on, turned the booth speaker off so he couldn't hear the music, and waited. 20 seconds later, the phone started ringing off the hook.

3402. In Praise of Carter/McGee

Newsgroup: rec.radio.broadcasting
Date: 1994-08-30 06:04:08 UTC
From: UltimaJock@aol.com
Message-ID: <33ui4o$ll6@vixen.cso.uiuc.edu>
Source record: 38256

IMHO, the only local talk show left in Milwaukee worth listening to (now that Don Vogel, Larry "The Legend" Johnson, Beth Albright and Jay Marvin no longer toil in that particular vineyard) is Richard Carter and Commander Michael McGee's morning shift on WNOV. Whether you like them or don't like them (thank you Ric Flair), they deal in the unvarnished, hardcore truth.
When Curt Smith thinks the best thing he can do is take three solid hours of WISN airtime to praise Richard Nixon (that's what he's hyping for next week), it just makes Carter/McGee all the more honest...

Daevid Aachen, Mornings, WRJQ-AM 1570, Appleton WI

WLS AM was a Top 40 / CHR format until about 5 years ago, when they went all talk (in the waning music days they sounded much more AC than CHR and ran an oldies show from '50's theme diner Ed Dbevic's)...they went hot talk, the FM (which was WDAI--AOR then a strange AC/AOR then hard AOR then disco then WRCK--kind of a fun oldies intensive adult rock, then WLS-FM--CHR) started simulcasting the AM about 2 or 3 years ago.

The AM has been pretty consistently right wing, the FM is pretty liberal except for Rush Limbore whose show is still simulcast on both frequencies. The AM is still simulcast on the FM on the weekends, with the "best" of Limbore, Bob Brinker, Dr. Dean Edell (on delay), Hainer and McNamee and Jake Hartford (a funny, intelligent and thoughtful conservative).

> The Loop was an AOR, verdad? I guess the AM went Hot Talk, and was so
> successful, the pushed the format over to the FM.
Not hot talk, but comedy mixed with adult AOR. Indeed, this was moved to the FM, the AM is now WMVP all sports, with Steve Dahl (who divorced Garry last year) doing mornings with sidekick Bruce Wolf (a very funny TV sportscaster who just lost his main TV gig). There is no music on WMVP...WLUP still plays a mix of old and new rock with lots of comedy and talk...still has nonstop Saturday night with at least 98 songs in a row.

Evergreen (who owns WLUP) bought WWBZ (formerly WFYR, adult contemporary). WWBZ (the Blaze) was a really repetitive heavy-rotation-AOR station that really sounded like a CHR with medium hard-rock. Evergreen hardened up the sound a little (added some Pantera during evening hours), but then changed the call letters to WRCX, Rock 103.5 and basically changed the format to the old WLUP AOR format, mixing Spin Doctors, Pearl Jam and STP with Van Halen, Zeppelin and the Stones. No Cure, Depeche Mode or Suzanne Vega, though...this is clearly a 18-34 male format.
>
> I remember Steve and Gary on WLUP-FM with "Disco Sucks" in the late 70s.
> Now I guess they're apart.
>

Garry just couldn't take Steve's crap anymore...now Garry's been asked to
leave WLUP...they are buying out his contract. Some say he's boring...
I don't find him so.

> WGN was the full service, while WBBM was the CBS news outlet (and former
> home of the notorious Van Gordon Sauter...the man who ruined the CBS news
> tradition!)
WGN is still full service, WBBM is the news outlet, WMAQ is trying to
be, but they have joined the sports-talk glut from 6p-12a (with WMVP and
WSCR, owned by the same folks who own WXRT, the long time adult progressive
stalwart in town which just celebrated 20 years last year)...WBBM
clearly dominates in the ratings (and in quality IMHO).
>
> When I was last in Chicago in 1989, I heard the best station I've ever
> heard anywhere: WNUA, a jazz outlet. They're still there, but what
> impact do they have? What major staions have I missed?

Q-101 is now a HUGE success, as a heavy-rotation alternative format very
big with generation Xers. Mix of Killing Joke, Sheryl Crow, the Cure,
Love Spit Love, etc. No "classic rock" but they sure could get deeper
into the albums and support local rock except for the one hour a week
they do the local show on Sunday nights...

WYSY is all 70's all the time. YAWN.... They used to be hot AC during
the day and heavy metal at night.

WCBR 92.7 from Arlington Heights is an excellent alternative format during
the week (deep cuts, lots of local acts, older tracks without having to
put up with Bob Seger or Steve Miller Band) but unfortunately, the station
is mainly brokered talk on the weekends.

WIND (formerly MOR then AC in the 60s and 70s, then issue-oriented talk)
is a Spanish language station for older folks, WOJO (105 FM) is
a Spanish language adult contemporary format.
>
WNUA is huge...they are the Muzak of the '90's...light urban and light
jazz during the day, more instrumental and jazzier at night. Excellent
for removing stress from the environment, and certainly better than
elevator music. Most likely station to hear on hold or in an office.

WJMK is oldies with Dick Biondi and John Landecker on staff, both top 40
icons from the 60's and 70's respectively. Sister station WJJD has
Clark Weber doing talk in the morning, then G. Gordon Liddy's show mid-day
and Patti Page, Pat Boone, Teresa Brewer type music the rest of the time.

> Looking forward to your response...
Enjoy!

3404. Student Owned Stations, where are you?

Newsgroup: rec.radio.broadcasting
Date: 1994-08-30 06:04:12 UTC
From: lrn1@cornell.edu
Message-ID: <33ui4s$lml@vixen.cso.uiuc.edu>
Source record: 38258

Last I heard, there were only very few (<8) successful commercial, student owned and operated radio stations in the USA. This means that the entire staff, aside from possibly a few custodians, and maybe a hired salesperson or two are students of a university.

The one in Princeton, NJ - are you out there? How 'bout Brown's? Please E-Mail me, so we can compare notes. The market is tough, and it is difficult for a station operated without financial assistance to survive, but there are also inherent advantages to this setup. In Ithaca, NY, we have come along extremely well with ours, and I would like to see how "you others" are doing.

Hello,

I've been away for a couple of weeks and away from subscribing to AIRWAVES for the summer. Now I read via the Gopher connection.

Can anyone answer for me why 3WE-Cleveland is not carrying Don Imus in the morning? has there been a change at the station & they have dropped it, or is Imus on some kind of break, or....

Any help is always appreciated. E-mail replies directly to me.

Well Friday the 26th was the final day for Springfield Missouri's locally programmed children's radio station KIDS 1340.

I taped the entire day (6 hours) on a Hi Fi VHS and have not listened to it all, but I will say this... If KIDS could have programmed its entire service like today's Farewell, there may have been no farewell at all.

What I heard was about two hours of 'KidTalk', where children call in ad talk about anything (or in some cases, there is a subject or guest). But today the topic was (you guessed it) Farewell to KIDS, and "Your best memories of KIDS".

Well I have to tell you that this was one fine piece of broadcasting. The lines were tied up for hours as children (and a few parents) called in, told jokes, sang songs, and reminiced about KIDS. It was great. Although the usuall technical problems plagued the show, the outpouring of emotion was touching and very very heartwarming. It is truly a shame that KIDS has had to pull its plug on Springfield Missouri and the Ozarks.

One can only speculate ... what if. What if there had been more outpouring of financial support, what if the management had been a little less rigid in their stance, what if ...

Even children's radio pioneer network, Radio AAHS could not match this performance. Because the kids were local, and were responding to people who are local.

In short, it was a blessing to hear.

Although I taped the show, I am not going to offer to make copies, since it was on VHS, not cassette and duplication would be a problem. I dont want to offer something I would have a problem fulfilling. If anyone out there wants to offer copies, I might make ONE duplicate (remember this is a 6 hour tape) under the promise that you will make copies available.

But suffice it to say, that in its final hour, KIDS surpassed all expectations.

Bravo.

Now, what will become of the 1340 spot is anyone's guess. Hey radio AAHS, get down here before 1340 becomes the Chuck harder network or some such garbage.

Bill

PS thanks to all who complimented me on the first KIDS article.

Cross-posted to: ont.general,wny.general,rec.radio.broadcasting,alt.fan.u2,alt.music.u2,alt.music.alternative

Anyone heard this yet?

They started off on Friday night/Saturday morning with an endless loop of station IDs that played overnight. Went something like "This is Niagara's rock alternative - 101 FM - The Planet..."

The signal is rather weak, and I can only seem to get it in my car. However, I picked it up on CJRN 710 at home, as they seem to be simulcasting them overnight.

(CJRN picks up the Jays...could The Planet be a Telemedia station? Obviously they are owned by the same company as 710 to be simulcast by them.)

Then, since Saturday...NOTHING BUT U2! I swear, NOTHING, except station IDs and Bono nonstop...

Likely a test, but who knows...maybe the world's first all U2 station?

I've just picked up a book titled RADIOTEXT(E), apparently the 16th volume in a series of essay compilations called Semiotext(e) (522 Philosophy Hall, Columbia University, New York City 10027). Among the contents are Steve Post's "Son of Playlist" (a chapter of his legendary book PLAYING IN THE FM BAND), a transcript of a broadcast made by Ezra Pound from Fascist Italy in '41, Murrow's report from Buchenwald, Hirohito's Imperial Surrender Broadcast, the Code of Wartime Practices for American Broadcasts, Abbie Hoffman's chapter on "Guerrilla Radio" from STEAL THIS BOOK, one of Happy Harry's bits from PUMP UP THE VOLUME, a Norman Corwin script, and essays by Bertolt Brecht, Kurt Weill, George Orwell, Leon Trotsky, Upton Sinclair and KPFA Berkeley's techno-satirists Negativland. If you're an egghead at all about this business, grab this thing as soon as you can.

Out of the #40 market:

*The changeover I mentioned at CKEY(101.1;Ft.Erie/Niagara Falls,Ont.)
occured on Friday night. Around 10:20pm,I heard a repeating loop of about
5 minutes with space-like music and liners saying that "the evolution of
radio has begun"-among other things. They're known as FM 101-The Planet.
This continued until Saturday afternoon,when they started playing
U2 round the clock-with no jocks,and only liners between songs. Even though
U2 has over 100 songs,it still wore out in about 3 hours. However,as of today
(8/30),they have expanded their playlist(Peter Gabriel,Morrissey,Billy Idol,
the local group 10,000 Maniacs)-albeit still no jocks or commercials. When
WBUF(B93)switched earlier this year,they went jockless,but still ran
commercials.
Who do I think will be hurt,ratings-wise? In the Buffalo Arbs,CFNY
probably will be hit hardest. The Planet will probably take a good chunk
of listeners away from The Leading Edge. In Canada,CHTZ(St.Catharines)could
suffer. It gears to probably the same demos at HTZ does.
BTW,I'm working on a tape of the switchover-complete with liners.
Write if you're interested(be advised-it's a work in progress).

*WGR midday talker Rich Michaels returned today after the 3-day
suspension handed to him last week,and sounded as intransigent as ever. He
boldly declared that nobody-not(in his words)"the FCC,the ACLU" or those
protesting outside the station(whom he referred to as "goons")-would
compromise or dictate the content of his show. Well,Rich,I can give you one
thing that might. Ever heard of the Arbitrons? The most recent book(either
the regular one or the one for NPR affils)shows you can't WBEN at any point
of your show. Not only that,but for the hour you and Limbaugh go head-to-head,
your head gets handed to you on a plate-by over 3 points. The best song that
could describe the show is the chorus of Beck's Loser. Mark my words-if Rich
leaves,he'll cry censorship. Depend on it.

FAB...

The move to a later month is short-sighted and anti-talent. The Radio Show now falls smack in the middle of the Fall Arbitron period rather than between books or during the Summer book as it has in the past. The result is that many stations won't allow talent to attend the event now because it's "in the middle of the Fall book."

I work for a network now, and I will be dispatched to attend the convention and promote my show. However, for years as a talent at local stations, I had to beg for the chance to go the NAB, and I'm sure that many air personalities won't get to go anymore...

BAY AREA RADIO WATCHER - August 30, 1994

KSFO Changes Management

The new KSFO 560 management (Cap Cities ABC) took over operations at 5 AM Monday, September 29th. The overnight before consisted of an interesting mix of Rock & Roll, novelty songs, comedy bits, and old KSFO jingles.

But at 5:00, the new morning show with Jeff Blazey (formerly of the Blazey and Bob Show on KOME 98.5 in San Jose) and Charlie Simons debuted. At 9 AM, the syndicated "Fabulous Sports Babe" airs, followed by former KGO talker Shawn Nix at Noon. Tom Leykis is on from 3 - 7, Dr. Laura Schlessinger follows, and a local late night show, hosted by Emil Guillermo, is on from 10 to 1 AM. Local weekend programming includes a sex talk show and a computer show hosted by former On Computers host Leo Laporte. The station is billed as "Radio with Attitude".

Shorts....

Tom Leykis made a visit to California last week, making a personal appearance at the California State Fair in Sacramento sponsored by local affiliate KSTE 650. The Friday show was broadcast from the capital city... Permanent KGO fill-in host and comedian Brian Copeland gets a permanent spot, taking over Shawn Nix's Saturday 10 to Noon show. Nix is now doing a daily show on recently acquired KSFO... G. Gordon Liddy fans in Northern California now have nowhere to hear "The G. Man". Not only has KSFO dropped the show (but is still contracting to carry the national commercials), but Sacramento affiliate KHTK-1140 replaced his with a local "Hot Talk with Tanya" show in the 10 - Noon time slot...

In a previous article, wollman@ginger.lcs.mit.edu (Garrett Wollman) says:

>That reminds me... Does anyone know why the Canadians seem so
>enamored of short-spacing their stations, especially the commercial
>ones? 540 is not even the best example; consider 800, which has CKLW
>Windsor, CJAD Montreal, and CHRC Quebec on it. If I had reference
>books in my office, I'm certain I could come up with more.

The main reason for Canada using short-spacings and complicated
directional antenna arrays is that most of the best AM channels were gobbled
up by the US many years ago. These techniques are necessary to obtain a
reasonable number of AM stations in our radio markets.

Things have gone for the worse since the government made the airwaves a source of profit and not of enlightenment...Commericals are horrible, and I refuse to listen to or watch them. Compressors are horrible, and I never use them.

Commercial stations should be shoved above 100 MHz, and from 88.1 to 99.9 should be non-commercial and public. We can use the airwaves as a tool, not just in the marketing sense.....

This idea of "Cyber-Jocks" sounds like an interesting
concept. Will this electronic publication just have names
of radio personalities with their e-mail addresses or will
it also have feature articles on some of these "Cyber-Jocks"?
If it does include articles, I have an idea for your next
issue...

I propose "The Battle of The Network Cyber-Jocks"(tm)!

Both opposing Jocks work for the Westwood One Radio
Network but are based from separate coasts.
Both "Cyber-Jocks"(tm) have a keen interest in computing
and have been spotted in "Cyber-Space".
The *Don & Mike Show* coming from the East Coast out
of the Washington D.C. area is the proven "veteran team".
The national show has grown in leaps and bounds over the
last year and the successful formula of the show can best be
described by that Sienfield episode when Jerry was trying to
pitch a show to N.B.C. as "a show about nuth'in". The entire
show is done with nothing special in mind, no pressing issues,
just radio high jinx at it's purest. It all the fun things about radio

and they make fun of the radio business itself.
On the West Coast (or as Tom would say... the "left coast")
there is the NEW (and improved) Tom Lykis Show !
He represents everything that is fake about the West Coast!
All the glitz and the phoney lifestyles that people have out there.
Tom says his show is the answer to all those "right-wing" radio
show hosts that constantly knock the Presidency, and that he
covers the issues that "really matter". I spent all of last week
listening to his show to give it a fair chance. He based most of
his shows on articles he read in "Glamour Magazine" and
"Redbook". Those really were'nt the kind of issues that "really
mattered" to me.

What I propose in "The Battle of The Cyber-Jocks" (tm),
is that these two jocks battle it out here on the Internet!

Listeners and other people in the radio biz can also
write their impressions of both shows.

When the smoke clears... The Cyber-Jock with the best
show will be declared the winner! ;-)

It might add a little spice to your "publication" !

Disclaimer: The above comments were written with tongue firmly
planted in cheek and was not intended to offend
anyone. Tom Lykis did alot of his shows last week on
Rush Limbaugh's lack of humor... let's see if Tom
has a sense of humor ! :-)

ftp'ed a nice windows program: it has a database of all the radio stations in and near the USA. The display shows a drawing of a radio, and you can select which larger town you live on or "visit", then you can scan the dial AM or FM, to see what stations are in that area. Displays frequency, call, format, and city of license. Or you can search for a radio station by typing in a small window you mouse up its callsign. And you can "visit" that town.

you can get it at: ftp hk.net then cd to shareware/prs
and do a "bin", then "get" the file, it's id_na484.zip (or similar name).

(on Canadian stations)

NARBA 1941 has been amended and re-amended to cut stations on both sides of the border a lot more slack than they used to have...we've all mutually agreed essentially to give each other the same protection we give our own Class I stations (which is a hell of a lot less than we used to). That means a 540 station in the eastern US is possible, as long as it doesn't get into the nighttime skywave area (about 1500 km radius) of CBK in Saskatchewan. You have a similar situation with formerly strictly protected CBW in Winnipeg; there's now a not terribly directional full time 5,000 watt outlet on 990 in Rochester, NY which has to worry more about co-channel protection of a Tennessee station than it does about Winnipeg.

Bottom line is, a similar operation on 540 is possible in the Northeast. Since the CBC French service on 540 in Windsor is rumored to be a candidate for the chopping block due to relative lack of potential audience, and may go dark, it could happen even sooner. In a case like that you could even see a 550 station like WGR make a run for it in order to run a looser night pattern, or the 560 daytimer south of Detroit try to go fulltime on 540.

In the case of CKLW (according to what insiders there say) it is considered the dominant station on 800 in the northern part of the continent, with a Mexican border station dominant to the south. Its DA-2 patterns were set in the late 40s with the idea of accomodating regional stations to its east. CKLW's 50,000 watts are moderately directionalized to cover Windsor, Sarnia, Detroit, Flint, Toledo and Cleveland day and night. Signal is restricted a bit, to the equivalent of 5,000 watts, to the east-northeast with the null (such as it is, it's not much of a null) roughly toward Toronto and Montreal. You have stations on 800 in Belleville, Montreal and Quebec, all extremely tight to the north-northeast to screen each other and CKLW, while CKLW (which is never very directional) is clearly audible in the background even on the edge of those stations' prime areas---get far enough west, somewhere around Buffalo, and it's all you hear.

The error, if there is one, is allowing stations on the air knowing CKLW is going to clobber them at night almost within sight of their towers on the east-west plane. It's reminiscent of the way the FCC stacked stations on 1510 in New England and 1260 between Central New York and mid-Ohio. Those stations should have been put somewhere else on the dial for their own good.

3427. Digital Audio in Commercial Radio

Newsgroup: rec.radio.broadcasting

Yes, I know a lot of commercial stations are using digital workstations in production and automation now, but I'm wondering if anybody's using an integrated solution along these lines:

Production takes place on digital workstations and the end product is stored on network hard drives. The sound files are called up through reproducing workstations with touch screens in the on-air studios or by automation systems -- but the network hard drives (a file server somewhere in the building) is the place where all these sound files live their more-or-less temporary lives.

If so, what kind of hardware/software are you using? Mac, PC or Unix? Separate or integrated A/D - D/A conversion? Are your networks fast enough?

Any thoughts you care to share on this subject are appreciated.

<tknab@nyx.cs.du.edu> writes:

Since this is an fm station, I would not mess around getting incomplete librarys from different sources. Spend a few grand and get the TM CENTURY CD library for your prefered type of a/c. Those librarys will have any cuts you will need. As for currents, If you can't get record co service, I reccomend RPMs Top Hits weekly hit cds. They are basicly the same as TMs Hit Disks and a MUCH cheeper cost. (As low as $50 per month). Sure you will spend some bucks here but then you will eliminate any concern for not having all the music you need.

As for a promotional gimmic for the change;
I would go for the standard Play one song for a weekend approach. Contact the news media, and mabye do a pre-change mystery billboard campaign that catches peoples attention, but does not let them know what the billboard is about untill the sign on. (ex: If you would call your station "the whale", do a campaign of billboards with nothing but a giant eye catching whale on it. Then on the day of the format change, Have the logo and calls printed on the boards.)

Yes more money spent here too. But you have a chance to start this off right. Doing a good job putting a station on the air can mean more money down the line than if you did a half assed job.

Bob

Ya know when you wrote this I was reminded of a station here in Toledo that changed formats from Top-40 to Oldies. WRQN which was number 1 in the ratings one morning started playing the song "Louie Louie" over and over and over again with some computer voice coming on in between telling us all that we were listening to "Louie 93.5 FM". Well, a couple day later they did change to Oldies. But, what is funny about this is one morning on WVKS 92.5 They started playing "Achy Breaky Heart" over and over, while the morning guy told the audience that he was told by the GM to do this. In between the songs they took phone calls with all the listeners talking about that "other" station.

Is there a large record store in your neighborhood with a "one-stop", a service offering discount bulk sales? By far the easiest is to go to the one-stop, buy the records you want, then send letters to the record distributors and tell them about your format change.

Here's a little more info on the KMAJ takeover of KDVV/KTOP...If everything falls into place, Midland Broadcasters should have control by the last week of September or first week of October...Another little twist to this story, V100.3's morning man, Steve Janas, was fired Friday, 8/26. (Janas is a former employee of KMAJ-FM)

Word has it that current KMAJ-FM afternoon driver, Charlie Summers, is said to be on his way over to do mornings when the takeover is finalized. Yes, Classic Rock will be the format of choice.

Mark, did you work at KLWN-FM (now KLZR) in the late seventies ?
If you are the same Mark Roberts I'm thinking of, you worked with my father, Frank Chaffin, who was Sales Mgr. at the time.

P>S> The FR Corp. just happens to be owned by the father of the owner of, Midland Broadcasters.

P>S>S V100.3's new letterhead has the words, CLASSIC ROCK N'ROLL underneath the logo.

Source record: 38285

In article <33ui5b$lt5@vixen.cso.uiuc.edu>, WIDNER@LIBRI.EDINBORO.EDU writes:

(What happened to Imus on 3WE?)

In a nutshell, a new PD at 3WE, Gary Bruce (formerly of Miami's WIOD) has decided a local morning magazine can do better than Imus' recent performance, so he put one in place and Imus is off for the moment in Cleveland (unless he's found a new home on WKNR, WERE or WHK---haven't heard any of them lately, he might conceivably fit at any of those stations, he once worked at WHK and at 'KNR's predecessor WGAR-AM).
Bruce is in the process of completely rebuilding 3WE into a more regionally oriented and younger skewing station. He's still trying to find the right midday host for the mix, no telling when that host will be hired or who he/she will be. But the syndication, except for Rush, is gone. For now, Rush stays in the lineup. Word is, even he's not certain to be a part of the station's long-term plans if he doesn't maintain or improve his 25-54 share, since he's very expensive to carry now. But if he holds his own, he'll be the one and only non-local host in their lineup.
The station's clearly going to be more local than it's been for a while. Probably a wise move, since 3WE has always been strongest when its local personalities were strong. It's a Great Lakes heritage powerhouse, and capitalizing on that will make it stronger.

I'm sure Geddy Lee, Alex Lifeson and Neil Peart have some pretty strong protections against the improper/unfair use of the word RUSH. I'd say Limbaugh is about 21 years too late trying to snag that word.

He could probably protect RUSTY, however!

: [Moderator's Note: I imagine Limbaugh will be suing for usage like
: "Rush Hour Traffic" and such. Is it possible to protect a commun word
: like RUSH? Bill]

Yes. It depends if the word is an obvious use or not. If it's not then
the word can usually be protected.

I'm fairly certain that "Rush" as a talkhost name and "Rush to Excellence"
as a traveling show can be registered, but I'm sure that "Rush" is
trademarked in other areas, such as in music where it is the name of a
popular band. By the same token "Apple" can be trademarked for a
computer by one company and trademarked for music products by another
company. "Rolling Stones" is trademarked as a band's name, but "Rolling
Stone" is trademarked as a publication.

But it has to be a non-obvious use. Nobody can register a trademark for
the tradename "Computer" for a line of computers.

You guys heard right: Aaron Harber, a Boulder-based, failed Democratic candidate for state treasurer, wants to start a syndicated talk show called "After the Rush," to give the rest of the story on some of the half-stories Limbaugh brings up. But the Incredible Bulk is suing to stop the show from ever getting off the ground -- claiming copyright infringement on the word "Rush" but also apparently moving to protect the kook right's monopoly on talk radio.

Seems to me I saw on C-SPAN a couple years ago a guy from Chattanooga that had a show called the "Pre-Rush Hour." Anybody know if he's still around?

If he wins anyone with the real name of Rush will have to pay him a royalty! Could you immagine, no more old movies on TV that stared Barbara Rush. No NPR documentaries on the now illegal drug Aymil Nitrate, better known on the street as RUSH. And what about vintage AOR and Metal stations that play the oldies of the hard rock group RUSH, (named after the drug, I suppose?). And what about college stations that promote the campus RUSH WEEK?

WOW! He could retire and still make millions from this. <vbg>

(on Rush's alleged lawsuit)

If he really wants to sue someone else for the use of his name, he'd best watch out...there's a multi-platinum selling rock band out of Toronto that's been using the Rush name since 1974. Wouldn't it be interesting to see him sue that "After the Rush" show off the air, setting a precedent, only to be denied use of his OWN name after Geddy Lee & his bandmates sue him on grounds THEY had prior public use of the name "Rush" and trademarked it all over North America?
(They did, BTW; Limbaugh was using the air name of Rusty something-or-other back then, and they probably WOULD sue him to get him off the air, since they have made public statements as to how odious they find him, and how hard they've had to try just in order to make it clear that they do NOT share his views and did not inspire him in any way. If Limbaugh succeeds in this suit, they would almost certainly succeed in theirs, and might have a stronger case.)
This may be only the beginning of a potentially hilarious chain of events...a daisy-chain of silly lawsuits that makes the case of the woman who spilled McDonalds coffee in her lap seem sane by comparison.
Bob Smith, WXXI/1370 Rochester NY

The rankings for the over 600 wanabee expanded band stations was released 12/93. The actual allotments which were promised by an FCC Rep several weeks after the Spring '94 NAB are being contested by several stations that don't like the algorithm (their ranking). And now the FCC is going to move their offices.

On 8/29, I tuned into WJMP 1520 (Kent-Akron) and heard a tape loop announcement stating that "all sports talk programming" on the station "has been halted until the baseball strike is settled". Listeners were urged to call WJMP's sister station, WNIR 100.1, to talk "about the strike or anything else" of interest. The announcement made it sound like there was nothing in sports worth talking about, which probably comes as a surprise to nearby sports-talk WGAR 1220, which has continued on, oblivious to WJMP's major 'statement'.
Sounds to me this station ought to get serious about its license's terms, which include a pledge to serve in the public interest, and not just act as a "beacon" to get people to listen to their FM sister station. It would be better to simulcast the FM, or perhaps, just sign off the AM & save the electric bill!

Scott Ferrell is on WCNN in Atlanta after hosting a show on SEN (Sports Entertainment Network). Recently, he covered for Pete Franklin on KNBR - San Francisco and was a pretty big hit. He still gets mentioned on KNBR and speculation is he will be coming to SF in the fall...stay tuned and get on the bench!!

I'd like to ditto that. I'm busy putting together a mini-thesis on campus radio stations here in South Africa and I'd really appreciate the input of stations in the US, UK or Australia. I'm looking for info on how these stations operate, how they balance commercial and community considerations and, most importantly to answer this question....When a campus station is considered a community station, who is its target community? Is it solely the students/staff at the college or is it the broader community in the surrounding town?

I'd appreciate the help.

Thanks.

Geez, you leave town for a couple of weeks and nothing looks the same
when you get back...

* American Radio Systems is creating a buzz with all these major changes
on the AM : WHDH AM 850 ceased to exist to the sound of a flushing
toilet on Monday, August 29th; WEEI moved from 590 to 850 with its
all-sports programming and Imus; a new(read : temporary) station has
been born at 590 -- WBNW and WRKO 680 is now more or less the only
all-talk outlet in town(sad but true : the more you listen, the less
you get;)

In case of the new WEEI-850 : Big gamble on a part of ARS folks.
The old 5k watt WEEI and sports talk were a perfect combo. More
power(50k) doesn't mean more listeners with a somewhat limitted format
like all-sports talk. I think ARS will learn that from the fall book.

Also,the first bad move was keeping Eddie Andelman and giving him 2-6pm
show.[his son also got a weekend gig as a result; Eddie must have
some compromising photos of ARS honchos or something].

The new consolidated all-talk WRKO is a lame effort. Look what you have :
AM drive : Marj Claprood and Pat Whitley : simply pathetic;[they'll
be toasting at WBZ for as long as these two stay there];
10-12 : Jerry Williams -- he can't be too happy with this 2-hr set-up and
from all reports he isn't. I heard his
pay scale remains the same for now.

12-3 : Rush -- sounds to me that WRKO is just trying to fill a
hole with him until something better comes along.
That's what many stations around the country do.
[Passing thru the Bay Area last week I heard Rush
on an all-sports outlet(KNBR) from 9a-12. How do
you explain that?]

3-7pm : Howie Carr -- The jury is still out on this one. Let's
wait for the fall book...

7-9pm : Gene Burns -- on tape; currently being pre-empted by
by AAA Pawtucket Red Sox;

9-12am : Bruce Williams -- More champagne toasts at WBZ(Brudnoy)
and expensive imported beer bottles
popping at WBCN(Stern)....

ARS --- all-replay systems :

12a-3a : Rush -- replay...

3a-5:30 : Howie -- replay...

The new WBNW 590 will start with all-business format(courtesy of Bloomberg Business Network) after the Labor Day. This station will not be around for long. Maybe until next spring. Most likely it will be sold off to a Jesus radio chain or become another ethnic outlet.

* ARS is also expected to officially take over AOR WCGY-93.7FM in the next couple weeks. The new rumor is that the station will dump its current album rock in favor of NAC format(New Age and Compatible rock). [it could be a bonus for those displaced 'CDJ fans].
ARS is also trying to move 'CGY's transmitter site closer to Boston.

Scott F. mentioned that ARRO might come to 'CGY. I wouldn't be against it if it did happen. I enjoyed listening to the original ARRO station(KCBS 93.1/ARRO 93) while sitting in typical freeway traffic jams in LA last week. I was quite impressed with the playlist. None of that CR schlock you hear on WZLX 100.7FM. ARRO has very little talk and very music oriented format composed mostly of rock hits from the 70s and maybe a couple from the very early 80's here and there. If ARRO ever comes to Boston, I'd volunteer to be its first official listener in the #9 market..:-)

* Greater Media's WMEX AM 1150 is now simulcasting its Country+Western WBCS 96.9FM in the mornings(to promote its new morning team of Adams and Doyle no doubt) and overnights(for all those lonely truckers driving down SouthEast Expressway :-)...Rest of the day still belongs to Hispanic and French Creole broadcasters...:

* Big happenings this weekend : WBZ AM 1030 is introducing all-sports afternoon blocks on Saturday and Sunday (12:30-7 on both days)...

More later...

-Mark

3456. Buffalo/Rochester Radio Update

Newsgroup: rec.radio.broadcasting
Date: 1994-09-01 05:58:55 UTC
From: talk1370@aol.com
Message-ID: <343qiv$da@vixen.cso.uiuc.edu>
Source record: 38211

In article <34194s$b9@vixen.cso.uiuc.edu>, ag365@freenet.buffalo.edu (Carl K. Gorney) writes:

(on latest news in Western NY/S. Ontario radio)

A late breaking, and IMHO very welcome, story is the return of talk radio veteran John Otto to a nightly show on WGR/550 in Buffalo. John will be on 11 PM-2 AM nightly, which was pretty much the time slot for his old "Extension 55" program, a pioneer talk effort during the 1970s and 1980s. This week was his first week back on the air as a regular, though he filled in for suspended Rich Michaels several days last week and contributed arts and culture features to Tom Bauerle's morning show in recent weeks. Agree or disagree with his views (and he's very much a traditionalist, though one with an open and inquiring mind), he's a thoughtful and classy broadcaster, and very much the same man off the air that he is in front of a live mike. His return may well mean WGR is headed in a more polished and professional direction in its overall air sound... and could that mean the end is near for Rich "The Bitch" Michaels in middays? (It would be hard to argue his work is of anywhere near the same quality as Bauerle, Dickerson, Wander or Otto, the other main players in the 'GR lineup...) Other news from 464 Franklin St. Is that Tom Bauerle recently re-signed for another year...
Meanwhile here in Rochester the search goes on for a replacement for ousted WHAM midday host Jack Kinnicutt. They've spent the entire summer, I'm told, trying out possible candidates for a permanent slot...and tried to recruit several local TV news personalities to see if they'd be willing to do the show essentially as part-timers for part-time salaries in hopes of attracting star power at a low price. No takers. Others, including a prominent conservative columnist for the daily paper who has filled in numerous times, WANT to be brought on board under such an arrangement, but the station is still looking elsewhere.
The requirements are very conservative and anti-abortion views consistent with the rest of WHAM's slant, willingness to work rather cheaply for a high profile slot in a top 50 market, and presumably some minimal level of air talent as well. (All this is coming to me from several sources very close to the station and its brass.) They are reported seriously interested in one of the people let loose by CFRB's recent late night housecleaning, but a green card and work permits are a big

problem there...They only say publicly an announcement is coming "soon." We'll see.....
And what happened to Kinnicutt? He's now back on the air in a limited way doing a bowling show on WHTK/1280. He's producing it in conjunction with the local bowling proprietor's association as part of his new PR business. (The irony of it is, he ends up on another station owned by the same company, Lincoln Group, that bid him goodbye late in the spring from WHAM. They say, no hard feelings...)
And the radio world continues to turn...bulletins at once...
Bob Smith, middays WXXI/1370 Rochester NY

3457. Radio Watchers -- Kansas City (8/31/94)

Newsgroup: rec.radio.broadcasting

From: Mark Roberts <transvox@tyrell.net>
Message-ID: <343qj0$db@vixen.cso.uiuc.edu>
Source record: 38213

Kansas City community station KKFI(FM) is expected to return to the air tonight (Aug. 31) after nearly one week off the air.
Station officials said a transmitter upgrade is the cause for the outage. This is the longest time the station has been off the air since it was forced to move on short notice from its downtown studios to a building in the Westport district in 1991.
KKFI is one of the few 100,000-watt community access stations in the U.S. (though no doubt there are other stations that get better coverage with less power due to greater antenna heights).
The station is best known for its two hours nightly of Spanish-language programming and its 67 kHz subcarrier that relays the Spanish-language Cadena Radio Centro network.
*****
Local morning shows haven't done much with the impending NBC-Fox TV affiliation switch between WDAF-TV and KSHB-TV.
One exception has been local radio bad boy Randy Miller. His KBEQ-FM morning show has aired take-offs on WDAF-TV's spots that trade on Channel 4's 45-year heritage in the market with the slogan "Covering News Like Never Before."
The real-life promos say, "we were there when <fill in name of major local event>"
The Millerized promos say, "we were there when Bart Simpson got his first spanking. We were there when Tori Spelling threw her first fit. And we were there when Homey the Clown first said 'Homey don't play that.'
Fox 4 News...Confused Like Never Before."

Hi all,

I have a friend who is an engineer at an all-sports station in Georgia.
Recent rumors about a format change have him flustered.

It seems that the management has decided to go from all-sports
to a "black" music ("rap?") station. Additionally, he has been
informed that all the NON-black staff will be replaced.

Does this smell of reverse racism? What kind of proof is necessary
to have a potential suit? I told him to acquire 2 kinds of evidence.
1. Anything in written form that pertains to this edict.
2. Any corroborating witnesses.

Any ideas/suggestions? He's a nice guy, and I hate to see him in
this headache. He's applied to the local public TV station, where he
volunteers his time every week. Still waiting. :::sigh:::

Thanks,
Mark :)

Quick Morning Programming Update:

Don Imus is off WWWE/1100, replaced by Chuck Myer from Miami.

After a couple months off the air at OmniAmerica's WMMS/100.7,
Jeff Kinzbach and Ed "Flash" Ferenc are reunited at WWWE, afternoons.

Brian Fowler and Joe Cronauer, formerly of WENZ/107.9, are the
new Buzzard Morning Zoo on WMMS.

The new morning team at WENZ consists of Rocco the Rock Dog (originally
at WMMS, then at WNCX for about a month after the sale) and Nikki
Summers (sp?). [She is either British or Australian and sounds
a lot like a DJ at WHOT named Nicole Dial. I don't know whether it's
the same person, though, as I don't always get WHOT too well and I
never could remember when Dial was on anyhow. Perhaps someone could
verify this.)

Unfortunately, Lanigan Webster and Malone are still at WMJI. :)

N> The Cuban Governemt asking the FCC for help (and getting it) to shut
N> down a clandestine station interfering in Cuba???\
N>
N> What about all the megawatts being pumped out at the USA on out Clear
N> Channels whioch wip[e out our stuff anywhere south of mid-continent?
N>
N> Sheesh. Now I have heard it all.

Are the Cubans *still* blasting us with their AM stations? I had heard they upped the power on a few choice stations once or twice during the 80's (protesting Radio/TV Marti), but that was never done for any extended period of time (more than a few days.).

(Hint: the power generation capabilities of Fidel and Co. were not that great back then, and are now probably much less, now that the Soviet Union is not around to sell them cheap oil . . .)

I've never gotten Cuba on the AM out here on the West Coast, even when they were doing their super power thing. I've picked up Cuban stations (mostly Radio Reloj clock ticks) while visiting Mississippi several times during the last decade. I didn't notice any "megawatt wipeout" of US signals by Cuban stations, however, the Cubans, along with other Latin American stations (as well as more and more US signals operating all-night), did contribute to the increasing amount of "radio clutter" one hears on AM at night. . .

3462. 54 Rock says goodbye...

Newsgroup: rec.radio.broadcasting
Date: 1994-09-01 05:59:07 UTC
From: ug930066@alpha11.scs.carleton.ca
Message-ID: <343qjb$dk@vixen.cso.uiuc.edu>
Source record: 38218

54 Rock (CJSB-540-Ottawa) signed off the air this morning at 9:05, after 12 years of broadcasting. After David Letterman's Top 10 list, they gave a history of the station, which started off as News/Talk, followed by the syndicated Music-Of-Your-Life format, 54 Lite Hits, 54 Lite, 54 Lite Rock, and finally 54 Rock. This history was followed by "Take Me To The Other Side" by Aerosmith (referring to the other side of the dial).

That was followed by a not-so-graceful switch to simulcast the FM transmitter (which will last for 90 days). Currently, they are still playing what they refer to as "abnormal programming", a mix of music of different formats (except rock) and comedy songs and skits, no commercials and no announcers.

The FM station is currently being prepared, and there has been no official word about when it would sign on. I thought that I had heard that it would be Thursday (09/01) at 6:00pm.

I taped the sign-off of 54 Rock, which was very interesting because of the history of the station. I may even transcribe or digitize part of it for distribution.

3464. KIDS RADIO DIES IN SPRING

Newsgroup: rec.radio.broadcasting
Date: 1994-09-01 05:59:14 UTC
From: charles.hobbs@support.com
Message-ID: <343qji$dt@vixen.cso.uiuc.edu>
Source record: 38220

rrb@deja-vu.aiss.uiuc.edu (AIRWAVES E-PUBLISHING) writes:
N> Radio Station KIDS (AM 1340 Springfield Mo) will sign off the air on
N> Friday, August 26th for the last time, according to Jean Kramer,
N> station owner.
N>
N> The locally-programmed children's music and entertainment station has
N> been struggling to survive, supported almost entirely by the owner's
N> personal assets, and has been cutting back its hours of operation
N> from 12 (6:30 AM - 6:30 PM) to the current 6 hours (12:30 - 6:30).
N> But now it is going to go off the air.
N>
N> I spoke to Jean Kramer today and asked here why she is giving up on
N> children's radio after three years of being one of its biggest
N> promoters. She replied (paraphrased) ... the community will not
N> support its children... there is a lot of talk about family values
N> and such, but it is just rhetoric...
N>

Oh, please.

It's the old song again. "I had a brilliant idea, but the world didn't fall down at my feet and support it, and it bombed, but it's everyone else's fault but mine." Spare me.

Without full knowledge of the programming, I can't comment on it. But to say that this station failed because "the community won't support it's children" or such is really ridiculous. Maybe "the community" had better things to do for its children, then to subsidize this radio station.

N> Kramer has been running KIDS in a strange 'half public radio half
N> commercial' sort of fashion with "angels" (businesses who pledge $150
N> -$300 a month. She has not sought advertising, nor has she accepted
N> donations from individuals.
N>

Why not?

If you really believed in something, anything, wouldn't you do everything you possibly could to keep it going?

N>
N> It is unclear what will become of the 1340 frequency, except to say
N> that it will be sold to someone... There is talk of the Kansas City
N> based news-talk operation (CNN-1340) coming in and running it as
N> another in its chain of 1340 stations in this area. Fox kids network
N> had expressed an interest and one employee feels that it might become

N> a repeater for Chuck Harder's For The People network.
N>
N> On a personal note, I am sad to see this station die, but although I
N> have no opinion on the commentary I heard vis-a-vis the alleged
N> mis-management of KIDS, I do agree that the station was never fully
N> utilized as a vehicle for reaching children and families. In all
N> conversations I had with Jean Kramer, she seemed genuinely interested
N> in the kids and seemed willing to do what was needed at KIDS. At no
N> time did I get the impression that she was 'running the station into
N> the ground'.
N>
Employees' anecdotes notwithstanding, I do get the feeling that this station was not managed well, and that Ms. Kramer, while being very well intentioned and loving kids, just did not understand, or chose to ignore, the "business end" of things at the station. And that's why so many small businesses of any kind fail: poor management.

(I also wonder if the frequency also had something to do with it: 1340 is a crowded, local low-power channel, and it may be difficult to get good coverage all over a metropolitan area with it, especially at night.)

N> One problem with kids programming is that Arbitron does not count
N> those under 12 in its ratings and as we all know, the Arb's are the
N> bible to advertisers, especially agency buyers. It seems sad that
N> Arbitron cannot see its way to offering a pre-teen rating category,

Then, find a way to work without Arbs. AAHZ Radio's doing fine, as far as I know. Besides most non-mainstream formats (foreign language, religious, public, etc). hardly make a dent in the Arbs anyway, most places (someone correct me if I am generally wrong about that last point)

N>
N> So 1340 will be dark for a while, and then some cookie-cutter
N> satellite talk format will spring up there. And as Jean Kramer
N> said... "The kids will be the losers."

Maybe AAHZ radio can be cajoled inth using this frequency. I'm no big listener to them (no kids!) but I'd rather have them on there than Paranoia Nation. . . .

This is not meant as a personal attack on anyone. But, we radio enthusiasts (myself included) occasionally forget that money, makes radio stations work. Either ads, or begging, or someone with deep pockets. I like the idea of the innovative, non-mainstream formats, but the reality is that they simply have to "hustle" for support more than the Top-40 stations, or the all-talkers that everyone listens to.

A brief update on Lincoln, Nebraska radio happenings/formats...

Changes in the last few months

KLDZ changes from oldies (50's & 60's) to all and only 70's.
KEZG changes from EZ-107 to STAR-107.3, Superstars of 70, 80, & 90.

...and the others who haven't changed

KZKX: Hot(test) Country
KTGL: Classic Rock
KFRX: Hit Radio
KIBZ: Rock'n Roll
KKNB: Alternative Rock
KFGE: Hot Country
KFOR: Full Service (AM)
KLIN: News/Talk (AM)
KMEM: Big Band/etc (AM)

Message-ID: <343qjr$e4@vixen.cso.uiuc.edu>
Source record: 38224

How expensive were network operations?

In March 1955, AT&T lowered the audio tariff on long lines by dropping the daily minimum from 16 to 8 consecutive hours, and reduced the per hour/per mile charge from $5 to $4.50. (This would make a NY-LA line cost approx $108,000 a day.

And you thought your phone bill was high?

There are no miracles with regard to audio processing. The ears of the listener are critical; what I've found is the entire air chain, from microphone/CD player to the transmitting antenna, has an effect on the sound of the station. The only way to sound good and loud is to go through the entire air chain, look for components that introduce noise, distortion, non-linear group delay etc. and modifying the circuits as necessary to eliminate the problem. When you get to the transmitter tuning is very important. The most useful technique I've found to fine-tune an FM transmitter for optimum bandwidth is to disconnect the stereo generator, feed in 19 kHz from an NAB test CD at 50% modulation, then connect a modulation monitor to the sample jack on the transmitter and tune for minumum 38 kHz.

When you've got the air chain as clean as you can make it, then you'll find that you can do a lot more processing before your listeners start to notice it. You'll be louder, cleaner, and have less multipath than before.

I've noticed that the exact same processor can sound very different on different stations, so I cannot say that a particular box will always sound good. Howeve, on stations tions that have cleaned up their air chains, the combination of Gentner Audio Prisms with an Optiomod 8100 sounds quite good, especially if the prisms and Optimod have been rechipped with better sounding op-amps. At least three Boston stations that I know of do this.

>A question: Are the ears of the person doing the tweaking the most >crucial part of the system, as I believe? Or are there hardware >miracles out there that make finesse and experience less important?

The most crucial part is the fight between the Program Director and the Engineering staff. I engineered an oldies station and I was lucky enough not to have this happen, however by friend engineered a Top 40 station and insisted trhe processing rack be lock to prevent ANYONE from touching the secret formula. Funny thing was when I was there as a contract engineer and peeked inside the "formula" was all the knobs cranked to the right.

I think things have changed and we are no longer into "grunge processing"

dannyb@xmission.com (Dan Bammes) writes:

>I'd like to hear your best before/after stories of changes in audio processing
>and what kind of difference it's made in commercial radio operations. Please

When I worked at WCYK in Charlottesville, VA (Crozet, actually), it was a start-up country outlet. There was no processing to speak of, and much programming came "off the bird" thanks to Drake-Chenault. No one was listening; of this we can be quite sure.

After addition of a processing chain, alterations of the playlists during "live" times, and a great jingle package, we really jumped off the dial. People found us, and seem to have stuck with us. As much of this has to do with tweaking of the format as the processing, though. Problem is, we had beautiful equipment (all I recall specifically was Symetrix on the mic line, sorry), and the PD insisted on doing the tweaks himself.

This brings us to the question about the ears of the person doing the setup. Our engineer set it up as a gentle chain, and the PD "cranked it up." As a result, the sound was distorted, with compression and limiting so close together that there was no punch at all. If we were playing a CD, it COULD sound great if the board was run carefully (unlikely). Carts could sound passable at best, and only if the music was run VERY tightly. If music was allowed to fade, tape hiss could be so overwhelming that it sounded almost like static. While the PD knew what sounded good from a programming standpoint, he couldn't hear for beans, and I think he might have kept us from being number one in the market (we were 2 in certain dayparts).

I would be interested, if anyone out there has heard the station recently, in knowing how they sound these days (it's been three years since I quit), and in how they are doing...

Best,
Alan

3472. This week's rumor

Newsgroup: rec.radio.broadcasting

Message-ID: <343qk3$ea@vixen.cso.uiuc.edu>
Source record: 38228

This week's rumor: 103.1 WOKC Okeechobee, FL is supposed to go on their new stick and at 50,000 watts sometime this weekend, to move into the West Palm Beach market. The station is operated by the company that owns 98.7 WKGR Ft. Pierce, which is also a West Palm-move in.

WOKC is supposed to be country, probably local automation with a live morning show.

Andy in West Palm Beach

3475. WWJZ 640 AM in Mount Holly, NJ

Newsgroup: rec.radio.broadcasting
Date: 1994-09-01 05:59:39 UTC
From: leo_keil@ASO.NAVY.MIL
Message-ID: <343qkb$eh@vixen.cso.uiuc.edu>
Source record: 38231

Does anyone know the current status of WWJZ 640 AM in Mount Holly, New Jersey?

Around November of 1992 they appeared out of nowhere with a 50,000-watt signal that came into Philadelphia with no problem. The station was well programmed with Big Band and popular vocal style music. In my opinion, it sounded better that WQEW New York, or WPEN in Philadelphia.

Then, in July of 1993, the station suddenly went dark. Today, over a year later, I noticed 64 AM was back on the air. They were playing music similar to what WWJZ had played, but with no commercials and no announcers. I didn't even hear a station ID at the top of the hour. The signal didn't seem to be as clear as the one from before, but I am hoping it's the same station back on the air after over a year.

Does anybody have any information about this? Is it still licensed to Mount Holly, and who owns it?

>I spent two illustrious months of my radio career on-air and selling time
>for U-102FM (WUUU) in 1987. Can anyone tell me what's up with them?

Norma Eilenberg, who owns the station, about a year ago, purchased WADR and WKDY from Larry Emanuel (Remsen stations). At that point she moved the Country format and WKDY call to the 102 frequency and put the oldies and WUUU call on 92. She ran it that way for quite some time. This past week she announced that WKDY was dropping the Country format and going to play CHR. They are calling the new package Kiss 102. I'm not sure if the call letters changed or not. I'm also not sure what is happening to the AM calls (WADR and WRNY) and formats.
Hope this fills you in.

3478. note to radio station PD's

I'm working with World Aid Relief (WAR), the people who are planning the world-wide mega concert in July '95 to raise funds for world hunger causes, staffed by the people who produced Live Aid.

WAR is planning a 1/2 hour TV spot to encourage awareness of the hunger issue and the concert, featuring some major-name musicians as hosts, which will be fed to stations via satellite. There has been significant interest by television in giving this time to WAR, so much that they are planning to offer a modified audio version for radio to be serviced both by satellite and CD.

I'd very much appreciate any opinion from anyone in radio as to whether there is enough interest to warrant such a project, and whether there are a significant amount of stations willing to donate their time.

Please reply via e-mail to:
Radiorock@aol.com

Also, I'd appreciate if this message was reposted to any other applicable newsgroups and forums.

Thanks!

}Things have gone for the worse since the government made the airwaves a source
}of profit and not of enlightenment...Commericals are horrible, and I refuse
}to listen to or watch them. Compressors are horrible, and I never use them.

As most readers of this forum know, I am not a big fan of what has happened to radio in my lifetime. Sure, the level of the average program has declined to the lowest common denominator, but whose fault is that? Listeners refuse to support more ecclectic stations and so do the advertisers. Sadly the predictible juke boxes haul in the big numbers over and over again.

I hate the trend but in the current state of affairs it is, sadly, the result of a bad rating system and an apathetic public who basically gets the radio they deserve. The public could not care less what comes babbling out of their radios.

}Commercial stations should be shoved above 100 MHz, and from 88.1 to 99.9
}should be non-commercial and public. We can use the airwaves as a tool, not
}just in the marketing sense.....

Well, hold on a moment. Define commercial. Does that extend to the so-called noncomms that offer 'underwriting' to local businesses? If not, then how are these stations of your dreams to be funded? Do you believe that 'college' radio comes free? No, it is funded by those who pay 20,000 dollars for an education. If you DO include them, then I submit they are just commercial operations in noncomm clothing.

I agree that greed and pandering to the lowest poublic taste has demeaned radio to the point of nearly a cash register connected to an antenna. I agree that such is not a good thing. But what you suggest is just knee-jerk reaction. Most non-comm stations are actually closet-commercial operations (especially the so-called noncomm-religious stations who sell their broadcast day to media ministers, but that is another discussion).

What is needed is a more responsive public, a less rigid rating system, and radio management teams that are willing to tell the consultants to take a hike and start listening to listeners. We need maverick program directors who can take off the satin jackets and put on some working shoes and get down to reality.

Commercial is not the problem, it is greed, coupled with toxic consultancy, and a belief that the public cannot handle better programming. This assumption is fueled by the rating books which take a miniscule sample and project out from that to the tastes of the

majority. Then the advertisers who are terrified that they might buy the wrong station, live and die by these flawed rating books.

So we have a vicious cycle. Clone programmers, trying to please faulty research, to attract fickle ad dollars from agencies who worship the faulty research. Break that cycle anywhere and you stand a chance. There have been some mavericks throughout the years, but today's radio is run by lawyers, consultants and a lot of people who are products of a lemming-like mood in the industry, rather than 'broadcasters'

Commercial or noncomm, the problems go on. So I cannot just lump the problem into the bed of the commercial broadcasters. At least not untill the noncomms get out of the 'closet-commercial' catagory.

I firmly believe with all my heart and soul that good programming does attract good people, but until the rating-book addiction is broken, and until we can get some programmers with a spine who will take their properties to new heights (instead of scrapping for crumbs) little is going to change.

Bill

3483. WOWO

Newsgroup: rec.radio.broadcasting
Date: 1994-09-01 05:59:57 UTC
From: "PETER Q. GEORGE" <PGEORGE@WELLESLEY.EDU>
Message-ID: <343qkt$f0@vixen.cso.uiuc.edu>
Source record: 38238

I need to say my two cents concerning a posting on Airwaves Journal from jamesr3594@aol.com concerning WOWO in Fort Wayne, Indiana. First of all, the main point he made concerning WOWO is that Fort Wayne does not deserve a 50,000 watt blowtorch. Hogwash! Fort Wayne is in the center of the agricultural epicenter of America. WOWO can boast a strong signal to all of that area and beyond. Part of WOWO's programming is geared to the farmer. Try to have some 50,000 watt station in a large city like Chicago to do programming other than the "Farm and Market report" and you will be very disappointed. You have noticed over the past 10 or so years that the local stations (yes, even the 50,000 watt blowtorches in major cities) have all become repeaters of Talknet, CNN Headline News and Satellite Music Network. The people like "jamesr" have made what WAS a GREAT SYSTEM of broadcasting on America into a shambles of Whitney Houston, Phil Collins..."another 10 in a row with NO talk", the "Morning Zoos" of the world, the Howard Stern phonomena...and you get the idea.

I have no qualms about the sale of any radio station, as long as it IS in the public interest. In terms of the "it will STILL serve the city of license " mentallity....that's garbage. A radio station has an obligation to serve the public interest THROUGHOUT the station's total city grade contour and then some. In trying to destroy a station that happens to be an oldtimer with superpower....for the sake of giving an allready "overradioed" market like New York City another high powered AM stick is pathetic. Sure, there have been significant changes with satellite technology, cable and FM and of course the soon to come DAB service. But if something works, like WOWO...a station that has a lot of character and still provides a service which happens to cover 29 states and Canada and you plan to downgrade it to a "piss weak" shadow of its' self...you damn well better put something of equal or better value in its' place. Any ideas ?

There is still a need for stations like WOWO and I'll tell you why. Most of America's rural population do not have the amenities such as cable, satellite, the four commercial networks and a solid FM signal. Also, if you vacation in some remote area, chances are you will be lucky to get maybe 1 or 2 TV of FM stations and their signals will be weak or overly multipathed. AM nightime skywave reception is the answer. But as you have probably noticed...chances are you will hear Bruce Williams on no less than 30 or 40 stations, CNN Headline News on another 10 or so, and 20 stations playing the SAME satellite feed from SMN. It is becoming ever so rare that you will find a station (yes, even the 50,000 watt blowtorches in major markets) programming locally. It is nice to know that there are still stations like WOWO, WHAS, WSM, WBZ and maybe a few more that there is a warm body and voice on the other sdie of that console. WOWO is a very special type of station that caters to both the

local area of its coverage and its' skywave coverage area with a unique format of local banter, real music and the various sundry items that make it so different. Difference is THE KEY of the matter.

I do wish "jamesr" would show himself to be the beancounter that his seems to be an give his name...rather than hiding himself into the sea of anonymity. Otherwise, keep your corporate mentality to the pages of "Broadcasting and Cable". Read the Communications Act.

JamesR3594 said:

>Having lived in Fort Wayne for a number of years, I personally believe
>that there is really no justification for a 50,000 watt, clear-channel
>station in that market.

No justification? Uhhh...more tourist dollars, our city on the "map", greater awareness of Indiana, news, weather, and sports, proving to the world that a 50 kw station doesn't have to be in a city with 1 mil. + people...these are not justified reasons??

>Years and years ago, when there were fewer stations (and no FM stations,
>cassette tapes, cd players, etc.), the US relied upon high-powered AM stations
>to serve large geographic areas. The mid-west (as well as the entire USA, has
>thousands of stations, today. The FCC, several years ago, decided that
>high-powered clear-channel stations were no longer serving the public interest
>as they had in the past. Times change...technologies change, etc.

[technologies change]... yes, yes, the times have changed. But, WOWO has kept up with the changes, including AM stereo, C-Quam, News reports, traffic (the only regular traffic reports, I believe.), etc. So, it's not like WOWO is a old, wounded animal on its last limb.

>The WOWO sale will most likely be approved. There is nothing about the
>sale, as far as I can see, which circumvents any FCC rule or regulation.
>FM stations may "downgrade" in order to permit other, distant stations to

>letters will not get you anywhere. Look at the lack of success which was

>met by the thousands and thousands of letters the FCC received regarding
>the reduction in protective contours of clear-channel stations several
>years ago.

I have investigated Inner City as thoroughly as I could. They are a private company, so their media exposure is not as great. Among the highlights:

1. They have a interest in the Apollo Theater in NYC. Inner City's FM in NYC (WBLS) frequently broadcasts Apollo Theater shows, performances, etc.

2. Inner City lets Anti-Semetic views be broadcast by their talk-show hosts. This prompted a Jewish protest outside the studios of WLIB(AM)-WBLS(FM), New York City, and outside the headquarters of Inner City Broadcasting.

3. Bill Cosby is associated with the CEO of Inner City. I do not know the details of the relationship.

>I dont mean to be a pessimist but....the times they are a changin'. If
>anyone wants to get into this stuff, in greater detail, feel free to
>e-mail me. I'm a communications attorney and I deal with cases like this
>(although I am NOT involved in this case in any manner.)

I would have e-mailed you this personally, however, I felt these views were better expressed to the readership of Airwaves, as a whole.

Thank you for your time.

LIVE! From the second floor of the Columbia Public Library at Garth and Broadway....
****
The owner of Columbia's KFMZ(FM) has been sentenced to eight years in prison after his conviction on 12 felony counts involving the sexual molestation of teen-age boys.
Mike Rice, 53, of the St. Louis suburb of Maryland Heights, was sentenced yesterday (Aug. 31) in St. Charles County Circuit Court.
Rice is the original owner of KFMZ (98.3), and also owns stations in Eldon, Missouri and Terre Haute, Indiana.
Rice was convicted July 5 of the felony charges involving youths in suburban St. Charles County, where Rice once lived.
The prosecutor in the case, Becky Shaffer, told Columbia's KFRU(AM) that she had asked for a 30-year sentence. Shaffer said Rice would be eligible for parole in 24 to 32 months. Rice will be required to report to the Missouri Department of Corrections at the end of September.
The status of Contemporary Media's stations is unknown. Federal law prohibits convicted felons from owning broadcast stations.
****
Notes from the St. Louis market during an unusually cool and damp day today:
* Community-access KDHX(FM) (88.1) appears to be off the air. A similar station in Kansas City, KKFI(FM) (90.1), just returned to the air after a week of silence. Happily, Columbia's public-access/adult-alternative station, KOPN(FM) (89.5) is still on the air.
* The polkas are gone from gospel station KSTL(AM) (690), as are many of the preachers. New duopoly owner Crawford Broadcasting appears to be programming the station with a contemporary format. Crawford also owns KJSL(AM) (630), the former KXOK.
* Subcarrier activity in the St. Louis market seems fairly limited, compared to Kansas City: (all are music services unless otherwise noted)
92.3 WIL, background at 67 kHz
93.7 KSD, background at 67 and upbeat background at 92 kHz
101.1 WFXB, talking-book at 67 kHz
102.5 KEZK, upbeat background at 92 kHz
The background and upbeat background services are also the same, i.e. WIL is relaying KSD's 67 kHz subcarrier and KEZK relays KSD's 92 kHz subcarrier.
* The background radio station of choice in most businesses I visited today seems to be 70s oldies KIHT(FM) (96.3). Could this indicate that 70s oldies is a serious contender for the same audience that may be getting burned out on adult contemporary? It's an interesting thought....

: "has been halted until the baseball strike is settled". Listeners were
: urged to call WJMP's sister station, WNIR 100.1, to talk "about the strike
: or anything else" of interest. The announcement made it sound like there
: was nothing in sports worth talking about, which probably comes as a
: surprise to nearby sports-talk WGAR 1220, which has continued on,
: oblivious to WJMP's major 'statement'.

News of this little publicity stunt of "Kaiser Bill" Klaus made it all the way out here to California. I was doing a newscast during the Bob Dunning talk show one night, and at the end of it, Bob asked me about this story (knowing I'm from the Akron area). Incidentally, that's WKNR now, not WGAR, as they split off from WGAR-FM 99.5 a few years ago.

: Sounds to me this station ought to get serious about its license's terms,
: which include a pledge to serve in the public interest, and not just act
: as a "beacon" to get people to listen to their FM sister station. It
: would be better to simulcast the FM, or perhaps, just sign off the AM &
: save the electric bill!

WJMP used to be a country station and an oldies station before trying satellite-delivered sports talk. (For those keeping track, before changing to country, AM 1520 used to simulcast the FM, when they were both WKNT. I still have memories of midday talk host Howie Chizek ID'ing with his old theme music... "WKNT AM & FM, Kent, Ohio".) The thing is, WJMP is horribly saddled by their signal. They have to protect WINW-AM 1520 in Canton, which is a mere 30 miles or so away. WJMP's signal does nothing south of Cuyahoga Falls, and WINW doesn't get out of Green.

Whoever approved this setup at the FCC must not have been paying attention that day. ;)

I haven't really ever been good at predicting what "Kaiser Bill" would do next, but I have a feeling he'll toggle 'JMP back to the old format when the hubbub and publicity dies down.

As is the case in much of international law, the Radio Marti story
is complex. For one thing, it broadcasts on the same frequency as
Havana's Radio Taino. For another. using the medium waves for
the broadcast of belicose messages is in contravention of a number
of international agreements to which the USA is signatory.

Even Fidel Castro, quoted in a book by Juan Gargurevich (Radio
Marti: Historia de una batalla entre Cuba y los Estados Unidos, La Voz
Ediciones, Peru 1992), admits that the station's illegality is
hidden behind technical/legal niceties.

Check out the book "Cuban-American Radio Wars" by Howard H. Frederick
(Ablex Publishing, New Jersey). It covers the story of Radio Marti,
and predecessors Radio Swan (owned by the CIA, according to Marchetti and
Marks in their book "The CIA and the Cult of Intelligence", Radio Swan
broadcast from a Honduran island during the Bay of Pigs escapade) and
the VOA Cuban service.

Sorry, I haven't read these books for a long time and can't cite the
actual international agreements that Radio Marti violates. Perhaps
someone out there can track them down.

3490. Century Radio in the uk

Newsgroup: rec.radio.broadcasting
Date: 1994-09-02 04:08:51 UTC
From: rhunt@cix.compulink.co.uk
Message-ID: <3468gj$o4i@vixen.cso.uiuc.edu>
Source record: 38245

Century Radio went on air today for the northeast of England. It uses two FM frequencies, 101.8MHz and 100.7MHz to cover the area from the Scottish border to York. The address is: PO Box 100, Gateshead, NE8 2YY. Phone 0191 477 2000. Programming seems to be, err, average, that is lots of motown and 70s/80s pop, nothing too radical.

No argument from me on the state of radio, but it seems to me that simply segmenting the band wouldn't improve the quality of radio. There may be a technical or administrative issue involved of which I am unaware, but why would one wish to banish non-commercial stations to on end of the band? Isn't it better to have them interspersed among the commercial stations? At any rate, in LA the non-coms all seem to be below 93 MHz anyway.

I mean no offense to any readers in this group, but commercial radio does seem to have declined steeply in quality from the '60s. AM is dominated by insipid talk, and FM by ininspired, canned formats and bland, equally canned on-air staff. But non-commercial radio is certainly no better. I do rely on them for good jazz (no commercial jazz stations exist in LA), but other than that we have a dozen NPR stations (so it seems) and the anti-everything KPFK.

The history of radio has been driven by commercial radio, and if the quality of broadcast fare is to improve, such improvement must be driven by the commercial stations. I believe improvement is possible; it seems to me that the listening audience would respond to it quickly.

If those who make such decisions would begin to emphasize entertaining and informing their audience over simply delivering them to advertisers, the situation would right itself in no time. Then, any segment of the audience not served could turn to the non-commercial stations for their needs.

writes:

>I believe in "battling it out" with other radio personalities
>where it counts: on the air.

I would like to hear that ! Why don't you call the
Don & Mike Show during your show, even if it's just a small
verbal exchange or just to say hello from the "left coast"!
They ARE from your own Network, there would be nothing
wrong with you saying "Hello... it's great that were part of
the same Westwood One Family".
This is the kind of stuff that makes radio fun for the listeners...
when other D.J.'s take on other D.J's or call up program directors
and give them the business. Listeners love that stuff ! :-)

>Don & Mike and I are not even on at the same time,
>so there is no need for any kind of "battle."

Your time slots do cross for an entire hour...
Don & Mike are on from 3 to 7 p.m. Eastern Time and your on
6 p.m. to 10 p.m. (ET). So from 6 p.m. to 7 p.m. you have a
solid hour of "prime time" battling ability!
Come on Tom... have some fun with your show !
Stop reading the "issues" YOU THINK we "really want to hear"
from *Glamour magazine* and *Redbook*. Those aren't the
kinds of magazines REAL men subscribe to !
While I've got your ear, I like to tell you I respect the
candid way you express your views on the Internet. Others
would shy away from being so open and straight forward.
For that, I commend you, but you have to remember...
You have total control over YOUR show... you have your
finger on the "dump button" if a caller says something you
don't like.
The Internet however is a NEW medium that the
listeners have "control" over the "show". There's no way
you can "push a button" if you don't like what you hear.
So posting your comments on the Net can be a risky thing.
The Internet is a "Media" for the common people and
should not be controlled by the "Cyber-Jocks" of the world.
Boy... is that deep or what?
I also applaud the moderator of this newsgroup, who let
this discussion go on... he is the one that has his finger
on the REAL "dump button" on the internet and controls
the direction THIS "show".

>By the way, I'm not offended by anything you've said.
>Please, however, spell the name right...it's L - E - Y - K - I - S.
>Thanks...

Sorry Tom, I usually try to keep an eye on my spelling... I'll
make sure to update my "spell checker" with the correct
spelling of your name for the next time. :-)
Thank-you for taking the time to respond to my posting
on the Internet.
Drop me an e-mail message if you want... I'll try to find
the time to reply. ;-)

Later,

Paul from Buffalo

P.S. Any one else who would like to discuss this "Cyber-Jock"

PREPARING FOR RENEWALS: PART I
TIME BROKERAGE _ LMA'S
------------------------------------------------
Next year, the broadcast license renewal cycle starts up
again. In anticipation, I am posting some helpful information
to assist broadcasters to prepare for license renewal time.
Enjoy!

The purpose of many provisions in a time brokerage agreement
is to hopefully avoid a real danger in FCC practice; i.e., what
the FCC terms a "unauthorized transfer of control." The law
provides that a licensee of a broadcast station shall not
transfer any rights to operate the station even while it is
brokering out its station time to another entity. This can be
questioned at license renewal time by a competitor or outside
party that alleges the licensee has abdicated control of its
facilities to the brokering party. Therefore, it is important
for the licensee to generate evidence that it has maintained
control of station during the license term to avoid these renewal
challenges.

While its station is being brokered, the licensee must take
an active part in the operation of the station by employing at
least two full-time employees, one of which must be management
level, and paying all the operating bills of the station. For
```

example, the licensee should pay payroll, electric, utilities, rent, etc. The licensee should maintain a business office and main studio and actually keep books, tax records, and the like. The brooker can pay salaries of those persons providing the programs to the station, but he/she should not pay the other items. This is important in case someone challenges the license renewal and the FCC conducts an investigation to determine who is really in control of the station.

Three items the FCC examines in determining whether control has passed are (a) control of finances, (b) control of employees (such as hiring, firing, and paying), and (c) control of programming. Although the Commission permits the source of the programming to be delegated to the broker (subject to certain safeguards setout in the time brokerage agreement), it has never permitted the delegation of the financial or the employment components. If both parties live up to the provisions of the time brokerage agreement, they will go a long way toward reducing the potential for FCC trouble.

3494. History and WYNE (was Re: 54 Rock says goodbye...)

Newsgroup: rec.radio.broadcasting

>54 Rock (CJSB-540-Ottawa) signed off the air this morning at 9:05, after
>12 years of broadcasting. After David Letterman's Top 10 list, they
>gave a history of the station, which started off as News/Talk, followed
>by the syndicated Music-Of-Your-Life format, 54 Lite Hits, 54 Lite,
>54 Lite Rock, and finally 54 Rock. This history was followed by
>"Take Me To The Other Side" by Aerosmith (referring to the other side
>of the dial).
>I taped the sign-off of 54 Rock, which was very interesting because of
>the history of the station.

Why is it that most stations have no expressed sense of their own history until their demise? One notable exception to this was WYNE Appleton, which, when it was programmed by Scott Walker (now of WOGL Philadelphia), always had special promotions centered around the anniversary of the station's sign-on. (I have a dub of the Wolfman Jack custom liner announcing the 5th Anniversary promotion in '75, for example.) Even when it switched formats from Top 40 through A/C to Country, the historical theme was not totally abandoned until Ned Hughes' sale of the station in the mid-80s. Thus, when the station was eventually sold off to Woodward and merged into WHBY in December '91, the material contained in the resulting sign-off activities were not nearly as ancient-sounding to the audience as one might expect.
Remembering and maintaining your own past is hardly detrimental to your own future; in some cases, it can strengthen the present.

Daevid Aachen, Mornings, WRJQ-AM 1570, Appleton WI

3495. "106.9-FM, The Bear"

Newsgroup: rec.radio.broadcasting
Date: 1994-09-02 04:09:01 UTC
From: ug930066@alpha11.scs.carleton.ca
Message-ID: <3468gt$o55@vixen.cso.uiuc.edu>
Source record: 38249

54 Rock (CJSB AM-540 Ottawa, Classic Rock) signed off the air on Wednesday (08/31) at 9:00am to move to the FM band. The station signed back on today (09/01) at 6:00pm as "106.9-FM, The Bear" (CKQB-FM 106.9 Ottawa). The Bear's slogan is Ottawa's Best Rock. The new format is hard rock, including a lot of classic rock.

The Bear launched with a countdown starting at 69. There is currently an open party at a local hard rock club.

The station, in my opinion, sounds great. In place of some unofficial ID's (i.e. those that don't include the call letters), they simply use a bear growl to identify the station.

The first song played was "It's Been A Long Time" (Sorry, I don't know the name of the band). The following four songs all included the word "rock": "Long Live Rock", "It's Only Rock & Roll (But I Like It)", "(Keep On) Rockin' In The Free World" by Neil Young, and "The Cradle Will Rock". I'm not sure if I got the titles right, but that should give you some idea of the format.

39 minutes after sign-on, The Bear has already mauled one of its competitors, with an ID saying "Finally, you can just CHEZ no!" "CHEZ" is pronounced "Shay" and refers to Classic Rock station CHEZ-FM 106.1.

The station will continue to simulcast on AM-540 until the end of November, when the AM transmitter will go dark.

3497. Fall Radio Show in L.A.

Newsgroup: rec.radio.broadcasting
Date: 1994-09-02 04:09:03 UTC
From: Merli John <jmerli@nab.org>
Message-ID: <3468gv$o5a@vixen.cso.uiuc.edu>
Source record: 38152

Tom Leykis' comments Aug. 31 critical of The NAB Radio Show being held one month later this year (Oct. 12-15) are understandable, however this is for this year only. This year, as you know, the needs of four groups, not just NAB, had to be accommodated. The needs of most broadcasters and related industries will be better served by running NAB, RTNDA, SBE and SMPTE shows concurrently under one big roof, separate but all equally accessible, and we've been told by local broadcasters it will be far less costly to their budgets. It will also mean a separate Radio Pavilion of exhibits (which will break a Radio Show record for size) -- plus a much larger one for all groups, World Media Expo. Mid-October was the only time frame open to this undertaking in 1994, even though such decisions are made several years in advance.

But rest assured, The NAB Radio Show will return in SEPTEMBER of 1995, in New Orleans. There are no plans to hold it in any other time period other than September -- through the several years that dates have been secured.

UltimaJock@aol.com wrote:

: Are y'all sure that THE SHADOW is in the public domain? It's always been my
: impression that Conde Nast held tight on the copyrights, just as Arch Oboler
: did with LIGHTS OUT.

Prior to the change in the copyright law in the USA in 1978, all prior works could be copyrighted for 28 years then renewed for an additional 28 years. After that they're public domain, regardless of what they do to protect the rights. This is why "It's A Wonderful Life" is shown on TV stations all over the country during Xmas season -- it's in public domain because the studio forgot to renew the copyright after the first 28 years. Likewise, some radio programs are public domain for any of 3 reasons: (1) the original copyright wasn't renewed, (2) the renewal has run out, (3) they weren't copyrighted in the first place.

>listening; of this we can be quite sure.

Hmmm...funny how I don't seem to remember you. Was the studio still out at Crozet or was it after the move into Charlottesville when you were there.

The processing was originally an older model Optimod 8100..By itself it sounded fairly good but the management and the little PD 'Scott Johnson' decided that it needed more punch .So without consulting the Contract Engineer who by the way was 'ME' Scott went to Hall Electronics and purchased about $5k of Hnat Hindes stuff and showed up at the Crozet studio with it. I almost freaked. I installed the gear...tweaked it, tuned it, played with it...consulted with Mr Hinds directly about it...tweaked it some more and still IT SOUNDED LIKE SHIT...and the modulation was not any better than it was with the old Optimod....Ask Mark Garwood...he was as disgusted as I was with it. Needless to sat the stuff went back to Hall's and the Optimod went back on line.

Another note for you engineering types...they run their audio on a T-1 line for 15 miles from the new studio to the old studio.. there it is split and fed to an AM transmitter and to an STL where the signal finishes the trip to the FM transmitter. Over $500 a month for the T-1...geez a double hop microwave could have been payed for three times for the money they have spent on this.

The whole intent of the project was to get the modulation up so the signal in Charlottesville would be better and with less multi-path. It didn'y work..The 102.3 FM signal from Crozet still sux.. What solved the problem for the station was the addition on a repeater which is now on 94.1 atop the Old Monticello Hotel downtown...It;s pumping 250 watts so it covers town quite well.

They have dumped Drake-Chenault (which is Jones now) and went to some other service to cover mainly the overnight hours...Their numbers are very good and they are doing quite well for themselves. BTW they were sold this year by High Media and are now owned by the Clarck Group whick owns several stations in the Central Virginia area.

Hope this sheds some light on it for ya.
>
>After addition of a processing chain, alterations of the playlists during

Nope, can't do that. He can collect damages for this, IF it can be proven that this is the reason he was canned. It is not necessary to be black to be a DJ of a black-oriented radio station, witness Rob Singleton, the white program director of KRE/KBLX during its heyday in the Bay Area.

>Does this smell of reverse racism?

If we're talking about an engineer, I'd say it's possible. I can't imagine why an ethnic programming policy should dictate who is on the technical staff.
If we were talking about an air personality or newscaster, obviously that would be a different matter---the issue there would be reaching a distinct ethnic culture that demands knowledge of that culture from the air staff. For example, I don't speak Spanish or have a good knowledge of the Latino communities in Northeastern Illinois, so I'd have no business applying for an airshift at WOJO or WIND, two of Chicago's Hispanic-formatted stations. But if I were a technical engineer, which doesn't necessarily need a knowledge of the audience's interests, I'd think I have a shot for THAT job if I applied. The only way I'd think such a move against your engineer friend was justifiable was if there were a demonstrable pattern of hiring bias against people of African heritage over the station's history. But if such a pattern can't be legitimately detected, I'd call the equl rights officer a FCC immediately.

Not so fast. If they're already well-known they can keep their name. How many "Johnny Holidays" were there in the 1960s? However, if your name is James Brown it's already too late to go around singing under that name. However, Michael Jackson the talk host was already well-known when Michael Jackson the singer came on the scene. Since they were in two different performing industries, no problem. But, if Michael Jackson the singer decided to host a talk show, Michael Jackson the talk host would rightly be able to object.

: therefore Stevie Wonder is God" form of "logic" has become transparent.
: The public is fed up with politicians and media people that lie and
: mis-lead. that is why Rush, scares advertisisers.

Why don't you simply admit that you disagree with Rush Limbaugh, and want
him off the air?

I am no ditto-head, but I am a conservative, and while Limbaugh does not
represent the Voice of Conservatism as many claim he does, his views are
reasonable and well-stated as far as they go. His show is however not an
issues show, but an entertainment show. His tongue is more often than not
planted firmly in cheek, and he says much of what he does merely to
rattle the cages of the politically correct.

Those of a conservative bent have long felt disenfranchised by the
popular media, who for the most part present a relentlessly left-leaning
view of the world. Limbaugh is a dissenting voice, and as such is a
prime example of the "diversity" that those on the left celebrate in
theory, but (it seems) not in execution.

If you don't like Limbaugh, don't listen! Let the marketplace decide his
fate. Don't waste time deconstructing his logic. Believe me, few
talk-show hosts of any philosophical stripe would survive such scrutiny.

The Knight-Ridder story that ran in the local paper yesterday morning states that USA Talk Network refers to Limbaugh extensively in their pitch material to potential affiliates. If that's the case, Limbaugh is probably in the right here, since he has no association whatsoever with USA Talk.

However, if he can sue for misappropriation of his "intellectual property", does that mean that the people whose songs Limaugh utilises in parodies and "update themes" can sue him for applying their copyrighted material for a purpose they oppose? I've wondered for years why Chrissie Hynde lets Limbaugh use her song "My City was Gone" as his program theme while I know damn well the songs lyrics criticise the very social policies Limbaugh espouses...

BTW, why is James Earl Jones' voice no longer giving the "EIB Network" tag? Did Jones disagree with Limbaugh at some point and revoke the rights to use his voice, or did the license for those liners simply run out?

Could you please post the specifics of this suit, then? Your post leaves me with the impression that Limbaugh is trying to stifle legitimate criticism. (Either that, or the other talk jock's show consists primarily of repeating tapes of Limbaugh's shows.) And it gives me that impression more than the other posts on the subject commenting on the name "Rush."

I have not heard the other show, and I don't listen to Limbaugh at all. So I can't comment on the lawsuit, or even the fact of whether or not there even is a lawsuit. But I find it hard to believe that Limbaugh would try to do what I think your post implies. Aside from any question as to the merits of such a lawsuit, it would seem to have substantially worse consequences, in terms of negative publicity for Limbaugh, than one filed to protect the name "Rush."

Such programming skullduggery has also been known to take place north of the Mason-Dixon line. In the late '70s, I had a Saturday night freeform airshift at WLFM Appleton that followed a decades-running classical show that usually featured North American premieres of European orchestral performances specifically recorded for the ORTF, RAI, RTE, etc. The classical show never finished on time---it was always only a few minutes short or a few minutes long. After a year of this, I decided to make an on-air point about it. So, when that week's lead-in ran a couple of minutes short, I played a section of Ennio Morricone's soundtrack score to ONCE UPON A TIME IN THE WEST (close enough to classical for a lot of that program's listeners to flow with it) and, at the top of the hour, opened the mic and announced, in my best Franklyn McCormick impersonation, "This is WLFM Appleton, a public service of Lawrence University, broadcasting the world's most beautiful music."
Then I slammed into The Beatles' "Revolution".
The lead-in classical show was moved to Sundays the following week...

3511. WWRC 50 kW Rumors

Newsgroup: rec.radio.broadcasting
Date: 1994-09-02 04:09:36 UTC
From: mh5260@ARK.SHIP.EDU
Message-ID: <3468i0$o6o@vixen.cso.uiuc.edu>
Source record: 38166

I have heard that WWRC-AM 980 in Washington, DC has received authorization to raise their power to 50,000 Watts. Has anybody heard anything about this? What are the details and when do they expect to raise their power? Finally, what kind of additional coverage would this give WWRC? Now, they have a weak signal in Gaithersburg, MD north (about 30-35 minutes) from downtown? Could this give WWRC a huge signal like WHP in Harrisburg, PA? And would they be 50 kW day and night or just day? (I would think that 50 kW night on a regional frequency with no directional would anialiate the station on 980 AM in Wilkes-Barre/Scranton, PA)

Sorry to pose so many questions in one post!!!

No connection with Arrow 94.7 either.

I should clarify. Being black is not a legitimate job requirement for a DJ or board op, just as being female is not necessary for a person to wait tables. If it's a *legitimate* requirement of the job, such as the ability to speak Spanish at a Spanish-language station, then he'd have no cause to complain if he didn't speak Spanish...but he would have a case if they fired him for not being of Latin background.

How do you know this? Did you do a lot of listening before 1922? You must be pretty old. As far as I know, radio has been commercial since the early twenties.. Were there some mystical sounds coming from KDKA or WBZ back in the early days? Consider this. If you invested several million bucks on a transmitter, air talent, engineers, rent, heat, office employees, and legal fees, wouldn't you want some return on your investment? Look, I'm tired of bland commercial radio too, but it's not going to change until we can find a mysterious income source to pay the bills and earn a living.

3518. Bay Area, CA - Ferral's coming to KNBR

Newsgroup: rec.radio.broadcasting
Date: 1994-09-03 03:14:53 UTC
From: bertino@netcom.com
Message-ID: <348pnd$jth@vixen.cso.uiuc.edu>
Source record: 38173

Tri-Valley Heald 08/02/94
By Michelle Smith

Adjust the volume, hide the children and brace yourselves. Scott Ferral is coming!!

KNBR's most notorious non-employee will be changing that status very soon. Although it's not official - meaning only that KNBR management won't confirm it yet - station sources say Ferral will begin a late-night talk show on "The Sports Leader" in mid-September.

And while nobody will say on the record that Ferral is coming, his arrival has been imminent since his July fill-in stint for Pete Franklin. Ferral's crass, abrasive style stirred up the Bay Area sports talk crowd in five short days. And nobody who listened left the car feeling lukewarm.

Ferral is the ultimate love-him-or-leave-him personality. Those who hate him can't stand the Wolfman Jack voice, the relentless to excessive beer drinking and carnage on the highways.

Those who love him can't get him enough of his schtick, and actually think the guy knows a few things about sports.

Ferral's not-so-subtle style fits the not-so-subtle way KNBR management has been preparing listeners for his arrival.

In the last couple of weeks, KNBR had begun running radio advertisements for Bay Meadows (horse racing), featuring Ferral. His name has been mentioned throughout the talk show day as much as Steve Young's. And when asked about Ferral's future with the station, program director Bob Agnew answered "We would like to find a spot for him."

Done. And sources say there will be some schedule-shuffling to create that spot. Current word is Franklin's show will be cut to two hours, Ralph Barbieri and "SportsPage 68" will move up to 4-7 p.m. Bob Fitzgerald will lose an hour and move up to 7-10 p.m. and Ferral will be on the air from 10 p.m.-1 a.m.

Late-night is the perfect place for Ferral to start. The younger, nighttime, crowd is better suited for Ferral's act. And if he bombs, at least he didn't do it in the middle of the day.

But if (a very big if) Ferral's act doesn't begin to wear thin, he could move up into an earlier, more visible slot. Franklin has less than a year left on his contract, as does Fitzgerald, Franklin may be ready to hang it up after a very long career, and Fitzgerald may be ready to move

on.

Well, Ferral, you're on deck now. Try not to strike out.

3519. Radio Stations Set Off Fire Alarms

Newsgroup: rec.radio.broadcasting
Date: 1994-09-03 03:14:54 UTC
From: wegeng.XKeys@xerox.com
Message-ID: <348pne$jti@vixen.cso.uiuc.edu>
Source record: 38174

The 9/1/94 issue of the Rochester, NY Democrat & Chronicle had a cover page article about how the signals from two local radio stations are causing automatic fire alarms to go off in the 911 Emergency Control Center. Here are the details, from memory (the article is at home):

According to the article, the FCC has determined that the signals from two local FM stations (WRMM & WRUR) are combining in such a way that one of the harmonics (at around 75 MHz) is the same as the local fire alarm boxes. The problem started occuring after WRUR (college station from the University of Rochester) received permission to move their transmitter to the top of the downtown Hyatt hotel, and increase their signal to 3000 watts. The article doesn`t say how the FCC determined that this was the problem, or how they determined that WRMM`s signal is also involved (maybe their transmitter is on the same tower?). The FCC has asked WRUR (and not WRMM) to decrease their power to 30 watts until the problem is resolved.

The FCC was in town last week to conduct tests. Apparently WRUR increased their power to 2600 watts during the tests, and several false fire alarms were reported. The results of the tests were inconclusive. The FCC person said that the problem occured when the two stations happened to play notes that combined to form the offending harmonic frequency.

My comments: It sounds like the problem is associated with the audio signals, and not with the carriers -- does that seem correct? I have heard that WRUR has been plagued with creating interference problems for years when their transmitter was on the U of R campus. One story that I heard was that they had received permission to increase their power several years ago, but it caused some of the lab equipment in the Chemistry Building (which was close by) to go nuts. I`m personally interested because I like some of the folk music programming that WRUR broadcasts.

: morning show.

WOKC is owned by the same corporation as the Gater, WKGR 98.6 in
West Palm Beach. The station is slated to go country and face WIRK in
West Palm Beach. WIRK was a surprise winner in the winter book. They
outpaced WRMF to reach the top of the heap in West Palm Beach.

WOKC has an amusing history. They were the only "all Disco"
station in America a few years ago. I expect the new station, to be
dubbed "the Frog," to be competitive in West Palm Beach

While I'm at it, listen to BIG RADIO at 105.9, the former WAXY in
Miami. They're playing all seventies music. I hear a horrible sound
with far too much talk. The rumor is that Howard will come to Miami.

Keep listnin'

In the responses to my original questions on this thread, I've heard a lot of sentiments from engineers who believe PD's should keep their hands off once they've tweaked the system. Nice ideal -- but it'll never happen.

As soon as the engineer gets a sound he likes, somebody across the street installs a new box and makes your processing sound sick. Are engineers willing in that case to:
a. Admit that what was perfect last week is not competitive now?
b. Give management a credible recommendation on what to do about it?

The thoughts on hardware are noted and appreciated. Any experience with digital signal processing in the studio => STL => xmitter chain? Is there a magic box that's "good for all your audio processing needs?" And most important: Can I trade it through my local car stereo shop? ;)

The term Windows for a operating system was used by Digital for a mulit
task monitor program that ran on VT100's on their TOPS20 systems, 20 years
ago. If DEC couldn't copyright it, neither could Microsoft, or Rush or
Windex.

In article <3468i0$o6o@vixen.cso.uiuc.edu>, mh5260@ARK.SHIP.EDU (M. HALE) writes:

(on WRC's 50 kW signal)

Folks at WRC tell me they got the CP for 50,000 watts DA-2
a while back...and the new transmitter and revised day and night
patterns are under construction right now. It will not have a much
stronger signal to the north (where co-channel stations exist in
Pennsylvania, New York State and Ontario) but will offer a LOT
stronger signal into the heart of the metro down the Potomac
and deep into Virginia.
Air date for the higher power is some time in the fall, according
to people now on staff at 'RC. Their ARB trends are already im-
proving month by month with the new lineup. This new signal, which
will allow them to reach further with a stronger signal than WMAL
for the first time, should help their competitive position even more.
Having done a little fill in work myself down there last year, and
gotten to know some of the 'RC folks, I'll just observe that it couldn't
happen to a nicer bunch.

From the #40 market:

*More news on FM 101 The Planet:Jon Summers,Buffalo radio veteran,will be returning on Tuesday(9/6)as half of the new morning team(more in a bit). Recall that Summers was released 3 months ago as WBUF's AM driver when it switched over to B93 and a regular A/C format. Liz Janik,chief consultant for The Planet,said that Jon has "a great voice and the people in Buffalo know him,so why not give him a chance." Summers,for his part,said that AM drive will lean toward a more adult demographic(with groups like R.E.M., the Pet Shop Boys and 10,000 Maniacs probably being featured-and,rest assured,weather & info.will be featured),while Janik notes that in late afternoon and night it will go to a harder sound. She said that The Planet is "not trying to be a college radio station and play music that's on the fringe",but does hope that it plays a lot of music that isn't on in Buffalo. (Liz,I used to work for a college station-and I'm not happy that you decided to take a shot at college radio as a whole. But,all is forgiven.)
Janik adds that Summers will be teamed with a Canadian in AM drive,to be known as "The Geezer & the Canuck." Summers' response? "That's OK with me. But I told them I thought I was supposed to be the Canuck." (He isn't exaggerating. He used to work for them when it started in the mid-80s on AM as CJFT(530 AM).) Incidentally,The Planet has started a feedback line (write me for more info).

*How far would you go to get Bills tickets? WGRF(97 Rock)found out yesterday.
To call attention to a New York City judge's ruling that said it was not indecent to bare one's breasts on the city's subway system,the station made the promotion. A woman took the station up on the challenge, riding on the city's subway line(which could be best described by the Talking Heads song "Road to Nowhere")for over an hour before being escorted off. As she was being led out,she covered her face-to avoid being photographed. This,however,didn't deter her before,as her face was in full view of the camera. Two of the 3 major stations covered the event.
Pretty far to go in making a point,no? :)

*About Rich Michaels:he was interviewing Rev.Fred Phelps,the Topeka minister infamous for picketing the funerals of gay people and their symphasizers,this morning and proudly said he had "scooped" the national press in getting him on. Nice try,Rich-but no cigar. 20/20,the ABC newsmagazine you were referring to,ran a piece on him last year-and this is only a repeat. And the IQ drops even further...:>
While I'm on the WGR track,they've opened up a feedback line as well. Were I to go on it,I'd probably mention this:Why does the station insult our intelligence? Starting one's newscasts with the line "here are the stories you'll be talking about" doesn't make me think it's professional-

nor does the fact that "news" consists of reading one or two lines-at most.
Also,the vast majority of the news staff sound if they've just come out of
college. WBEN,OTOH,has very few-but those they do have are much better.
Next,get some real sports talkers. Art Wander is a full-fledged joke
and Chuck Dickerson,outside of football,knows NOTHING about sports. Doug
Young tries so hard to make you like him,there's almost no time for getting
to sports. Rocco Pendola tries so hard to be Chris Russo(of WFAN)that it isn't
funny-neither is his performance. Only a few reasons I'd even bother listening:
Pete Weber and Darrian Chapman with Bisons games,Rick Jeanneret,Barry Buetel
and Clip Smith. That's it.
So,in conclusion,I hope you enjoy the express elevator ride to the
basement. I will shed no tears at all,believe me. >:>

*About football:
-WBEN has 21 stations in its radio network(4 I know of:Rochester's
WHAM,WWSE-FM in Jamestown,and WACK in Newark besides 'BEN). It's paying
$1.2 million this year(1st of 4),a $400,000 decrease from WGR last year.
-As far as college football:
U.B.:WWWS(1400 AM;3WS-Your Money 1400)has the games,with WIVB
sportscaster Paul Peck and Brian Ackley handling the call.
Canisius:WECK(1230 AM),with WJYE's Jay Moran and ex-Golden Griffin
football coach Tom Hersey calling the action.
Buffalo State:WBNY(91.3 FM),with who-knows-who doing the games.
(Their season doesn't start until next Saturday.)
Also,WWKB(The Big 1520)will carry Notre Dame games,but not Syracuse.

TTFN..

C.K.G.

"This world's depressing enough without a few insults,slurs,and good,honest
laughs at other people's expense."

3528. RadioWatch Detroit

Newsgroup: rec.radio.broadcasting
Date: 1994-09-04 04:18:01 UTC
From: ad553@leo.nmc.edu
Message-ID: <34bhpp$n4t@vixen.cso.uiuc.edu>
Source record: 38183

Courtesy of the Detroit News...and my own listening.

CBS has changed the formats and calls of former beautiful music (and lately soft AC) WJOI (97.1) to WYST-FM "Star 97 FM" playing the greatest hits of the 70s. CBS claims this format was designed by CBS "exclusively" for the Detroit market...but it sounds strangely like "Y-107.9" in Aurora/Chicago...including the jingle beds. Oh well, I admit I like it since it's the music I grew up with...still haven't heard any disco yet:-)

Lots of staff changes...first, none announced at the new WYST-FM...but, I can't believe none will happen.

Tom Shannon has been replaced as morning man at CKLW-FM (93.9) by Jeff "Zippy" Crowe who had been doing fill-in and the like at WCSX-FM (94.7). Shannon, who unfortunately had been muzzled somewhat by the semi-classic rock format at CKLW-FM, has been in this market several times at CKLW-AM doing both Top 40 and Music of Your Life (now, that's a stretch). He also has spent some stints in Buffalo (I think WKBW was the latest). Hmmm...just my own rumor here...but wouldn't Shannon fit the "New Star 97 FM"? I hope CBS is listening!

CIMX-FM (88.7) has replaced morning man Mike Harrison with evening shifter Kelly Brown.

And, finally, WHYT-FM (96.3)...a station I don't listen much to reminding me of the times my parents questioned why I listen to "that music"...has fired 10pm-2am "Party Princess" Lisa Orlando. Also, Steve Courtney and "Samurai Steve" Ryan have also been dismissed fromthe morning show. The station is moving to an alternative rock format to challenge CIMX from their current mix of urban/rap.

And, I know this is radio, but a brief note from the completely mixed up TV wars in Detroit...WKBD-TV 50 has announced they will align themselves with the new Paramount network leaving CBS three alternatives to affiliation in the market (since they are losing WJBK-TV-2 to Fox)...WXON (20), WGPR (62) or WADL (38)...seems nobody wants CBS here. Guess this will force us all to cable who don't have it now since 38 and 62 don't have very good signals.

More from Detroit later...

Gary Meier formerly part of the very successful Steve and Gary show had his last show on Friday. His former partner Steve Dahl, in a classy move, came on the air to wish Gary good luck in his future endeavors. Gary seem ed very uncomfortable by Steve's presence but was cordial. He noted that he and Steve "would never work together again." Danny Bonaduce replaces Gary middays with Wendy Snyder (Gary's newsperson) and frequent WLUP contributor Tony Fitzpatrick taking over Danny's evening slot. Plans of syndication of the the stations "entertaining" talk continue.....Jim Memolo, formerly of WFAN in New York and current weekend host on WSCR joins current morning host Tom Shaer on the morning drive. Memolo, abused by his station mates for his propensity for monologues, is one of the bright talents at the station.....Scott Loftus, formerly of WMET, WVVX, WYSY has resurfaced on the former WWBZ (now WRCX) afternoons. Loftus appears to have nine lives, surviving yet another change at radio stations he works at. Loftus is best known for his support of "real rock radio in Chicago" although the RCX is the most limited station he's been associated since his days at the former WMET. The station rounded out it's staff by adding Jo Robinson from WLVQ in Columbus middays and Mark Tammany from KZFX in Houston for the evening shift.....Chuck Swirsky, main sports anchor at WGN is leaving for WJR in Detroit. Swirsky will also do play by play for Michigan basketball. Corey McPherrin, (sports anchor on CBS affiliate WBBM-TV) takes over for Swirsky as GN's morning sportsman. Swirsky was a pioneer in Chicago sports talk radio starting at the former WCFL in 1978. He has been at GN since 1982......DeDe McGuire is leaving WPNT to become the music director at WIOQ in Philadelphia.....Finally, Bob Hale returns to WJJD middays replacing Bob Dearborn. Huge Copeland moves to evenings while Adrian St. James gets the graveyard shift......Thanks to Rob Feder and Steve Nieditz for their contributions to the posting.

Joe

3530. Radio Watchers -- Manhattan and Mexico (9/3/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-09-04 04:18:02 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <34bhpq$n4u@vixen.cso.uiuc.edu>
Source record: 38185

If this is Saturday (Sept. 3), this must be Kansas City. Here are some scattered notes, apparently focusing on names of cities that would cause confusion if I left off the names of the states they're in:

* Manhattan, Kansas station KTDF (104.7) is on the air. It may have come on the air Sept. 1 (when I was away from this area). I had noted a week or so ago that Manhattan did not have a country-music station. KTDF is filling that niche with a locally programmed "hot country" format.

The station is using the slogan "B-104.7," so one would expect there to be a change in call letters soon. The KTDF calls are being used only for legal IDs.

* Mexico, Missouri station KJAB (90.1) appears to be off the air. The low-power monaural gospel station is owned by a fundamentalist church in Mexico. It was locally programmed with some relays of the USA radio network.

* St. Louis modern rock station KPNT (105.7) has shifted most of its air personalities, apparently in response to recent low ratings. This weekend, the station is running another "Reagan Rock Weekend" of all 80s hits. "The Point" faces an interesting challenge from CHR WKBQ (104.1), which at times sounds like a modern-rock station with hit-radio formatics.

* St. Louis urban contemporary station KMJM (107.7, "Majic 108") is celebrating its 15th year in the format with numerous billboards around St. Louis: "15 Years and Still Jamming!" The station transitioned over to an urban-contemporary format in mid-August, 1979, and, as I recall, began using the "Majic 108" slogan with the call letters KKSS the last week of August, 1979.

* In response to a post from Mark Bialik: I am not the "Mark Roberts" who worked in Lawrence (and later in Kansas City at KSAS(FM)) in the late 1970s. As I understand it, this person used "Mark Roberts" as an air name. I occasionally had to deal with people (sources, other reporters, prospective employers) who thought I was him. I don't know what happened to him, or whether he bears any relation to the "Mark Roberts" who is now a reporter for a Denver public radio station (whose reports are heard occasionally on NPR).

Mark Roberts *is* my real name, despite frequent friendly accusations to the contrary. Accept no imitations!

Source record: 38186

In article <348pn4$jt7@vixen.cso.uiuc.edu>
Matthew Kanzer <duncan@camelot.bradley.edu> writes:

>Could someone please provide a brief list of what different radio format
>abbreviations mean. . . .

Abbreviations for the "mainstream" formats are as follows;

AC = adult contemporary
CHR = contemporary hit radio
MOR = middle of the road (not many stations programs this anymore)
AOR = album-oriented rock
UC = urban contemporary

There are a number of other formats that are usually not abbreviated.
For example, country is usually called "country." Same with religious
(gospel, etc.), easy listening, beautiful music, oldies, talk, news,
news/talk, Spanish-language, classical/fine arts, ethnic.

There are also a number of combinations and variations--fine tuning,
particularly in major markets for competitive reasons: e.g., mix,
churban.

For a pretty good, yet easy-to-read review of radio programing at the
station level, including discussions of major formats, check
'Perspectives on Radio and Television' (Harper), pp. 153-162.

3532. Pittsburgh Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1994-09-04 04:18:08 UTC
From: AMCCOY@delphi.com
Message-ID: <34bhq0$n5b@vixen.cso.uiuc.edu>
Source record: 38187

(Copyright, Pittsburgh Post-Gazette. Reprinted here
by permission. Republication prohibited in any medium.)

One of the more refreshing stops on the radio dial these days is ``Hightower Radio.'' This lively issue- and event-driven talk show is leavened by host Jim Hightower's down-home sense of humor. The result is a delightful mix of well-researched expose, unpretentious commentary and general hell-raising, peppered with aphorisms and witty observations like ``The water won't ever clear up until you get the hogs out of the creek.''

In 1993, former Texas agriculture commissioner Hightower launched his radio career with a daily 10-minute commentary. In May he added a weekend call-in talk show which is now heard on 117 stations. WTAE-AM carries the Saturday edition from 1 to 4 p.m. The daily commentaries are carried locally at 11:05 a.m. on WBCW-AM (1530) in Jeannette, although it can be tough to pull in the signal, depending on your location.

Hightower's targets are corporate raiders, big business and the political machine. He says he didn't go into radio to be a personality, but to use the airwaves to wake the ``sleeping giant out there'' - to make listeners think, get mad and take action.

He takes an activist approach to the problems of the day. After the killing of a physician and his escort by an anti-abortion activist, Hightower gave out the phone number for Operation Rescue and urged listeners to call them and demand that they denounce advocates of violence within their ranks.

The show's populist, progressive viewpoint is a good counterbalance to the conservative right-leaning tendencies of much of current talk radio. While Rush Limbaugh has given a hero's welcome to Oliver North as a guest on his show, Hightower describes North's primary election victory in the Virginia Senate race as ``a shoplifter demanding a refund.''

Opinions on the show don't go unchallenged, and callers often disagree with the host. But even if listeners don't buy the substance of ``Hightower Radio," the style should keep them tuned in.

WWKS-FM (The Force) and sister station all-news WBVP-AM of Beaver Falls are changing hands, pending FCC approval. The new owner is
Pittsburgh Radio Partnership, which consists of Michael Schwartz, Aaron
Daniels and Frank Iorio, Jr. All come from radio management and/or ownership backgrounds. Daniels is the former president of ABC Radio Network. This is the first property for the new partnership.

Iorio said there would be no format change at either
station.
The stations sold for around $2 million.

Around the Dial:

KQV-AM will broadcast the funeral Mass for the Most Reverend Vincent Leonard this morning at 11 a.m. The services for the former bishop of the Catholic Diocese of Pittsburgh will be held at St. Paul Cathedral in Oakland.

WQED-FM has some treats for opera fans this month. This summer's harmonic convergence of Jose Carreras, Placido Domingo and Luciano Pavarotti was of course captured for posterity, and the much-hyped and heralded ``The Three Tenors in Concert 1994'' was released this week.
``Listener's Choice'' host Jim Sweenie will play the complete ``Three Tenors'' CD at 4:30 p.m. Saturday as the finale to this week's show.
Sunday nights in September are devoted to airing the new production of Wagner's ``Der Ring des Nibelungen'' cycle performed at the Bayreuth Festival with James Levine conducting.
The ``Ring'' productions are Sundays at 7 p.m. It starts this weekend with ``Das Rheingold,'' followed by ``Die Walkure'' (Sept. 11), ``Siegfried'' (Sept. 18), and ``Gotterdammerung'' (Sept. 25).

WDVE-FM's Steeler pre-game show is starting up again with the advent of football season. The pre-game shows start two hours before kickoff for every Steeler home game.
And WVTY-FM is jumping into the scrimmage by adding Steeler linebacker Kevin Greene, who will talk about the week's upcoming game and other Steelers news on the WVTY morning show.
``Greene on Black and Gold'' debuts tomorrow and will air Fridays at 7:50 a.m.

WQKB-FM (K-Bear) morning host Stoney Richards will talk to singer Travis Tritt during this Sunday's edition of the syndicated ``Country Countdown U.S.A.'' It airs from 6 to 9 p.m.

Back when WDVE was just a pup, five dollars could get you into a major rock concert. For its 25th anniversary, the station is presenting the Who tribute concert with Roger Daltrey and John Entwhistle at Star Lake September 15 with lawn and reserved seat tickets going for $5.

3533. Re: Radio Stations Set Off Fire Alarms

Newsgroup: rec.radio.broadcasting
Date: 1994-09-04 04:18:10 UTC

Source record: 38188

This sort of thing occurs when two stations carriers mix in a nonlinear fashion to produce sum and difference signals.

For example, listeners to WFNX (101.7 FM) in the western suburbs of Boston hear another station, WODS (103.3) when driving near the television towers in the Newton Upper Falls neighborhood. This happens because the 103.3 station is picked up by the transmitting antenna of WCRB (102.5) which is mounted at early the same height on a different tower about half a mile away from WODS. The 103.3 signal travels down the WCRB transmission line into the transmitter where it encounters the WCRB second harmonic (2 x 102.5 = 205.0). This produces a signal at (205.0 + 103.3 = 308.3) and another at (205.0 - 103.3 = 101.7). The 308.3 signal is filtered out by the WCRB harmonic filter and does not radiate, but the 101.7 signal does radiate and is stronger in the immediate vicinity of that tower than the 101.7 signal from WFNX. This is called intermodulation.

Is it legal for WODS and WCRB to allow this to happen? Yes, but only because the offending 101.7 intermodulation product is more than 80 dB down from WCRB's main signal. Were it less than 80 dB down, WCRB would have to install a cavity filter to suppress it.

Intermodulation often happens in radio receivers. If you live near an FM transmitter farm you'll probably find that you can hear false signals in parts of the FM band where there aren't any stations. If the signals entering your radio are strong enough to overload the RF amplifier which is the first amplifying stage in most radios, they'll add and subtract to produce the bogus signals. The only effective way to stop this from happening is to install a passive filter (i.e. not one with an amplifier in it) between the radio and its antenna. The filter is then tuned to suppress the stations causing the overloading (you'll still be able to hear them because they'll be strong enough to receive but not so strong as to overload the radio).

In article <348pne$jti@vixen.cso.uiuc.edu>, wegeng.XKeys@xerox.com writes:

>The FCC has determined that the signals from two local FM stations
>are combining in such a way that one of the harmonics (at around 75 MHz)
>is the same as the local fire alarm boxes.

Harmonics are multiples of a frequency and thus would never be less than
the fundamental (in this case an FM broadcast channel). The FCC knows
this.

3535. Re: Radio Stations Set Off Fire Alarms

wegeng.XKeys@xerox.com wrote:

: My comments: It sounds like the problem is associated with the audio signals,
: and not with the carriers -- does that seem correct?

Both. The alarm system likely listens to a particular channel and
rejects anything which isn't a special activation tone (other
selective-call receivers such as pagers use similar technology). So, the
carriers are mixed and being received, and then the receiver thinks it's
hearing the triggering tones, too.

Bruce Girard <resystom@web.apc.org> writes:
N> As is the case in much of international law, the Radio Marti story is
N> complex. For one thing, it broadcasts on the same frequency as
N> Havana's Radio Taino.

That medium wave transmitter (1180 kHz) has been there for *years* as just plain VOA. Does changing it's name to "Radio Marti" suddenly make it A Bad Thing?

Besides, radio signals (of any type) don't respect borders to begin with. Every time I go down South (Mississippi), I hear Radio Reloj clicking all across the AM band at night.

N> For another. using the medium waves for the
N> broadcast of belicose messages is in contravention of a number of
N> international agreements to which the USA is signatory.
N>
Signatory with whom?

Oh, and I suppose Radio Moscow broadcasts on Havana on 600 kHz, in the early 1980's (long before Radio Marti startup) were ok?

N> Even Fidel Castro, quoted in a book by Juan Gargurevich (Radio Marti:
N> Historia de una batalla entre Cuba y los Estados Unidos, La Voz
N> Ediciones, Peru 1992), admits that the station's illegality is hidden
N> behind technical/legal niceties.
N>
What would one expect Castro to think about it? "Radio Marti is good?"

What's next? Asking Kim Il Sung's son about the relative merits of the proposed "Voice of Free Asia"?

N> Check out the book "Cuban-American Radio Wars" by Howard H. Frederick
N> (Ablex Publishing, New Jersey). It covers the story of Radio Marti,
N> and predecessors Radio Swan (owned by the CIA, according to Marchetti
N> and Marks in their book "The CIA and the Cult of Intelligence", Radio
N> Swan broadcast from a Honduran island during the Bay of Pigs
N> escapade) and the VOA Cuban service.
N>

The point being, the US government should not broadcast to Cuba at all?

I wonder, is WQBA-Tampa (1140 kHZ), which broadcasts in Spanish to a Cuban audience, also breaking some vague international treaty?

How long has Radio Taino (or predecessors) been on 1180 kHz? VOA has been broadcasting to Cuba on 1180 from Marathon Key, Florida, since November 1962; before the Radio Marti service began that station carried VOA's general Spanish service that was also broadcast on shortwave to the rest of Latin merica. My understanding is that Castro fired up on 1180 AFTER Radio Marti began operations in order to jam it (and, perhaps not accidentally, U.S. domestic stations on 1180).

>Havana's Radio Taino. For another. using the medium waves for
>the broadcast of belicose messages is in contravention of a number
>of international agreements to which the USA is signatory.

I'm not aware that the Voice of America is in the business of broadcasting bellicose messages. Cuba certainly has no right to complain about broadcasting agreements, since it essentially abrogated the North American Regional Broadcasting Agreement not long after Castro seized power.

3539. ID Logic Simulator for Windows

Newsgroup: rec.radio.broadcasting
Date: 1994-09-04 04:18:24 UTC
From: BruceS8852@aol.com
Message-ID: <34bhqg$n62@vixen.cso.uiuc.edu>

Did anyone download and use the ID Logic Simulator for windows. I downloaded the .zip file, uploaded it to my Windows based PC, unzipped it with pkunzip, and also added vbrun300.dll to the windows/system subdirectory. I tried to run setup.exe in windows, but nothing happened.

Did I do something wrong in the downloading process or is the software defective. Thank you very much.

3540. Kansas City Radio and TV Affiliation Swaps

Newsgroup: rec.radio.broadcasting
Date: 1994-09-04 04:18:25 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <34bhqh$n63@vixen.cso.uiuc.edu>
Source record: 38195

(NOTE: The following has some relevance to radio although it more directly relates to TV affiliation changes. Even so, I think it will be of interest to many readers.)

A trade publication had this to say about a concentrated flurry of affiliation swaps some time back:

"Yet there's no denying, either, that network loyalties are becoming more tenuous, more strained, as the TV child grows up and as more TV stations are born; that 'divorces' and 'remarriages' occur at the drop of a termination clause ...."

Does this read like something Kansas Citians have read in the Star -- or St. Louisans in the Post-Dispatch -- regarding upcoming affiliation changes to the Fox network?

I found these words in "Television Digest's" February 12, 1955 issue.

Specifically, CBS had suddenly told stations in Albany, Cleveland, Indianapolis, Kansas City, Omaha, and Phoenix that they soon would not be CBS affiliates.

The Kansas City, Omaha, and Phoenix switches were linked to Meredith Broadcasting. Meredith's KPHO-TV in Phoenix lost its CBS affiliation to a new station put on the air by Gene Autry.

Apparently, in response, Meredith worked out a deal with CBS, which already was affiliated with its Syracuse, N.Y. station, WHEN-TV, to affiliate its Omaha and Kansas City radio and TV stations with CBS.

In the process, CBS abandoned its Kansas City stalwart, KMBC-TV. Longtime owner Arthur Church had sold out to Cook Paint and Varnish Co., former owner of archrival WHB radio, in 1954. Cook assumed ownership of KMBC radio and TV.

The sale also ended an unusual and (no doubt) expensive share-time arrangement for TV channel 9 between the competitors. KMBC-TV and WHB-TV shared the same transmitter site and were both counted as a single CBS affiliate. But local programs were originated from separate studios. The stations alternated call letters every 90 minutes.

The share-time arrangement was described at the time by WHB as a "shotgun marriage" arranged by CBS, which wanted a Kansas City affiliate to challenge the nearly five-year monopoly of NBC affiliate WDAF-TV. Yet, 18 months later, the matchmaker turned into a divorce lawyer.

In Kansas City, the affiliation switch occurred September 27, 1955, when KCMO-TV (now KCTV) became a CBS affiliate and KMBC-TV joined ABC. That's still the way it is today.

(Turnabout may be fair play: now it's WDAF-TV's turn to flip networks, when it joins Fox on September 12. NBC will be picked up by UHF station KSHB-TV.)

The radio operations changed affiliations a bit later, on December 1, 1955. In Omaha, WOW radio and TV joined CBS on January 1, 1956; former CBS affiliates KMTV (television) and KFAB (radio) joined NBC at that time.

In recent years, in most major cities, network affiliations have been something taken mostly for granted. In radio, people don't pay much attention to them at all. In fact, NBC "Radio" is really just a re-branded Mutual network.

It appears we're entering another era in which, as Broadcasting Magazine quipped in 1955: "You can't tell your affiliation without a scorecard -- get today's morning lineup!"

3541. Resource list for Old Time Radio Shows

Newsgroup: rec.radio.broadcasting
Date: 1994-09-04 04:18:26 UTC
From: "MacHarg, Ken" <kmacharg@mhs.hcjb.com.ec>
Message-ID: <34bhqi$n65@vixen.cso.uiuc.edu>
Source record: 38196

Hello, I submitted this to Airwaves some time ago and it ran
then, but since there has been a recent request for a listing of
where to obtain old radio shows, I submit this again:

For those who want to order old radio shows, here are the
sources I use:

North American Radio Archives
C/O Janis DeMoss
134 Vincewood Drive
Nicholasville, KY 40356

(This is a club which operated an unbelievable library. You
join, then borrow tapes. They do not sell tapes)

Robert Dalton
C/O Learning Media Center
Memphis State University
Memphis, TN 38152

(Memphis State University has an extensive collection of
some unusual material. Prices are inexpensive, quality sometimes
marginal)

Carl Froelich, Jr.
2 Heritage Farm Drive
New Freedom, PA 17349

(Nice catalog, good quality tapes, limited selection)

Adventures In Cassettes (Metacom)
5353 Nathan Lane North
Plymouth, MN 55442-1978

(Good quality, often has clearance sales)

Radio Yesteryear
Box C
Sandy Hook, CT 06482

(Nice selection, good quality)

Radio Spirits, Inc.
Box 2141
Schiller Park, IL 60176

(New group to me, nice catalog--They are the ones who
produce "When Radio Was" with host Art Fleming)

Erstwhile Radio
Box 2284
Peabody, MA 01960

(Extensive catalog, you can pick which individual programs
you want, good prices)

Satellite Broadcasting Inc.
4580 E Mack Avenue
Frederick, MD 21701

(New group to me, strange mix of programs on tapes, but
some unusual programs available)

The Hall Closet
Metro Golden Memories
Box 421
Morton Grove, IL 60053-0421

(Nice catalog. This is the outlet for Chuck Schaden of
WBBM)

In addition, some of us collectors will trade tapes. I
would be glad to hear from others with an interest in radio
drama, old programs, etc.

In article <33ui5k$m08@vixen.cso.uiuc.edu>, duke@interlog.com (DUKE) writes...

>Then, since Saturday...NOTHING BUT U2! I swear, NOTHING, except station
>IDs and Bono nonstop...
>
>Likely a test, but who knows...maybe the world's first all U2 station?

The stations become sort of a joke between my friends and me. The joke is: chances are one in two that if you turn it on at any random moment (after the U2 weekend) they will be playing REM, U2, or the Smiths' "Please, Please, Let Me Get What I Want." I think the market they are trying to exploit is one similar to the market that devepolped for Motown fifteen years after the fact. The people who listen to that station now didn't listen to alternative music when it came out--when it WAS cool ten years ago.

Even funnier then their play list is their morning announcer (former easy-listening Buffalo DJ and current AM-Buffalo MC) John Summers. On AM-Buffalo two mornings back the hep-cat responded to the question, "do you really listen to the Stoned Pilots?" that he did indeed, and that there was definitely an adult audience for that kind of music in WNY.

3544. Re: Audio Processing Miracles

Newsgroup: rec.radio.broadcasting

From: umar@world.std.com
Message-ID: <34bhqp$n69@vixen.cso.uiuc.edu>
Source record: 38199

There is a myth circulating among FM broadcasters to the effect that the louder my station is, the more people can hear it. Everybody is always trying to be the loudest in town; if my competitor is half a dB louder I have to act quickly or else (1) all my listeners will immediately desert me and then (2) my advertisers will follow them. However much some manufacturers and distributors of audio processors wish this were true, it is not. It's bullshit.

The point of audio processing is to be loud enough to be heard. Your listeners drive cars, listen at work, and frequent many other places where there is a fair amount of background noise. You have to give them something that's consistently loud so they can hear the music and your advertisers' messages. But the number of people who can hear your FM station is determined largely by the amount of RF you put into their radios, not by how much it is modulated.

If you run a 5,000 watt FM transmitter and modulate it 100%, your power is still 5,000 watts. The signal level at a listener's receiver increases not a whit.

There is no credible evidence that being louder than your competitor will translate into higher ratings (or more importantly, more sales). If you've got a clean, multipath free signal now that's loud enough to be heard, don't spent $12,000 on that new processor. You're wasting your money.

Remember, it's your programming that draws listeners. The way to beat the other guy is to outprogram him, not outprocess him.

3545. RUSH to Dishonesty (was Re: Conservatives and Talk Radio)

rspencer@netcom.com (Rob Spencer) wrote:
>Why don't you simply admit that you disagree with Rush Limbaugh, and want
>him off the air?

Time to get out the Bromo-Fizzy...
Why is it that ANY TIME Limbaugh is taken to task, he and his supporters knee-jerk into yelps of "CENSORSHIP!"??? Only the extreme fringe of the radical left has ever made any rumblings about wanting Limbaugh banned, and last time I checked, their comments on radio programming fall upon sympathetic ears only in the offices of Radio Pyongyang.

>His show is however not an issues show, but an entertainment show.

Oh, THAT'S why George Bush invited him to lie unconscious at the White House so that he could lie while conscious on behalf of the Republican National Committee.

>Those of a conservative bent have long felt disenfranchised by the
>popular media, who for the most part present a relentlessly left-leaning
>view of the world.

Aah, the liberal-conspiracy theory of broadcasting. It's funny, no three of us can agree on what to order on a (communal?) pizza, but we sure know how to lock conservatives like Paul Harvey, G. Gordon Liddy, Chuck Harder, Jerry Hughes, Pat Buchanan, Mort Downey, Bob Grant, Barry Farber, Wally George, Michael Reagan, Jim Bohannon and Tom Valentine from the national airwaves. Hell, it must have been an act of God that allowed Mutual to resurrect the political career of Ronald Reagan by handing him that radio commentary stint after his '76 electoral shellacking. Gee, I didn't know that Tom Leykis, Jack Ellery, Jay Marvin and Don Vogel had that much power all to themselves.

>If you don't like Limbaugh, don't listen!

I thought Dittoheads always chided Limbaugh's critics for allegedly NOT listening.

>Don't waste time deconstructing his logic. Believe me, few
>talk-show hosts of any philosophical stripe would survive such >scrutiny.

It's not his "logic" that collapses under scrutiny, it's his honesty, or lack thereof. Just one of the many points of example---on his show of 12 January, Limbaugh stated, "This all involves the death of Vince Foster. And I've used my words carefully. Death, not suicide." Then, in an appearance on NIGHTLINE in April, he said, "Never have I suggested that this [Foster's death] was murder or this whole thing was accurately portraying murder." Does Limbaugh somehow provide a third option past a self-inflicted wound or another person inflicting the wound? (Wait a minute, maybe this IS only about logic...)

N> However, if he can sue for misappropriation of his "intellectual
N> property", does that mean that the people whose songs Limaugh
N> utilises in parodies and "update themes" can sue him for applying
N> their copyrighted material for a purpose they oppose?

Not too long ago, the US Supreme Court more or less stated that anyone has a right to make parodies of any song, more or less. (There are still the licensing requirements (ASCAP/BMI), though)

N>I've wondered
N> for years why Chrissie Hynde lets Limbaugh use her song "My City was
N> Gone" as his program theme while I know damn well the songs lyrics
N> criticise the very social policies Limbaugh espouses...
N>
I know the lyrics too; it's anti-development blethering. Rush talked about this song in the early years of his show: he said that the beat was more important, in that case, then the lyrics.

I'm not quite sure what rights C. Hynde herself has as to the use of the song (as opposed to the music publishers). Normally, don't songwriters sell the rights to their songs to some other entity?

N> BTW, why is James Earl Jones' voice no longer giving the "EIB
N> Network" tag? Did Jones disagree with Limbaugh at some point and
N> revoke the rights to use his voice, or did the license for those
N> liners simply run out?

Was that *really* James Earl Jones? There's lots of people out there with a deep, deep voice . . ..

3549. THE WORD RUSH IS PROT

Newsgroup: rec.radio.broadcasting

Source record: 38104

dk@crl.com (David A. Kaye) writes:
N> Yes. It depends if the word is an obvious use or not. If it's not
N> then the word can usually be protected.
N>
N> I'm fairly certain that "Rush" as a talkhost name and "Rush to
N> Excellence" as a traveling show can be registered, but I'm sure that
N> "Rush" is trademarked in other areas, such as in music where it is
N> the name of a popular band. By the same token "Apple" can be
N> trademarked for a computer by one company and trademarked for music
N> products by another company. "Rolling Stones" is trademarked as a
N> band's name, but "Rolling Stone" is trademarked as a publication.

A. Is this "Rush"-name-protection suit for real? Sounds too strange to be true.

B. I remember a dispute between Apple Records and Apple Computer, when Apple Macintoshes started to have MIDI capability advertised. Apple Records stated that doing so was an infringment of the original agreement allowing Apple Computer to use the "Apple" name (i.e. they could not promote music).

Obviously, Apple Computer was not prevented from using the name "Apple", but I don't recall any other outcome of that incident.

C. As far as Rush protecting his name from "unauthorized uses", I just remembered another case here in LA where one of the AC stations promoted itself with "We don't play Barry Manilow" or something like that. Well, Barry got upset with that station, and took some legal action to get them to stop.

Steve_Coletti (bigsteve@dorsai.dorsai.org) wrote:

: The term Windows for a operating system was used by Digital for a mulit
: task monitor program that ran on VT100's on their TOPS20 systems, 20 years
: ago. If DEC couldn't copyright it, neither could Microsoft, or Rush or
: Windex.

The term is trademark, not copyright. Trademarks are handled by the
patent office and are brand names for products which can be described
with a generic word. A copyright is a manifestation of a creative work
such as a book, news article, movie, software, etc. Copyrights are
handled by the copyright office.

And what you say about the "Windows" trademark isn't true. Microsoft has
been trying to register it for years and succeeded in doing this just the
other day. "Windows" is not an obvious term to decribe multiprocessing.
Was it in wide use prior to Microsoft's use? Maybe not. Did anybody else
try to trademark the word? It appears that nobody else did. In the
meantime, MS has bought up major programs which use the word "window" in
them, thereby strengthening their case...and they just won.

Back to "Rush". The mark "Rush" is not generic for "talkshow host"; it
refers to a specific talkshow host. The concept is called "prior art",
and if there is no significant prior art, the mark belongs to the user
which applies for it in that particular field.

>
I think that the syndicated program "When Radio Was" somehow has the rights to
broadcasting "The Shadow". There's a small local station in Westland MI on 1090
that runs old radio programs and I've heard them say that they cannot broadcast
"The Shadow" due to legal ramifications. I don't know the whole story but
hope that this sheds some light on the topic.

Lukas...

I am an alumnus of Ohio University's student run commercial system, ACRN. IT stands for the All Campus Radio Network. ACRN operates a Cable FM station (99.3), a network of dormitory carrier current stations (who program themselves in the evenings, taking hourly news feeds from ACRN), and the dormitory food service music system.

It is and was entirely student operated and supported by commercial announcements sold by a student sales staff. It receives both National and Local Advertising Revenues. In fact, most of the sports broadcasts that ACRN produced during my college years (mid 1970's) were sponsored by the major breweries.

I hope this has been of interest to your subject.

Take care...

(KoolBreez1) writes:

RE: traffic/billing systems...

About "Decision" -- Our Traffic manager does avails reports by hand.
If you want notorized script with invoices, forget it. Each piece of copy
you enter is indigious to each order -- same copy + multiple order = type
the copy over again for each order! Easier to photocopy script.
Continuity: good luck with complicated spot rotation patterns. Your
typical Anheiser-Busch/Budweiser traffic instruction -- spot 1 (25%), spot
2 (20%), spot 3 (15%), etc... is a lot of fun to enter.

3554. WWRC Power Increase

Newsgroup: rec.radio.broadcasting

I looked at the FCC file on WWRC a few months ago (in the Public Document Room), and came away with a few impressions.

1- The 50 kW day, 5 kW night grant was made many months ago.

2- I going to a directional pattern days as well as night, it seems to me that their antenna efficiency will suffer substantially in the daytime. Their OLD non-DA AM stick must be at least a half-wave tall, and top-hat loaded at that. Using their two short night-DA towers as part of the day-DA array will mean that a lot of the power will go to them (and they don't radiate as efficiently as the tall stick). Thus they will impress the ad agencies with FIFTY KW, but the coverage won't go up proportionally.

3- They will still have to limit coverage to the W-NW since WCTN Potomac is on 950, and maybe 15 miles away.

4- WMAL 630 still has the coverage-to-beat in the DC area. While WTOP has 50 kW day/night, being on 1500 kHz doesn't give them a chance, and they're an old 1B at that.

Regards de Bob w3otc@amsat.org

3555. Need Info on Jerrold RF amp.

Newsgroup: rec.radio.broadcasting

Cross-posted to: rec.video.satellite,rec.video.cable-tv,sci.electronics,rec.radio.shortwave,rec.radio.broadcasting

I ran across several of these units.

Jerrold model jhpm 6 rack mountable units. They are called
"Solid State AGC High Power Amplifier", the have three female "F"
connectors marked 'input' 'output' and 'thru input' and each one has a
screwdriver adjustment on the front called 'output level'

Any ideas what these are?

I have about a dozen of them.

On the rear is a power cord (110vac) and a female AC plug.

Please help.

Bill

a recent poster requested a list of "radio aahs" affiliates.
according to my d.p., who works there, stations currently on line are:

wwtc-am minneapolis 1280 (flagship)
kidr-am phoenix 740
kkds-am salt lake city 1060
kpls-am los angeles/orange 830
kctq-am ventura calif 850
wkdl-am washington d.c. 1050
wkdv-am manassas, va 1460
kahz-am dallas 1360
weio-am eau claire wis 1050
klze-fm st louis 95.3
kkyd-am denver 1340
kiid-am san luis obispo, calif 1400
wkdb-am baltimore 1570
kazz-fm spokane 107.1
waoz-am cincinatti 1360
wisz-am grand rapids, michigan 640
womx-am orlando, fla 950
wjax-am jacksonville fla 1220

according to aahs promotional material, for information, call (eastern u.s.)
203-431-9225 (barbara mcmahon) or (western u.s.) 817-589-1100 (bob bruton)

radio aahs can also be heard on satellite...i don't know the coordinates,
but if anyone is interested, i can find out and post

Here in the Fayetteville/Springdale MSA, we have two stations who
regularly ID their auxilliary transmitters. Is this common elsewhere?

This is the first time I've ever heard calls like this used on-air.

KUAF - 91.3 --> K205AA - 88.9
KKZQ - 101.9 --> K272DQ - 102.3 --> both referred to as Q102

Here it is The WorldWide RAY DIO Guide!

Several years ago I created a radio station database. I used many sources to create the list including Billboard Magazine, American Top 40, Casey's Top 40, Rockline, etc. Now I'd like to update the database and share it with everyone.

Let's start with the state up South Carolina (picked at random). Here's what I have. Any corrections, notes, or stories are appreciated.

CITY CALLS FREQ BAND ID FORMAT SHOWS

Charleston ____ 107 FM (Z107) CHR - Casey's Top 40
Charleston WWWZ ___ __ Urban
Cheraw WCRE 1420 AM CHR - former AT40 affiliate
Columbia WNOK 104.7 FM CHR - Casey's Top 40
Columbia WWDM _____ __ Urban
Georgetown/
Myrtle Beach WBPR 98 FM CHR - Casey's Top 40
Greensville WLWZ FM Urban
Myrtle Beach WYAV 104.1 FM Wave 104 Classic Rock - Howard Stern

**CHR = Contemporary Hit Radio/Pop/Top 40

Message-ID: <34e2g4$mep@vixen.cso.uiuc.edu>
Source record: 38115

I'm looking for recent information on digital broadcasting. An article in the Ottawa Citizen on Thursday August 25th explained how a company that was going to sell 40 chanells of digital audio through the cable has been denied their license. However I'd like to know some recent information on the `L-band' system that was being explored.

Anyone who can help please E-mail me or post,

thanks,

Similar to all this (and pertinent to radio, since I can't think of many music formats that don't play his compositions) is the story in the local paper last week about Bob Dylan, the former Robert Zimmerman of Hibbing, Minnesota, suing Apple for naming one of their products "Dylan".
Seems to me that, if anyone has the right to sue, it'd be the estate of Dylan Thomas, from whom the former Mr. Zimmerman lifted the name "Dylan" in the first place (an act committed, I'm sure, without written permission)...

BruceS8852@aol.com wrote:

: Did anyone download and use the ID Logic Simulator for windows. I downloaded
: the .zip file, uploaded it to my Windows based PC, unzipped it with pkunzip,
: and also added vbrun300.dll to the windows/system subdirectory. I tried to
: run setup.exe in windows, but nothing happened.

It appears that in the North American version (the file with "na"
somewhere in it) they left out one of the modules needed to run it. When
I tried to install it quit, too. Luckily I had also downloaded the
shortwave sample version which *did* have whatever module was needed and
unzipped this into the same directory as the NA version. Then it set up
properly. Too bad there aren't provisions for the thing to indicate
stations beyond the artificial 27-town grid. I can hear dozens of
stations on my radio which would never appear on this virtual radio.

FOURTH REVISION, 9/4/94: Solves mystery of CBS-ABC affiliation swap
in 1955. Adds dates for KCMO and WHB frequency switches. Narrows down
WDAF upgrade and WREN move. Confirms link between KWKC and KCMO. Confirms
link between WLBF and KCKN *and* the role of Everett L. Dillard in WLBF.
Adds info about KXBY/KITE, *and* the role of Everett L. Dillard in KXBY,
but more info is needed. Adds info about upcoming WDAF-TV sale.
Version 3.1, 8/5/94: Adds information on KCMO and KMBC, plus experimental
high-fidelity station KITE. Version 3.0, 8/3/94: Minor updates and more
information about pioneer FM station KOZY.
The original version of this history originated in a request
from Barry Mishkind on early Kansas City radio, using 1928 as the baseline.
I began with a 1930 base date (using a photocopy of RaDex from 4/30).

Footnote Station Frequency Post-1941 Fq* Present Fq Other
(1) WIBW 580 580 580 Topeka, KS
Share-time w/ KKSU
(2) WDAF 610 610 610
(3) KFEQ 680 680 680 St. Joseph
(4) WHB 860 880 710
(5) KMBC 950 980 980 Now KMBZ
(6) WREN 1220 1250 1250 Was Lawrence, KS
Now Topeka, KS
(7) WOQ 1300 (1330) (1330) Off air in 1934
^--of KFH Wichita, had share-time w/ WOQ
(8) KWKC 1370 1480 810 Now KCMO
(9) WLBF 1420 1340 1340 KCKN, now KNHN

Footnotes:
(*) Most stations changed frequency 3-29-41 as result of Havana
agreement.
(1) WIBW on-air 5-8-27. 1930 owner Topeka Broadcasting Assn, controlled
by Capper Publishing Co. Topeka Broadcasting Assn bought in January 1957
(FCC approved 12-19-56) by Stauffer Publishing Co., its present owner.
Sale of all Stauffer properties to Morris Communications announced 7-27-94.
Morris announced spin-off of Topeka properties 8-1-94 to comply with
FCC cross-ownership regulations (co-ownership with Capital-Journal newspaper).
Still shares with KKSU (formerly KSAC, also listed in 1930 RaDex).
KKSU (Kansas State University) has the frequency 12.30 pm-5.30 pm weekdays.
=> Has FM and TV facilities, unavailable in KC. AM: 5 kW, DA-N. Format
farm and news/talk. Flagship station of Kansas City Royals.
(2) WDAF started by the Kansas City Star in 1922, owned by the Star
until 1957, when Star lost restraint-of-trade case and forced to sell
under a consent decree. Sold to National-Missouri TV. Inc. 5-18-58. Sold
to Transcontinental TV Co., 7-13-60. Sold to Taft Broadcasting Co. of

Cincinnati 2-19-64, predecessor of present owner, Great American Radio and TV Co.
To be separated from WDAF-TV by proposed sale of TV to New World Communications, to take effect 9-9-94. TV affiliation to change to Fox network on 9-12-94, with NBC affiliation going to former Fox affiliate KSHB-TV (channel 41).
=> FM history: Conditional grant for KCST in 1947, never activated. WDAF-FM (102.1) on-air 3-5-61, presently KYYS. Has TV facilities.
=> AM: 5 kW, ND fulltime, stereo. Format full-service country. Transmitter moved to 79th & Mission Road in Johnson County, Kansas, in 1939. Both WDAF and KMBC (built 1940) have the same type of unusual wide-faced square tower.
(3) KFEQ, listed in earlier Radio Service Bulletin lists at Oak, Nebr. Owned by Scroggin & Co. bank, later owned by Barton Pitts and the Bradley family, publisher of St. Joseph News-Press. Sold to Kemper Brown and Bing Crosby 12-31-55. Sold to Jesse D. Fine family 9-19-57. Sold to Panax Corp. 8-30-63. Separated from KFEQ-TV (now KQTV) by sale to KAYS, Inc. March 1969, predecessor of present owner, Beach-Schmidt Group, a chain based in Hays, Kansas.
=> AM: 5 kW, DA-2. Format mixed news/talk and country.
(4) WHB started in 1922 by Sweeney Automotive School (across from Union Station). Owned in 1928 by Sweeney and in 1930 by WHB Broadcasting Association. Purchased in 1930 by Cook Paint & Varnish Co. Independent until affiliated with Mutual in 1936. Changed frequency to 710, DA-2, adding nighttime service, on or about 5-1-48. WHB sold to Midcontinent Broadcasting (Robert and Todd Storz chain) 6-14-54, in conjunction with Cook's purchase of KMBC AM and TV, thereby resolving a shared-time situation with WHB-TV and KMBC-TV on channel 9. See KMBC entry for more details. Storz chain discontinued Mutual affiliation 10-17-54. Sold to Shamrock Broadcasting (Roy Disney interests) 4-12-85. Sold to Kanza, Inc., based in Carrollton, Mo., 8-26-93.
=> FM history: WHB-FM (102.1) 1948-50. Under Shamrock ownership with KUDL (98.1) 1985-93. Presently relaying programs from KMZU (100.7), Carrollton, Mo.
=> AM: 10 kW-D, 5 kW-N, DA-2. Was stereo under Shamrock ownership. Dominant Top-40 station in 50s, 60s, and early 70s. Now farm and country.
(5) KMBC owned by Midland Broadcasting Co. in 1928 and 1930. Traces ancestry to amateur station (9XAB) started by Arthur B. Church in 1921, and claims to be Kansas City's oldest station. Went commercial in 1922 as WPE, moved to Independence in 1924 as KFIX and KLDS (owned by Reorganized Church of Latter-Day Saints). Arthur Church regained ownership (as Midland) in 1927, moved it back to KC as KMBC.
Increased power to 5 kW, DA-N 6-1-40, at present Westwood, Kansas site. Site apparently in use before that date; present DA utilizes both the newer half-wave tower and the older quarter-wave tower.
Sold to Cook Paint and Varnish Co. 6-14-54, to resolve share-time TV service on channel 9 between KMBC-TV and WHB-TV. The two stations, on-air 8-2-53, alternated 90-minute blocks of programming from different studios, using the same transmitter, in an arrangement described by Television Digest

as a "shotgun wedding" encouraged by CBS. Both stations were counted as a single CBS affiliate. Church retired because of ill health.
Affiliation changed to ABC 9-27-55 (TV) and 12-1-55 (radio) when Meredith obtained CBS affiliations for its stations in Omaha (WOW) and Kansas City (KCMO) as compensation for losing CBS affiliation in Phoenix (KPHO) to a Gene Autry station. Sold to Metromedia Broadcasting Co. (John W. Kluge, et al.) 8-29-61. Separated from KMBC-TV by sale of radio stations to Bonneville Broadcasting (Utah Latter-Day Saints--Mormons) 5-12-67.
=> FM history: KMBC-FM began 1944 at 46.5, moved in 1945 to 97.9, apparently went dark late 1948. Successor KMBC-FM (99.7) on-air October 1962, now KLTH.
=> AM: 5 kW, DA-N. Format news/talk. Studios and transmitter at 50th & Belinder, Westwood, Kansas. Bought KCMO-AM/FM in 1993, forming a duopoly.
(6) WREN on-air 6-15-26. Started by Jenny Wren Co. of Lawrence, Kansas. The Kansas City Star had proposed a purchase in 1935 but was denied on grounds of monopoly by the FCC. Moved to Topeka in 1947 (after FCC approval 5-1-47). Purchased by Alf Landon (1936 Republican presidential candidate) October 1952. Sold to Pat Paton and Ted Cramer 9-5-85. Paton and Cramer took station off the air in 1990. Reactivated in 1993 by Michael Glinter with southern gospel format.
=> AM: 5 kW, DA-N. Still nominally has share-time arrangement with KFKU Lawrence (as it did in 1930), but that has not been used by Kansas University in at least three years.
(7) WOQ started by Western Radio Co. in 1922, purchased by Unity School of Christianity in 1924. Surrendered license in 1934. Shared time with KFH Wichita.
(8) KWKC listed in 1930 RaDex as owned by Wilson Duncan Broadcasting Corp. Predecessor of KCMO, purchased by Tom Evans (president of Crown Drug Co., a chain of Kansas City drug stores) 6-10-36. Station at 1370 until at least 10/38, subsequently at 1450 and then 1480 (NARBA move)). Power increase from 1 kW to 5 kW at 1450 granted by FCC 2-19-40.
Moved to 810 and present transmitter site in far northern Kansas City (at a town formerly called Nashua) on 9-9-47. Evans and co-owner Lester Cox (Springfield, Mo. businessman) started KCMO-TV 9-8-53. KCMO-AM/FM/TV sold to Meredith Engineering Co. 11-16-53. See KMBC entry for description of 1955 affiliation change to CBS. Separated from KCMO-TV (now KCTV) by sale to Summit Communications, Inc. 6-21-83. Sold to Pacific and Southern Co. (Gannett) 7-29-86. Sold to Bonneville Broadcasting (KMBZ) fourth quarter of 1993, forming duopoly.
=> FM history: KCMO-FM (CP for 98.3, on-air at 94.9) on-air 1948. Never left the air, the only Kansas City FM station with that distinction. Present AM facility: 50/5 kW, DA-N. Downgraded from 50/10 kW, DA-N during 1990 to improve nighttime pattern over suburban Johnson County, Kansas. Present format talk.
(9) Station WLBF went on the air 11-1-25, but went bankrupt three years later, according to the Kansas City Star. The Star cites KCKN as its successor. Variety Radio Directory and Broadcasting Yearbook also counted KCKN as WLBF's successor. 4-30 RaDeX lists WLBF at 1420 with 100 watts. First issue of 1932 White's Radio Log continues that listing. Station

could not have moved to 1310 kHz until 1934 when WOQ at 1300 kHz surrendered license.
Profile of Everett L. Dillard in Broadcasting, 1-13-47, wrote that Dillard started WLBF in 1928 and moved it to Kansas City, Kansas. Profile said Dillard sold the station in 1930. Not known at this time when Capper Publishing Co. (owner of WIBW) purchased the station and changed calls to KCKN (named for its Kansas City Kansan daily newspaper).
Sold to Cy Blumenthal (Continental Stations) 2-8-57 as part of Capper sale of WIBW AM/TV. Sold to Seattle, Portland & Spokane Radio, Inc. (later Kaye-Smith Group) 7-1-65. Purchased by Joseph L. Allbritton in 1981. Sold to Sconnix Group Broadcasting 6-21-83. Sold to KCBR Limited Partnership in 1989 (present owner). It is now KNHN, a news/talk station.
=> FM history: KCKN-FM (94.1) on-air 5-28-63. KFKF calls claimed by Sconnix. AM and FM separated by 1989 sale of AM to KCBR partnership.
=> Present AM facility: 1 kW, ND fulltime.

Other Historic Stations:
* Pioneer FM broadcaster KOZY dates to the pre-war FM band. Started by Everett L. Dillard, who later started WASH(FM) in Washington, D.C. Studios and transmitter at the Porter Building at 34th & Broadway. Experimental licensee of W9XA at 26.45 mHz 1937-39, operating both AM and FM. First FM station application submitted to FCC 3-1-40. On-air 1942 at 44.9 mHz. Moved to 99.9 mHz in postwar band change, then to 98.1 mHz. Off the air early in 1950 after lost lease on studio and transmitter site. Requested deletion for economic reasons, which was granted by the FCC 2-15-51. The 98.1 allocation was reactivated by KCMK(FM) 3-3-58, now KUDL(FM).
* Experimental high-fidelity broadcaster KITE(AM) listed at 1530 in October 1938 RaDeX and 9-15-40 Broadcasting list of NARBA reallocations. Variety Radio Directory for 1937-38 lists station as KXBY, with start date of 12-31-34. Dillard was chief engineer for KXBY in early years (but not by 1937). KITE moved to 1590 3-29-41, listed in 1942 Broadcasting Yearbook. Deleted by 1949, when (unrelated) station KPRS went on-air from Olathe, Kansas. KPRS subsequently moved to Kansas City (1951?), becoming one of the nation's first Black-owned radio stations.

You are invited to a meeting of the Free Communications Coalition on Sunday, September 11. It will be held in Berkeley at 809 B Allston Way (two blocks south of University Ave. between 6th and 5th) from 12 noon to 2 PM. A potluck vegie picnic will follow at a nearby park complete with a live micro power broadcast. Members of the Free Communications Coalition (the peoples' FCC) include San Francisco Liberation Radio, Radio Libre, Free Radio Berkeley, National Lawyers Guild Committee on Democratic Communications and other micro power practioners and supporters. Help plan the fall/winter campaign to take back the airwaves.

Two workshops on micro power broadcasting are scheduled for the Bay Area. The first one will be held in Berkeley at the Long Haul, 3124 Shattuck Avenue on Saturday, September 24. New College, 777 Valencia in San Francisco will be the site of the second workshop on Saturday, October 8. Both workshops will start at 11 AM and run until about 4 PM. A donation of $5-$25 is requested. Materials and info will be provided. Learn how to put your own micropower station on the air.

Listen to San Francisco Liberation Radio 93.7 on the air every night covering the western portion of SF, north and west of Twin Peaks. Radio Libre 103.3 is on every night from the Mission District covering an area east of Twin Peaks. Free Radio Berkeley returns to the air on Sunday, September 4 at 8 PM on 104.4

For further information, contact Free Radio Berkeley / Free Communications Coalition. You can request a current copy of our newsletter and list of the kits we offer.

on aug. 25th, thursday morning at 6 am, k-n-o-w a-m 1330 in the twin cities (licensed to minnesota public radio, city of license minneapolis) ceased simulcasting the programming of minnesota public radio's news and information service (carried also on know-fm 91.1 in the twin cities and other stations statewide) and began programming the new associated press all-news format, with local weather inserts and local news during drive time.

i am not writing without personal interest in the event or its consequences. i work there, i do afternoon drive, and am involved in creating a new broadcast service in our market.

what's interesting is that, as far as is known, minnesota public radio is the only public radio service to pick up what is intended as a commercial service. the commercial avails are covered by psa's by a.p. we cover most of them with local information or promos for our news and information (long form) news service.

until now, the twin cities had no 24 hour (headline type) news service. minnesota public radio, which has been an innovator in public broadcasting for over a quarter century, saw a need in the market, and sought to fill it via an a-m frequency that had been (for the most part) duplicating programming already available locally on the f-m band.

i'll keep you posted on how the new service is received. its a new venture in uncharted waters for m.p.r....but m.p.r. did not get to where it is without taking a few chances.

here's a news release that went out:

FOR IMMEDIATE RELEASE August 25, l994 Contact: Ginger Sisco, 612-290-1240

KNOW 1330 AM SWITCHES TO 24-HOUR, ALL-NEWS FORMAT St. Paul, MN -- KNOW 1330 AM became The News Station today as it began broadcasting a new, 24-hour-a-day, all-news format. Previously, KNOW 1330 had simulcast the in-depth news programming heard on KNOW 91.1 FM. Both stations are owned by Minnesota Public Radio (MPR). "By duplicating KNOW 91.1 FM on 1330, we at Minnesota Public Radio felt that we were missing an opportunity to present another program choice for radio listeners. With this complementary headline news programming, we expand our news franchise while capitalizing on one of our strongest resources the largest broadcast news staff in Minnesota," said MPR President Bill Kling. "We will present local and regional news reporting with frequent local weather updates along with national and international news from The Associated Press," said Vic Bremer, MPR vice president of broadcasting. "Listeners will get a quick capsule of news whenever they tune in." The all-news radio programming is a commercial-free service. "We were anxious to bring this quality news format into the Twin Cities where it can be a complement to the broad perspective and

in-depth reporting heard on KNOW 91.1 FM," commented Bremer. "In addition to our local and regional news reports and Twin Cities weather, listeners will hear six newscasts, two business news updates (weekdays), two sports updates and two national weathercasts every hour. There are also a number of regular features like Consumer Watch, Film Clips, Health and Medicine and Entertainment Report." The all-news radio programming is produced by The Associated Press and Minnesota Public Radio News. Lifestyle features will be supplied by MNN Radio. ###

a-m forever! de jw

It's my understanding that the broadcast rights to "The Shadow" and other well-remembered programs are controlled by Charles Michaelson. I was one recipient of a firm letter from his office when the local newspaper listed a broadcast of a program whose rights he owned.

It should be noted that there's a difference between copyright, which applies to the scripts, which expires after a specified period of time, and performing rights, which do not expire. Copyright is owned by the writer (or his heirs and assigns), while performing right belongs to the actors or other talent. Depending on the terms of the original contract, the performers may or may not have a continuing interest in recordings made in years past.

The only performance rights that I know anything specific about are those for the CBS news broadcasts. If a report is rebroadcast, even after many years, the original reporter or commentator is entitled to additional payment.

charles.hobbs@support.com wrote:

: Obviously, Apple Computer was not prevented from using the name "Apple",
: but I don't recall any other outcome of that incident.

Actually they were prevented by Apple Corps (the Beatles' record company)
from using the "Apple" trademark for music products. I don't recall that
Apple Computer is using the word on its CD-ROM products. If they are,
it's likely under license from Apple Corps. Apple has long claimed that
the name just "came" to them, though people around at the time say that
both Woz and Jobs were big Beatles fans. Apple got over a possible legal
hurdle with the name "Macintosh" by licensing the name from "Mcintosh"
the stereo manufacturer, even though technically they have no rights to
the "Macintosh" spelling. But Mcintosh has a name which has been in use
for generations, so it was safely assumed that the trademark was strong.

: C. As far as Rush protecting his name from "unauthorized uses", I just
: remembered another case here in LA where one of the AC stations promoted
: itself with "We don't play Barry Manilow" or something like that. Well,
: Barry got upset with that station, and took some legal action to get them
: to stop.

Whether this is legal or not depends on who's got the deepest pockets.
Barry Manilow might have legal standing if he can prove he was "damaged"
(for instance that he could lost potential future bookings) because of
that statement. It would be hard to convince a jury of this, but the
station probably just settled out of court rather than dump thousands of
dollars into their lawyers' laps, even if they did eventually win.

The whole concept of trademark law is based on preventing confusion to
the consumer of a product or service in the marketplace. If another talk
host claims that *he* is "Rush" or that he is doing the "Rush to
[whatever]" roadshow, Rush Limbaugh would have a good strong case. But
simply to say that one talk host is, say "better than Rush" or something
similar would not cause confusion and would lose a court test.

Look at it this way: MCI and Sprint are always comparing their prices to
AT&T. All 3 companies have valid trademarks on their company names.
AT&T can't (validly) sue MCI over this because there is no confusion
being caused in the marketplace.

>I think that the syndicated program "When Radio Was" somehow has the >rights to broadcasting "The Shadow".

You're right, Carl Amari the brains behind "When Radio Was" has very successfully marketed Old Time Radio Programs for broadcast and tapes for home use. This young man has "done things right"! He has made arrangements not only for broadcast rights to the shows he carries but has also made arrangements with the copyright holders to sell tapes to listeners. The magic of his success? The copyright holder gets a cut of the action (profits). It's funny how money talks.

>Jersey?
>
>Around November of 1992 they appeared out of nowhere with a 50,000-watt
>signal that came into Philadelphia with no problem.

WWJZ went dark because of a battle between the owners. As it was explained to me, they started making money, got greedy and started fighting over who owned how much of the station. There were allegations of phyisical abuse along the way... or assault or something or other.

This ludicrous situation resulted in the owners turning off the transmitter, thereby leaving their new million dollar facility to serve as a cobweb collection point.

A few weeks back I heard a rumour the station would go back on the air, but operated by another local station under a local marketing agreement.

I don't know much more. But a suggestion- Call the Station. Someone might actually tell you what the deal is. My info is 3rd hand.

It's been a not-so-quiet week and a half in Lake RF...

My travels over the last 10 days or so took me by plane to Fort Wayne, Indiana, then by rental car to Detroit. While the ostensible purpose of the trip was a wedding, there was plenty of time for radio. Among the highlights:

*Stopped in to visit WJR-760 and WHYT-FM "Planet 96.3," now that they're officially not moving out of the Fisher Building in downtown Detroit. WJR ND Dick Haefner and the crew were very friendly, and I had a nice tour of the (very spacious) facilities. A quality shop.

*Also stopped in at CBS's all-news WWJ-950 and lite rock WJOI-97.1. Even though WJOI's call letter change was just a week away at the time, it was apparently a well-kept secret. WWJ's facilities are tucked away in a corner of non-co-owned CBS-TV affiliate WJBK-TV 2 in Southfield. This will get interesting in a few months when WJBK jumps to Fox...

*Thanks to the help of several r.r.b. readers, I was able to locate just about all of Detroit's broadcast towers (WQBH, WMKM, WCHB, and WPON remain at large...), and I have almost all of them on videotape now. WWJ and WJR both have VERY attractive old transmitter buildings. WLQV-1500 and WDFN-1130 are both running off 9 towers each south of the city.

*I crossed into Windsor Sunday morning and checked out the CBC and CKLW/CKWW/CIMX studio buildings. Windsor is VERY quite on Sunday... the University of Windsor's CJAM-91.5 let a record run out about 10am and just left a dead carrier on for at least the next hour.

*Leamington Ontario's CHYR has switched from its split-freq AM operation (710/730) to 96.7 FM. But Dearborn Heights' WNZK was fun to listen to at 8:30 PM, as they invited listeners to tune down from 690 to 680 for the night side of the operation. Yes, I have it on tape...

*Monday morning brought stops at Ann Arbor's WIQB-102.9 (which is now simulcast on co-owned WAMX 1290 Saline) and WAAM-1600. After that it was time to take I-96 across Michigan, as I captured the Lansing, Grand Rapids, and Kalamazoo markets on cassette. Not much new in any of those...although WIBM(AM) 1450 Jackson MI has become satellite country WCXI. And nearby, KTGG (NOT a typo!) 1540 Spring Arbor MI is lazy about legal IDs. They tend to think a legal for simulcast WSAE-FM 106.9 will do. I don't think so...

*Returning to Fort Wayne...besides my WOWO public file inspection, I also paid a call on the brand-new studio and transmitter facilities of public radio WBNI-89.1. VERY impressive...a brand new 600' tower, a new transmitter (they're up to 50kw from 39kw), a new main air studio with Pacific Recorders console, several Shure SM7 mics, a couple of brand new Sony DATs, a touchscreen digital audio playback system, and other goodies. WBNI has sold its old transmitter to new WKQM-96.3 Churubusco-Fort Wayne (co owned with WGL-AM/FM). 'KQM is an automated easy listening station. It is actually less interesting to listen to than the 67kHz Muzak subcarrier on WBNI. It's also tightly shoehorned in among co-channels WBBM-FM Chicago, WHYT Detroit, and WHHH Indianapolis.

*Out in Columbia City IN, the high school's WJHS-91.5 uses an STL to get from the studio at the school to the antenna on a United Telephone/Sprint tower a half-mile away. The 2500 watt signal is pretty good. Headed back towards Fort Wayne, I found the WDJB-"B106" transmitter in a cornfield near the edge of Whitley County.

*The Midwest is a fun place for TVDX. With just a rabbit-ears, I pulled in Detroit's WKBD-50 in Fort Wayne, more than 110 miles away.

*Good thing I rolled tape on CHR WMEE-97.3 Fort Wayne; Paul Phillips reports they're going AC "Mix" this week.

*WOWO-FM has moved to 102.9 from 103.1, and the signal seems even worse. The tower farm on Fort Wayne's west side obliterates WOWO-FM from the west edge of Allen County in towards downtown.

*Auburn IN's WIFF-102.3 has pulled out of a 3-station country network in northern Indiana, and is all-local "The Music Station FM102," sort of an AC blend. Nothing exciting, but at least it's not satellite. Signal is adequate but hardly earth-shattering into Fort Wayne.

*South of Fort Wayne, WADM-1540 Decatur is on-air again, simulcasting purchaser WNUY-100.1 Bluffton "Y-100." The 100.1 signal is much better in Fort Wayne now that co-channel WLKI Angola IN has moved up to 100.3.

*Fort Wayne 80-90 drop-in WFWI-92.3 "The Fort" is garnering attention with an all-70s format. Interesting for about an hour. A stop at their studios yielded a blank stare from the receptionist: "A what again...a bumper sticker... no, we don't have those..."

And with that it was time to fly back into the land of Daylight Savings time...for an exciting weekend at the National Radio Club convention in Nashua NH. More on that after I've gotten a few hours sleep.

As always, tapes of all this fine radio (and a lot of not-so-fine radio) are available for trade or other consideration...just e-mail me.

3573. WOWO Redux: We Go Into the Public File

Newsgroup: rec.radio.broadcasting
Date: 1994-09-05 06:43:28 UTC
From: fybush@world.std.com
Message-ID: <34eemg$iq5@vixen.cso.uiuc.edu>
Source record: 38128

There are few advantages to having family in Fort Wayne, Indiana. But one of those few is the chance to visit 203 W. Wayne, 4th floor, and examine the WOWO public file (it's just down the hall from the fire escape!).

Here's what a search turned up last week:

First, I noticed on the sign-in sheet for the public file that an aide to Rep. Jill Long (D-IN) visited the public file TWICE on 8/31/94, the day before my visit. Clearly the Congresswoman is taking an interest in our cause. This is good.

The most interesting item in the file is the sale contract from Inner City (ICBC) to Pathfinder. Here are a few of the highlights -- or is that lowlights?:

*The conditions of sale include:

7.3.5. -- the FCC shall have granted applications to be filed by ICBC for construction permits to modify WOWO in a manner to permit nighttime operation of WLIB.

There it is in black and white: the whole purpose of the deal. So in your future letters to the FCC, no need to beat around the bush. The entire sale is aimed at castrating WOWO's signal. If that can't happen (i.e. if the FCC won't approve the signal modifications), the deal's off. Does this serve the public interest, convenience, and necessity, as far as *WOWO's* listeners are concerned?

*Here are some other things that can (but do not have to) kill the deal:

--If approval of the WOWO/WLIB modifications is not granted by 8/1/95, or if the Final Order is not issued by 2/1/96, or if the application(s) is/are designated for hearing, either side can withdraw from the deal.

--If a lawsuit is filed against either party, the deal can be halted.

--Most promising, if the original deal to sell WOWO from Price to ICBC has not been approved within 270 days of filing (that means on or about 12/11/94), or if it's designated for hearing, either ICBC or Price can withdraw.

*ICBC claims it still intends to lease at least 15% of the airtime of WOWO AM/FM after the sale is complete.

*WOWO-FM will not be sold separately, as I and others had predicted. In the public file is an engineering study that concludes that

the signal overlap ofthe 3.16 mV/m contours of WOWO-FM 102.9 and WQHK-FM 105.1 is an area less that 1/2 square km, located southwest of the Fort Wayne airport, in an area containing one house. So Pathfinder will seek a waiver allowing them to keep WOWO-FM, WQHK-FM, along with full-B WMEE 97.3 Fort Wayne (which is moving from CHR to AC "Mix"), and WQHK AM and WOWO AM. Never mind that the _1.0_ mV/m contours of WOWO-FM and WQHK-FM overlap downtown Fort Wayne...

*ICBC puts up the cash for the WOWO modifications no matter who's holding the license at the moment.

*Here's ICBC's statement of intended programming for WOWO: "ICBC regularly will air programming addressing issues of public importance to listeners who will be receiving the broadcasts of WOWO and WOWO-FM." That's it, in full. Stirring.

*I checked out WOWO's listener mail for 1994. There were, hearteningly enough, more than a dozen letters opposing the ICBC sale, many cc's of letters to the Commission. In addition, there were many letters from WOWO listeners to the east, in areas that would lose the signal. The schools in West Unity OH wrote to thank WOWO for announcing their closings, early in the morning, when WOWO is still on night pattern. West Unity won't be getting that service from the new "mini-WOWO" if and when that happens. Same for Ohio Power, which wrote WOWO with thanks for carrying messages to their customers in Paulding, OH during a storm-related outage. Wasn't that what radio was there for? Oh, and as for those WOWO listeners who wrote from Tunkhannock PA, Philadelphia, Charlottesville VA, Stoughton MA, the coast of Florida, Sayre PA, and Cincinnati -- they'd be losing service too.

*Remember how WOWO was loath to do anything about WLIB's apparent illegal nighttime operation last month? WOWO was much more active when 1190 WBDY Bluefield VA (10 kw daytimer) was signing on an hour too early in 1993. After a listener from Ohio wrote in to complain about the interference, WOWO's engineers called WBDY on the carpet, and forced WBDY to write a letter to the FCC admitting their wrongdoing and promising it won't happen again. I have a feeling WOWO would be just as vigilant if any other 1190 were to encroach on their signal -- any 1190 other than WLIB, that is.

*And apparently WLIB's application to move to Yonkers NY, filed in April 1993 (docket BP930406AE) is still pending.

So that's what I found at WOWO. To summarize: this thing is far from a done deal. There are many windows in there for ICBC, Pathfinder, or Price to withdraw from the deal if things get sticky, and as WOWO listeners with an interest in what happens to the station, we can help make things as sticky

as possible.

Once more, folks:

BAL940311EC - Price to ICBC
BAL940722GE - ICBC to Pathfinder

FCC
Mass Media Bureau, AM Branch
1919 M Street NW
Washington DC 20554.

And while you're at it, make sure a copy of your letter goes
to WOWO, Public File, 203 W. Wayne, Fort Wayne IN 46802. And
a cc: to Rep. Jill Long, United States Congress, Washington DC 20515
might not hurt either.

It looks like Cox Broadcasting's new acquisition, KACE, will be in the (co-owned) KFI-AM/KOST-FM studios within the next two weeks.

KACE (103.9) was formerly an Urban Contemporary station that drew in the mid 0's (Yes, zero's- no signal) They still have no power, and are now an Urban Adult Contemporary station, which some people are dubbing, because of their new sound, "The Black KOST"

It will be interesting to see if Cox can do anything with this incredibly weak signal. They spent $11.3 million on it, So let's hope that they can do better than a 0.4....

>made in years past.

If I remember correctly, this is the reason why stations still have to legally acquire rights from an agent for Howard Koch, Sr., before airing the Mercury Theater WAR OF THE WORLDS broadcast; he held onto the original copyright on the script, and incorporated the script into a second copyrighted work (his book THE PANIC BROADCAST). I assume then that the fact that the originating work (the H.G. Wells novella) is itself in public domain has no bearing on the situation...or am I wrong?

>The only performance rights that I know anything specific about are those
>for the CBS news broadcasts. If a report is rebroadcast, even after many
>years, the original reporter or commentator is entitled to additional
>payment.

Is this why the Edward R. Murrow A REPORTER REMEMBERS albums put out by Columbia Masterworks circa '65 stated that broadcasts of those albums were prohibited after a particular date (I think it was circa '69)?

>Carl Amari the brains behind "When Radio Was" has very
>successfully marketed Old Time Radio Programs for broadcast and tapes for
>home use. This young man has "done things right"! He has made
>arrangements not only for broadcast rights to the shows he carries but has
>also made arrangements with the copyright holders to sell tapes to
>listeners. The magic of his success? The copyright holder gets a cut of
>the action (profits). It's funny how money talks.

Do you know if this is the same kind of arrangement that led to Metacom's cassette marketing of Arch Oboler's LIGHTS OUT catalogue?

I'm interested in knowing if there is a comprehensive list, electronic or paper, of radio talk shows out there? A friend of mine is promoting her indie book the old-fashioned way. She has a publicist at the book company but that person appears to be slightly clueless to Modern Media.

I'd be grateful for any leads. Reply to barnhart@mcs.net, thanks.

WAMC, Albany, NY, routinely IDs its whole Northeast Network, including a
couple of auxs. Since I'm no longer in their listening area, I can't
give the details.

This is the way all FM translators ID. The "K" or "W" is assigned as all
other broadcast stations, the three digit number is the Channel number
(88.1 is channel 201, 107.9 is channel 300) and the last two letters have
no significant meaning if I am correct.

I've heard this sort of thing from time to time, mainly in rural areas. It seems to be common to ID them in Morse Code in some places. I guess that's legal. Anyhow, the K and W apparently follow K and W broadcast conventions, the 3-digit number refers to the FM channel (201 to 300), and the last 2 letters appear to be sequentially issued. Likewise, a TV translater would be K30BI or some such, indicating the TV channel number. I'd guess AM translators could be ID'd as K102AA or some such if they wanted to be consistent about it, but I think those stations just get conventional callsigns. I had thought that translators were required to ID only once or twice a day. Maybe I'm wrong on this...

WOKC (formerly licensed to Okeechobee, FL, now licensed to Indiantown, FL) 103.1 is now putting its signal into West Palm Beach but instead of the country format we expected, it's now satellite Z-Rock (hard rock music).

I still won't be surprised if this turns out to be a smokescreen for a country format.

3584. Boston Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1994-09-06 01:06:16 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <34gfa8$1p8@vixen.cso.uiuc.edu>
Source record: 38139

* On Friday,August 26th Fairbanks Communications, owner of country WCLB 105.7FM filed a lawsuit in Federal District Court in Boston against Greater Media Inc., owner of country WBCS 96.9FM.

WCLB management wants to stop WBCS from using its trademark slogan : "Hot New Country". WCLB is also asking for monetary damages.

WBCS has been the distant number two country station in the # 9 market since it went on the air in May,1993.

In the most recent spring Arbitrons WCLB registered a 3.4 share of the the most important 25-54 demo while WBCS only mustered a 1.8.

Earlier this summer Harry Nelson was lured away from his consulting job at WCLB to take over PD duties at WBCS. He escalated the country battle by adjusting WBCS sound from a slower, classic country to a more upbeat, faster sound that's heard on WCLB.

Nelson also made a couple of personnel moves that no doubt upset WCLB management :

Nelson hired WCLB mid-day man Jim Roberts to do PM drive at WBCS....

To give some personality to WBCS in the morning drive, Nelson raided WCLB again : Boston radio vet Tom Doyle who was a sidekick on 'CLB's 'Loren and Wally' morning was paired in the mornings on WBCS with another longtime Boston radio personality, Mike Adams who left his morning show at all-oldies WODS 103.3FM....

It was widely anticipated that Greater Media was going to make major format change at WBCS after a very disapointing spring ratings came out. However, the new strategy turned out to be a big-scale attack on the number one country station.
The court action is WCLB's way of slowing down WBCS' surge to make a bigger name for itself with 'Hot New Country' image...

* WBZ AM 1030 premiered its new weekend afternoon all-sports programming this Labor Day weekend. The format is very similiar to ESPN Radio. (ie 10-minute sports briefs, phone interviews, no listener phone calls).

* On a related note : the new WEEI 850(SportsRadio 850) is no longer airing ESPN Radio on weekend evening/mornings. Those periods will be filled by college football/basketball games or local talk shows hosted by Steve Buckley. It also seems that the Red Sox games will move from WRKO to WEEI in 1995(provided the 1994 baseball season

is over). The Pawtucket Red Sox games that aired on WRKO as a replacement for the BoSox have moved to WEEI...

* The new business format premieres on WBNW 590(Business News Radio 59) on Monday, Sept. 12th...Most of the programming will come from Bloomberg Business Radio based in NYC(WBBR AM 1130). Currently. WBNW is simulcasting most of WEEI 850's sports programming.

* There's some talk that CBS-Group W TV merger might also have an impact on the Boston radio scene...Group W's WBZ 1030 AM and CBS' WODS 103.3FM could be a part of a larger deal that could create another Boston duopoly...

-Mark

Greetings to friends and listeners of HCJB, The Voice of the Andes. As of 11 a. m. Eastern Standard Time, or 17:00 UTC today the English Language Service of HCJB is on the air with new frequencies and new programming. We encourage you to tune in, listen, and send us your comments. A complete printed or FTP program schedule is available, just let us know your address and we will be happy to send one to you. Here is our new broadcast schedule:

AMERICAS:
00:30-4:30 UTC (8:30-12:30 P.M. Eastern Daylight Time) 9745 & 12005 kHz
04:30-5:00 UTC (12:30-1 A. M. Eastern Daylight Time) 12005 kHz
5:00-7:00 UTC (1:00-3:00 A. M. Eastern Daylight Time) 11925 kHz
11:00-14:30 UTC (7:30-10:30 A. M. Eastern Daylight Time) 15115, 17890 kHz
14:30-16:00 UTC (10:30-noon Eastern Daylight Time) 17890 kHz

ANDEAN REGIONAL RELEASE:
14:30-21:00 UTC (10:30 A. M. -5:00 P.M. Eastern Daylight Time) 6080 kHz

EUROPE:
7:00-8:30 UTC (3:00-4:30 A. M. Eastern Daylight Time) 9600, 11835 kHz
17:00-20:00 UTC (1-4 P.M. Eastern Daylight Time) 15350 kHz

SOUTH PACIFIC:
7:00-11:30 UTC (3:00-7:30 a. m. Eastern Daylight Time) 11925, 9745 kHz

Also, we are on 21455 SSB from 00:30 UTC-21:00 UTC (8:30 P.M. until 5 p. m.)
(however, as I write this, that transmitter is off of the air)

Because of the present windy conditions here, some of our antennas may be off the air at any given time. Please be patient with these interruptions to our broadcast schedule.
We invite you to tune us in and listen!

From: "Niel J. Wolfish" <lobo@io.org>
Message-ID: <34gfaq$1q6@vixen.cso.uiuc.edu>
Source record: 38148

Tuned in to Fort Erie's 101.1 "The Planet" on two different occasions this Labour Day weekend. Heard R.E.M's "Man on The Moon" both times! It should be interesting to see how they fare. I seem to recall that Niagara Falls's 98.5 (WZIR in those days) and Wethersfield-Buffalo's 107.7 (WUWU in those days) had brief flirtations with a "modern rock/new wave/whatever you want to call it" format in the early 1980s. Carl can probably set me straight on this.

Sounds like they will concentrate on the "hits" during drive times and play the more "obscure" stuff at other times. CFNY (102.1-Toronto) seems to do the same thing. Morning drive usually has the safe bets, like New Order, Depeche Mode, Midnight Oil, The Tragically Hip and 54-40. You can almost always count on them coming out of their half hourly news with something "hot" such as "Beer Can" by Beck, "Vaseline" by Stone Temple Pilots or "Black Hole Sun" by Soundgarden.

An article in today's TORONTO STAR says that CHUM has fired 11 people in their news department and that their FM (CHUM-fm) has done away with the mid-day talk show "In Toronto".

Another poster (Wayne Stacey, I believe) had commented on the "short spacing" of Canadian stations on 540 and 800. For years Sault Ste. Marie's CKCY (920 at the time) was listed as being slated to move to 540 to join CBEF, CJSB and CBK. That never happened, and now CKCY is defunct.

Finally.... had the opportunity to be close enough to Detroit to catch the Lions game and post-game analysis yesterday. Interesting to compare 950-WWJ (with the game), 760-WJR and 1130 WDFN. After the game, "The Fan" encouraged people who had been at the game to phone in with their comments. One caller reported that he was watching the Dolphins-Patriots game (I assume this was the NBC 4 p.m. telecast in Detroit?) and that he just saw Dan Marino carried off the field with an injury. Funny, but when I check this morning's paper, Marino had thrown for a bunch of TDs and seemed very healthy. I wonder if "The Fan" issued a retraction later?

3595. Rebuttles/replies to recent articles about P.R.N.

Newsgroup: rec.radio.broadcasting
Date: 1994-09-06 01:06:40 UTC
From: People's Radio Network <76114.3521@compuserve.com>
Message-ID: <34gfb0$1qd@vixen.cso.uiuc.edu>
Source record: 38050

[Moderator's Note: I am posting this in the interests of fairness and balance, despite the fact that it has little to do with radio, per-se but is a reply to several statements made on this group regarding Chuck harder's radio program. Please note that despite the opening remarks, I never saw anything from PRN before this, there was no censorship. Bill]

--------- Begin Article ---------

I have on two occasions submitted the following rebuttal articles from myself and Chuck Harder to attacks on him and his program.

I am resubmitting them again in the hope that the first two were simply mislaid and not intentionally censored by the moderator.

Followups are welcome to wyatt.cox@delta.com.

Date: 08-24-94 (10:45) Number: 3203 of 3313 (Refer# 3163)
To: ALL
From: WYATT COX
Subj: Chuck Harder
Read: (N/A) Status: PUBLIC MESSAGE
Conf: rec.rad.broad (5407) Read Type: MAIL FROM YOU (+)

Regarding the questions raised about Mr. Harder:

1) The question of "homophobia" or "xenophobia" is not the true question here. The question as raised by Mr. Harder is a valid one. Why does the government want to remove weapons on the pretext that someone "might" use them, and yet allow individuals with a contageous, deadly, incurable disease to roam the streets with no supervision? The reason that Mr. Harder perhaps attacked the Homosexual community is that the radical homosexual groups have been in the forefront of demanding that there be no restrictions at all on individuals who are HIV+.

2) I cannot speak to the issues of the operations of the Sun Radio Network, having worked there only a short time two years ago.

3) I can tell you that the For The People telephone bookstore has routinely exchanged or made good on those shortwave radios that Mr Aachen screamed about up to 18 months after they were purchased. The bookstore routinely refunds or exchanges products that are defective promptly.

4) I belive Mr Aachen has a bad taste in his mouth for Mr. Harder because of the problems with another station. As I recall, he was associated with the much troubled WXOL in Oshkosh. The owner of the station begged us for months to allow them to broadcast For The People. However, because the station's 2 mv/m signal overlapped that of an existing affiliate in Ripon, the station could not air FTP live. Finally, the station was permitted to broadcast the network programming from 7pm to 8am ONLY, which included the overnight rebroadcast. If you've read Radio Workd recently, you know the rest of the story. During the daytime WXOL was running an oldies formet. When the owner decided to give it up, he turned on the satellite receiver and walked away, thus causing problems with our Ripon affiliate. The stir from that got us more ink in the trades than anything in a long time.

Finally, the People's Radio Network today consists of 280 radio stations. Of those stations, 250 carry Mr. Harder's program. The programming works. But it only works with localization. Having run three satellite driven Talk radio stations I can tell you that without local input (News/Weather/Traffic) it, like any satellite format, will not work. In many markets where localization is done, the AQH's are good, the Cumes are fair, and the TSL is huge!

...Hey Ultimajock@aol.com! What was this you said...

Ul> Jay Marvin, in AIRWAVES #762, identified bogus light bulb sales over
Ul> the Sun Radio Network as the point of Harder's investigation by a Tampa
Ul> TV station. Interestingly, a couple of weeks ago, Harder himself
Ul> recounted on-air a story in which WFLA-TV Channel 8 (look familiar,
Ul> Jay?) investigated his mail-order sale of some books that he was
Ul> publishing in direct relation to received orders. Harder claims to have
Ul> grabbed some of the just-off-the-presses books and taken them to the
Ul> Channel 8 reporter a few days after the first report aired, the
Ul> reporter supposedly refusing to run a follow-up piece clearing Harder
Ul> of the allegations.

Harder's response:

I have not seen the Jay Marvin article. If you could Email that to Wyatt at wyatt.cox@delta.com, please do so.

To fill in the details of the above story which is basically true,
WFLA-TV alleged that I was selling books that "did not exist".
The same night that report aired, I took copies to the reporter
and station executives and demanded a retraction. The response
was "Go get a lawyer, ha ha."

The real reason the report aired on WFLA-TV was partially because
I was on a radio station competing with their co-owned WFLA radio,
and through an investigation I initiated with the State Attorney,
closed down one of WFLA's biggest advertisers, John Naughton Ford,
because of unscrupulous business practices. No good deed goes
unpunished.

Back for just a moment to the AIDS thing. My niece is out of
school right now awaiting the results of a TB test. If the TB
test comes back positive, she will be unable to return to school.
Why is it that a contagious disease like TB is treated differently
that a very deadly contagious disease like HIV and AIDS?

Bill:

The following is a rebuttal to public comments made regarding
Chuck Harder which have been sent to Jay via E-mail. Chuck also
requests inclusion in rec.radio.broadcasting.

Wyatt Cox

Jay:

The following message was dictated to me by Chuck Harder and
requested to be forwarded to you and also to Bill Pfeiffer for
inclusion in rec.radio.broadcasting.

Dear Jay:

All of the people got their light bulbs and everything else they
ordered when I ran Sun. Channel 8 did not tell the truth, but at
the time, I was not in the financial position to sue them. Times
have changed for the better, and had the statute of limitations
not expired, I would consider suing them to day for what they did
then. You and others may or may not like me, and that's fine, but
be careful with what you say are facts, especially if your
statements are not correct. You have publicly referred to me as

"a joke". You are entitled to your opinion of me, just as I have an opinion of you for making such a non-sensical comment. But with that state of mind, your uttering untrue statements and calling them factual could expose you and your employer.

At this time, our radio broadcast is on 250+ radio stations domestically, two world wide shortwave stations, and our daily 30 minute television program is on the Keystone satellite network, and thus numerous cable systems, and 18 independent TV stations after only a couple of weeks. Hardly a joke.

I wish you continued success in Chicago.

All The Best,

Chuck Harder

E-mail followups to me (wyatt.cox@delta.com) will be forwarded as necessary.

Wyatt Cox

An Atlanta AOR radio station ran a contest promo Monday (using "I Love Lucy" character-type voices) suggesting that listeners build Cuban-type rafts and listen to the morning team later this week for more information on how to win a trip to a Florida (panhandle) beach resort.

Both the subject and tone of the promo are somewhat disquieting, and I wonder whether this is an isolated phenomenon or whether stations in other markets are capitalizing on current events with satirical promos/contests/whatever.

This goes beyond idle curiosity; I'm a journalist and my news organization may be interested in doing something on this. If you'll e-mail replies, I'll summarize. Many thanks.

Cheers,
Mark

Its not $1100. Its a little less than $400 w/S&H, if memory serves. That stills seems like alot of money for a stand-alone table radio.

Boy, did they go up in price! I thought the "Accoustic Wave Machine"
from about the mid '80s was expensive, selling for $700.00! It was a
great sounding unit, but not that great! A stand alone table radio for
$1,100.00? Call the men in the white coats immediately!

:(OK, I can -- anybody got a 1938 Sparton Blue Mirror?)

Now that's a different story entirely! Bet AM sounded better on one of
those then on today's "wonder boxes"! :-)

Why drive someone crazy when it's such a short walk?

3601. British Radio Comedians CD

There's a fascinating compilation CD I just got called GREAT RADIO STARS, VOLUME TWO, put out by the Pearl label over in England and available on import. The performers on it are all 1930s British radio comedians. None of them are Fred Allen or Jack Benny-level brilliance, but there's one particularly hilarious track from Oliver Wakefield called "Much Ado About Little or Nothing", which is almost identical in form to Lily Tomlin's old partial-sentence gags; another bit is a spoof of 1930s BBC Radio by Cecil Johnson called "The Annual Dinner of the Slate Club Secretaries." It's worth tracking down.

Wyatt Cox and Chuck Harder of "People's Radio Network"
<76114.3521@compuserve.com> wrote:

(Mr. Cox)
>Regarding the questions raised about Mr. Harder:
>The question of "homophobia" or "xenophobia" is not the true
>question here.

Then can you please explain why Mr. Harder used the public airwaves to suggest the further harrassment of Camp Sister Spirit, the predominantly-lesbian feminist camp in Mississippi that had been the target of violent attacks last year, by checking into potential public works code violations? Why did Mr. Harder promote your sales of anti-Clinton videotapes by pointing out that the "liberal news media" that "loves...gay rights" was "livid" about it, as if that was a prime selling point? Why are most references to Barney Frank on Mr. Harder's program delivered with a stereotypical lisp and voice inflection? Why, when Surgeon General Elders called recently for the lifting of anti-non-heterosexual bans in the Boy Scouts and Girl Scouts, did Mr. Harder refer repeatedly to gay men and lesbians as "these sexual predators", even though the overwhelming evidence indicates that, both in numbers and proportion to sexual orientation, it is HETEROSEXUALS that are more frequently pedophiles?

(Mr. Cox)
>The question as raised by Mr. Harder is a valid
>one. Why does the government want to remove weapons on the
>pretext that someone "might" use them, and yet allow individuals
>with a contageous, deadly, incurable disease to roam the streets
>with no supervision?
(Mr. Harder)
>Back for just a moment to the AIDS thing. My niece is out of
>school right now awaiting the results of a TB test. If the TB
>test comes back positive, she will be unable to return to school.
>Why is it that a contagious disease like TB is treated differently

>that a very deadly contagious disease like HIV and AIDS?

HIV is transmitted through contact with [various internal body fluids] and internal organs that have been contaminated. HIV CANNOT be transmitted from sharing drinking containers, being bitten by mosquitoes, sitting on public (or private) toilet seats, kissing, swimming in pools, socialising with friends, eating food prepared by HIV-infected food workers, shaking hands, or hugging. NO KNOWN CASES OF HIV TRANSMISSION THROUGH THE LATTER MEANS HAVE EVER EXISTED. Look up what any dictionary defines the word "contageous" as and figure out for yourselves how the above information disqualifies HIV from being a "contageous" disease. Not that I expect you'll change your on-air policy to accommodate it, but it's a thought.

(Mr. Cox)
>The reason that Mr. Harder perhaps attacked
>the Homosexual community is that the radical homosexual groups
>have been in the forefront of demanding that there be no
>restrictions at all on individuals who are HIV+.

PLEASE cite who and how this is being done, IN DETAIL. If you can.

(Mr. Cox)
>I can tell you that the For The People telephone bookstore has
>routinely exchanged or made good on those shortwave radios that Mr
>Aachen screamed about up to 18 months after they were purchased.

I hardly "screamed" about the radios; I simply reported what PASSPORT TO WORLD BAND RADIO stated in their consumer review of the things several years ago. Complain about these comments to Larry Magne at PASSPORT, not me.

(Mr. Cox)
>I belive Mr Aachen has a bad taste in his mouth for Mr. Harder
>because of the problems with another station.

My distaste for Harder comes from hearing the often ludicrous statements he makes on the air. The situation at WXOL was entirely due to the actions of station owner/GM Steve Rose and business manager Mike Utech. I was simply an air personality who acted, upon Rose's request, as a liason with PRN to arrange approval for airing of your network's material. In fact, it was as a direct result of my firing at WXOL that said station began running the unauthorised PRN material indicated in the Radio World article you refer to; it was my program that covered the hole in the schedule created by the inability to run Harder live. To deflect my specific criticisms of Harder by trying to tie me, FALSELY, into the violation of WXOL's contract with PRN is profoundly dishonest.

(Mr. Cox)
>the People's Radio Network today consists of 280 radio
>stations. Of those stations, 250 carry Mr. Harder's program. The
>programming works. But it only works with localization.

No disagreement there, at least on face value. But REAL "localization" is the issue. Simply plugging in 2-to-7-minute news, sports and weather reports

isn't going to do the trick, it's just the cheap way to go. I cannot think of any market wherein a talk station with a primarily locally-originated schedule is consistently beaten by one with a primarily sattelite-fed schedule. The majority of truly successful syndicated talk programs (at this point, that means Leykis, Limbaugh, Liddy, Gene Burns and Jim Hightower) are usually carried on stations that make commitments to substantial local origination in their overall schedule. Covering a couple of commercial avails on PRN's 24-hour schedule doesn't cut it.

(Mr. Cox)
>Boy, David, for someone who hates our guts, you sure do purport to
>knowing everything about us.

For YOUR information, I DO NOT hate PRN, nor have I ever made such a statement. However, as someone who lobbied extensively to have WXOL carry PRN in the first place (primarily on the basis of Jack Ellery's program), I am profoundly disappointed with the ignorant and arrogant attitudes displayed by Harder and Jerry Hughes themselves. I find it odd that specific criticism of Harder turns into a full-fledged attack on the whole network in your eyes, unless Harder considers himself to be the whole network.

(Mr. Cox)
>BTW, this tagline's specifically for you....
>... Hillary happens...

Your tagline, like much of the rest of your postings, doesn't apply here. I voted for Jack Herer, not Clinton.

(Mr. Harder, to Jay Marvin)
>your uttering untrue statements and
>calling them factual could expose you and your employer.

Jay Marvin is one individual who needs no defense from third parties of his own opinion. But could you please explain how any comments he makes in AIRWAVES and r.r.b. in criticism of you "could expose" WLS or CapCities/ABC?

I asked this question to the group just after rec.radio.broadcasting started up, and unfortunately I didn't find out any info. Now that there are MILLIONS more (there are millions, aren't there, Bill?) people subscribing to this newsgroup I thought I'd have another shot.
Back in the thirties or forties a program was produced by the MacGregor Company called "Jonathon Thomas and his Christmas on the Moon". It was a 26 episode serial of a young boy's quest to get Santa Claus back from the evil Squeebobbluns in time for Christmas. Hardly "A Christmas Story" but nonetheless one which was unbelievably popular here in Newfoundland, and still is remembered today. We have all the episodes at CBN (even the Library of Congress doesn't have them all) and we're trying to find out something about this program. Who wrote, who starred, who produced, directed, when it was done....anything and everything.
Chuck Shaeden never heard of it, I spoke with Chuck a few years ago. The Museum of Broadcasting has nothing on it. The Library of Congress only has a couple of episodes and I spoke to the person in charge of their broadcast holdings, he tried to help out, but nothing there either. And last but not least, the lady who now owns the MacGregor company has never heard it either. She saw the name on paper, but never heard any episodes. Can anyone, please, help me out with this? It is driving me NUTS, and we've been trying to catalog this in our Archives for years.

Please e-mail to rockwood@kean.ucs.mun.ca

>"update themes" can sue him for applying their copyrighted material for a
>purpose they oppose?

Nope...I don't have the case cite handy, but the Supreme Court held last
term that parody is a fair use of copyrighted works. The case involved 2
Live Crew's parody of Roy Orbison's "Oh Pretty Woman."

>I've wondered for years why Chrissie Hynde lets Limbaugh
>use her song "My City was Gone" as his program theme while I know damn well
>the songs lyrics criticise the very social policies Limbaugh espouses...

Probably because the performance rights for the recording belong to the
record company, not Chrissie, and are licensed through BMI or ASCAP to
Limbaugh (or whatever entity syndicates the show). No doubt it doesn't
thrill her (if she even knows about it)...Lennon's estate wasn't thrilled
about NIke using "Revolution" in a TV ad for shoes a few years ago, either.
Unfortunately, artists and their heirs seldom retain complete control over
their work (at least in the music world).

Date: 1994-09-07 04:17:22 UTC
From: Dan Schaffer <dschaffe@lynx.dac.neu.edu>
Message-ID: <34jesi$13v@vixen.cso.uiuc.edu>
Source record: 38074

I've seen references in Billboard to a satelite format that programs
R&B oldies. Does anyone know if there are any New England affiliates (or
stations with a similar format?
Thanks in advance,
Dan Schaffer

pryack@mtholyoke.edu (Paul Ryack) writes:

>WAMC, Albany, NY, routinely IDs its whole Northeast Network, including a
>couple of auxs. Since I'm no longer in their listening area, I can't
>give the details.

(ahem)

"This is Northeast Public Radio...WAMC 90.3 in Albany...WAMK 90.9 in
Kingston..WOSR 91.7 in Middletown...WCAN 93.3 in Canajoharie...WANC 103.9
in Ticonderoga New York...WAMQ 105.1 Great Barrington, transmitting from the
Butternut Ski Area in South Egremont Massachusetts...and translator
stations W205AJ at 88.9 in Oneonta...and W226AC at 93.1 FM in Rensselaer-
Troy."

So I drive through the area a few times a year...;-)

By the way, W226AC is only a few miles outside of Albany, but it fills
an important gap in the coverage of the main 90.3 WAMC signal, which
is actually broadcast from Mount Greylock, some 50 miles east of Albany
in Adams, Mass. Troy and Rensselaer are down in the Hudson River valley
and are shadowed from the 90.3 signal. WANC and WAMQ are both former
commercial stations which WAMC purchased a few years back to boost coverage
to the north and southeast.

-=Scott Fybush - fybush@world.std.com=-
"This is Boston's NPR News Station, 90.9 WBUR Boston, also transmitting
on 91-5 WSDH Sandwich, 90.7 WKKL West Barnstable, and 90.3 WCCT Harwich,
on Cape Cod."

>Here in the Fayetteville/Springdale MSA, we have two stations who
>regularly ID their auxilliary transmitters. Is this common elsewhere?
>KUAF - 91.3 --> K205AA - 88.9

The ID containing the three digits is really the identification for a translator station (repeater) of the primary radio station. These are translators to fill in weak signal areas, and not backup or auxillary transmitters.

The first letter tells you if the translator is east or west of the Mississippi. The three digit number identifies the FM channel number. The FCC knows FM's by channel number instead of the specific frequency. Finally, the last two letters identify the specific translator station on that channel.

Until recently when the FCC decided to allow a secondary identification method, Low Power TV stations were similarly identified.

3622. Reporters needed

I think a $50 SuperRadio III will beat the great majority of old
radios. I remember a late 40's biamped Zenith console with two
12 inch woofers, midrange and tweeter that would beat the
SuperRadio on bass, but not the highs.

A Denon TU-680NAB with a decent amp and speakers might beat even
the legendary Scott radios on most stations, for far less money
(in real terms).

>of the program details was correct.
>
>I have talked to a number of engineers and for an FM station it appears to be
>unique. Has anyone heard of FM carrying so far?

No! I've been an FM DXer for many years and the most distant confirmed
reception I've had has been just above 4000 km. I would think others
have logged even more distant stations. I won't say the reception in
question is impossible, however, it does seem unlikely. Did the reception
report include a tape recording? If not, it's harder to believe that the
reception actually took place. Even if the description of program details
was correct there are several ways of obtaining such information...

:"racist". . ..)

Hmm... Diversity? That's what Larry King cried during the time that Clarence Thomas was nominated for the Supreme Court. He had no complaints, however when the court was dominated by liberals during the 60' and 70's. In fact, he had praise for that court.

:Let Rush run his course. If enoguh people are *that* tired of him,
:someone else will take his place. (It'll eventually happen, :anyway.
Just look at Larry King!)

Larry King's downfall was partly because people tired of him, and mostly because he couldn't compete when he finally had to deal with something he never had to deal with at night: Ratings!

3633. KSFO -- My Review of the first week

Newsgroup: rec.radio.broadcasting
Date: 1994-09-08 02:30:12 UTC
From: dk@crl.com
Message-ID: <34lsvk$11m@vixen.cso.uiuc.edu>
Source record: 38088

[Article crossposted from ba.broadcast]
[Author was David A. Kaye]
[Posted on 7 Sep 1994 00:53:39 -0700]

My KSFO opinions:

Jeff Blazey mornings I liked Gene Nelson better, sorry; he's
almost got it, but not quite.

Sports Babe mornings I *like* her even tho I don't like sports!
A GREAT listen.

Shann Nix afternoons Will cross someone with her ego and get fired
It'll be her loss, not ours.

Tom Leykis afternoons Wish he'd tell more stories, less "anger" --
The anger sounds phony, but when he tells
stories I hang on every word

psych doc evenings She's so ho-hum I can't remember her name;
They dumped a winner like Joy Browne for
this one? Bring back Dr. Joy!!

Emil Guillermo nights I wish he had *it*, but he doesn't -- it's
sad to hear him twist in the wind waiting
for phone calls, considering he's a nice guy
He may not last.

Barry Weintraub weekend nites YES YES YES!!! He will be a star. He's
witty, intelligent, a fun listen, and he
has great schtick with his guest calls;
he enjoys being there and comes across as
a real person.

Haven't heard sex talk or Leo Laporte yet, but Leo always was fine at
KNBR, and I really don't care to hear any more sex talk (unless they've
invented some new kind of sex I haven't heard about yet).

If *I* were programming KSFO: I'd put Guillermo on afternoons in place
of Shann Nix and ask him to ditch the dog-eating stories, appeal more to
the kind of audience Eason is losing. I'd put Weintraub on weekday
nights. I'd put myself on weekend nights. :)

I'd bring back Joy Browne and replace the Shann Nix reruns at odd hours
with "When Radio Was" -- when a station in Portland played these programs
fulltime they had a significant blip in the 18-34 male demographic, which
I assume is also the KSFO slant.

John, where do you live? WBBM-AM, 780 kHz in Chicago, broadcasts oldtime
radio programs every night from midnight to one (central time). They
claim they can be heard in something like 38 states, and I've picked them
up from Nashville, Shawnee (OK), and Washington DC. The program carries
several commercials every night that tell you where to write to get
catalogs of OTR cassettes.

I believe the only Bay Area station carrying classic radio shows is KSRO
1350 out of Santa Rosa, Saturday nights from 7pm to Midnight. KSFO 560 used
to on Sunday nights, but not since Cap Cities took over.

You can also pick up KNX 1070 Los Angeles at night; they have their
"Drama Hour" seven nights a week from 9 pm to 10 pm, repeated at 2 am.

To answer some recent questions:

The CBS Mystery Theater was on the air for over a decade. A year or two ago the producer tried to re-syndicate the series--I heard some of them on WHAM while we were in the US last year. But, I understand that there weren't enough stations willing to take it. A shame. Many of the programs are available to borrow from North American Radio Archives, if you are a member of the club.

: Tuned in to Fort Erie's 101.1 "The Planet" on two different occasions

Anybody know who's marketing "The Planet?" In Detroit, WHYT (96.3 FM), a station that had been almost Urban Contemp./Pop made the change to what is calls "Planet 96.3" or "Welcome to the Planet."

>107.7 (WUWU in those days) had brief flirtations with a "modern rock/new
>wave/whatever you want to call it" format in the early 1980s. Carl can
>probably set me straight on this.

Yep. Both of the stations did modern rock in that time(but I was just
entering my teens,and then didn't do much listening,so what do I know?)
BTW,Robbie Goo(of the local rock group Goo Goo Dolls)used to be a DJ at
WUWU(he now does Modern Rock on the Fox(WUFX)Sunday nights),which was also
owned by my former dentist. 107.7,of course,then went to AOR as WBYR(The Bear),
the satellite-delivered Wave format as WBMW,easy listening as WEZQ,and now
satellite-delivered(via Unistar)hot country as WNUC.

>Sounds like they will concentrate on the "hits" during drive times and
>play the more "obscure" stuff at other times. CFNY (102.1-Toronto) seems
>to do the same thing.

Liz Janik,chief consultant to The Planet,admitted as much. (Recall,she
worked for 'FNY some time ago.)

>An article in today's TORONTO STAR says that CHUM has fired 11 people in
>their news department and that their FM (CHUM-fm) has done away with
>the mid-day talk show "In Toronto".

From what I know,CHFI still does one(yes,Niel,I know-what's the point?)

Hi folks,

Anyone know where I could get tapes of this great old BBC comedy
show from the 60's? (Yes, the title is: I'm Sorry I'll read that
again.) I remember that during the 70's the Beeb had
some sort of distribution arrangement such that they were made
available to some US stations. I remember listening to them on
WCYC 88.7 FM in Chicago for a while. Those shows were as funny
as Monty Python at least (and involved some of the same cast too).

Thanks,
-A.J

Since nobody has come forward with more than a couple of these
answers, here is the list as I know it...

F/S FULL SERVICE. HEAVY NEWS COMMITMENT, USUALLY SPORTS
COMMITMENT. WEATHER, AND COMMUNITY SERVICE. WGN, WCCO, KOA, KFI,
KMOX, ARE SOME EXAMPLES, THERE ARE COUNTLESS OTHERS. A
VANISHING BREED.
MOR MIDDLE OF <THE> ROAD. CAN BE LIGHT-AC, STANDARDS FROM THE
FORTIES AND FIFTIES, OR A COMBINATION OF STYLES. NOT USED MUCH
ANYMORE SINCE IT NO LONGER IS DESCRIPTIVE.
CR CLASSIC ROCK (PRIMARILY 'FM' STYLE HITS FROM THE LATE 60'S - 80'S)
AOR ALBUM ORIENTED ROCK (SELF EXPLANITORY)
OL OLDIES (AM RADIO HITS FROM THE 50'S - 70'S)
ARROW ALL SEVENTIES HITS. ACTUALLY A TRADEMARK FOR A CERTAIN
'BRAND' OF SEVENTIES HITS, BUT HAS BECOME NEARLY A GENERIC DESCRIPTOR.
URBAN BASICALLY HAS COME TO MEAN 'BLACK' POPULAR MUSIC. INCLUDES A LOT OF
DANCE, SOUL, RAP AND LIGHT JAZZ.
CHR CONTEMPORARY HIT RADIO (TOP-40, CAN SKEW URBAN IN SOME MARKETS)
AC ADULT CONTEMPORARY (HITS FROM THE 80'S THROUGH PRESENT, NO
HEAVY ROCK OR RAP. WHITNEY HOUSTON, MICHAEL BOLTON ETC)
[NOTE THAT AC IS PROBABLY THE MOST BROADLY DEFINED FORMAT
CODE. IT HAS BEEN BROKEN DOWN INTO 'HOT-AC' WHICH IS JUST SHORT OF
CHR, AND LIGHT AC, WHICH IS JUST BEYOND EZ. ALSO IN THE AC
FAMILY ARE STATIONS CALLED 'MIX' 'VARIETY' ETC.]
NAC NEW ADULT <NEW AGE> CONTEMPORARY. AGAIN, A BROAD CATAGORY,
USUALY NOTED FOR 'SMOOTH JAZZ' OR 'NEW AGE' POSITIONERS. CAN LEAN
HEAVILY URBAN IN SOME MARKETS. KENNY G, SHADOWFAX, RIPPINGTONS...
AAA ADULT ALBUM ALTERNATIVE: THE NEW BREED OF COMMERCIAL
ALTERNATIVE ROCK. MTV FOR THE RADIO. NO CLASSIC ROCK.
PT PRE-TEEN. KIDS MUSIC, DISNEY ET-AL RADIO AAHS AND KIDSTAR
BEING THE MAJOR PLAYERS IN THIS FORMAT.
CW COUNTRY & WESTERN (SELF EXPLANITORY)
NX NEWS
TX TALK
NX/TX NEWS/TALK
SX SPORTS
ET ETHNIC
VA VARIETY (OFTEN MMEANS BROKERED PROGRAMMING)
SS SPANISH
FA FINE ARTS (CLASSICAL MUSIC, OPERA, DRAMA, ETC)
RL Religous (preachers, gospel music etc)
RC Religous Contemporay (more contemporary version of above)
EZ EASY LISTENING (COULD BE ANYTHING FROM LIGHT ROCK TO 'ELEVATOR MUSIC')

There are countless hybrids and variations on these formats.

Bill

It seems that there is a trend in Ottawa of stations moving from AM to FM. Unless I am totally deluded, CBO used to be on 920 KHz but was moved to FM for some reason I am unaware of. It doesn't make much of a difference in town, but the old CBO was easy to receive in Mt. Tremblant Provincial Park where the mountains interfered with the reception of CBM.

Is there some consistent reason for these changes or is it merely a coincidence?

Rene Kahle (ug930066@alpha11.scs.carleton.ca) wrote:

As little as I care for most of WEEI's sports programming, the prospect of not hearing Rush Limbaugh must be music to many people's ears.

With respect to the goings-on at CBM, we can always hope that the CBC goes back to 24-hour operations. Even if they replayed highlights from Morningside and Gabareu, those away from the station who can't receive the CBC signals during the day could hear the programs at night.

CUBA: Government Denounces Increase in Anti-Castro Broadcast

DATE: 08-31-94 (20:46)

HAVANA, Aug 31 (IPS) - The Cuban government denounced on Wednesday an increase in anti-Castro radio and television broadcasts from the United States "as part of an escalation in its aggressive policies."

Stations such as Radio and Television Marti, financed by Washington, broadcast more than 1,000 hours of anti-Castro programming a week from the United States, using 17 frequencies.

Television Marti, which cannot be seen in Cuba because it is easily jammed by the government, "has increased its broadcasting schedule," while Radio Marti "has attempted to expand by using 26 short-wave and two medium-wave frequencies," the comunique stated.

Private Florida stations which are received in Cuba "have adapted their programming," increasing their criticism of the Caribbean island nation's government, the statement added.

Government authorities reiterated that they will "make every effort to defend Cuba's sovereignty over the national broadcasting spectrum and adequately respond to these new expressions of U.S. aggressive policies."

In an article about a SF radio station's new talk format, David Kaye noted that Emil Guillermo was covering evenings. If my memory is for once correct, he sparked a heated debate at NPR a few years back when he was suddenly made co-anchor of Weekend All Things Considered in what many thought was a job he earned merely for being Hispanic. After he failed at that I heard him turn up in '92 on a Pacifica-wannabe show that covered the Republican convention. I heard it on Maine Public Radio, and they seemed to think it was a humor show, though in reality it was just some left-wing professor trying to pedal his book and not lose his shirt paying for satelite time. (An 800 number to pledge was the main focus of the program.) Come to think about it, I can see why MPR found it so funny. Anyways, does anyone know what he has been doing since? What's his new show like? Thanks.

>
>On 8/29, I tuned into WJMP 1520 (Kent-Akron) and heard a tape loop
>announcement stating that "all sports talk programming" on the station
>"has been halted until the baseball strike is settled". Listeners were
>urged to call WJMP's sister station, WNIR 100.1, to talk "about the strike
>or anything else" of interest. The announcement made it sound like there
>was nothing in sports worth talking about, which probably comes as a
>surprise to nearby sports-talk WGAR 1220, which has continued on,
>oblivious to WJMP's major 'statement'.

Could well be an indication that possibly there's just TOO MUCH talk
radio?!?! For the Akron area, WNIR pretty much is *the* talk station as I
remember, and they do a fine job, but it seems a little redundant to have
both sister stations doing talk format, and not even simulcast!

I preferred Kent 1520 when it was an oldies station, that lent itself
better to the local AM "feel". Trying to remember what the call was, I
recall their contest to vote on the new call letters...

BTW, isn't 1220 now WKNR?

Larry Ellis inquired about the radio program that started "It..is..later..than..you..think." The show was the very popular and well done "Lights Out." It was one of Arch Oboler's best shows that appeared at various times and in various formats. It first appeared in 1934 and disappeared from radio in 1947. It ran on television from 1949 to 1952.

The television series was surprisingly well done, but television cannot compete with the horror that the imagination can create with the help of radio.

:Could you please post the specifics of this suit, then?

Unfortunatley, I am working from memory, and I am NOT talking about the "suit" that seems to be taking shape. A number of Rush Limbaugh affiliates were running programs that immediatly followed his program running short recorded clips and allowing listeners a chance to comment. In defense of Limbaugh, his concern that his efforts were being used without compensation has some merit. This lawsuit about his name is asinine and a publicity stunt.

3663. Imus Vs. Stern ratings/affiliates info?

Newsgroup: rec.radio.broadcasting
Date: 1994-09-09 06:33:59 UTC
From: UASR74A@prodigy.com
Message-ID: <34ovkn$kef@vixen.cso.uiuc.edu>
Source record: 38018

There has been an ongoing debate involving Imus Vs. Stern on the Prodigy Radio BB for quite some time. Although in markets where they both share the same time slot Stern wins in the ratings, I believe that Imus is in many more markets than Stern. I am also led to believe that even though Stern's ratings exceed Imus', Imus earns more money for Infinity than does Stern. I believe that Imus' demographics represent a more affluent and mature market than does Stern. In summary, my understanding is that given the choice, Infinity would choose Imus over Stern. If someone can either confirm or deny (factually) what I have stated, please do so.

Thanks,

Jack (Long Time Imus Fan)

>Its not $1100. Its a little less than $400 w/S&H, if memory serves. That >stills seems like alot of money for a stand-alone table radio.

Actually it's both. The full-blown Wave radio is about $1100 and has a tuner and either a CD or cassette player (but not both). The junior-size version is radio only for just under $400. Both sound very good for their size, in my opinion, but not for their price.

[Moderator's Note: From $400 - $1100 just for a cassette or CD? Those must be SOME cassette/CD decks to be worth $700.00 :-). Bill]

The all sports station in the above city is playing Take Me Out TOut To The Ball Game by Bruce Springstone, yes that's right stone not the steen fellow, until the strike is called off. 24 hours a day, that's all you here, except for some add telling you that if you wish this to stop to call the Baseball Commission and tell them to get the strike over with. They are not taking any feds from the sports network they belong to. Sorry about the spelling of the city. Just a piece of news, it made it up here on the Canadian Broadcasting Corporation here since it's interesting nature. AS It Happens did the interview if any of you wish to get the full scoop. How is this affecting sports in that city, since the station is a. losing money and B. May make the network angry, just a guess on my part?

I was talking to a freind of mine who lives outside Baltimore and she had some insight on the firings of a couple of 98 Rock air personalities which took place a couple of months ago. (Someone was asking about this a while ago.) Please tell me if I'm way off, though.

Cruiser: Was pulled over by police for something and later went on the air and complained about the police and the way they delt with him. Also said that people should go out because the police are out to get you (or something along those lines...)

The Morning Team: Sexually explicit comments were made to a couple of women that were in the studio. Had something to do with money exchanged for viewing of the females. Geez.

FYI, use at your own risk,
Mike

Same dude. He's Filipino, not Hispanic. He worked briefly at KRON (TV),
but didn't last in that position. He also did some shifts at KGO radio.
I don't know if he'll last at his current gig at KSFO. It's an uphill
battle to get the audience for that station (rated at #30 in the Spring
Arbs). The talkhost in the evening slot has to be especially adept at
getting listeners both due to the low ratings and to buck the fact that
much of the audience in their chosen 18-34 demographic are watching TV
then. It's hard to evaluate his show since it tends to be monologues and
attempts at getting people to phone in. Not a pretty picture at present.

After I posted the original message in this thread I received a very interesting response from an engineer at WRUR. With his permission I`m forwarding it to Airwaves. Replies should be directed to him, not me.

/Don

Originally-From: dd002b@uhura.cc.rochester.edu

>The 9/1/94 issue of the Rochester, NY Democrat & Chronicle had a cover page
>article about how the signals from two local radio stations are causing
>automatic fire alarms to go off in the 911 Emergency Control Center. Here are
>the details, from memory (the article is at home):

>According to the article, the FCC has determined that the signals from two
>local FM stations (WRMM & WRUR) are combining in such a way that one of the
>harmonics (at around 75 MHz) is the same as the local fire alarm boxes. The
>problem started occuring after WRUR (college station from the University of
>Rochester) received permission to move their transmitter to the top of the
>downtown Hyatt hotel, and increase their signal to 3000 watts. The article
>doesn`t say how the FCC determined that this was the problem, or how they
>determined that WRMM`s signal is also involved (maybe their transmitter is on
>the same tower?). The FCC has asked WRUR (and not WRMM) to decrease their
>power to 30 watts until the problem is resolved.

As I remember, it was simple math that showed that it was WRMM that was the 2nd agent. WRUR went off the air voluntarily, when the problem was discovered, in hopes of finding a quick solution. WRUR transmits fromthe top of a hotel in downtown, WRMM transmitts from about 3/4 mile away. 911 is a stones throw from WRUR's antenna. After over 6 months of testing, WRUR went back on the air at 50 watts. 100 watts causes interference. The brand new transmitter is being used as a giant locking relay to control the exciter.

>The FCC was in town last week to conduct tests. Apparently WRUR increased
>their power to 2600 watts during the tests, and several false fire alarms were
>reported. The results of the tests were inconclusive. The FCC person said
>that the problem occured when the two stations happened to play notes that
>combined to form the offending harmonic frequency.

WRUR and the FCC have been doing test for over a year now. WRUR will return to Full power (or high power) and the FCC plays the Triangulate game, using a directional Antenna. In april the problem was traced to a single rusty wire in an older neighboring building. (Yes 1 wire) since then the problem has not gone away, but the level of the interference is below that which the FCC's equipment can pick up. 911 is trying to pick up signals transmitted at 1watt from >5 miles away. Thay are so close th the noise floor that

tracing the problem has been problematic. 911's equipment is very outdated, which is the real problem here. WRMM and WRUR both have clean signals, as far as any tests have been able to determine.

Every time a false alarm is sent (as explained by the original poster) the fire dept. must check the fire box associated. During our recent tests, a real fire allarm went off. the dispatcher freaked out, and as he transmitts on a public frequency, anyone listening could here about the episode. all this was made worse by some other minor incedents (the Chief Engineer's pager was answering as busy, though the pager company claims tno knowledge.)

>My comments: It sounds like the problem is associated with the audio signals,
>and not with the carriers -- does that seem correct? I have heard that WRUR
>has been plagued with creating interference problems for years when their
>transmitter was on the U of R campus. One story that I heard was that they
had
>received permission to increase their power several years ago, but it caused
>some of the lab equipment in the Chemistry Building (which was close by) to go
>nuts. I`m personally interested because I like some of the folk music
>programming that WRUR broadcasts.

the problem, as far as any tests have been able to determine, is outside the transmission facilities of both WRMM and WRUR. the incedent with the labs' happened anumber of years ago. WRUR was transmitting at 5kw from a tower only just taller than the floor the labs where in, in a building only200 feet away. Of note: WRUR has been working constantly with the FCC despite the fact that it is is a 100% volunteer station. 911 has also been working with us on this. WRMM has ignored the issue entirely. the only point where they were involved, was when the FCC did a test of their transmitter in case the problem was there (this was about 8months after the problem was found)

If this situation had arrisen where 911 was not a public service, it would have been their problem. only bec. they are a public service does WRUR have any resposibility toward the problem. WRUR has so far, easily passed any performance tests that the FCC has thrown at it.

any help of suggestions are apreciated.

From: talk1370@aol.com
Message-ID: <34r96c$6dn@vixen.cso.uiuc.edu>
Source record: 38035

In article <34ovkn$kef@vixen.cso.uiuc.edu>, UASR74A@prodigy.com (JACK SCHNAPPER) writes:

(Imus vs. Stern, ARBs and $$$$)

One of the reasons Infinity bought WFAN/660 in NYC was so they would not HAVE to choose between Imus and Stern, but enjoy the benefits of both. Imus does have more upscale demos than Stern, and his success tends to vary from market to market (stronger in Boston than Stern, somewhat weaker in 12+ AQH in NYC but stronger in prime 25-54 demos, weaker overall in a lot of markets because he's usually on a weak AM while Stern tends to hook up with strong FM affiliates). Here in Rochester Imus came late to the market on a marginal AM talker (WHTK/1280) that carries an 0.6 share overall...vs. the Stern FM affiliate's 4+ share, and the two top talkers (WHAM and WXXI) that consistently pull 11 and 6 ratings respectively. It's too early to tell whether that will improve. I don't think Imus even has an affiliate in Buffalo yet, while Stern has a 50,000 watt clear channel AM in that market. Look at Boston on WEEI and you have to say Imus is gaining...look at Cleveland and you have to say it didn't work out (replaced by a new local show on 3WE). Stern does moderately well in most markets, gangbusters in some, partly because in some key markets (including ours) he got there first. IMHO they will both survive long term as national shows, but their relative success will vary from market to market more on the basis of how strong or weak their local affiliate is, than how good the shows themselves are.

>>the choice, Infinity would choose Imus over Stern. If someone can either
>>confirm or deny (factually) what I have stated, please do so.

Imus is a straight cash program thru Unistar, stations get to sell the time themselves--Stern syndicates himself with Infinity's blessing. Imus appeals to a male 25-54 demo, hence, more stations chose to pick him up. Stern's controversial show scares stations away--the FCC is breathing down his neck, and most stations don't want the headache.
In terms of ratings, Stern gets them 12+, but Imus is very strong males 25-54--his station (WFAN) bills almost $30 million, he's responsible for about a third to a half of that in AM drive. While Stern gets ratings, Imus get the bucks.

3682. "Inside Radio"'s Sources

Newsgroup: rec.radio.broadcasting
Date: 1994-09-10 03:29:18 UTC
From: fybush@world.std.com

Source record: 38037

Some of you may have heard of a daily FAX newsletter called "Inside Radio." I get a peek at my boss's copy from time to time, and imagine my surprise to see this item in Thursday's issue:

WOWO deal has a December "out." Parties to the controversial sale of the heritage Fort Wayne AM and its FM can blow up the deal if the FCC hasn't approved a transfer from Price to Inner City by mid-December -- and that's exactly what opponents hope to see. They don't want WOWO's signal trimmed, which is part of Inner City's plans to strengthen coverage of its WLIB-AM New York. Permission to change WOWO and WLIB's patterns is a condition of the sale. There's local political heat against the sale -- an (sic) now an aide to Congresswoman Jill Long has logged in at the WOWO public file to take a look at the sale contract.

I wonder WHERE they could have gotten this info from? ;-) Looks like r.r.b./AIRWAVES has readers in places we never imagined. Looks like I'd better watch what I say...good thing they didn't use my name!

(And a final plug here: Those docket numbers are BAL940311EC and BAL940722GE. FCC, Mass Media Bureau, AM Branch, 1919 M Street NW, Washington DC 20554. cc: any letters to WOWO Public File, 203 W. Wayne, Fort Wayne IN 46802. It's NOT too late to make your voice heard and stand up for a less-cluttered AM band.)

3683. Buffalo/Toronto Radio Watch(9/9)

Newsgroup: rec.radio.broadcasting
Date: 1994-09-11 04:11:22 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <34u01a$qmc@vixen.cso.uiuc.edu>
Source record: 38039

From the #40 market:

*I'm starting to become convinced that some of the people who write for the Buffalo News(especially the Lifestyles section)haven't the faintest idea what they're saying. Case in point:Lauri Githens,write of the Buzz column in the Thursday edition,refers to FM 101 The Planet(CKEY,101.1,Ft.Erie/Niagara Falls,Ont.)as a adult album alternative station. Nice try,Lauri;for the length I've listened,it is a modern rocker(albeit with some quirks,and with a somewhat improved playlist). It also mentions WJJL's attempt into the "alternative"world,"The Other Side"(on Saturdays at 5-8pm),which I haven't heard-I'll give it a shot.

*From WBNY:The station is the preliminary stages of upping their power to 500 W,among other things. Also,Rich Wall-after what seemed like an eternity(at least 8 years)-has ended hosting duties on its local music show. No idea as yet who'll step in as host.

*Over at WGR,the station may be soon hit where it hurts the most-the pocketbook. The Buffalo Teachers Federation,angry over a remark made by (you guessed it)Rich Michaels(in which he said that he'd give pink slips to any striking teacher-which didn't happen;I think the Arbitrons are going go give him one,however),is planning a boycott of Rich Products(of which Rich Communications,owner of 'GR,WGRF-FM,WUFX-FM and WWWS-AM,is part of). This is on top of one by the Polish-American Congress in the area. Rich had disdain for this,calling them "drive-by terrorists". He'd best be worried,for Rich Communications recently got rid of some staffers at its stations to save money.
Also of note:Metro Weekend's Noise column reported on a comment made by morning man Tom Bauerle,in regards to the Keith Lussier story(he had lost custody of Brittany,his adoptive child,after his wife died). He said on air(paraphrased):get your pictures and leave. It said,"No mention from Tom of WGR's own news microphones which were plainly visible in most of the television stories of the event. noise wonders if Tom advised his own people to leave. He does have some power,having been the force behind the return of John Otto to radio." Gee,isn't that nice...someone at a station that still can't beat WBEN and now taunting them about the Bills contract and news(again), lecturing about ethics. That station should be called the USA Today station (no joke;to prepare for the AM show,someone on staff gets a few copies of USA Today-which makes me wonder:do they pay or just go to a top-notch hotel to get them gratis? :) Anyone who travels will know what I'm talking about.) for the depth of its newscasts-not much.

*Some stations recently changed voices:
-WWKB
-WUFX

-CJEZ

: part?

There is already a 50kw all-sports station in Cleveland, so the loss
of WJMP is probably not going to make a huge difference to a lot of
people. There are no pro sports in Akron/Canton/Kent, except for the
AA Canton/Akron Indians, and I don't know if this station does the
Kent State sportscasts (it is located in Kent).

OK, let's try to get this right!

The BOSE WAVE RADIO is shoebox sized, has an alarm clock and an AM/FM radio. For its size, it produces excellent sound, especially bass. I don't have the technical specs, but I believe the bass response is good down to 100 hz or so. It certainly sounds like it in my bedroom!

The BOSE WAVE RADIO costs $349, plus s+h+tax.

The BOSE ACOUSTIC WAVE MUSIC SYSTEM is much larger (like about six shoeboxes). It includes AM/FM radio and CD or cassette. It has much more ability to make loud noises than the WAVE RADIO and the bass response is even better, thanks to the big box.

I don't know the exact price, but it is much more expensive, but you get a lot more, too!

By the way, any of you that own BOSE 901 speakers that have noticed a marked degredation in sound quality -- Bose is replacing all 901s that have had "foam degredation" i.e. the foam suspension has fallen apart in the drivers. For more info, call Bose in Framingham, Mass. In my case, I can exchange my 17-year-old 901 series IIIs for brand-new series VI for $400.

>coincidence?

I think it was 1991 when CBO moved from AM-920 to FM-91.5 and CBOF moved from AM-1250 to FM-90.7, and now CJSB AM-540 has become CKQB FM-106.9. I think it's just a coincidence that these happened in the same city. The CRTC is not in the habit of allowing stations to move from AM to FM. In fact, Standard Broadcasting claims that CJSB was the first commercial radio station in Canada that was ever given permission to move from AM to FM. (CBO, of course, is non-commercial.)

CBO, CBOF, and CJSB all used the argument that a move to FM would allow the stations to better serve their market -- the Ottawa Valley. I can vouch for that, because I live about 50km southwest of downtown Ottawa, and I could barely pick up CJSB at night, and it was even noisy during the day. I can now pick up CKQB in the basement with my Walkman!

CKQB took just about the last FM channel left in this area, 106.9 MHz, which became available when the all-news CKO network went under nearly five years ago. There are a few frequencies left that could handle low-power stations. CBO and CBOF, being non-commercial, were able to move to frequencies allocated for educational uses.

Ottawa only has three English AM stations left (one news/talk, one all-hit, and an oldies station). There are also two French AM stations in Hull. By contrast, the Ottawa-area has 14 FM stations. Only about five years ago, there were fewer FM stations than AM stations!

In article <34ovjf$k97@vixen.cso.uiuc.edu>,
z005465b@bcfreenet.seflin.lib.fl.us (Joel Runes) writes:

(on moving the AMs to FM)

There seems to be a policy of moving AM stations to FM
wherever possible in SOME markets, especially those markets like
Ottawa where a lot of FM allocations were sitting open...while the
AMs were operating with restrictive signal patterns (especially
at night) that didn't cover a lot of their metros. In other markets
stations are actively being encouraged to STAY on AM rather
than build on or migrate to the FM band.

Canadian broadcast pros I know tell me the idea is to put
everyone on FM where there's room and where the AMs have
to be too directional to cover the market...and to restrict the
number of FM licenses even below what's technically possible
in markets like Toronto where all the AMs are adequate to the
task of coverage and nearly all are economically viable.

They're not killing AM, just fostering it where it makes sense and let-
ting it dwindle where it doesn't do the job and FM does. A few
listeners on the fringes are going to lose service from that
kind of policy. The CRTC says this will be balanced by the
larger number of listeners in expanding metro areas who were
once screened out by directionalized AMs, who will be able to
pick up their FM replacements. I should add that no one is
being coerced to move out of the AM band in any market...just
offered a chance to move to FM if it's advantageous. Incidentally
this may let some other major market AMs both in Canada and
the US spread out their patterns if they no longer have to protect
other stations on the same or adjoining channels.

I can't wait to see what happens on 540 now that CJSB is about to go...
since a move to FM or a closedown MAY also be imminent
for the CBC French station on that channel in Windsor. My best
guess is that if all of that happens, someone will put a direc-
tional 50 kW station on that channel in the northeastern or
midwestern US, screening Saskatchewan, or someone at the
bottom end of the band on either side of the border (maybe WGR)
will move to 540 to bump up its power and spread out its night
pattern.

3688. Precidents for WOWO's situation (wasRe: "Inside Radio"'s Sources)

Newsgroup: rec.radio.broadcasting

: It's
: NOT too late to make your voice heard and stand up for
: a less-cluttered AM band.)

: -=Scott Fybush - fybush@world.std.com - Save W O W O!=-

Didn't something similar to the trimming of WOWO's sale take place about 15 years ago, when the signal from KBCQ-AM 1020, a 50,000 watt full-time directional powerhouse from Roswell, New Mexico (protecting KDKA-AM in Pittsburgh, PA) was trimmed back somehow to allow KGBS-AM 1020 (a.k.a KTNQ-AM), Los Angeles, CA (which had been a daytime or limited time 50,000 watt station) to operate full-time with 50,000 watts?

And didn't WADO-AM in New York, NY more recently purchase an AM station on Long Island on an adjacent channel just to turn in their license to expand WADO's coverage to the east?

And, more recently, wasn't there an article in this newsgroup announcing that WINS-AM 1010 in New York bought a 10,000 watt station in Little Rock, AK for the purpose of shutting it down to allow WINS to improve their signal to the southwest? Is this true?

While I don't want this message to be construed as being favorable to Inner City crippling WOWO, it does seem to suggest that Inner City's "power play" is not unprecedented. Thus, it may require a more persuasive argument than simply, "we shouldn't do this to our 'heritage' stations" to convince the FCC to prevent WOWO from having its signal pattern reduced, especially if the present owners are selling the station and thus, have no objection to the encroachment.

I can't speak as an expert, but perhaps facts tending to prove that the service area lost as a result of the encroachment will be without an emergency information source might help.

Also, the FCC these days is trying to reduce interference on the AM band to make it a more viable service, as evidenced by their pending reallocation of stations to the 1610-1700 band and the strict interference reducing requirements up there. Perhaps a factual showing that WLIB's intended operation at 1190 at night will adversely affect the FCC's goal of reducing interference at night might be persuasive.

Joe Duffy, an account executive at WLUP, Chicago, was one of the 132 people killed in this week's crash of a USAir jet near Pittsburgh.

Duffy, who was 28, had been with the station for two years.

Duffy had decided to take a long weekend to visit his family in Westchester County, north of New York City. He had attended a sales meeting Thursday afternoon before boarding the ill-fated flight.

In a telephone interview for CBS News radio broadcasts, WLUP's general manager, Larry Wirth, described Duffy as an extremely popular employee. Wirth said the station's staff was in shock.

From: bdsteve@aol.com
Message-ID: <34u01r$qmu@vixen.cso.uiuc.edu>
Source record: 38049

The heritage WNAP call letters are back in Indianapolis. On Friday 9/9/94, Oldies 93 WKLR abandoned it 7 year 60s based gold format for a new direction...70s based gold as "The Buzzard WNAP."

For anyone who grew up in Indianapolis with this legendary station, it is great to hear these songs with those call letters. The library is a little less Classic Rock than the Arrow stations, but not a pop/AC sounding as the Coast or Y 107.9. At the core are the basics...the Doobie Brothers, Steely Day, Eagles, David Bowie...it all sounds great!

If you're in Nap-town...tune it in. And if you want, give them a call at 239-9393...I know they would love to hear what you think about the return of the Buzzard... 93.1 WNAP!

>upscale demos than Stern, and his success tends to vary
>from market to market (stronger in Boston than Stern, some-
>what weaker in 12+ AQH in NYC but stronger in prime 25-54
>demos

I don't know what's up in Boston (where I thought Stern was aired at night (?). In New York, Stern soundly kicks Imus to shreds with almost triple the I-man's numbers 12+. The 25-54 isn't even close. Stern in a walk.

Imus definitely brings home quality demos. But for sheer numbers, you look in the New York book and the raw figures are not impressive, and never have been.

The exact opposite's true for Stern. But don't get the silly idea Howard can't translate the demos into gross revenue. Mel Karmazin was quoted in one of the trades saying that Howard's show grosses $350,000 A WEEK. And that's in New York City alone... no other Infinity markets included.

True, the FAN billed 30-million dollars. A massive amount. Let's not forget they have the Knicks and Rangers and Mets and more.. in addition to Imus.

Something else to think about in the WOWO/WLIB Controversy. If memory serves, I believe that WLIB had a CP to move to 1200 khz and change the city of license to Yonkers, NY. They would also add night service at 5kw. I wonder what happened with that? Also, wasn't 'LIB on the list to move to the expanded AM band (1610-1700)? I guess that Inner City must be growing impatient, and have decided to toss away a legacy in WOWO to serve their own selfish interests. But didn't Group W do the same thing when they bought a Little Rock, Arkansas station at 1010khz in order to shut it down and get 50kw at night? And they ALREADY had night service at 30KW!!!! A-mazing... I guess that means that "Money talks, and history walks"......

: radio?!?! For the Akron area, WNIR pretty much is *the* talk station as I
: remember, and they do a fine job, but it seems a little redundant to have
: both sister stations doing talk format, and not even simulcast!

Actually, when the Howie Chizek show was the only talk show on then WKNT-FM 100.1, it was also simulcast on WKNT-AM 1520. "WKNT AM & FM, Kent, Ohio". It was much more a Portage County station than it is now, either AM or FM. When the FM changed to WNIR (remember "Winner 100"? That's where it came from...), the AM I *believe* kept the WKNT call letters. The FM started dual-IDing to Akron.

: I preferred Kent 1520 when it was an oldies station, that lent itself
: better to the local AM "feel". Trying to remember what the call was, I
: recall their contest to vote on the new call letters...

AM 1520 kept the WKNT call letters and became a country station, at first. They moved to the WJMP ("Jump") call letters when they went oldies. Until switching to the syndie-sports-talk format, they were also known as "Super Oldies 1520".

: BTW, isn't 1220 now WKNR?

Yep, still owned by the Cablevision folks, who bought it from Nationwide/WGAR.

Something else to think about in the WOWO/WLIB Controversy. If memory serves, I believe that WLIB had a CP to move to 1200 khz and change the city of license to Yonkers, NY. They would also add night service at 5kw. I wonder what happened with that? Also, wasn't 'LIB on the list to move to the expanded AM band (1610-1700)? I guess that Inner City must be growing impatient, and have decided to toss away a legacy in WOWO to serve their own selfish interests. But didn't Group W do the same thing when they bought a Little Rock, Arkansas station at 1010khz in order to shut it down and get 50kw at night? And they ALREADY had night service at 30KW!!!! A-mazing... I guess that means that "Money talks, and history walks"......

Source record: 37916

CIQC 600 AM, Montreal, has gone through several formats
in such a short time period that it may be frustrating
its potential audience away.

That is not new. The Montreal radio community is fully
aware of CIQC's identity crises. But I have not been
able to figure out what is going on. I'd like to
pose a few questions to any of you who may be in the know.

First of all, why is Montreal perhaps the only large
metropolitian market without a country station? If
the smaller diplomatic hideaway town of Ottawa can
accomodate at least two FM stations, why can't Montreal
install one? And don't tell me it's because of the
predominantly francophone population. Country stations
dot Quebec's interior, but Montreal seems to be a black
hole for what is perhaps the most popular and lucrative
radio format throughout North America.

And second, what is wrong with CIQC? Since 1991 they went from
talk to country, then to country/talk, then to talk alone,
then to talk/oldies, and now I'm not quite sure, but it
appears that they have drifted into talk/oldies/country.
What is going on at this station to account for its rapid
shifts?

3713. ID LOGIC Sim. SETUP prblms and COVERAGE question

Newsgroup: rec.radio.broadcasting
Date: 1994-09-12 07:22:26 UTC
From: prs@hk.net
Message-ID: <350vji$nr@vixen.cso.uiuc.edu>
Source record: 37918

[As a follow up on another article about setup problems,]

In article <34e2g6$met@vixen.cso.uiuc.edu> dk@crl.com (David A. Kaye) writes:

>Too bad there aren't provisions for the thing to indicate
>stations beyond the artificial 27-town grid. I can hear dozens of
>stations on my radio which would never appear on this virtual radio.

Hi, I'm the one responsible - I designed and wrote the stuff...

First, before going into the question of coverage, let me say:

Since MOST people ALREADY HAVE all the various MS modules
necessary in their /windows/system subdir to run the Simulators
(such as VBRUN300.DLL and DDEML.DLL) they have been
removed from the ZIPped installation files because they require
a lot of time to download (trying to save bandwidth usage).
If someone doesn't have these files, they can separately downloaded
from hk.net (/shareware/prs), and unzip to /windows/system before
starting the setup.

Now for the coverage question. BTW the maximum grid
coverage - DX2 - is 25 grids (5x5) and not 27 as suggested above.
First, each grid represents an area of 1/2 degree lat. by 1/2 deg/ lon.
which is roughly equivalent to 50x50 km (it depends on your lat.).
So in DX2, ID LOGIC is looking at an area of 250 x 250 km which
is enough for MOST situations.
(Of course, when you read reports of a Canadian FM stn being
received in Goa or US Stn received in Australia you could wonder... ;-)

The main problem with coverage is that a balance must be struck between
beeing able to identify all possible stations AND LIMIT THE NUMBER OF
MULTISTATIONS! And that's where we have a real problem. (Multistation
condition occurs when more than one stn broadcast on the same freq in
a given area of reception.)

The only way to increase the listening area past 25 grids and still limit
a potentially overwhelming multistation problem would be to (1) add
station power data to the database (that's relatively easy) and (2) include
a description of the physical geography in the all possible receiving areas
and that's NOT trivial considering space limitation and the kind of resolution
needed to make this work. (Remember ID LOGIC covers the whole of N.Am.)

For example it's entirely possible to be next to a hi-pwr stn (but separated
by a mountain) and far from a lo-pwr stn (but separated by, say, a large lake)
and being able to only receive the latter stn.

ID LOGIC was developed for radio receivers - not computers with unlimited storage.

If someone comes up with a practical way to squeeze all this info AND the proper algorithms into a small IC to go into a battery-powered portable radio or a car radio which must sell at the right price points, LET ME KNOW.

Cordially,
P.

Source record: 37920

[Moderator's Note: Ken could not get the format info for these stations, but I am running them anyway. If anyone has a format list, send them in to me and Ill run the entire thing again. Bill]

I just received a newspaper clipping with the latest Louisville ratings:

1. WAMZ-FM
2. WHAS-AM
3. WDJX-FM
4. WVEZ-FM
5. WGZB-FM
6. WRKA-FM
7. WTFX-FM
8. WQMF-FM
9. WAVG-AM
10. WLRS-FM
11. WHKW-FM
12. WKJK-FM
13. WQNF-FM
14. WLSY-FM
15. WWKY-AM /
WLOU-AM TIE
WLLV-AM /
18. WDJX-AM
19. WTMT-AM

Not showing on this list, among others, WFIA-AM, WXVW-AM, WGCC-AM, the CNN station whose call letters I cannot remember, and the NPR stations. Note, this listing probably does not reflect the recent switch of WDJX from simulcasting the FM to the all-new AP news network.

In the 24-54 age range:
1. WAMZ-FM
2. WHAS-AM
3. WRKA-FM
4. WVEZ-FM
5. WQMF-FM
WLRS-FM --tie

Mornings:

1. WHAS-AM
2. WDJX-FM
3. WGZB-FM

4. WVEZ-FM

Afternoon drive

1. WAMZ-FM
2. WHAS-AM
3. WDJX (I assume FM and AM combo, since split)
4. WTFX-FM
5. WVEZ-FM

: Especially since it wasn't originally his name. No, he didn't change it, it
: was his father's, and grandfather's. WHY ANYONE in ANY CENTURY would name
: their child "Rush (R)" I don't know.

Do you know this for a FACT, or is it another of Rush's untruths? I remember a DJ who went by the name "Roger W. Morgan" and claimed that the famous "Robert W. Morgan" had lifted his name. In a call I made to him at KYA he had said, "At least *I* use my real name." Turned out that "Roger W. Morgan" retired from the business a few years ago in the Portland area and revealed his true name, which wasn't Roger W. Morgan.

I expect that Rush is probably using a similar expediency -- why should he reveal his real name when he faces the possibility of people who dislike him stalking him or his family? If I were a betting guy I'd say "Rush Limbaugh" is at least 50% manufactured.

3723. WINS applications pending (was WOWO/WLIB discussion)

Newsgroup: rec.radio.broadcasting
Date: 1994-09-12 07:22:48 UTC
From: prm@cbnewsl.att.com
Message-ID: <350vk8$of@vixen.cso.uiuc.edu>
Source record: 37928

WINS' applications for changes keep getting mentioned as
a precedent for the WOWO/WLIB possibilities.
WINS has quite a few petitions in the FCC fire,
according to the records in the Engineering Files at the FCC:

One involves an agreement with CFRB Toronto and KBIS Little Rock.
One facet of the petition filed 4/7/93 is "acceptance of KBIS'
relinquishment of license and deletion of facilities." (Signal
Media would sell to Westinghouse). CFRB would then change their
directional antenna pattern.
My late 70's reference shows KBIS (then KLRA)
with a significant lobe to the ENE, with WINS essentially
pushing all of their signal to the East. Not having to
protect Little Rock would help WINS signal problems in
the West suburbs of NYC, it would appear.
The engineering statement for this agreement with CFRB/KBIS
also refers to a CP to move to the (was WNEW)WBBR-1130 site,
which is still significantly more in the "swamps" (my observation)
than the WINS site on Polito Ave in Lyndhurst, now adjacent to office
buildings and "Medieval Times", all of which cause "reradiation
problems entirely beyond the control of Group W."

Another petition involves changing the daytime directional pattern

and is contigent on the relinquishment of license by WRNJ-1000
Hackettstown NJ. In this case they have applied to put up a 4 tower
array, in a parallelogram, at their current site (where a 4 towers in-a-
row site exists today). This would allow them to relax their severe null
to the west in the daytime
There would stil be nulls at 10, 193,240, and 295 degrees in daytime.

Perhaps the word on WINS is 'they're waiting to
see which petition is granted, and which are mutually exclusive
with each other.'

I think there is so much more of a sentimental favorite aspect
to the encroachment threatening WOWO that isn't felt with KBIS.
As a personal example, when in Fort Wayne, I visted WOWO telling the
receptionist "I've been listening to you in NJ for almost 20 years;
since I was in town I felt I had to come say hi." They know where their
signal goes and rewarded me with a quick tour including meeting the pm drive
host and gave me some memorabilia including a nighttime coverage map.

I started to look at the WLIB file but between license renewal,
the proposed move to Yonkers, the proposed move to 1200, the possibility
of a split freq day/nite operation, etc, the file was way too thick

to get any information out of quickly, at 4pm.

Paul Mount
Member, National Radio Club
I research NJ stations/CPs and stations with towers in NJ.

3724. Re: Precidents for WOWO's situation (wasRe: "Inside Radio"'s Sources)

Newsgroup: rec.radio.broadcasting
Date: 1994-09-12 07:22:49 UTC
From: fybush@world.std.com
Message-ID: <350vk9$og@vixen.cso.uiuc.edu>
Source record: 37929

The WINS/KBIS case has been brought up several times as possible precedent for what WLIB wants to do, but it's simply not the same deal. WINS is the dominant station on 1010 in the East, and they've been working closely with the other dominant, CFRB in Toronto, to reshape both stations patterns to better serve the populations that have developed in the NYC and Toronto market in the last 4 decades. WINS can't hit many areas in New Jersey, areas that were farmland in the 50s but are important suburban markets now. Ditto, I think, for CFRB. The KBIS deal will actually clean up 1010 in NJ. I don't know as much about the 1020 deal, so I can't comment on that (except to note that it did NOT cut into the dominant 1020, KDKA Pittsburgh, which was is and will remain non-directional). Also, there are other under-utilized AM signals in the Little Rock market comparable to KBIS. The market was (like so many others) overbuilt. Fort Wayne's not, at least on AM, and there is NO other signal that can come close to WOWO's.

To summarize: Previous cases have seen the dominant AM on a clear channel buy out smaller stations to improve the coverage of the dominant station. Never before has the FCC allowed a smaller station to buy the dominant to cut down on the dominant signal. This is new territory, and very dangerous at that. And yes, there are other possibilities out there as we speak. Check out 1520, where WTHE Mineola (Long Island) lost a court fight a few years ago to get night power. What if WTHE's owners had the cash to buy out WWKB and cut down on its signal towards NYC? Bingo...a new 1520 signal over NYC. It's not out of the question.

And just to restate: This has gone beyond just the signal issues. ICBC is trying to strike a deal under which it will reduce the WOWO signal without EVER operating the station, and with owning it just a "legal instant." It all comes back to this: WOWO's city of license is Fort Wayne, not New York, and this deal has NO benefit to Fort Wayne. None.

Once more: the docket numbers are BAL940311EC and BAL940722GE. The FCC's Mass Media Bureau, AM Branch, is at 1919 M St. NW, Wash 20554, and WOWO's public file is at 203 West Wayne, Fort Wayne IN 46802. Whatever your opinion, make your voice heard.

Source record: 37932

The latest from Market #29 (definitely bigger than a used-car lot!)....

****

Kansas City's last radio-TV combination is no more. New World Communications officially took control of WDAF-TV (channel 4) yesterday (Sept. 11), and switched network affiliation to Fox today (Sept. 12).

Contrary to statements on "NewsChannel 4," this is not the first such affiliation switch in Kansas City. KMBC-TV (channel 9) and KCMO-TV (now KCTV, channel 5) traded CBS and ABC affiliations this month in 1955, along with their associated radio stations.

The Kansas City Star put WDAF(AM) on the air in 1922, and pioneered television in Kansas City with WDAF-TV in 1949. The Star was forced to sell the stations in an antitrust settlement in 1957.

The radio and TV stations stayed together through several subsequent changes of ownership until Citicasters (formerly Great American Communications) sold the television station in May.

WDAF-TV's former NBC affiliation is now on Scripps-Howard's KSHB-TV (channel 41).

Channel 4 also set up a phone bank in midtown Kansas City at 125 East 31st Street, the present studios of KCPT (PBS, channel 19) -- the former studios and present transmitter site of KCTV.

****

Longtime Kansas City radio personality Jim Welch has packed his bags and gone to Hawaii.

Welch started in Kansas City radio at Top-40 legend WHB(AM) in 1971, using the name Greg Austin. Several years later, he went to easy-listening KMBR(FM), now "lite" AC KLTH(FM).

Welch has been the morning drive announcer at "Lite 99.7." Until April, Welch was teamed with Roberta Solomon, to whom he was married until a year ago. Welch told the Kansas City Star he and his ex-wife are still close friends.

Welch said he just wanted to try something different. As he told the Star, "I'm 45 and I don't owe any bills so I thought I might as well go try and see what happens."

Welch's last day on the air was Sept. 2.

****

Subcarrier update: Community-access station KKFI(FM)'s return to the air Sept. 1 did not include its relay of the Spanish-language Cadena Radio Centro service. The subcarrier does appear to be in use for occasional relays of National Public Radio audio.

KKFI left the air for a week to repair lightning damage and to install telemetry return on its 92 kHz subcarrier.

****

The only thing getting more hype in Kansas City than the WDAF/KSHB

affiliation change was the Sunday Chiefs-49ers (San Francisco) game.
The most extreme instance of hype came on "Young Country Q-104"
(KBEQ(FM)), which dubbed itself "Montana Country 104" last week, in
honor of the Chiefs quarterback.
There were numerous other promotions on radio stations, some of
which benefited charities.
I ignored most of them. I think too much money, adoration, and
attention goes toward professional sports when I consider the amount of
money and support that goes toward people doing truly useful work:
teachers, social workers, academic researchers, etc.
(I feel somewhat the same way about nationally syndicated radio talk
show hosts, by the way, which is why I rarely note that this station
or that station has picked up some talk show.)
****
A radio personality's strangest description of oneself: CHR
station KISF(FM) announcer Ed Adkins, who called himself "Kiss FM's
affirmative action diversity jock" during his shift Saturday (Sept.
10).

06/09/94 CENSORSHIP: CRTC RULES AGAINST HATRED
COMPLAINTS AT CAMPUS RADIO
(Source: The Charlatan, Carleton University and Trans FM)

OTTAWA (CUP) -- A Carleton University community radio
station did not propagate hatred against Catholics and will be
allowed to operate, a recent Canadian Radio-television and
Telecommunications Commission (CRTC) ruling said.

Local conservative groups had asked for CKCU's broadcasting
licence to be revoked for "abusing the public airwaves."

The Canadian Christian Women's Organization for Life filed a
complaint July 7, saying that a day of programming was "offensive"
and "nauseating."

CKCU had broadcast a six-and-a-half-hour program titled Stonewall
25 on June 26, which consisted of panel discussions with members
of the gay, lesbian and bisexual community, poetry and short story
readings, and live phone-in discussions on notions of community,
diversity and the family.

The event commemorated the 25th anniversary of the Stonewall
riots, when police raided the Stonewall Inn, a gay bar in New York.
The raid sparked five days of rioting and has since become a
symbol of solidarity for the gay-, lesbian- and bisexual-rights
movement.

The radio station included disclaimers before and during the
broadcast, warning listeners that the programming would be explicit
and to turn their radios off if they didn't approve.

Rita Curley, a member of the organization, said in the complaint
that the program could have a negative influence on children.

"If we could unintentionally tune in to this degrading, obscene
program, our greatest concern is that children could have the same
misfortune," she wrote.

In her letter to the CRTC, Curley singled out the song, 'You Suck,'
by the Yeastie Girls, which describes oral sex in detail.

The song includes lyrics like: ". . . you tell me its gross to suck my yeast infection./How do you think I feel when I gag on your erection?"

Robert Eady, a member of the Catholic Civil Rights League, says he also sent a complaint to the CRTC about Stonewall 25. Since 1992, Eady has launched several complaints against CKCU's gay, lesbian and bisexual program, Defiant Voices.

"(`You Suck') is disgusting and has no place on the airwaves," Eady said.

But CKCU station manager Max Wallace said the playing of the song was justified because it was "contextualized within the programming."

Wallace said in a letter responding to the complaint:

"The music which was played on the day, including the song, `You Suck,' which you refer to, certainly dealt with the issues being discussed and was not gratuitously offensive."

Wallace insisted that the station's programming is within the limits of the Broadcasting Act, which regulates all Canadian broadcast media.

The CRTC agreed. CRTC Secretary General Allan Darling wrote to Eady: "The Act clearly does not give the commission the power to censor programming . . . The commission will continue to take into account the guaranteed right of freedom of expression contained in the Canadian Charter of Rights and Freedoms."

However, the CRTC renewed CKCU's licence for four years, not the usual seven, because a malfunction in the station's logger machine last winter meant that some shows were not taped, as required.

In article <350vjh$no@vixen.cso.uiuc.edu>, amlper@vax2.concordia.ca (PERRELLA, ANDREA M.L.) writes:

(CIQC/600 format changes)

Andrea, a question...who OWNS CIQC (ex-CFCF-AM) these days?
Ever since Canadian Marconi bailed out of radio I've lost track of who owns the various properties in Montreal (I know Standard owns CJAD, La Presse has market-leading CKAC, and CHUM Ltd. has an FM whose callsign escapes me...as to who else is a player, God only knows...) Stable ownership tends to breed stability in personnel and format, and gives stations a chance to evolve gradually rather than make the kind of jerky, disruptive change you've described. Go down the 401 to Toronto and you find stations that for the most part are owned by the same people who have owned them for many years, in some cases by the original owners who put them on the air in the first place (CHUM AM-FM, CFTR, CHFI-FM, CBL AM-FM, CJBC-FM, CJEZ-FM, CILQ-FM, CHIN AM-FM and CFNY-FM are all owned by the organizations that originally put them on the air---how many cities have that many stations still under their original owner-ship?) Contrast it with Montreal where I believe the only stations still with their original owners are the CBC outlets and CKAC...
And what is the result? Relative stability in format in Toronto, with only one station (CFTR) radically changing its broadcast format, one station (CJCL/Fan1430) bringing a new format into a city that was more than ready for it, and one other (CHUM-AM) evolving gradually from CHR to AC to gold in such a seamless way that no one was shocked by it at all. In fact, all the baby boomers who grew up listen-ing to it probably didn't even notice that the playlist wasn't changing because they were still hearing their favorites...I get the distinct impres-
sion there's a lot more format churn in Montreal, Ottawa, Vancouver and most other Canadian markets where stations are changing hands more often...We have the same phenomenon in the States, where the markets with the most stable ownership (New York, LA, Chicago and a few others) are the ones where stability extends to what you hear going up and down the dial.

==================== ======================
The Better Music Mix Local radio, nationwide

PROGRAMME CONTROLLER VACANCY

2-TEN FM, part of the GWR group, is looking for a first class radio programmer to lead the South of England's most successful station to even greater heights. 2-TEN FM is enjoying it's highest ever audience share and is the market leader in an area heavily overlapped by the London stations. We need an experienced programmer with proven management skills to continue this success.

Send a one page career resume and a 10 minute air check if you currently do an on-air shift.

Closing date - 23rd September 1994

Jeff Lee, Station Director, 2-TEN FM, PO Box 210, Reading, RG3 5RZ, UK

==========
If you are applying from abroad, and are unable to send your resume by post in time, you may mail it to 'gwrlink@mcrfm.demon.co.uk'.

3736. KGEI (shortwave) post-script.

Newsgroup: rec.radio.broadcasting
Date: 1994-09-13 06:26:21 UTC
From: "PETER Q. GEORGE" <PGEORGE@WELLESLEY.EDU>
Message-ID: <353gmd$90g@vixen.cso.uiuc.edu>
Source record: 37941

Monday, September 12, 1994

I have in my hand what promises to be one of the LAST KGEI QSL cards. KGEI, that wonderful pioneer shortwave radio station that came to life as a result of the 1939 San Francisco World Fair... died at 0400 on 1 August, 1994. There was talk about re-vitalizing KGEI at a later date but according to a little note enclosed in the envelope that held the QSL and written history of KGEI....I quote...."The station is closed for good. Glad to send QSL and history. The original 1930's transmitter is the one you heard and it is to be moved to AFRICA and to be used in a Christian station in Liberia."...it was signed Edgar F. Peebles, Registered Professional Engineer. So, if anyone out there sent in a reception report to KGEI before it left the air....you will receive a "Collector's Item", KGEI will NOT be coming back.....and you will receiving one of the last QSL cards from this historical station. KGEI, "The Voice of Friendship" came to the air in February, 1939 as W6XBE... "The Showcase Station" of General Electric. It started life with 35,000 watts...later to be raised to 50,000 watts. Shortly afterwards the call-letters became KGEI, (K) for West of the Mississippi River, (GE) for General Electric and (I) for International. Some of the highlights of this station include the operation of the station by the U.S. Office of War Information during World War II. The OWI was using the station to inform servicemen of the activities at home, as well as in other parts of the world. After the was, the USIA (VOA) operated the station under contract to GE to program VOA material. General Douglas MacArthur transmitted his "I shall return !" famous message to the people of the Philipines during WWII on KGEI. During the Cuban Missile Crisis, KGEI cancelled ALL of its' regular programming and re-broadcasted the Voice of America broadcasts to Cuba for over a month, receiving official recognition from President Kennedy. In its' peak, KGEI had a 250,000 watt transmitter which combined with a HIGH GAIN ANTENNA system gave the station an equivalent ERP of 25 million watts !!!!
I think that it would be appropriate to offer a hearty salute to the now silent KGEI for 55 years of service to the shortwave community and a "job well done" !!!! Bon Chance, mon amie !!!

David A. Kaye (dk@crl.com) wrote:
: John Winder Taber (taberj@caedm.et.byu.edu) wrote:

: : Especially since it wasn't originally his name. No, he didn't change it, it
: : was his father's, and grandfather's. WHY ANYONE in ANY CENTURY would name
: : their child "Rush (R)" I don't know.

: Do you know this for a FACT, or is it another of Rush's untruths? . . .
: I expect that Rush is probably using a similar expediency -- why should he
: reveal his real name when he faces the possibility of people who dislike
: him stalking him or his family? If I were a betting guy I'd say "Rush
: Limbaugh" is at least 50% manufactured.

I agree that Limbaugh utters many untruths, but this probably isn't one of
them.

About two years ago, while rummaging through some old legal periodical
index for reasons that are not relevant here, I happened upon a listing
for an article by "Rush H. Limbaugh" from the 1960's. I'm making up the
middle initial, because I don't remember what it really was -- but the
rest of the name was exactly the same as that of the famous
neoconservative windbag who regularly proves that radios can run on gas
as well as electricity.

About two years later, I learned, from a TV report, that Rush Limbaugh
came from Cape Girardeau, MO, and that either his father or grandfather
was an attorney or judge, and that the Rush that is on the air is named
after this person. Thus, I would not be too surprised to find that the
only believable words that pass through Rush Limbaugh's lips and into your
radio are his first and last name.

3739. Help! A small-market station in Finland...

: [. . .] But don't get the silly idea Howard
: can't translate the demos into gross revenue. Mel Karmazin was quoted in
: one of the trades saying that Howard's show grosses $350,000 A WEEK. And
: that's in New York City alone... no other Infinity markets included.

Thank you for bringing some rational thought into this argument. It seems that many people in radio just wish Stern would disappear, and refuse to accept that he is a bona fide success--not just a fluke, a quirk, or a flash-in-the-pan.

One can argue the reasons for Stern's success, but I believe that it is sufficent to note that he strives genuinely to _entertain_, and obviously succeeds in this.

I recognize that many in this group do not find Stern suited to their tastes, and I can certainly understand this. I do not wish to incite an argument on this subject. I am merely saying that Stern is unarguably successful, and it behooves anyone wishing to compete with him to figure out why this is so.

What a great job John Sterling and Michael Kay have
been doing during the baseball strike. Who are
Sterling and Kay, you ask? They are the NY Yankee radio
broadcasters on 77WABC-AM New York.

Since the strike began, they have been filling lots of
air time (three hours almost every day) with their
"Strike Talk" show. The two have been discussing more
than the baseball strike, trying not to bore everyone
and they have had several guests. Guests have included
New York City newspaper sports columnists, the Mets
Manager, Dallas Green, Yankees manager, Buck Showalter,
other sports figures, and even comedian, Pat Cooper!

However, their conversations (some more like yelling
matches and well-thought-out lectures) about the baseball
strike have been right on the money (so to speak)!

Give them a try, most weeknights from 7PM-10PM (Eastern).
WABC's nightime clear-channel signal travels quite far.

PLAY BALL!!!!!!

Well, according to one rather snippy gentleman I ran into, it's about the "Internet Talk Radio" program, which is a relatively recent effort to produce a radio talk show distributed by data files on the 'Net. (The files are huge, and you need some sort of sound equipment on your machine.)

It is not about talk radio in general.

The man was huffy, in my opinion, because an AOL member had done pretty much what you did.

Mike

From: raval@Hoover.Stanford.EDU
Message-ID: <353gmu$917@vixen.cso.uiuc.edu>
Source record: 37949

Hi! I need help with a couple of radio talks that are going to be aired on the east coast from Sept. 12-20. Can I get to listen to them on the West Coast (Bay area)? They are:

Bridges with Larry Josephson (air time 11:15 am, Fairfax, Virginia)
G.Gordon Liddy Show (air time 1-2pm Fairfax, Virginia)
Between the Lines with Bill Thompson AP/Sky Radio
Mutual Broadcasting with Jim Bohannon (air time 12midnight)
Mitchells in the Morning, National Empowerment TV (8-9am)in DC
Diane Rehm WAMU-AM (NPR affiliate) (11-12pm)
David Brudnoy Show (9-11pm) in Boston
Henry in the Hub, WFNX-FM Boston (1-1:30pm)
Milt Rosenberg WGN-AM (8:30pm)
To the Best of Our Knowledge, WFMT-AM (11:15-11:45am)
Talk of the City, WBEZ-AM, (12:30-1pm)
Dick Staub Show, WYLL-Am (nationally sindicated),(2:45pm)

These talks are important for my research. I would appreciate if anyone can tell me the west coast time of these talk so that I ccan listen to them. If not then, I would like to know how I could get the recording, how many$$'s, etc or if any one on this newsgroups can help me with this. Let me know at raval@hoover.stanford.edu Thanx!!!!!

(on WINS)

Oddly enough, politics in Canada may affect WINS's future.
It works like this...WINS and CFRB ended up sharing 1010
because CBC in Canada managed to get CFRB kicked off
its old clear channel (860) to claim it for its own operations,
first for the old Dominion network and then for its French
language outlet in Toronto. If Quebec separates and CBC
closes its French outlets outside Quebec...or if CBC moves
its French services to FM in Toronto as it did in Ottawa re-
gardless of Quebec's future...CFRB moves back to 860 with
50,000 watts non-directional (or so insiders in the Toronto
radio biz say). Then WINS probably goes omni on 1010 as a
1-B clear....don't know if it WILL happen, but it could....

What's been happening to WJR (760 Detroit)?

Going back to it after a couple years, now that Imus is gone from Ohio, it seems to have shifted out of my demographic group

I used to listen with pleasure almost all the time

JP McCarthy has mellowed, and he was already pretty mellow, in the morning. There's no edge to the show, except when Mrs. Pennypacker calls from the Blue Star Home.

Perhaps I have not matured fast enough here.

Going the other demographic direction, Jimmy Launce, who long ago used to do wonderful interviews with singers and composers, is playing ``guess what I'm holding in my hand'' every morning to enthusiastic callers. If he'd discuss UFO's he'd get even more callers, I imagine.

The afternoon drive crew is as insipid as they come, giving safety tips and feeling good about it. Joan Siefert used to give the show a little irony to keep it alive.

I don't understand exactly what's happening up there.

Maybe Limbaugh started it all by killing off the noon lineup?

(on sanctions against a broadcaster)

You basically have to willfully violate FCC rules or commit a felony in order to get thrown off the air.
Sometimes it can be a serious pattern of blatant, repeated employment discrimination (a VHF-TV station in Jackson, MS awarded about 20 years ago to a competing applicant). Sometimes it's concealment of a silent partner who controls the operation, but wouldn't be fit to be a licensee...sometimes it's gross technical violations (like "forgetting" to sign off at sunset, or "forgetting" to change to night pattern repeatedly) , or long periods off the air without permission. A couple of licenses have been lifted and station facilities opened up to new applications when the licensee gets convicted of a felony unrelated to his broadcast operations...and both individuals and corporations (RKO General most prominent among the latter) have been forced to sell off their stations under those circumstances to qualified buyers, often at fire sale prices. Meanwhile, a lot of other challenges to licenses have been thrown out as virtual attempts at extortion...they used to take a long time (like the decade-long successful fight of WPIX/Channel 11 in New York to stay on) before the FCC told the challenger to go to hell. Now they usually get brushed off without even a comparative hearing.
The rather transparent attempt of the Nixon crew to yank the licenses of the Post-Newsweek stations for partisan political reasons forced the FCC to tighten up its practices on hearing license challenges to make sure the process could never be so easily abused again.
If a broadcaster does a halfway decent job, and stays out of legal trouble, you can't get his license yanked just by promising to do better. You literally have to prove serious wrongdoing, like gross and repeated negligence that causes interference to other stations (an isolated and unintended screw-up might not even draw a fine), or actual willful violations of FCC rules, employment law or criminal statutes by the owners and managers, before you get him thrown out. What's more, you have to fight all comers in order to get the right to succeed him.
If you're planning such a challenge, be warned...it'll take a lot of time and eat up so much in legal fees, you will probably be better off BUYING or BUILDING a station if getting on the air yourself is the ultimate goal. And unless you've really got the goods on a licensee, with evidence that would stand up beyond reasonable

doubt, a challenge is almost certain to be a loser.

Hello, I'm the Music Director for a volunteer, non-commercial college radio station in the Seattle/Tacoma area. We have a little unusual problem. At the current moment we have somewhere between 6000 and 7000 AudioPak Blue Carts. They range in lengths from 3.5, 4.5 and 5.0. Our problem is in that we have all of these long carts but no 70 sec, 90 sec, 40 sec or 120 sec.

If you work for a radio station that would like to do a "Cart Exchange" of some sort, please contact Tom Evans Krouse at 206-833-9111 x431. We are looking to exchange these carts for anything that our bare-bones station might need (like a splice-finder, another cart machine, a roll of toilet paper) so if you have a need for any number of carts (we have some seven thousand to spare - and the cart racks for them as well) and think you have something that we might need, then please call Tom. He has a voice-mail system up, and I'm sure that he'd love to return your call if you can't reach him.

Just think. You could finally cart up all of that rare-vinyl that isn't available on CD! You'd never have to worry about it getting scratched. You'd just have to worry about the cart being cued. ;)

I don't know where the problem lies but the National Radio Club in
Mannsville,NY is alive and well. The Chairman of the BoD was at our ConventionLabor Day
weekend in Merrimack,NH.
The new AM domestic log will be available the end of September for under $20.
This will be the most up to date listing around and you can't beat the price.
Send a dollar for a catalog and a sample copy of DX NEWS (published 30 weeks
of the year) to:
National Radio Club
P.O. Box 118
Poquonock, Connecticut 06064

This is the membership center that I've been runnin since 1977. Or use the
Mannsville,NY address (PO. Box 164 13661). Its still good and so is the Log.

Hello there... I host a two hour drive show on the CBC's Northern Ontario Network. I'm looking for some suggestions to simple contests to involve our listeners.

Tell me about the contests that you've enjoyed in the past... how did it work and what did you like about it ?

Barry Mercer
CBC Northern Ontario Radio. "Points North"

thanks.

3753. Re: Louisville ratings

Newsgroup: rec.radio.broadcasting

These ratings are very interesting because they reflect the scramble of AM stations to take whatever they can of the audience that is left. The only consistent station is WAVG, which runs athe Music of Your Life format.

WWKY, Talk 790, has fallen from 12th to 15th. They fired their morningt host, Denton Randall. Denton was calm, rational, and funny. The new morning person is STu Williams. He is very conservative and always seems angry. His humor comes across to me as negative.

Based on these ratings, WXVW's switch to an all-sports format (asrn) has not been working. It is interesting that WWWKY has just increased the amount of sports coverage on weekends. Their source is the Sports Fan Radio Network.

On the other hand, WHKW's switch from 103.9 to 107.7 seems to be helping it.

One week in Indianapolis, and already stuff's a-happening! I guess that's life in the big city. Here's the story:

1070 WIBC, currently positioning themselves as "News all morning, talk all day", has recently re-hired Lee DeNoone as news anchor/reporter. (I'm not at all sure how to spell Lee's name. I hope that's close.) In WIBC's days as a full service/MOR, when WIBC was a radio news powerhouse, Lee was part of the team. The station was sold in the meantime, I believe to Emmis, and that killer news team was dismantled. As I understand it, there was some sort of uproar among listeners, and now that the spring book is back, golly gee, WIBC is trying to reposition itself as a heavier news hitter and so Lee is back. Also noteworthy: the slickly produced ID they had been using is dumped in favor of the 70s-sounding ID they had been using before.

Emmis' local FM at 93.1 switched formats and call letters last Friday afternoon. All last week, my first week here in Indy, they were a (very annoying) "Good Time Oldies" station with calls WKLR. They're now playing "The Greatest Hits of the 70s" as WNAP. They're running jockless right now. They have entirely too few sweepers to run between songs; I think they repeat hourly. They do clue me in that the calls WNAP have been used in Indy before. The sweeps mention a buzzard mascot; apparently, the buzzard was part of the old WNAP incarnation. Their sweeps are going after WFBQ (Q95, AOR) and WZPL (CHR) -- but using slogans and positioners these stations used in the late '70s and early '80s. "The buzzard is back, and he's tired of all that yakkin' on Q, and the kiddy music on the Apple" -- "the Apple" is an old WZPL slogan.

Over the weekend, the new WNAP was running commercial-free, too, but Monday morning I heard spots at :20 and :50.

(As I read back on this, I notice my writing is unusually sloppy; please excuse it! I'm just into the second week of my new job editing books and I'm still suffering from the stress of moving last weekend!)

More when it happens,
jim grey

I'm please to announce that my infant newsletter, Radio 2000 (tm), is now available through automated email.

It's a project I've been wantingto start for a long time. I love writing and I adorecomputing. I especially find pleasure in disseminating information I think is helpful, essential or fascinating.Radio 2000 (tm) is a newsletter devoted to the changes affecting today's broadcaster that are being brought on by computers, computing and networking. Whether it's a new internet mailing list that might help you with show prep, a piece of shareware I've found that's especially useful, or a trend which affect your future, I'll discuss it here and give you
particular insight. I'm fascinated with computing and hope to share my enthusiasm with you as it relates to the professional broadcaster.

Radio 2000 (tm) is published electronically weekly....or more often as information overload warrants!

SUBSCRIBING

To subscribe to Radio 2000 (tm), send email to:

listserv@radio-online.com

and place this command in the text of your message:

sub radio-2000 (your email address)

To give you an idea of Radio 2000 (tm), I'm reprinting a portion of a recent issue:

FALL FEMALE DEMOS

If you're after the ladies and want to keep up with two shows
in particular they enjoy, you might want to get on these
Email mailing lists:

"90210"

Contact: 90210-request@ferkel.ucsb.edu (Jim Lick)

Purpose: Discussion of the Fox TV show "Beverly Hills, 90210."

"melrose-place"

Contact: melrose-place-request@ferkel.ucsb.edu (Jim Lick)

Purpose: Discussion of the Fox TV show "Melrose Place."

^ ^ ^

BRAINSTORM YOURSELF SILLY

If you're looking for really new and goofy inspiration
for your show, try Random Mania. This piece of Windows
software is fun and clever and apparently freeware (I can't
find any documentation about shareware registration with the
progam). It randomly generates tabloid headlines, movie
titles, band names and more from word lists
which you can actually update and localize if you want! The
interface is simple and it worked flawlessly on my system.
To grab a free copy, dial up my BBS at (804) 227-3348 and
download the file: RNDMANIA.ZIP
You'll have to "unzip" the file with pkunzip.exe or
another public domain .zip extractor.

^ ^ ^
BIRDY, BIRDY IN THE SKY

Satellite radio may take your job away someday in the
future. This and other scary notions are contained in
the first issue of "Satellite Times (tm)" - a new slick
printed publication which you might do well in subscribing
to. It's all about satellite technology and the premiere
issue features a story called "DBS: It's Here!" by B.W.
Battin. DBS stands for Direct Broadcast Satellite. It's
kind of like having cable without the cable. The reception
is immaculate and you can receive all of the audio on a
satellite dish only 18 inches wide. Oh...and this 18-inch
satellite is stationary....so you could say, STICK IT ON THE
ROOF OF A CAR! Wanna hear Howard Stern but he's not in your
market? No problem! You'll buy a subscription to a services
provider and you'll have plenty of choices of radio
formats...like about 150 channels! DBA became available in
5 cities this past June (Albuquerque, NM, Jackson, MS,
Shreveport, LA, Little Rock, AK and Tulsa, OK) DBA will be
available nationwide this fall. By 1995, it will be available
in Canada. Installation costs about $700 for the equipment
and another $200 bucks to actually hook it up. Those prices
will obviously come down as consumers and demand discover the
product. DBA has the potential of changing the landscape of
commercial broadcasting in the same way cable and satellite
relegated the traditional 3 major networks (ABC, NBC, CBS) to
just three more players vying equally for the viewership,
ratings and profits.

Two pieces of advice: keep your eyes on the progress of
DBS and consider getting a subscription to "Satellite Times
(tm)" It's 19.95 in the U.S. and $26.00 in Canada. Their
phone: (704) 837-9200. Their fax: (704) 837-2216. Their
BBS: (704) 837-9200 M-F, 6:30pm - 8:30am, 24 hours on the

weekend.

Corey Deitz
